MDNR / EPA WL/B

2:00 PM

Friday 8 - strong storms; pot tornado in Earth City
power was off
- landfill has a generator which kicked for operation for leachate coll. sys. & sump pumps
- no wknd work
- RCP removal last one being removed this morning (6th
- good weather today
- ~~RCP~~ next phase - perimeter work - digging into tow drains, slope grading, lastly applying plastic
- w/ RCP ~~work~~ work concluding, will be phasing ~~today~~ back &

* - find out if any assessment work has been done on WL since Friday's storms
- still req. Republic to continue w/ workplan for interceptor wells, and break line
- WP will be in to MDNR in about 3 weeks
- looking for ↑ CO & temp on north end of interceptor wells
- leachate is being sampled
* - concern w/ stepping out on fencing
- concern w/ total radium in low to mid-20s

interceptor line went on 4/8
* ~~Call~~ Call w/ ORD & Chris Nagel
* Lanhart - reaching out - give you 6/20 & 21st

- ASPECT report released 5/29
- On that same day, EPA held briefings for both the press and federal congressionals.
- Upcoming public mtg @ Pattonville HS on 6/25 6:30-8:30 which will cover 2nd round of gh2O results & ASPECT rpt
- PRPs have not released gh2O results - although it is my understanding that they have received them. We anticipate that we will receive data mid June
