2/24/14

Peabody relief - Review of N.Z. document
Establish complaint hot-line, 24 hr, match complaints to weather data, some kind of RER
Do they have dust management plan?
Are they still operating weather station?
Peabody unknowns
- met station?
- extent they Δ ops based on weather
- handling of overburden
- dust plan?
- GPS on dust suppression equip?
- covered transfer & loading?
- sprays around stockpiles?
- vegetate unshaped overburden?
→ Talk to Kurt too about blasting techniques

Peabody Meeting 2/24/14 10Am
Jesse w/ Clerk w/ HQ in previous
→ give them questions
- see above
- ask them if they have filters portions left from analysis they did
called "destructive abnal. - for purpose of mass speciation
Jesse's assessment of their Jan letter - data qual. is good but conclusion is insane
They did "visible speciation" not mass, so we can't use that i.e. useless

Peabody Meeting 5/7/14 → look at NSPS Coal prep
→ Look @ IN SIP to see if fug. dust measurement prov. are there
Jesse emailed HQ on the 1 hr vs 24 hr thing
Kahi will write letter
