Sediment Samples – Check Mapping (FT) – Check
– what data we have or do not have
LPRPs

Sediment – 1, 2 4, – Have PRPs & EPA split

→ 2 newer sediments (may be in a cavity in this matter report)

* Next steps for sampling →
– Gamma walk over survey (per Tom)
– Consider how stormwater (moves through this area – especially with regards to recent NCC work
– Then consider "a number" of plans to take them.
– Exactly the fever doesn't make sense until we know if there is more than – then we can bias sample locations based on gamma walk over
