---

Susan and Pat,
I received some information from the proposed facility today. They sent along two papers (attached) and an article from a trade magazine. They also sent along a copy of the process flow diagram. Since it is confidential, I will send it via fax. The consultant has contacted me and I sent him information about the engine rule (Quad Z) and the new definition of solid waste (published this week), along with links to the EPA engine page and combustion/incineration pages. He is still in the process of trying to get a handle on the federal requirements and the process. I will let you know when/if they want a call to discuss possible applicability issues.
