I just wanted to confirm that you are not expecting a modeling presentation from EPA at the November meeting? I got that impression from various conversations swirling around me, but wanted to make sure.

We would certainly be better prepared to do such a presentation at a future CAG meeting.

Hi Debbie. I have conferred with the technical team and I can assure you that the CPG has a lot of new information to share with the CAG. As of our last presentation, we had not yet completed any modeling runs. We have now completed several and can elaborate on those results. In addition, there is new sampling information available for areas above and below RM 8. The only question is whether all the upriver data will be through quality control by the 14th. If not, the folks at the EPA would need to determine whether it could be shared with the CAG. Any further questions please let me know. Thanks.

Ray

So, will there be any new information from the last presentation? It seems that CPG has been saying that it has been doing this sampling and modeling for a while, but we have not seen any results. If there is nothing new, then it probably makes sense to wait.

Ok, just to confirm, you do not have any sampling results yet from above the 8-mile study area. Thanks, Debbie

Ray

My notes indicate that the CPG was undertaken additional sampling upriver as well as some modeling work. We would appreciate an update on that. Thanks, Debbie

Last we chatted with the CPG, you guys were doing your own modeling work to refine your proposal. Can you please provide an update of the status of your work and what timing makes sense for the CPG to present an update of its work at a CAG meeting.
