We will have the majority of our data available monday. I will forward the lab data at that time.

Hello,

Thank you, Devlin.
Gregg- if you have any preliminary data you can share, that would be great. Devlin explained to me that you have been collecting a lot of samples from all the classrooms, and we are anxious to understand the state of PCBs in the school.

Thank you,

Michelle Mullin

Michelle,

Here is the report that you request. We currently have Gregg from PBS assisting with the environmental concerns at Sky Valley Education Center. I have included him in the email if you have any additional questions. As for the PCB analysis, Gregg has not completed his analysis of that data so I am not sure he has anything to provide yet as he is still testing.

We are currently in the process of removing all ballasts from Sky Valley Education Center. Pleas let me know if there is anything else or questions I can answer.

Devlin

Thanks!

If you could send me the following on Monday, that would be great:

1. Contact information for the consultant
2. Report showing analysis for PCBs from initial assessment
3. Any subsequent data or report showing PCB analysis
4. Status of Fluorescent Light Ballast removal

I'll follow up with my email about cleanup methods.

Take care,

Michelle Mullin
