Subject: EPA INFORMATION COLLECTION REQUEST

To Whom It May Concern:

We are in receipt of the above referenced information request for the following facilities:

1) Gaines Operating, LLC, Facility #1249250;

2) Fossil Energy, Inc., Facility #1240000;

3) Fitzgerald Production Co., Facility #123400;

4) R. L. Davis, Facility #1536650;

5) Caddo Pine Island Oil & Hist. Soc., Facility #1103350

We are herein requesting an extension until March 1, 2017, to complete Part 1 of the survey and an extension until July 1, 2017 to complete Part 2 of the survey. We are requesting these extensions due to the volume of information requested and the Ex. 4 - CBI complete the survey. Our industry has experience difficult financial times over the last two years Ex. 4 - CBI Ex. 4 - CBI The information requested, and in particular, the Longitude and Latitude of each well and facility is not information we have on file and will require onsite surveys to collect this information. In addition we have yearend obligations regarding our IRS requirements and forms due and simply do not have Ex. 4 - CBI to meet the pending deadline for completing the EPA survey.

Your help and cooperation in granting these extensions will be greatly appreciated.

Subject: Oil and Gas Information Collection Request

Good afternoon,

Zanetis Oil Company, LLC received the ICR from the United States Environmental Protection agency in the first week of December, 2016. At this time we would like to ask for a 60 day extension for all parts included. It is the company's intention to comply with all information requested, Ex. 4 - CBI Ex. 4 - CBI We are also still in the process of acquiring well files and information on properties purchased in mid to late 2016. The 60 day extension would allow us the time to gather the needed information to complete the ICR. If there is anything further we can provide, please contact us via email.

Subject: ICR Deadline Extension Request Marathon Oil Corporation

Brenda,

The purpose of this email is to request an additional ninety-day extension to submit the Part 2 Information Collection Request (ICR) response for Marathon Oil Corporation (Marathon). Marathon appreciates the agency's need to gather this information and wants to ensure that the data is as accurate as possible. Unfortunately, the Part 2 data gathering will occur simultaneously with our annual criteria pollutant and greenhouse gas emission inventory reporting as well as with implementation of NSPS OOOOa LDAR requirements. We received our first letter ICR Section 114 letter on December 5, 2016; therefore, Marathon respectfully requests an extension to July 5, 2017 to submit its Part 2 response. By granting this extension, EPA will be giving our company much-needed additional time to respond to the ICR. Please be advised that we intend to submit our Part 1 response by its due date.

Subject: From True Oil LLC - Oil And Gas ICR

Jeff/Brenda,

True Oil LLC has received the certified letters from the EPA requesting completion of Part 1 and Part 2 of the ICR for their crude and natural gas extraction facilities and gathering and boosting facilities. True Oil LLC has begun this process to satisfy the EPA's requirements. However, due to multiple other regulatory reporting requirements, True Oil LLC would like to request a 60 day extension in order to complete Part 1 of the ICR. The first few months of every year are extremely busy for True Oil LLC with the various reporting requirements for GHG, Quad Oa and several layers of individual state reports required by the states that True Oil has operations in.

True Oil respectively appreciates your consideration for the extension. If you require additional information please let me know.

Thank you.

Subject: ICR Extension

Ms. Shine,

I'm with El Ran, Inc. an Oil and Gas operator/producer out of Lubbock, Texas and we were trying to get approval on a 30 day extension for part 1 of the ICR. This extension we feel would give us time to gather all the necessary information. I look forward to your response.

Thanks,

Good afternoon,

Zanetis Oil Company, LLC received the ICR from the United States Environmental Protection agency in the first week of December, 2016. At this time we would like to ask for a 60 day extension for all parts included. It is the company's intention to comply with all information requested, but Ex. 4 - CBI Ex. 4 - CBI We are also still in the process of acquiring well files and information on properties purchased in mid to late 2016. The 60 day extension would allow us the time to gather the needed information to complete the ICR. If there is anything further we can provide, please contact us via email.

Subject: Request for Extension: November 14, 2016 Information Collection Request (ICR) for Facility ID: 1783450
Importance: High

Dear Mr. Tsirigotis and Ms. Shine:

Four Corners Petroleum, LLC ("FCP") is in receipt of an Information Collection Request letter, EPA ICR No. 2548.01 for Facility ID: 1783450, from the U.S. EPA Office of Air Quality Planning and Standards dated November 14, 2016 (the "ICR"). While the ICR is dated November 14, 2016, it was not received by FCP until December 12, 2016 (see attached USPS tracking information). This letter is to request a sixty (60) day extension of FCP's deadline to respond to both Part 1 and Part 2 of the ICR survey request.

FCP requests this extension due to the fact that the ICR was not received until December 12th, and FCP's offices were not open for a portion of the months of December and January due to the national holidays. In addition, in December and January FCP staff are busy with end of year regulatory and internal reporting obligations. Further, as EPA is aware, this request is unprecedented in nature both in terms of its breadth and depth of detail.

This extension is necessary for FCP to fully evaluate the data requested in the ICR and to conduct the detailed reviews necessary to provide information on the requested facilities. Much of the requested information will require detailed site-by-site calculations that cannot and should not be rushed to complete within the currently allotted timeframe. By granting this extension

and allowing 120 days to respond to Part I and 240 days to respond to Part II (both commencing on December 12, 2016), EPA will be giving FCP much-needed time to provide accurate and complete responses to the ICR. Thank you for your consideration of this request.

See attachment for tracking information showing delivery date of 12/12/2016. A hard copy has also been mailed to your office.

Sincerely,

Ex. 6 - Personal Privacy

Good Morning Ms. Shine,

I hope everything is going well for you in North Carolina. I would imagine that you have been busy answering questions regarding the EPA Oil and Gas ICR.

BRG Lone Star (BRG) received our ICR letter on December 8, 2016, which we believe

started our 60 day time clock to submit Part One of the survey. This would make our effective due date February 6, 2017.

Ex. 4 - CBI BRG employees wear multiple hats often times juggling many tasks, this combined with the timing of the letter (around the Holidays), it has been challenging to focus on the survey while maintaining the day-to-day operations.

BRG respectfully requests a 30 day extension to submit Part One of the survey, extending our deadline to March 8, 2017. The additional time would allow us to ensure the accuracy of the data submitted.

We appreciate your consideration in this matter.

Thanks,

Ex. 6 - Personal Privacy

Gentlemen:

My Company hereby requests an extension of time in order to submit the requested data per your letter dated November 14, 2016. With the delivery of the letter during the holiday season, Ex. 4 - CBI Ex. 4 - CBI and recent weather that caused office closure, we most likely will not have time to comply with your 60 day deadline. As I am sure you have heard from other Operators, we have a very heavy workload in the month of December as we process year end data for many partners and contractors.

I have contracted with a third party to put this information package together and they assure me they are close to having all of the necessary information gathered and are in the process of putting in the correct form for submittal.

Thanking you in advance for your consideration.

ICR Help Desk,

Thank you for your prompt response to our request. In response to your discussion below, CRC would like to formally request a 60-day extension for the ICR Part 1 and a 90-day extension for the ICR Part 2.

Please note that we received another notification (Facility ID 3001290) on Jan 06, 2017. To facilitate data submission, CRC would prefer the extensions be from the date of the final letter received, in this case January 06, 2017. However, as of today, expected due dates are:

ICR	Receipt Date	Due Date	Extension Due Date	Facility ID
Part 1	Dec 12, 2017	Feb 10, 2017	Apr 11, 2017	*1786350*
Part 2 (Prod/G&B)	Dec 12, 2017	Jun 10, 2017	Sep 08, 2017	*2116000*
Part 2 (Proc)	Jan 06, 2017	Jul 05, 2017	Oct 03, 2017	*3001290*

For any future notifications and/or additional correspondence, please use the following address:

California Resources Corporation
Ex. 6 - Personal Privacy
Bakersfield, CA 93311

If you have questions or additional information concerning the ICR process, please contact myself or Ex. 6 - Personal Privacy @crc.com. Your assistance and guidance is appreciated.

(Note: Attached is a Word document containing this correspondence in the event this email cannot be read.)

Subject: Oil and Gas ICR Request
Importance: High

ICR Help Desk,

California Resources Corporation (CRC) has received several Information Collection Request (ICR) notifications for our oil and gas operations in California. To date, CRC has received nine (9) separate ICR notifications covering all aspects of the ICR Part 1 and 2.

CRC maintains Ex. 4 - CBI
The ICR request is far beyond routine data collection typically associated with either air quality or GHG reporting activities. Furthermore, the data requested is in a format not conducive to traditional data collection activities.

As you are aware, preparations are currently underway to generate the annual GHG report due to your offices in March. Additionally, in California, there is State GHG reporting due in June. Ex. 4 - CBI

Ex. 4 - CBI

Ex. 4 - CBI

Our goal is to provide your office with the most accurate data possible. However, considering the breadth of the ICR, CRC believes the timeframe provided is not sufficient to accurately complete the data request. Therefore, we respectively request a 60-day extension of the Part 1 and Part 2 requests. We feel this extension is necessary to properly address the data requests.

Please contact me if you questions or comments concerning this issue.

Re: Request to Extend ICR Reporting Due Dates
Southwestern Energy Part 1 Surveys
Southwestern Energy Part 2 Surveys

Dear Mr. Tsirigotis:

Southwestern Energy is submitting this letter to request an extension to the reporting timeline for the "Information Collection Effort for Oil and Gas Facilities" ("ICR") Section 114 letters that we recently received. We understand the importance of the information requested in the ICR and support the agencies collection of the ICR data. However, we believe that additional time is warranted to assure that we can properly collect and verify the information prior to submittal to the EPA.

Southwestern Energy is one of the largest producers of natural gas in the lower 48 states. We own/operate Ex. 4 - CBI Ex. 4 - CBI Each of these wells is subject to the ICR Part 1 survey. We are subject to the ICR Part 2 survey for Ex. 4 - CBI well sites. We also are subject to the ICR Part 2 survey for one of the gathering system pipelines that our production company operates (as determined by the Random Tool Generator).

Southwestern Energy also operates gas gathering and booster stations in Ex. 4 - CBI under our midstream operations. We are subject to the ICR Part 2 survey for 6 of our gathering and booster stations.

We received the Section 114 letters by certified mail for both our Production and Midstream (Gathering and Boosting) operations on December 10, 2014. Based on the prescribed 60-day timeline for the Part 1 surveys, the submittal date would be February 8, 2017. Based on the prescribed 180-day timeline for the Part 2 surveys, the submittal date would be May 8, 2017.

Southwestern Energy is respectfully requesting a June 30, 2017 submittal date for both our ICR Part 1 surveys (Production) and Part 2 surveys (Production, Gathering and Booster Pipelines, Gathering and Booster Stations). Our request is based on multiple issues, with some of the key issues outlined below:

- Southwestern Energy will need to complete the Part 1survey for Ex. 4 - CBI Although the Part 1 survey is limited in scope/detail, it still requires significant internal systems, communications and resources to compile the requested data. As an example, the Part 1 survey will require input from our Production Analyst, Engineering, Operations, and Environmental staff. Then the data will need to be aggregated and manually entered into the Part 1 survey sheet provided by the EPA as we will need to select the proper "drop down" selections in many of the data fields on a well by well basis. We simply do not see 60-days (including holidays and vacation) as adequate time to complete this task.

- Southwestern Energy will need to complete the Part 2 survey for Ex. 4 - CBI 1 of our gathering and booster line "counties", and [redacted] of our gathering and booster facilities. Although not nearly as many "facilities" are subject to the Part 2 survey as the Part 1 survey, the data elements including items such as component counts, measurements, sampling, and detail design data are much more extensive. Similar to the Part 1 survey, the Part 2 survey will require significant internal systems, communications, and resources to compile the requested data. In addition, we will need to engage with external parties (e.g. engine lease companies, equipment manufacturers) to obtain requested data. As with the Part 1 survey, the Part 2 survey will need to be aggregated and manually entered into the Part 2 survey sheet provided by EPA as we will need to select the proper "drop down" selections in many of the data fields on a well by well basis. The Part 2 survey will then need to be electronically uploaded via EPA eGGRT.

- In addition to the data acquisition, compilation, and report aggregation tasks, Southwestern Energy also needs time to review and validate that the information is correct for both the Part 1 and Part 2 surveys before submittal to the EPA. We recognize that this data needs to be as correct as possible for the agencies intended use.

- We acknowledge that the EPA communicated frequently throughout the ICR process. However, there were many changes that occurred to the Part 1 survey and Part 2 survey through their final issuance. These changes, although generally beneficial, still require us to review and confirm interpretations, and possibly establish protocols (e.g. sampling and measurement) before we can provide internal guidance as to the final data that is being requested and how it needs to be obtained.

- The ICR Part 1 and Part 2 surveys appear to be based on "calendar-days" and not "business-days". This has significant impact to our resources (personnel) as the personnel that will be engaged are not assigned to work on weekends. Furthermore, the Section 114 letters were not issued until the busy Thanksgiving-Hanukah-Christmas season when our personnel enjoy holidays off and vacations (further limiting our "effective days" to complete the surveys). Even if the intent is to be based on "business-days", we still see the need for extended timelines.

- The time commitment to complete the Part 1 and Part 2 surveys will have significant impact to our limited resources. In our current commodity priced environment, we have scaled back our

personnel to support our base operations (e.g. production and gathering of natural gas). The resources needed to complete the Part 1 and Part 2 surveys will also need to complete their normally assigned duties during a very busy time of the year. We had commented on the significant resource burdens in our comment letter dated October 28, 2016 (attached).

- Finally, we believe that extending the deadlines (especially for Part 1 surveys) will allow us to check the Part 1 survey information against our 40 CFR Part 98 Subpart W information (report filing March 31, 2017).

In order to provide more accurate information, while allowing our staff to also work on their normally assigned duties, and based on the issues outlined above, we are respectfully request a June 30, 2017 submittal date for Southwestern Energy's Part 1 and Part 2 surveys.

If you have questions, please contact me at Ex. 6 - Personal Privacy @swn.com or Ex. 6 - Personal Privacy.

Sincerely,

Ex. 6 - Personal Privacy

Re: Comments on Proposed Information Collection Request for Oil and Gas Facilities

Dear Docket Clerk:

Southwestern Energy (SWN) appreciates this opportunity to submit comments on the notice of proposed Information Collection Request for Oil and Gas Facilities as posted in the Federal Register on June 3rd and the second draft on September 29th, 2016

SWN is currently the third largest producer of natural gas in the lower 48 United States. We are an independent energy company primarily engaged in natural gas and crude oil exploration, development, and production. We also operate midstream services focused on natural gas gathering and marketing. As an oil and gas sector company, the Information Collection Request and potential future regulations on existing sources will significantly affect our operations.

SWN understands and supports the need for better factual information regarding the oil and gas sector operations as a prelude to considering and or developing regulations for existing sources. We therefore understand and support the Information Collection Request which may provide EPA with better factual information. However, we believe that the Information Collection Request imposes an undue burden on the oil and gas sector in the manner and timing in which it is being implemented.

Part 1 ICR Survey Timelines and Resource Estimates

We recommend that EPA extends a more reasonable reporting timeline for the Part 1 surveys which will allow operators adequate time to compile and report better factual and more accurate data.

The proposed ICR requiring Part 1 surveys to be due within 30-days of request is an unreasonably short response time. In the ICR Supporting Statement, EPA estimates that the Part 1 survey will require approximately 7.76 hours per facility (aka well pad) to complete. Assuming that 7.76 hours is a fair assessment of time to complete each Part 1 survey, the resource impacts to SWN are approximately 19,400 hours for our Production Operations. Furthermore, assuming that SWN (and other companies) are given 30 "business" days to complete the Part 1 survey, and assuming a standard work hour day of 8

hours, which is equivalent to 240 hours. This means in order to meet a 30 day timeline for Part 1 surveys, SWN would need to commit Ex. 4 - CBI to this effort. This represents at least Ex. 4 - CBI Furthermore, if the 30-day period is based on "calendar days" the required personnel increases as our technical employees are not expected to work over weekends. Calendar days would Ex. 4 - CBI adding holidays would increase the employee count again. Furthermore, this segment of our workforce is vital to our operations and could not be dedicated full time to this task to the detriment of their regular responsibilities.

SWN has reviewed the Part 1 survey form and believes that we have the information necessary to complete the significant majority of the draft Part 1 survey. However, that information is not readily available in a singular data base or asset tracking system. Furthermore the Part 1 survey form is pre-populated with "drop down" selections. While we believe the intent of the "drop down" selections was/is to minimize resource impacts, it can actually have an adverse effect due to the manual line by line entry which will be required. With the various SWN personnel needed to locate, aggregate, compile and individually enter the data into the Part 1 survey for approximately 2,500 well pads, we believe the resource impacts could easily be doubled (e.g. 38,000+ hours, 160 full time technical staff, > 20% of our technical workforce).

Part 2 ICR Survey Timelines and Resource Estimates

We recommend that EPA extends a more reasonable reporting timeline for the Part 2 surveys which will allow operators adequate time to compile and report better factual and more accurate data.

The more detailed Part 2 surveys would be due within 120-days of request. EPA has estimated approximately 33 hours per facility to complete the Part 2 survey. Because the "population" or number of "facilities" that will be subject to Part 2 survey is "unknown" it is impractical to conduct a resource estimate similar to the Part 1 survey. However, unlike the Part 1 survey, the Part 2 survey requires a significant amount of information which a company may not have and for which considerable time and expense will be required to obtain. As an example, the Part 2 survey requires a detailed count of "components" (e.g. valves, flanges, connectors, PRVs, etc) as well as categorized by major equipment type (e.g. wellhead, separator, compressor, tanks, etc). In addition, Part 2 requires sampling of liquids at sources which may not be equipped for such sampling. Therefore facility "modifications" may be required to facilitate such sampling. These "modifications" may require engineering review, design and approval. Additional time would be required to make the necessary modifications and obtain the sample. These are a couple of examples of Part 2 survey elements which may significantly impact the resources needed to complete the survey.

As expressed above, SWN supports the acquisition of factual data to assist in the evaluation of impacts from proposed regulation for oil and gas existing sources. We find the ICR in its proposed form to be overly burdensome and the resource assessments and timelines (30-days/120-days) to be unreasonable. We recommend that the agency consider streamlining both the Part 1 and Part 2 surveys and utilize information that is already publically available (e.g. 40 CFR Part 98 Greenhouse Gas Inventory Rule

Reporting). We also recommend that the agency extends the submittal deadlines to at least 180-days for Part 1 surveys and 180-days for Part 2 surveys.

We appreciate the opportunity to provide these comments and would be glad to meet with you to discuss our comments. If you have questions please contact me Doug Jordan at douglas_jordan@swn.com or 832-796-7628 or Roy Hartstein at roy_hartstein@swn.com or 832-796-4875.

Sincerely,

Re: Request for an Extension to Data Submittal for Part 2 of the Information Collection Effort for Oil and Gas Facilities, EPA-HQ-OAR-2016-0204

Dear Mr. Tsirigotis:

Devon Energy Corporation ("Devon") respectfully requests a 120-day extension (for a total response time of 300-days) to provide data in response to the U.S. Environmental Protection Agency's ("EPA's") Part 2 Information Collection Request ("ICR") we received on December 5, 2016.

Upon further review of the Part 2 ICR, the existing one hundred and eighty (180)-day response time does not give Devon sufficient time to obtain complete and accurate data that will provide EPA the specificity it needs. Devon's facilities subject to Part 2 are Ex. 4 - CBI requiring more time to schedule, coordinate and participate in the sample collection effort. Also, the information needed for Part 2 requires the use of a sample collection method that is different than what Devon typically uses requiring more time to analyze the results to ensure they are correct.

In addition, EPA's ICR request comes at a very demanding time. Our staff and resources are significantly limited due to other important reporting deadlines already imposed by EPA and state air agencies for the first quarter of 2017. These existing reporting deadlines include EPA's Part 1 ICR, the annual report for New Source Performance Standards OOOO, the Greenhouse Gas Subpart W report, the EPCRA Tier 2 report, and reporting for numerous state air emission inventories. The same staff responsible for the data collection, assimilation, and reporting for these programs would be responsible to gather the ICR Part 2 data.

Devon appreciates EPA's consideration of our extension request and looks forward to providing meaningful information that will better inform EPA's decision-making process for future rulemakings on this issue.

Sincerely,

Ex. 6 - Personal Privacy

Manager EHS
