Importance: Normal
Subject: Fw: EPA R3 IMT Environmental Unit-- Technical Call on Charleston WV Chemical Leak
Start Date/Time: Sun 1/12/2014 1:00:00 PM
End Date/Time: Sun 1/12/2014 2:00:00 PM

Josie--In case I forget--can you make sure the RRC and phone line is reserved from 8-10 everyday for a month? TKS!!

Hello Group,

Hope you are well. The purpose of this call is to coordinate among EPA groups who are providing support or services or who are ready to provide them for the response above. As you know there are a lot of questions about cleanup numbers, safe numbers, flushing methodologies, timelines, laboratories and methodologies for analysis, sampling plans for water, drinking water. THIS WORKING MEETING IS ONLY INTENDED FOR THOSE PROVIDING OR NEEDING AN EPA SERVICE NOT FOR GENERAL OPERATIONS OR OTHER, PLEASE SHARE ACCORDINGLY.

Our focus is to:
1. Determine was services have already been requested of EPA and by who.
2. Determine what services EPA is ready to provide on this chemical, for who, and by who.
3. Discuss what other needs may be out there (not all of us may have heard of so please share)
4. Develop one clear EPA message on numbers and safety of the water.

Meeting is scheduled at 8am for the next 30 days—we will adjust according to what the group deems necessary.
My goal is to have enough information available from this meeting to provide a clear all inclusive technical strategy (even if it is general) on behalf of EPA by Monday AM.
We will have a separate call for overall operations and progress (OPS Brief) by 0900 Monday 1/13 where this strategy can be presented in a unified manner.

Agenda: OSC JACK KELLY has agreed to be our Environmental Unit Lead, I've fallen into planning so I'll facilitate the set up.
Introductions
Report outs (Please address each points under focus above)
Agree on a communication structure for those groups providing a service (meeting daily for now?)
Review Tasks and Responsibilities for follow up
Questions and Additional needs

Food for thought:
Scientists cobble together ad-hoc water limit
