FOLLOW-UP CALL REGARDING DRAFT WASTEWATER PERMIT FOR LOUISIANA OFFSHORE OIL PORT (LOOP): EPA, the Louisiana Department of Environmental Quality (LDEQ), and LOOP met on September 5, 2017, to discuss permit conditions for LOOP's Outfall 004, brine discharges. LOOP explained their position on the issues and discussed some additional information which they believe supports a case-by-case permitting approach regarding whole effluent toxicity (WET) biomonitoring . EPA will internally summarize and discuss the information that LOOP presented. A follow-up call is planned for next week to request specific additional information from LOOP to support a case-by-case permitting approach. **Silvia Bogdan 665-2749, Isaac Chen 665-7364, Kay Schwab 665-6635.**

MEETING REGARDING DRAFT WASTEWATER PERMIT FOR LOUISIANA OFFSHORE OIL PORT (LOOP): EPA, the Louisiana Department of Environmental Quality (LDEQ), and LOOP will be meeting on September 5th to discuss permit conditions for LOOP. Specifically, whole effluent toxicity (WET) requirements at Outfall 004, which discharges brine from the Brine Storage Reservoir into an impaired waterbody will be discussed. This deepwater port receives and temporarily stores significant amounts of crude oil. **Silvia Bogdan 665-2749, Isaac Chen 665-7364, Kay Schwab 665-6635.**
