Diana: We have realized that the files that Bob Benson sent you on January 25th for potential use by the SAB panel, could benefit from some clean-up if we are going to publically post the data, and so we are taking the time to do that. We will also include a key so that symbols are explained, thus making the files more user friendly since this is a public posting. Previous emails from Bob (1/24 or earlier) with Marysville cohort data files have some personally identifiable information in them so you would not want to post those.

In the end when we send you the cleaned up files, likely today, you can delete the earlier files so that nothing gets mixed up.
