Joe,

Per our discussion this morning, please see link below for WVA water order and air notice.

Also, you mentioned you spoke with Michelle Price Fey in R3. It is my understanding she is in Program office.

You may also want to talk with Suzanne Parent ORC (CWA 311), and Steve Field , ORC (SDWA,CWA 301) **Ex. 5 - Deliberative**

Bruce

FYI:
There are some press releases on the WV DEP website that provide interesting info.
Second link is to an order issued on Sat. pursuant to state laws.

Hi Anne,

We had a brief call with R3 and DOJ. Give me a call if you want the quick update (assuming you haven't talked to Bruce).

Hi Manuel:
I think I am being roped in as a "removal" person and I'm happy to followup with Region 3. I thought I'd check with you first, though, to see if you've heard anything and whether you'd prefer to lead on this as Region 3 liaison. Just let me know.
Thanks,
Anne

Subject: HOTSITE REPORT: Freedom Industries, Charleston, WV

This afternoon there was a chemical spill from Freedom Industries, which is the old Pennzoil Refinery. The spilled chemical was methylcyclohexane, which is used in coal preparation and processing. Spill into the ELK River occurred sometime earlier in the day and there was an early report of an odor. The Gov of WV declared a state of emergency for at least five counties. The Kanawha Valley Water Treatment Plant detected the chemical even after the increased carbon treatment effort.

WV issued an order to not drink cook or bathe in the water, which affects approximately 100,000 people. WV is conducting additional water sampling. The Civil Support Team is also deployed to the WVEOC to assist in supplying water to residents. The WV EOC is operational but have not requested EPA assistance. OSC Dennis Matlock has contacted WV DEP Mike Dorsey and offered EPA assistance.
