Subject: Weekly Update

Administrator et al. – Here are three quick items:

Ex. 5 - Deliberative

2) WV Spill – Freedom Industries - Region III proposes to discontinue maintaining a daily on-site presence at the Freedom Industries facility in Charleston, West Virginia. The current operations at the site

are routine and consist of pumping and controlling of water, along with maintenance of boom in the river, following plans prepared by the company that have been reviewed by the State and the EPA. West Virginia Department of Environmental Protection (WVDEP) water and waste enforcement staff now are at the Freedom facility overseeing operations from 8am to 8pm daily. If conditions change, or if WVDEP needs federal on-site assistance, two Region III On Scene Coordinators (OSCs) who live in the Wheeling Area would be able respond within 3 hours. These OSCs are also available by phone and email to provide any guidance that WVDEP may request. EPA's START contractors can be redeployed as EPA requires. I am coordinating with HQ before we do anything, but hope to make a decision in the next day or two.

Ex. 5 - Deliberative

Let me know if you have any questions.

Thank you - Shawn
