Subject: Status update on EPA Vapor Response as of 2pm Sunday
Date: Sunday, May 24, 2015 2:23:00 PM

Hi Peggy-
I left you voice messages on your home and cell phones but Judy said you monitor your email as well so thought I'd use all my avenues to reach you.

I wanted to let you know that we do have some preliminary findings from our air monitoring activities that have helped us develop a more robust air sampling strategy as well as some thinking about sampling groundwater. The initial results also suggest that there may be some short term actions that would be beneficial.

Please contact me on my cell at your earliest convenience and I'll bring you up to speed. 206-379-2996.

Thanks!
