Subject: question on QA plan
Date: 02/08/2012 10:52 AM

I need to ask about how NMED plans to use the model. I have the goals you already sent, but the use is a little different and the level of data quality I specify in the QA plan depends on the use. For example, on another model I did for Louisiana DEQ last year, they described their use as follows: (This model is developed for internal use and results will be used only for internal decision-making for directing corrective actions (final remedies) at Ethyl and Formosa. There is no current or anticipated litigation.) Would you mind writing down a few sentences on NMED's use and sending them over.

Thanks.
Scott
