Hi Heather. Your additions and edits to the notes were just what I needed. I think you just proved the point that it's next to impossible to take detailed meeting notes while actively participating. Thank you very much.

I had planned already on circulating the notes to everyone who attended, and will take your suggestion to get their input on attribution, and whether to post these on the DNR website.

Re: Draft Meeting Notes: Feb. 20 Agency-Only Meeting

Hi John - Overall I think you did a great job capturing the gist of the discussion. I made a few suggested edits based on my personal notes.
Because a few weeks have passed since we met, I've done my best to recall specifics where my notes were general. So in the few cases where our notes differ, please feel free to make a judgment call - or call me at (907) 586-7122 if you wish to discuss. With respect to your question regarding using names, I think each individual's comfort level with that approach will likely depend on how the notes are intended to be used or distributed. If you retain names, I suggest you allow all the participants to review and comment on those portions of the discussion that are attributed to them. You

might also want to consider soliciting group input on whether we should request DNR post these notes on the TWG website. What do you think about having the Steering Committee review and discuss these notes at its March meeting? Thanks, again, for organizing this meeting. I found it to be quite productive. HB

That will be fine. Have a nice week away from the office.

Heather, thanks for jumping in.

Re: Draft Meeting Notes:

Feb. 20

Agency-Only Meeting

John,
Hi. I am getting ready to leave for the week. So I haven't had
the
time to really look at these I will not have access to E-mail. I
am
passing them onto Heather so she can review and give you comments
if she

thinks appropriate.

Jeanne

Hell Jeanne and Tom.

Before I circulate these draft meeting notes to the wider

audience,
would you take a look please and see if I captured the
comments from
everyone? In particular, please look at the Wrap Up to see
if I've
fairly characterized the problems and possible solutions.
Also, do

you

feel it's appropriate to use people's names along with each
comment?

I

could re-do this to drop the individual's names.

(See attached file: Meeting Notes.doc)

The Feb 20 meeting summary should be discussed at the March
26

Steering

Committee, so we can comfortably say that the agencies as a
group

agree

these are the problems we see, and the solutions we
recommend.

Thanks.
