Yahoo!

Thanks!

Of course this means I have to get the work done and I'll be up all night typing my little fingertips down to the quick, but at least now I'll make my deadline.

Bye for now and Thanks again.

Subject: TO 122: Reviewer Individual Comments

Hi Dan,

Please find attached the individual reviewers' comments submitted for the Sulfolane Toxicity Study review (task 122). We are compiling the comments by reviewer into a report and should be able to provide you that by Thursday this week.

Let me know if you have any questions.

Regards,
Laurie

Hi:

I've just been tracking information on their website...no particular point of contact. I suppose we could write and ask when each study was anticipated to be completed, but they probably wouldn't let us see them before the release to REACH.

Bye for now

Dan

Do you have a point of contact at Novasol that we can follow up with later to check on their progress?

Hi:

Novasol bought the European producer (Evonik Degussa Stanlow Ltd.) which closed it's plant in the UK and exited the market. Novasol says it will be ready by the 2013 deadline for having the regulatory requirements met, but no further information is available yet.

Bye for now

ugh... all I could find. I guess the enthusiastic thank you and explanation about how important this was to Steve was a verbal discussion between me and him.

Teresa (or just one of you, not all), please email and get a quick quote from him and other beneficiaries you may know on the importance (outcome) of this provisional. Explain that this helps us stay viable and growing to develop PPRTVs and provide support like this to him and others.

Then, insert quotes on presentation.

Thanks!

Thanks Mike ...
I enjoyed talking with you too.

Thanks for your help ...
we will keep in touch as the site characterization and remediation at the Flint Hills Refinery site continues.

Hi:

I just got the peer-review comments back yesterday. It will take me a week or so (with all my other responsibilities) to incorporate the comments and corrections. We expect that we'll have a final draft by September 30th...so stay tuned.

Thanks again for your interest.

Subject: checking in...

Good morning Dan,

Just checking in to see if EPA has any new published information on sulfolane.

Thanks again,

Rick vk

Hi:

We are awaiting the external peer-review of the document, which according to the contract must be completed this month. I will then incorporate comments from the peer-reviewers, and prepared the final draft. We are expecting that the document will be finalized before the end of our fiscal year on September 30th. It will be posted on-line when complete. If you would like to be notified of any substantive changes between now and the end of September let me know.

Subject: latest info?...

Good morning Dr. Petersen,

You sent me the preliminary reviewed report, many weeks ago, with a detail profile describing sulfolane and its potential health effects.

I recall the final, peer-reviewed report was forthcoming. Is it nearing completion and/or is there anything considered appropriate for publication?

Thank you, sir!
