MILBANK

February 11, 1998

Mr. Mitchell Smith
Superintendent Waste Water Treatment Plant
1501 W. Markland Ave.
Kokomo, In 46901

Dear Mr. Smith:

On January 15, 1998, we had an exceedance on our zinc level. The reading was 2.370 our maximum per day is 2.100. The only reason that can be found for this high reading was that on that particular day, they were overflowing the rinse tank at too high of a rate.

Those parties involved have been instructed as to the amount of flow from the tank going down the drain.

We have also changed supervisors in that department so as to try to get better monitoring of the system.

Sincerely,

MILBANK MFG. CO., INC.

Richard Tyler
