Brooks,
I have filled out our standard permit form for the work. See if that will work okay for you. It is what ODOT uses for written permission to work within the right of way. If it looks good, please sign as applicant and return to me for recording, then you are good to go. If you don't have a scanner or fax available to return the signed form I can have one of the local maintenance crew pick it up from you.
Have a good afternoon.

John-
Thanks again for being so supportive of this effort. Attached is the sample access agreement we use with private residents. If you prefer to use a permit instrument I'm sure that would be fine. You might want to just look at the key elements of this agreement to make sure your permit is compatible.

We plan to start drilling tomorrow first thing in the morning.

Thanks!
