"Alice laughed. `There's no use trying,' she said `one can't believe impossible things.'

`I daresay you haven't had much practice,' said the Queen. `When I was your age, I always did it for half-an-hour a day. Why, sometimes I've believed as many as six impossible things before breakfast."

Subject: Florida's TSD

Per today's discussion I'm sending out materials that I promised to send to you. In this email I'm sending the Florida TSD as a separate email because its a large file.

I took a look at the fish consumption rate calculation for the general public and it is in fact based on landings. I also noted a discussion in the TSD on how they approached the consumption rate for recreational anglers... very very interesting....Looking forward to finding out what EPA HQ thinks of this.
