Hi Will,

I'm still planning to travel to Albuquerque Wednesday May 16th as we discussed earlier. When we meet, I would like to go over the project steps, conceptual model, computer model setup, data sources, data needs, and what I've done on the modeling so far. I need to bring my laptop. Do you have a projector I can use?

I would also like to visit an exposure (like a road cut) of the Santa Fe formation, and drive around the affected area.
