---

Hi Will,

As promised, I have attached our responses to USACE's and CDM's comments to the Metal Bank Sheetpile Repair Work Plan (RTC Letter 2015 073115). The responses in the letter reflect the discussions we had on our conference call last month. In addition, we are including two files (DeepEX Stage Graphs.pdf, and METAL BANK CALCULATIONS.PDF) containing the results of the supplemental modeling runs requested by USACE. These calculations confirm that the proposed repairs will stabilize the sheetpile. We have also included an updated version of the technical drawings and specifications, reflecting the changes we made in response to some of the comments we received (Attachment B – Drawings and Specifications.pdf).

Should you have any questions or concerns, don't hesitate to contact us. We plan to move forward with the solicitation of bids in the near future.

Regards,

Nicholas Steenhaut, PE
