David,

I am off today, but did give Patti-Kay a call. I know next to nothing about this contaminant, and some quick searches yielded little useful information. I'll dig through my resources and see if I can find anything that would be helpful. If I do, I'll pass it on to Patti-Kay. I'll also have my Blackberry with me, and Patti-Kay has my number.

Steve

Steve, are you in today? Is this something you can assist with, or do you have another recommendation?

Perhaps you have already heard about the spill of 4-methylcyclohexanemethanol and impacts to over 100,000 customers of WV American Water. State of emergency declaration by Governor and President Obama.

We have information from ATSDR and CDC, but very limited. Recommendations at this point are Do not use, and flush until no odor detected. American is continuing to test the raw and finished water.

I could use a contact for treatment information.

This message is very short due to my other ongoing efforts to investigate situation. We will share more later.

Patti Kay
