Nancy,
Yes, you may use the acrobat version of the presentation material that I sent to NAS.

At this time, I would cite the paper as S.P. Horton, Disposal of Hydrofracking Waste Fluid by Injection into Subsurface Aquifers Triggers Earthquake Swarm in Central Arkansas with Potential for Damaging Earthquake, Seismological Research Letters, in Press (2011).

So at least two of the active wells are within 5 km of the M5.6 main shock location epicenter. I have not plotted the others. Interesting…

Thanks,
steve

Subject: upcoming and NAS publication questions

Hi Steve,

We want to be sure and cite your upcoming publication on the Arkansas quakes. Can you give us sufficient information that folks can find it when it comes out, please?

Also, I wanted to ask if we may include the presentation you and Scott gave at the National Academy of Science meeting, not the power point copy, the final shorter acrobat version sent to NAS after the meeting? This is for the report that we are working on, that you will get a chance to peer review.

Oh, on Oklahoma the website to find the historical injection information is http://imaging.occeweb.com/ If I already had it available, I would have sent it to you.

thanks so much,
Nancy
