I assume so also, but our press officer who made the calls is gone for the day; I have an email in to him to confirm and will let you know if he gets back to me from his bus.

Gotcha. Thanks Chris. I guess it's safe to assume Jim O'Neil from the Record?

No, we are not issuing a press release, but we did make calls to selected reporters to let them know about the results.

Subject: lyndhurst/north arlington soil sampling results

Hi all – as you know, EPA recently sampled surface soils along the passaic river, in riverside county park in lyndhurst and in nearby ballfields in north arlington, that were flooded by sandy.

As in previous similar sampling events in that area, we did find dioxin, pcb's and mercury, but at concentrations well below levels of concern.

A fact sheet and the full sampling results report are now posted at:

http://www.epa.gov/region02/superfund/npl/diamondalkali/relateddocs.htm

Please let me know if you have any questions – Thanks.
