Meredith:

Given our concern on ftp site, if possible, please provide us with a CD or thumb drive.

Thanks,

Kim Hoang PhD, MPH

Hi Kim –

Margaret has compiled data on the PRP sites. Right now, it is all sitting on an FTP site. When we met, I know that Kathy expressed concern about using an ftp site to transfer information/records. Would you prefer that we move all of this to a CD and carry the CD over to your office?

On that note, what we have available is some inherited documents from OCWD, and tabulated data from some of the PRP sites into 2014 (don't have all data for 2014 yet – it wasn't on GeoTracker the last time we checked). We haven't yet moved all of the data into database format.

Please let me know your preferred method for providing this information to you.

Thanks.

Meredith

Meredith:

Thanks very much for sending this summary table.

Hi Kim –

I apologize for the delay in responding to your request. Attached is a summary table which Kennedy/Jenks had developed to keep track of the multiple PRP sites in the Orange County "North Basin" area. This table was displayed on the projected computer screen during our meeting in EPA offices in late January. Our most recent use of the table was to provide a site/source area summary for INTERA. INTERA has been retained by OCWD to develop a groundwater fate and transport model for the North Basin area that will be used to assist in the Feasibility Study evaluations.

We are also preparing a compilation of monitoring data from the source sites which we will transmit to you shortly.

If you have any questions on this information, please contact me at (415) 243-2534 or Dave Mark at (714) 378-3337.
