Subject: TRAFFIC ALERT: 2018 Rolling Thunder Rally

TRAFFIC ALERT: 2018 Rolling Thunder Rally

ARLINGTON, Va. – The Arlington County Police Department and Virginia State Police will close part of Washington Boulevard near the Pentagon on Sunday, May 27, 2018, for the Rolling Thunder motorcycle rally. From 7:00 a.m. to approximately 4:00 p.m., Washington Blvd. (Route 27) will be closed from I-395 to the Memorial Bridge.
In addition, Arlington National Cemetery will only be accessible from southbound George Washington Memorial Parkway or northbound Route 110.
Motorists should expect large numbers of motorcyclists in Northern Virginia and the entire Washington Metropolitan area during the Memorial Day weekend.
For questions or concerns, please contact Lieutenant Steve Meincke at 703-228-4148.

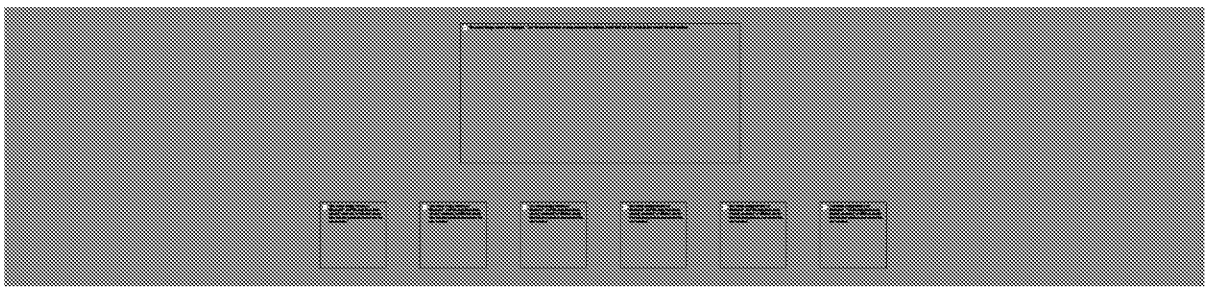
Arlington Va., is a world-class residential, business and tourist location that was originally part of the "10 miles square" parcel of land surveyed in 1791 to be the Nation's Capital. Slightly smaller than 26 square miles, it is the geographically smallest self-governing county in the United States, and one of only a handful with the prized Aaa/AAA/AAA bond rating. Arlington maintains a rich variety of stable neighborhoods and quality schools, and has received numerous awards for Smart Growth and transit-oriented development. Home to some of the most influential organizations in the world — including the Pentagon — Arlington stands out as one of America's preeminent places to live, visit and do business.



This email was sent to Ex. 6 n behalf of Arlington County.

Subject: Message for EPA

To: Beck.Nancy@epa.gov
Morris.Jeff@epa.gov
Corado.Ana@epa.gov
Parsons.Douglas@epa.gov

Ms. Beck, Mr.Morris, Ms.Corado and Mr. Parsons,
Our friend's son, [Ex. 6 Personal Privacy (PP)] (age 31), recently passed away while using a Methylene Chloride based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on Methylene Chloride. (EPA-HQ-OPPT-2016-0231-0001).
Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to toxic chemicals with serious, well-documented health risks.
Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay rule making process. You should finalize the proposed ban on Methylene Chloride.

Please feel free to tweak the above message any way you would feel comfortable. Additional information :
Dr. Nancy Beck heads the toxic chemical Dept. within EPA, she was senior director of The American Chemical Council, the leading chemical lobbying group. prior to this appt.

Methylene Chloride has been phased out by the US Military and banned by the European Union in 2013

The product kills instantly and fills the shelves in home improvement stores paint depts.

Warning labels are inadequate on the products and sales persons unaware of risks as well as protective materials for application.

Thank you for addressing this matter immediately,
Madelyn Graf

Subject: Workshop White Paper
Attachments: DRAFT 2018 Epi Workshop White Paper Do Not Distribute.pdf

Dear all,
Thank you again for taking the time to meet with me. I am now able to share the Draft White Paper related to our Workshop on developing a transparent approach to describing what risk assessors need from environmental epidemiology for decision-making. As this is still in draft form, I am asking that you do not distribute this beyond your group. After our Steering Committee meeting in April, I would be happy to circle back to you to determine your level of interest in this Workshop. In the meantime, please feel free to contact me with any questions.
Regards,
Judy

Subject: Canceled: Monthly DRSG Meeting-CANCELED FOR TODAY 6/5
Location: Adobe Connect: https://epawebconferencing.acms.com/drsg/

Start: 6/5/2018 4:00:00 PM
End: 6/5/2018 5:00:00 PM
Show Time As: Free

Importance: High

Recurrence: Monthly
the first Tuesday of every 1 month(s) from 12:00 PM to 1:00 PM

Hi DRSG,
We are canceling today's meeting. Below are some updates:

- Weihsueh Chiu, DRSG Pres. Submitted public comment to EPA in regards to proposed EPA rule "Strengthening Transparency in Regulatory Science" as member of the public asking that the reference to DRSG be omitted.
- Resha Putzrath and Sara Henry will be representing DRSG at the SRA Program Meeting on June 26th in Dulles, VA- **Thank you Resha and Sara!**
- Phil Yeager (FDA) submitted the following symposia for SRA 2018 annual meeting:
  Symposium: Evaluating Public Health Impacts of Electronic Nicotine Delivery Systems (Yeager and Weil; FDA) SY16-53k83f (This is the overall symposium number)
  Symposium abstract: Electronic nicotine delivery systems (ENDS) are novel tobacco products that generate a nicotine-containing aerosol inhaled by users. ENDS have been referred to as e-cigarettes, e-hookah, vapes, vaping devices, personal vaporizers, box mods, and trade specific names, among others. ENDS contain flavored and non-flavored liquids, and include a range of device products with different designs, properties, and characteristics that the FDA will evaluate as to whether their marketing in the U.S. is appropriate for the protection of public health. FDA's Center for Tobacco Products will evaluate ENDS submitted in tobacco product applications for scientific data to support these regulatory decisions. A component of this evaluation includes assessing the impact of ENDS on human health, for both users and nonusers. ENDS products and aerosols contain ingredients, impurities and constituents as byproducts of use, and all may pose a hazard to human health. As ENDS products are inhaled during use, the evaluation of these products considers the relevant adverse human health endpoints from inhalation exposures, whether these are portal-of-entry or systemic effects. This session will provide a discussion of approaches to evaluate adverse health effects from ENDS exposures as applicable to individuals and the population. Topics include presentations about the regulatory authority the FDA has over ENDS; approaches to evaluating ENDS ingredients, particularly nicotine and flavors, and constituents; human exposures to nicotine from ENDS; and vape shop worker exposure to ENDS emissions.

    - FDA Tobacco Regulations and Considerations for Evaluating Human Health Risks of Electronic Nicotine Delivery Systems (ENDS) (Weil; FDA) 89-687993
    - Evaluating Flavors in Newly Deemed Tobacco Products (Benson; FDA) 88-909247

- Electronic cigarette heterogeneity influences individual and population-level effects (Eissenberg; VCU MCV; Academic) 85-739077
- Evaluation of chemical exposures at three vape shops throughout the United States (Zwack; NIOSH) 87-935636

Phil is requesting $800 from DRSG to cover Dr. Eissenberg's travel costs (would likely need one day registration and flight costs). Approval of the $800 expense is pending discussion by the DRSG officers, which will occur via email.

Subject: These chemicals should have been banned years ago
Reply-To: info@saferchemicals.org

Supporter,

Under Scott Pruitt, the Environmental Protection Agency sought to roll back 76 environmental regulations, including proposed bans on extremely toxic chemicals.

Now he's gone and the new Acting Administrator, Andrew Wheeler, says he wants to turn over a new leaf and has pledged to be more transparent than his predecessor but actions speak louder than words. So we're calling on Wheeler to take action on four of the most toxic chemicals that Pruitt failed to regulate.

Will you join us in calling on the new Acting EPA Administrator to take action on toxic chemicals?

These chemicals are notoriously dangerous and should have been banned years ago. Chlorpyrifos is a neurotoxic pesticide linked to brain damage in kids. TCE, or trichloroethylene, is a carcinogen found in the tap water supplies of 14 million Americans. Methylene chloride and NMP, or N-Methylpyrrolidone, are highly toxic chemicals used in paint strippers. Methylene chloride has been linked to more than 60 deaths.

While much of the media attention on former EPA Administrator Scott Pruitt focused on major problems with ethics and transparency, he also did everything he could to avoid protecting our health and the environment. Mr. Wheeler has the opportunity to turn over a new leaf for Trump's EPA and protect Americans from these four highly toxic chemicals.

Methylene chloride and NMP can be found in many paint strippers on the shelves of your local hardware store. At least 64 American families have lost loved ones who were exposed to methylene chloride fumes. And NMP is linked to miscarriage and stillbirth. The Obama EPA proposed banning these chemicals from paint strippers but eighteen months later, the EPA hasn't moved forward. Every day of delay could mean another life lost.

Chlorpyrifos is an insecticide that can harm kids' brains and nervous systems even at small doses. The Obama-era EPA proposed banning its use on food crops but Scott Pruitt sided with the pesticide lobby over EPA scientists and delayed the ban for at least five years.

TCE, made famous by the book and movie "A Civil Action," is used in industrial processes and in dry cleaning. This carcinogen contaminates the tap water supplies for 14 million Americans. The Obama administration proposed banning it for many uses but Pruitt's EPA indefinitely delayed the bans.

Join us and call on Mr. Wheeler to protect public health and finish the job of banning these harmful chemicals.

Thanks for your support,

Liz Hitchcock, Acting Director

Subject: Methylene Chloride

Our close friends, Ex. 6 Personal Privacy (PP), lost their son Ex. 6 Personal Privacy (PP) at age 31 to toxic inhalation of Methylene Chloride in a product (Goof Off) which he was using to strip the floors of his start up business. His autopsy has proven that this was the cause of his death. He was wearing an approved respirator mask and all of the coverings that the product instructions indicated.

This was a totally preventable death. I would like your help in keeping our loved ones from potentially suffering the same fate, just by using a product that is readily available at Lowes, Home Depot and other hardware stores throughout our country. The EPA has delayed indefinitely acting on a ban of Methylene Chloride, despite the fact that it is banned for use by the US Military and the European Union since 2013. This product should be banned immmediately, before more people die unnecessarily.

We have floors that have been cured with a substance that many states have banned. We had difficulty breathing when we had to have part of it repaired. I suffered headaches and had some numbness in my arms. The more your agency discovers about all these products, the scarier it gets. Please give this very serious attention. You might be saving your children or your grandchildren.

Sarah Raver

Subject: must ban methylene chloride

Ms Beck:
As lead of the EPA's toxic chemical department, you should be as horrified and saddened at the death of Ex. 6 Personal Privacy (PP), as we are. You, however, are in a position to do something about it.
Ex. 6 Personal Privacy (PP) was our friends' son. Per the autopsy report, Ex. 6 Personal Privacy (PP) died after using Goof Off, a methylene chloride paint stripper. He was wearing a mask, protective clothing and took all the precautions on the can.
Nothing can bring back Ex. 6 Personal Privacy (PP) but you can prevent other needless deaths. We are appalled that the EPA has indefinitely postponed its ban on this dangerous chemical, when even the US Military (not to mention the EU) has banned its use.
Please take action now.
thank you,
Jayne Eastman

Subject: Formaldehyde Decay Curve
Attachments: Formaldehyde Gas Decay Rates from Wood Products.pdf

Dr. Beck, good evening.

Thank you and your team for taking the time to meet with AHFA Tuesday. I found the meeting very helpful and insightful. As discussed, AHFA is hopeful EPA will provide written guidance related to data gaps or a better understanding of how the data in the UL studies are stated as we work to prepare our petition for a laminated product exemption.

Attached is the decay curve we discussed during the meeting. I believe the narrative and the graph is self-explanatory. As stated, HCHO gas decays rapidly over time further reducing the potential risk of exposure.

As stated, we look forward to the agencies reply and guidance. Please let me know if you have any additional.

Regards,

BPerdue

Dear Ms. Beck, Mr. Morris, and Ms. Corado,

I'm know that I'm not the first of [Ex. 6 Personal Privacy (PP)]'s friends to write you and your colleagues with his story, but it bears telling again. Drew was a small business owner in South Carolina who died because of methylene chloride in the paint stripper he was using.

There's no reason that products containing methylene chloride should be on the market and I urge you to reconsider the proposed ban (EPA-HQ-OPPT-2016-0231-0001). EPA's website lists the effects of short-term exposure to methylene chloride as "dizziness, incapacitation, and, in some cases, death." Tragically, Drew experienced all three.

There are plenty of alternative products to those that contain this deadly chemical. Drew may not have known that, but he really shouldn't have had to. After all, why would anyone allow something so lethal to be sold in stores?

I look forward to EPA's action on methylene chloride as we continue to share Drew's story.

Best,

Chris

Subject: Methylene Chloride

Ms Beck

I am writing to implore you to move forward with regulations banning the sale of methylene chloride. This "paint thinning" chemical is banned in other parts of the world and is deemed too dangerous to use by the Defense Department. I can think of no reason to delay this step.

I have spent years working in a highly regulated industry (aviation). I understand what's reasonable and what's a stretch. And I understand the administration wants to reduce regulations. I've often argued against unneeded regulation.

People have literally been hurt and died because of this chemical, including a friend of my son's. There are plenty of safer alternatives. There is no reason to delay. The administration is well ahead of its goal of reducing two regulations for every one new one. Please do this.

Subject: Ex. 6 Personal Privacy (PP)

Good Morning,

The picture I share is of the outpouring of cards, notes and donations we received upon the death of Ex. 6 Personal Privacy (PP) This does not include what our other two sons received.

My purpose in sharing is to help you understand the impact y's death has had on so many. Secondly, these represent those who have and will help in our quest to regulate the use of Methylene Chloride.

We look forward to opening a dialogue with you on this deadly toxic chemical.

Sincerely,
Cindy and Hal Wynne

Subject: Ban methylene chloride

I was recently made aware of a tragic death of a young man using methylene chloride stripper, a dangerous product banned by the US military and the European Union. He had followed all safety precautions listed by the manufacturer. This product needs to be removed from the market before more senseless deaths occur. I urge you to be responsible in your duty to protect the public from such toxic chemicals.

Dr. April Gordon

CC: Brian Wynne Ex. 6
Subject: Ex. 6 Personal Privacy (PP) e Death by Methylene Chloride

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rulemaking process. You should finalize the proposed ban on methylene chloride as soon as possible.

Very respectfully,
Elan Rotklein

The Forum in Sidney Harman Hall
610 F Street NW

Explore how the creationand sharing of art is inherently political.

Using Shakespeare's Hamlet andHeather Raffo's Noura as a starting point, the morning of conversationswill investigate how the form, structure and context of a work of art informits political impact.

The event will open witha short framing lecture from Lab Co-Director and Georgetown Professor Derek Goldman that draws from hisextensive experience working at the intersection of theater and politics, andexamines how content, context, and form affect a work's political impact.

Playwrights Heather Raffo (Noura) and Nikkole Salter(In The Continuum with DanaiGurira) and scholar Dr. Isaiah Wooden (American University) will discuss theways in which artists use structure, characters, and plot as tools to inspire,deepen, or challenge an audience's understanding of global issues.

Finally, author Azar Nafisi (Reading Lolita in Tehran), actor Robert Joy (Polonius in Hamlet),and Soraya Nadia McDonald (culturalcritic ESPN's The Undefeated) will explore how the environment in which anartistic work is produced shapes an audience's response.

Refreshments andbreakfast treats provided.

Reserve your seat < Caution-http://tracking.wordfly.com/click?sid=MTQ5XzI4MDk4XzI2MDg5Ml82Njgz&l=5aeaf6ba-4601-e811-8416-e41f1345a486&utm_source=wordfly&utm_medium=email&utm_campaign=AsidesLIVEHamlet%2FNoura&utm_content=version_A&sourceNumber=69651 > _____

Subject: Please ban Methylene Chloride

Our friends, Ex. 6 Personal Privacy (PP), from Folly Beach SC, lost their son Ex. 6 Personal Privacy (PP), this past Fall, at age 31 to toxic inhalation of Methylene Chloride in a product (Goof Off) which he was using to strip the floors of his start up business. He was very healthy, college educated, not one to cut corners, co-owner of an up and coming coffee business here in CHS.

His autopsy has proven that this was the cause of his death. He was wearing an approved respirator mask and all of the coverings that the product instructions indicated. This was a totally preventable death and I would like your help in keeping our loved ones from potentially suffering the same fate, just by using a product that is readily available at Lowes, Home Depot and other hardware stores throughout our country.

The EPA has delayed indefinitely acting on a ban of Methylene Chloride, despite the fact that it is banned for use by the US Military and the European Union since 2013.

Tom and Jackie Ashbaugh
Charleston, SC

Good Afternoon Ms. Beck, Ms. Corado, and Mr. Morris -

I hope this message finds you all and all is well.

I know all of you are super busy, probably have a million things going on in your professional and personal lives (so I don't mean to add to the chaos, especially on a Monday), so I'll try to keep this short, sweet, and to the point.

A friend of mine - Ex. 6 Personal Privacy (PP) recently passed away. To say he was a good human-being and member of society, would be an understatement. It pains me to know that his passing (due to methylene chloride) could have been prevented. People like Drew are exactly the types of people we hope to encounter on this road called life. I hope you all will find it in your heart and conscious, to look harder as whether these types of products should be on our shelves in the first place. I'd hate for another brother, son, or friend to meet his same demise.

Appreciate all of your time and consideration.

God Bless -

Derek Morgan Kinzel

Subject: Fwd: Rejoining TERA

Dear Nancy, Charlotte and Louise

Just a personal note to thank you and the wonderful OCSPP staff for all your support during my 4 months at EPA. It was rewarding to get back, if only for a brief time and I have no regrets for what happened. I have learned quite a bit from the experience!

As you can see from the note below, I have "landed" safely on the outside of EPA with the 501c3 nonprofit Toxicology Excellence for Risk Assessment (TERA) as its Director of Science. I will lead TERA in developing collaborations among government, industry and eNGO scientists to resolve risk assessment on specific chemicals and will also take the lead in collaborations on problematic environmental issues. As you know, TERA is unique in its approach, as one of the only outside-of-government organizations that works for both government and industry in a science neutral manner, and one that involves eNGOs routinely.

TERA has had several of its employees in the past participate in an Interagency Personnel Agreement. If this might be helpful to OCSPP/EPA in the future, please let me know. Finally, please feel free to call me any time with questions [Ex. 6 Personal Privacy (PP)]

Cheers!

Michael...

Subject: Fwd: Rejoining TERA
Date: February 12, 2018 at 9:38:07 AM EST

To: ...

Dear Colleagues

I am pleased to announce my return to the nonprofit 501c3 organization, *Toxicology Excellence for Risk Assessment* (TERA), as its Director of Science. As many of you know, TERA joined the University of Cincinnati, College of Medicine (https://med.uc.edu/eh/centers/rsc) two years ago and became known as the Risk Science Center (RSC). However, TERA always maintained an external nonprofit organization under the leadership of Dr. Patricia McGinnis in order to complete several contracts, including one with the Consumer Products Safety Commission.

TERA's Board of Trustees has decided to continue TERA as a nonprofit organization and remain a separate entity from the RSC. TERA's mission will emphasize hazard identification, dose response assessment, independent peer review, and public education. Dr. McGinnis will continue to serve as TERA's President leading the business and contributing to projects as a board-certified toxicologist.

As many of you also know, TERA's extensive collaborative work was woefully mischaracterized during my US EPA confirmation hearings. Responses to this mischaracterization can be viewed at http://tera.org/TERAcollaborativework%2012.8.17.pdf. You may also wish to view https://www.cincinnati.com/story/news/politics/2018/01/25/university-cincinnati-professor-former-uc-professor-dourson-picks-up-pieces-after-failed-controversi/1047685001/ for some additional thoughts on this confirmation process.

TERA looks forward to the opportunity to work with you in the future. If you are attending the annual meeting of the Society of Toxicology next month, please stop by our booth #555.

Cheers!

Michael...

Subject: Oxitec Brazil Closes Planet, Same issues as Cayman
Attachments: Oxitec closes factory and exposes failure of the creation of the transgenic mosquito.pdf

Hi All,

Dr Norris and I brought a lot of evidence about Oxitec credibility, professional practice and the safety and viability of their GM Species technology. The article in the link, also translated and attached in pdf, affirms the same issues as seen in the Cayman trials, exposed in Dr Alan Wheeler's FOIA released emails. Please note some of the translation may be slightly awkward.

https://www.redebrasilatual.com.br/saude/2018/07/oxitec-fecha-fabrica-e-expoe-fracasso-da-criacao-de-mosquito-transgenico

The inordinate amount of females released are promoting hybridized wild Aedes Aegypti populations without characterization, or long term studies. Mohamad Habib the entomologist from Brazil CTNBio said in the article that "in terms of controlling the population of Aedes aegypti wild , and Oxitec as a criminal for deceiving managers and the population and made them guinea pigs." He also highlighted the risks to health and the environment associated with the release of millions of insects altered by genetic engineering. "This increases the number of crosses and can generate new strains, with impacts still unknown to biodiversity, and increase population, virus circulation and the consequent contagion of diseases, not to mention that the adoption of the mosquito can discourage managers and own population in actions to combat the breeding of these insects, a problem that should be faced by the Public Ministry and the authorities. "
This article goes on to explain some of his reasoning for the failure:

According to the data, while the Oxitec speaks in reduction of 90% of the population of wild Aedes , the program shows much smaller number, 60%. One reason is the large number of females that are out of control and loose in the environment - hence the reason the company invests in the second generation technology, with a focus on females.

The large number of females released means that humans in any test area become part of an experiment for a mosquito bite that has not been clinically tested on humans, or animals. The Common Rule must be applied and permit those within a test area to have informed consent to any trial. The recent exposure of allergen relationships that Oxitec has not disclosed, should be a high level concern. They either are not aware, or are. Either way, they have not discussed any results. They put in the EUP application that 1/4300 mosquitoes would be female, but they have struggled to make 1/500 in the Cayman trial and it seems the same is true in

Brazil. How can a purposefully erroneous application be approved? They were accosted by the Cayman MCRU about the quantities of females being released approximately 1 month before submitting the application to the EPA. This is willfully misleading!

Oxitec has abandoned the camp of science and pitched their tent in the marketing camp. They wish to release this experiment on the US for the sake of their profit and it is not ready for release if human and environmental safety are to be assured!

One of the hardest challenge for the EPA, or any of our regulatory agencies, moving forward in the wake of rapidly advancing technology, is to clearly define the scientific rigor required to assure safety, while dealing with brilliant people who would deceive in order to profit.

We have all of the compelling evidence to show the concerns surrounding this technology represent unnecessary levels risk to our population and ecosystems. Oxitec does not care to provide the necessary evidence to demonstrate safety, they only care to deliver a brilliant dialogue on what they have done, in hopes that it will dupe our EPA into believe Oxitec is competent, when all of the data coming from the field shows they are not!

Add all of this together with the likelihood that this technology can amplify antibiotic resistant bacteria, as Dr Norris has shown, and there can be no assurance of safety to our public, or ecosystems. We urge the EPA deny the Oxitec EUP for this GM Species, the OX513A, and any other GM Species developed by Oxitec, whether regulated under USDA, or FDA, should be immediately suspended from release, until safety can be assured.

Sincerely,

Barry Wray

Subject: BAN ON METHYLENE CHLORIDE

ATTN: Ms. Beck, Mr.Morris, Ms.Corado and Mr. Parsons,

I have just learned of a healthy young man (age 31), who recently died while using a Methylene Chloride-based paint stripper. He carefully followed the manufacturer's directions, using all the protective respirator equipment and skin protections recommended on the label. He bought the Methylene Chloride off of the shelf at his local Lowes store. This is the same product which I have kept in my home, until learning of the grave consciences with use of this deadly product.

I'm very troubled by reports that the EPA has indefinitely postponed its ban on Methylene Chloride. (EPA-HQ-OPPT-2016-0231-0001). It is banned for use by the US Military and the European Union since 2013.

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to toxic chemicals with serious, well-documented health risks and numerous deaths resulting from your delay.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on Methylene Chloride IMMEDIATELY.

Thank you,
Mark Denzer
Columbus, Ohio

I would like to setup a meeting with you for myself and ACS Executive Director and CEO Tom Connelly for general introduction purposes as well as discuss the U.S.EPA Green Chemistry Challenge Awards program. Here are some dates and times that would work from our end, and hope that one of them might mesh well with your calendar:

February 19 – after 12:00 PM
February 23rd & 27th – before 12:00 PM
February 28th – Open

Please feel free to email me back or to call me at 202-872-4475. I look forward to speaking and meeting with you.

Subject: Florida Keys Physician Petition OX513a Mosquito

I want to thank you for the attention that you and the Environmental Protection Agency (EPA) have shown related to the Florida Keys physician petition and the supporting data that was released by the Cayman Island Government related to OX513A Antibiotic Dependent insects. The petition was authored after the Federal Drug Administration (FDA) published its 'Findings of No Significant Impact' (FONSI). The information I presented during our July 13, 2018 meeting should demonstrate Oxitec data integrity concerns from Cayman scientists and public safety concerns related to what grows when antibiotics are used.

This is NEW information relative to the FDA FONSI. Therefore, it was not able to be factored into the FDA decision. Now they have transferred the analysis of these concerns to EPA as discussed.

It is my belief that the demonstration of Cayman Scientist concern over the mold (fungus) issue in the production facility strongly supports the fear that the production process breeds and promotes more than the intended insects. It must be assumed the use of antibiotics in the mass raising of insect livestock will breed more undesirables than mold (fungus). We see this when humans get yeast (fungus) infections and resistant bacterial infections from appropriate antibiotic use. Antibiotic resistant bacteria and risks antibiotic resistant infections must be studied with this new technology in humans and animals. Manufactured Insects which will share their bacteria 1. with female insects via mating and 2. simple surface exchanges. Females and surfaces then sharing these bacteria with humans via direct contact. All this as the World Health Organization makes the policy statement that antibiotics should not be given to healthy animals and declares an antibiotic resistance crisis.

Please support our petition with the requested testing.

Sincerely,

John W Norris III MD FACP

Subject: Take action on Use of Methylene Chloride

Dear Ms. Beck, Mr. Morris, Ms. Corado and Mr. Parsons,

I am writing to you to ask you to take action to ban methylene chloride, after learning of the awful and preventable death of a family friend's brother's death Ex. 6 Personal Privacy (PP) recently died tragically and much too young, after using a methylene chloride based paint stripper in his recently started business.

EPA is aware of the harmful and toxic effects of this chemical and its well documented health effects and had been planning to issue a ban. That is the right thing to do just as other countries in Europe and elsewhere have done.

You are in a position to take action. Prevent tragic accidents and spare other families from the heartbreak of what happened to Ex. 6 by taking appropriate and necessary action now. Please reconsider your delay in imposing a ban (HQ-OPPT-2016-0231-0001) on this dangerous and deadly chemical.

Thank you.

Dianne Bona, RN, MSN

Subject: Ban Methylene Chloride

Ms. Beck, Mr. Morris, and Ms. Corado:

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule-making process. Please take action with a decisive and immediate ban on methylene chloride.

Regards,
Karen Schott

Subject: Methylene Chloride

Dear, Ms. Beck, Mr.Morris, Ms.Corado and Mr. Parsons,

Ex. 6 Personal Privacy (PP) (age 31), recently passed away while using a Methylene Chloride based paint stripper.

I'm very troubled by reports that the EPA has indefinitely postponed its ban on Methylene Chloride. (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. Especially while these dangerous chemicals can easily be purchased at a Home Depot, Loews etc....every day. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to toxic chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on Methylene Chloride

Subject: Methylene Chloride danger

Dr. Beck, Mr. Morris, Ms. Corado, Mr. Parsons, and Mr. Pruitt:

Our friend's son, Ex. 6 Personal Privacy (PP) (age 31), recently died while using a Methylene Chloride based paint stripper. He was a physically fit young man, college graduate, and co-owner of a successful business.

He was not one to ignore labels or safely precautions. He was wearing a respirator and heavy gloves.

It is my understanding that the US Military has phased out the use of this toxic chemical. I am married to a Vietnam Combat Veteran. While I applaud the protection of our military, why is this same protection not afforded to the general public?

I will share all this information with family and friends so that they too can learn about this toxic product.

Please help me understand why the EPA has indefinitely postponed its ban on Methylene Chloride. (EPA-HQ-OPPT-2016-0231-0001)?

Cheryl Clark

Subject: Methylene Chloride

Ms. Beck, Mr.Morris, Ms.Corado and Mr. Parsons,

Our friend's son, [Ex. 6 Personal Privacy (PP)] (age 31), recently passed away while using a Methylene Chloride based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on Methylene Chloride. (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to toxic chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay rule making process. You should finalize the proposed ban on Methylene Chloride.

Methylene Chloride has been phased out by the US Military and banned by the European Union in 2013

The product kills instantly and fills the shelves in home improvement stores paint depts.

Warning labels are inadequate on the products and sales persons unaware of risks as well as protective materials for application.

This product needs to be banned in the United States. The EPA is failing the American people by allowing it's continued use. Any do it your selfer can walk into a Home Improvement store and buy this and the warning labels are not clear on how dangerous the product is.

Another family should not have to suffer the loss of a loved one due to the EPA's stalling on this issue. Do the right thing!

Sincerely,

Allison Hansen

Subject: APCRA teleconference follow-up: Meeting notes and Save the Date for Face to Face meeting

Attachments: Compiled Case Study Proposals.011818.docx; 180118 APCRA meeting notes.docx

Thank you for the discussion on January 18th. Please find attached the meeting notes and updated case study document. These items will also be added to the share drive at

Ex. 6

Our next teleconference will be held on **April 11th at 8am ET**. An invitation will be sent shortly. Agenda and materials will be sent closer to the teleconference date.

Please save the date: **October 10-11, 2018 for the next APCRA Face to Face workshop** to be hosted by Health Canada and held in Ottawa, ONTARIO. Specific details will be shared as we confirm the meeting venue. These dates were selected to avoid conflicts with other professional meetings held in October/November.

Keep up the great work moving forward on the case studies! We look forward to future updates.

Thank you,

Maureen

Subject: APCRA teleconference
When: Thursday, January 18, 2018 8:00 AM-9:30 AM (UTC-05:00) Eastern Time (US & Canada).
Where: Call-in information in the body of the message

Updated case studies attached in at the link below.

Ex. 6

Dear all,

Thank you again for the productive meeting in Helsinki. As you recall, we asked for updated abstracts on the case studies by December 8, 2017. If you have not already, please send us your update as soon as possible and I will share with all prior to our teleconference. Please note the new call-in information listed on the agenda. As a reminder,

materials from the October workshop can be found at

Ex. 6

January 18, 2018 APCRA Teleconference Agenda
Conference call number Ex. 6 Personal Privacy (PP) **code** Ex. 6 Personal Privacy (PP)

1. **Follow-up from October 2017 workshop**
    a. **General Feedback**
        i. Specific feedback on workshop
    b. **Action items from the workshop**
        i. Update on case studies (case study leads)
            1. Activity since the workshop
            2. Current status
            3. Timeline to completion
        ii. Update on communication on use of NAMs
            1. Scope of activity
        iii. Outreach about APCRA activities (*Please share any outreach activities with Maureen Gwinn at* gwinn.maureen@epa.gov)
            1. Overview presentation at OECD IATA Case study meeting (November 2017; slides in share drive)
            2. Draft commentary submitted to journal (ECHA, EPA, HC)
            3. Society of Toxicology (March 2018)
            a. Poster presentation on workshop overview (ECHA, EPA, HC)
            b. Platform presentation on case study #3 (EPA)
            c. Others attending/presenting at Society of Toxicology meeting in March?
2. **Other topics?**

For the topic on outreach on the agenda, please share any outreach activities with Maureen Gwinn at gwinn.maureen@epa.gov if you'd like them included in the notes.

Also, for your information, I am sharing a link to a recently released ECHA report that might be of interest to you. The report is on the regulatory applicability of non-animal approaches under the three EU chemicals regulations coordinated by ECHA (REACH, CLP and BPR).

https://www.echa.europa.eu/-/more-progress-needed-to-replace-animal-tests-under-eu-chemicals-laws

Thank you,

Maureen

Call-in information and agenda to follow.

Dear all,

Our first follow-up teleconference since the meeting in Helsinki will be held on January 18, 2018 at 8am ET. Invitation to follow.

Please review the items below for details on follow-up actions. We are extending the due date for updates on case studies to December 8th, which will still allow time to compile all updates and share with the group for review prior to our next teleconference.

Please contact me with any questions or updates.

Subject: APCRA Follow-up and Action Items

Dear all,

Thank you all for a very productive meeting in Helsinki. Our discussions ranged from building bridges between case studies, increasing acceptance of the use of NAMs by risk assessors and managers, and use of NAMs for exposure analysis. Presentations included updates on specific case studies, with discussion of how these will move forward. We are working to compile and share notes from the workshop, but in the meantime we wanted to send out some follow-up action items that came out of our discussions.

1. Teleconferences: We will continue to hold teleconferences every 6-8 weeks to discuss progress on case studies and other action items, and build toward strengthening collaborations on current and future case studies. Please confirm that we have the correct members from your organization on our email contact list.
2. Case study leads: Please share updates for your case study by **November 27th.** Send updates to Maureen Gwinn (gwinn.maureen@epa.gov) for compilation.
3. Need for Communication strategy: Tina Bahadori will lead a workgroup on discussions of what is needed for a communication strategy to increase acceptance for the use of NAMs in risk assessment and regulation. Workgroup members currently include Tina, Mike Rasenberg, Rusty Thomas and Maureen Gwinn. Update to be given at next teleconference, likely sometime in January. Separate invitation will follow within the next week or so.

Slides and other workshop materials are being updated and maintained at
Ex. 6
Please do not share materials outside of your organization without permission. We will share notes on key points from the workshop in the near future.

Thank you everyone for your continued activities in support of this work, and one last thank you to Bob Kavlock for bringing this group together.

Subject: methylene chloride-based paint stripper

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Regards,

Morgan Brown

Subject: Request for meeting for Reckitt Benckiser

Nancy,
My client Reckitt Benckiser is coming in town for the Pria quarterly meeting on March 7. They are a major international company with many well known brands like Lysol, Woolite, Airwick, Enfamil and others. We are also having a meeting with Rick Keigwin at 11:00 that day. We are speaking at AAPCO meeting the morning of March 7. RB would like a chance to meet you as well. Would it be possible for you and Rick to meet us on March 6 or would you be able to participate in the meeting with Rick on March 7 at 11:00?

Subject: Message for EPA

Ms. Black, Mr. Morris, M. Corado and Mr. Parsons,
Recently a good friend's son (age 31) passed away while using a METHYLENE CHLORIDE based paint stripper. My husband and I are very troubled by reports the EPA has indefinitely postponed its ban on METHYLENE CHLORIDE (EPA-HQ-OPPT-2016-0231-001).
Protecting the American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to toxic chemicals with serious, well documented health risks. METHYLENE CHLORIDE has been phased out by the US Military and banned by the European Union. The product fills shelves in home improvement paint departments with inadequate warning labels sold by people who are unaware of the risks.
Action on METHYLENE CHLORIDE, a toxic chemical is long overdue. We urge the EPA to reconsider its decision to delay its rule making process and finalize the proposed ban on METHYLENE CHLORIDE.

Sincerely,
Carol and Mike Morgan
Mt. Pleasant, SC

Subject: Ex. 6 Personal Privacy (PP)

Ms. Beck, Mr. Morris and Ms. Corado,

In grad school, I took a course on environmental policy where I learned what happens where there is a lack of proper regulation to protect American citizens from harmful chemicals - I am referring to the TSCA act of 1974.

Late last year, I was saddened to learn about the passing of my friend's sudden death. Ex. 6 Personal Privacy (PP) was a young, great, healthy guy who was just starting his business and had his whole life ahead of him.

How did he die? He passed away after using a methylene chloride-based paint stripper.

Now I'm very troubled by reports that the EPA is once again not doing enough to protect American citizens. EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Your actions could save lives of other Americans who may be at risk simply by going to LOWE's and not know that they are buying their death ticket. Thank you for your consideration.

Jane Khodos

Subject: Ex. 6 Personal Privacy (PP) Methylene Chloride

Good Afternoon Mr Pruitt,
I trust the name in the subject line has become a familiar one with recent emails.

Since I had the opportunity to listen to your testimony in front of the EPA Oversight committee last Tuesday, I must say I am quite encouraged by your response to Sen.
Carper's question regarding the finalization of legislation on Methylene Chloride in the next 30days.
Your response being YES

Therefore, unless that was a 'dodge and skirt' reply, we will celebrate TSCA and the ban on Methylene Chloride on March 1, 2018.
Since no one from your agency has contacted us from previous communication, and aid in keeping this on track, our family and friends will begin correspondence with their Congressional Representatives.

Sincerely,
Cindy and Hal Wynne

Subject: Meeting request

Hi Nancy,

As I mentioned on our brief call a couple of weeks ago, Michal and I would like to meet with you when she is in DC next month. Might you have some time on Friday, March 16? Additionally, we would be delighted to meet more informally over dinner on Thursday, March 15 if that might work for you.

Many thanks,
Charlie

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) e recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Please feel free to tweak the above message any way you would feel comfortable. Additional information :
Dr. Nancy Beck heads the toxic chemical Dept. within EPA, she was senior director of The American Chemical Council, the leading chemical lobbying group. prior to this appt.

Methylene Chloride has been phased out by the US Military and banned by the European Union in 2013

The product kills instantly and fills the shelves in home improvement stores paint depts.

Warning labels are inadequate on the products and sales persons unaware of risks as well as protective materials for application.

Thank you for addressing this in a timely manner. Lives are at risk!
Jim Graf

Subject: DEADLY METHYLENE CHLORIDE

Dear EPA Colleagues,

My dear friends recently lost their son Ex. 6 Personal Privacy (PP) to Methylene Chloride poisoning. I have read that this deadly dangerous chemical has been flagged by the EPA for a number of years for removal from the market. I also understand that there are at least 31 companies around the country who supply it. Apparently, they would like to continue doing so.

Ex. 6 Personal Privacy (PP) was equipped with a ventilator, wearing protective gloves and working in a ventilated area, thereby using this toxic chemical in paint stripper according to instructions.

As you know, he is one of an estimated 40 or more deaths due to DCM exposure. It is time that you take decisive, unequivocal action to remove this chemical from those who are in [deadly] harms way.

Please let me know what you are planning to do to remove DCM from the market. Your prior unsuccessful efforts in, what appears to be, favor of company profits and pressure must change in favor of those who have died and those who remain in harms way.

I appreciate your prompt attention to this most critical matter and look forward to hearing from you on action that you will undertake to ensure that DCM will be removed from the market.

Thank you,
Mark Riley

Subject: Ex. 6 Death by Methylene Chloride

Ms. Beck, Ms. Corado, Mr. Morris and Mr. Parsons,
A wonderful family has suffered an unspeakable loss. Their son and brother, Drew was using the toxic chemical Methylene Chloride and died as a result. Drew and a friend were pursuing the American Dream by starting a cold brew coffee company in Charleston. He was using this toxic chemical attempting to strip paint when he met his untimely death. He was only 31 years old.
Please BAN METHYLENE CHLORIDE and keep our families safe.
Please don't let this tragedy happen to another family.
Sincerely,
Ann L. Principato,

Subject: Proposal for the review of epidemiological studies in the open literature
Attachments: EPIPubRevProposal.docx

Dr. Beck: I was very frustrated with the way things were going with the chlorpyrifos project based on the Columbia study. Attached is a proposal for the review of an epidemiological study that occurs in the open literature so that problems with the study will be identified early in the process. The decisions in the resulting product will be transparent and the individuals responsible (the owners of the decisions) will be identified and the decision defended as needed.

I would really appreciate it if you would read this over and let me know of any comments that you may have.

I have not heard from you on the proposal to increase the efficiency of the review of toxicity studies in OPP to produce a more useful review document which I sent last fall.

If you would like to further discuss either of these two proposals, I would be happy to visit your office.

Thank you for giving my suggestions your consideration.

John D. Doherty, Ph.D.

Subject: Re: My Brother's recent death from Methylene Chloride
Attachments: NavyMethyleneChloride.pdf

Nancy, your inaction is unacceptable. Explain to me how you jokers can defend this junk when the Navy decided to scrap it. They have videos of safe alternatives. The blood of these young workers is on your hands. Have a nice day.

Brian Wynne

On Wed, Jan 17, 2018 at 1:29 PM, Brian Wynne [Ex. 6]:

Hello Nancy,

Ana and Doug are tracking this, I thought you should as well. My brother died do to exposure from a chemical that you protect "Methylene Chloride". They say that Methylene chloride is a one-two punch when fumes accumulate, well that is 100% correct. My brother slumped over, no longer breathing, because the respiratory centers of his brain switched off and the chemical turned into Carbon Monoxide in his body which also starved his heart of oxygen. He was found dead on a cold floor surrounded by a puddle of blood (from falling over). You should know that his level of exposure was so high that we couldn't donate his organs and that they had to wear respirators during his autopsy.

There is no reason to shelf the NMP rule and there is no need for "long term action". The chemical kills, there are alternatives available. Have a soul and prevent this from happening again. If you care, read the details below.

V/R,

Brian Wynne

Subject: RE: "Alleged Death from Goof Off Product
To: Parsons.Douglas@epa.gov

Hello Douglas,

My name is Brian Wynne, I am writing to follow up on a message sent to you by a family friend of ours [Ex. 6] was my brothe[Ex. 6] who died from Methylene Chloride toxic fumes. To help clarify and remove the "alleged" from the subject "Death from Goof Off Product", I thought I would go ahead and share the cause of death as determined by the Charleston Co. Coroner (autopsy conducted on

10/16/17 at 12:45pm). Sidebar the autopsy was delayed to to a need to decontaminate my brothers body. Below is a link to his obituary and after that is the COD from the coroner.

Drew was a 31 yr old small business owner that died working hour number 59 of his regular 60 hour week. He was found a day after he died and it took the Hazmat team 2 hrs to recover his body from the building. The fumes were so strong that chemical detectors were having positive hits outside of the facility. I can go on into specific details (blood, smell, cleanup) but it wouldn't be worth it.

He bought poorly labeled poison and was sold an inadequate breathing apparatus at Lowes. He was blissfully unaware of the danger he faced when he walked out of that store and started working at his coffee plant.

http://www.mcalister-smith.com/obituaries/Drew Ex. 6

"In light of historical information and the toxicological, gross and microscopic autopsy findings, it is in the opinion of the pathologist that the decedent died as the result of acute dichloromethane and methanol toxicity. Furthermore, the manner of death is best deemed accident. "

Toxic Fumes (paint thinner/methylene chloride/methanol exposure).

Acute dichloromethane and methanol toxicity

- Peripheral blood toxicology: dichloromethane = 77 mcg/ml, methanol = 25 mg/dl
- History of exposure to paint thinner fumes in a poorly ventilated enclosed space

Attached is a picture of the paint thinner aisle at Lowe's. Can you find the product that kills more effectively than the department of corrections?

Everything on the left side of the shelf will kill you, nothing on the right will save you. I'm not interested in debating EPA positions, I'm following up to provide the additional details that were requested.

V/R,

Brian Wynne

Subject: No one's son should die this way

Ms. Beck,

My friend's son, Ex. 6 Personal Privacy (PP) (age 31), a healthy young man, recently died while using a Methylene Chloride-based paint stripper. He carefully followed the manufacturer's directions, using all the protective respirator equipment and skin protections recommended on the label. He bought the Methylene Chloride off of the shelf at his local Lowes store.

I'm very troubled by reports that the EPA has indefinitely postponed its ban on Methylene Chloride. (EPA-HQ-OPPT-2016-0231-0001). It is banned for use by the US Military and the European Union since 2013.

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to toxic chemicals with serious, well-documented health risks and numerous deaths resulting from your delay.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on Methylene Chloride immediately.

Thank you,

Steve Degnen

Ms. Beck & Ms. Bertrand:

I simply wanted to thank you for the time you spent with me on Friday evening discussing the role in EPA's Office of Chemical Safety and Pollution Prevention that you are hopeful to fill. Based on the description of your needs, I am more than confident I could be a contributor to the mission of the Office, and of this Administration.

As I mentioned during our visit, I have experience getting "deep in the weeds" on substantive issues, interfacing and working with stakeholders, and managing intra-organizational processes towards desired outcomes. I believe my background and skill set could be a value-add to OCSPP, and I hope that was clear to you as well.

I really look forward to the next chance to discuss this opportunity with you, and I welcome any additionals visits I may need to have with others at EPA. For the moment, I simply wanted to thank you for your consideration and to convey my excitement at the notion of working closely with you both. Have a wonderful day.

On Fri, Jan 26, 2018 at 9:02 AM, Brian Wynne <Ex. 6 Personal Privacy (PP)> wrote:

Nancy/Doug/Ana/Jeff,

What are you going to do about it? I just found out about another death. A young man working in California fell dead from exposure to this crap that you protect. At some point when you look in the mirror you will see the faces of these people that you failed to protect all because of a profit. I believe that we all have some inherent good, it's not to late to get on the right side of history. It's not too late to do the right thing, step out and ban methylene chloride. These deaths are preventable and the only way to do that is banning consumer sales.

Drew brought a lot to this world. He dared to branch out and start a small business (which was thriving). He made nitro tapped cold brew coffee and he died working on his business.

This is a picture of Ex. 6 Personal Privacy (PP) at a wedding in September. One month after this picture he died.

On Thu, Jan 25, 2018 at 8:57 AM, Brian Wynne Ex. 6 Personal Privacy (PP) wrote:

Good morning Nancy!

Not only can Methylene Chloride kill you instantly, long-term exposure can cause cancer. Lung cancer, liver cancer, breast cancer. Even concentrations below applicable occupational exposure limits, may increase the risk of cancer.

This is so bad that the DOD won't even use it (and they invented it).

Do the right thing.

Below is a picture of my brother with my son. Have you ever had to explain heaven to a 3 year old? I hope you never have to experience that.

Have a nice day.

Brian Wynne

On Wed, Jan 24, 2018 at 11:00 AM, Brian Wynne <Ex. 6 Personal Privacy (PP)> wrote:

Adding Jeff Morris to the message. Jeff, just to fill you in. My brother died from exposure to Methylene Chloride fumes, details are below. I'd like to hear what the EPA is going to do about it. Here is a picture of Drew making coffee, he bought a "goof off" product from Lowe's which had a high concentration of Methylene Chloride. The next day he was found laying in a pool of blood, dead.

The word is spreading, your inaction is unacceptable.

Hello Nancy,

Ana and Doug are tracking this, I thought you should as well. My brother died do to exposure from a chemical that you protect "Methylene Chloride". They say that Methylene chloride is a one-two punch when fumes accumulate, well that is 100% correct. My brother slumped over, no longer breathing, because the respiratory centers of his brain switched off and the chemical turned into Carbon Monoxide in his body which also starved his heart of oxygen. He was found dead on a cold floor surrounded by a puddle of blood (from falling over). You should know that his level of exposure was so high that we couldn't donate his organs and that they had to wear respirators during his autopsy.

There is no reason to shelf the NMP rule and there is no need for "long term action". The chemical kills, there are alternatives available. Have a soul and prevent this from happening again. If you care, read the details below.

V/R,

Brian Wynne

Subject: RE: "Alleged Death from Goof Off Product

To: Parsons.Douglas@epa.gov

Hello Douglas,

My name is Brian Wynne, I am writing to follow up on a message sent to you by a family friend of ours Margaret Valachovic. It was my brother Ex. 6 Personal Privacy (PP)) who died from Methylene Chloride toxic fumes. To help clarify and remove the "alleged" from the subject "Death from Goof Off Product", I thought I would go ahead and share the cause of death as determined by the Charleston Co. Coroner (autopsy conducted on 10/16/17 at 12:45pm). Sidebar the autopsy was delayed to to a need to decontaminate my brothers body. Below is a link to his obituary and after that is the COD from the coroner.

Ex. 6 Personal Privacy (PP) was a 31 yr old small business owner that died working hour number 59 of his regular 60 hour week. He was found a day after he died and it took the Hazmat team 2 hrs to recover his body from the building. The fumes were so strong that chemical detectors were having positive hits outside of the facility. I can go on into specific details (blood, smell, cleanup) but it wouldn't be worth it.

He bought poorly labeled poison and was sold an inadequate breathing apparatus at Lowes. He was blissfully unaware of the danger he faced when he walked out of that store and started working at his coffee plant.

http://www.mcalister-smith.com/obituaries/ Ex. 6

"In light of historical information and the toxicological, gross and microscopic autopsy findings, it is in the opinion of the pathologist that the decedent died as the result of acute dichloromethane and methanol toxicity. Furthermore, the manner of death is best deemed accident. "

Toxic Fumes (paint thinner/methylene chloride/methanol exposure).

Acute dichloromethane and methanol toxicity

- Peripheral blood toxicology: dichloromethane = 77 mcg/ml, methanol = 25 mg/dl
- History of exposure to paint thinner fumes in a poorly ventilated enclosed space

Attached is a picture of the paint thinner aisle at Lowe's. Can you find the product that kills more effectively than the department of corrections?

Everything on the left side of the shelf will kill you, nothing on the right will save you. I'm not interested in debating EPA positions, I'm following up to provide the additional details that were requested.

V/R,

Brian Wynne

Dear Sir

I work at EPA and we got your message regarding the alleged death from someone using the solvent product, Goof Off. Do you have any additional details?

Thanks, doug

Subject: Finalize the proposed ban on methylene chloride

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. **You should finalize the proposed ban on methylene chloride as soon as possible.**

Thank you,

Ashley P. Eppes, RBT

Dear Nancy,
Hello to you, and I hope you are well. I wanted to schedule 20 minutes with you to discuss logistics and details relating to the upcoming SOT Ancillary Meeting " Lautenberg Chemical Safety Act: Outside Party Assessments".
NSF and ToxServices are now serving as co-sponsors of the meeting, and we are very excited that you have agreed to provide introductory remarks. I have cc'd Amanda Phelka and Kevin Cox from NSF on this email so that they are in the loop. Would you please identify a few open timeslots that you would be available for a quick telephone call over the next ten days so that we can discuss logistics with you?
Thank you for your time and consideration.
Sincerely,
Meg

Subject: My Good Friend Drew Wynne

Ms. Beck, Mr. Morris, Mr. Parsons, and Ms. Corado,

My friend [Ex. 6 Personal Privacy (PP)] recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Kind Regards,

Brian McCormick

Subject: Logistics for March 11th SOT Ancillary Meeting: Lautenberg Chemical Safety Act
Attachments: LCSA-SOT 2018 Agenda.pdf

Dear Nancy,
Hello to you, and I hope you are well. I wanted to schedule 20 minutes with you to discuss logistics and details relating to the upcoming SOT Ancillary Meeting " Lautenberg Chemical Safety Act: Outside Party Assessments".
NSF and ToxServices are now serving as co-sponsors of the meeting, and we are very excited that you have agreed to provide introductory remarks. I have cc'd Amanda Phelka and Kevin Cox from NSF on this email so that they are in the loop. Would you please identify a few open timeslots that you would be available for a quick telephone call over the next ten days so that we can discuss logistics with you?
Thank you for your time and consideration.
Sincerely,
Meg

Subject: Ex. 6 Personal Privacy (PP)

Ms. Beck, Mr. Morris and Ms. Corado,

My friends, lost a brother. My sons best friend lost an uncle. A mother and father lost a son that they never were able to see get married or have the gift of grandchildren from. As a mother it is unimaginable to think of the pain his parents are enduring. Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. He was a young entrepreneur who had his entire life ahead of him to succeed. He truly had everything to live for! I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible. Christmas was very quiet for the Wynne family this year. I am pleading to you all to not allow this to be able to happen to one single other person. It is well within your power to remove this product. After hearing Ex. 6 Personal Privacy (PP) story, would you allow your spouse, children, family to use it? Doubtful. I sure wouldn't. Please perform your duties and protect consumers. One case is too many- just ask the Wynne family about what they have endured with the immeasurable loss. My heart is broken for them all as the unimaginable happened to their Drew.

Respectfully,

Kathleen L. DeWitt

Subject: Methylene Chrloride

Dear Nancy, Jeff, Ana, Douglas,

We were horrified to hear of the death of Drew Wynne, caused by Methylene Chloride. This chemical is available for purchase at Home Depot, Lowe's and hardware stores throughout the country in a product used for stripping floors. The product is called Goof Off. This 31 year old young man followed safety directions religiously with mask and ventilation. It killed him, all the same. How is this product available for purchase? Where is the EPA? THE EPA HAS DELAYED ACTING ON A BAN OF METHYLENE CHLORIDE! This delay is directly responsible for Drew's death, as his autopsy showed.

We learned of this through good friends of Drew's parents, who, as good friends of ours, asked us to communicate our concern with you.

Please address this ban immediately before anyone else is killed. That the EPA has delayed action on this substance is not acceptable. It has been banned by the U.S. Military and the European Union since 2013! What is the point of EPA if not to protect us from this very tragedy?

Susan and Roger Cox

Nancy/Doug/Ana/Jeff,

What are you going to do about it? I just found out about another death. A young man working in California fell dead from exposure to this crap that you protect. At some point when you look in the mirror you will see the faces of these people that you failed to protect all because of a profit. I believe that we all have some inherent good, it's not to late to get on the right side of history. It's not too late to do the right thing, step out and ban methylene chloride. These deaths are preventable and the only way to do that is banning consumer sales.

Ex. 6 Personal Privacy (PP) brought a lot to this world. He dared to branch out and start a small business (which was thriving). He made nitro tapped cold brew coffee and he died working on his business.

This is a picture of Drew at a wedding in September. One month after this picture he died.

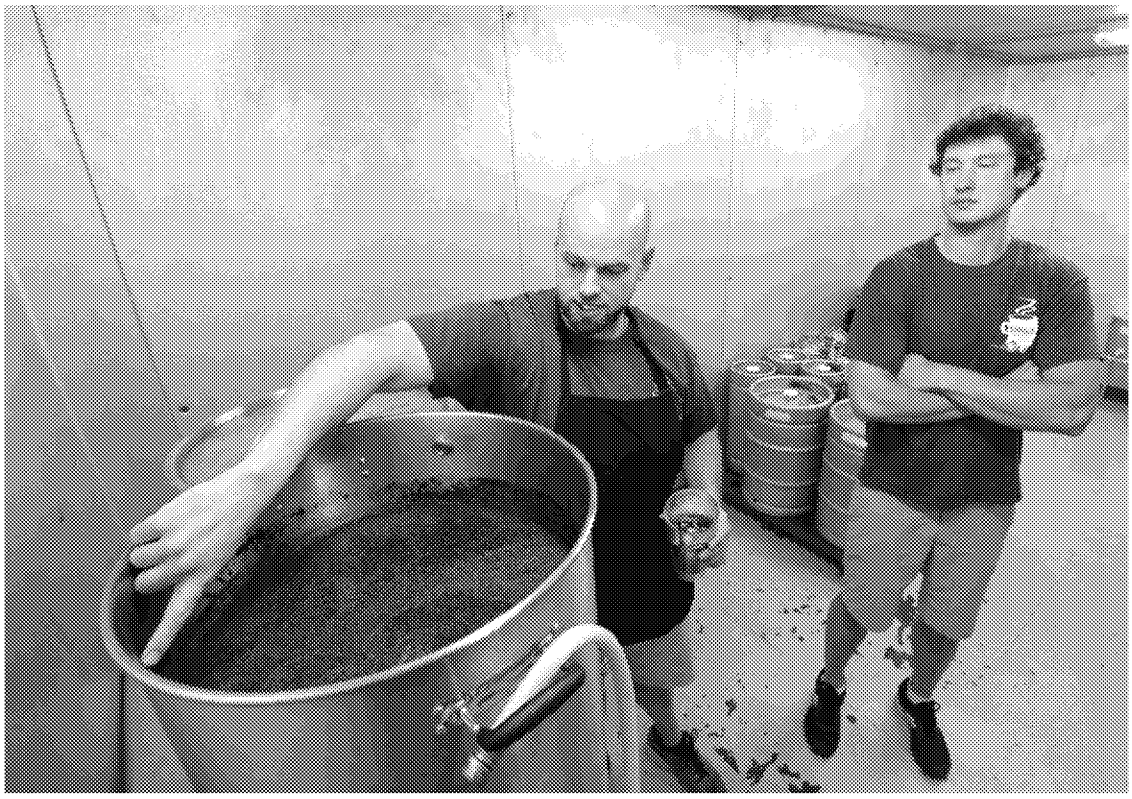
Brian Wynne



On Wed, Jan 17, 2018 at 1:29 PM, Brian Wynne Ex. 6 wrote:
Hello Nancy,

Ana and Doug are tracking this, I thought you should as well. My brother died do to exposure from a chemical that you protect "Methylene Chloride". They say that Methylene chloride is a one-two punch when fumes accumulate, well that is 100% correct. My brother slumped over, no longer breathing, because the respiratory centers of his brain switched off and the chemical turned into Carbon Monoxide in his body which also starved his heart of oxygen. He was found dead on a cold floor surrounded by a puddle of blood (from falling over). You should know that his level of exposure was so high that we couldn't donate his organs and that they had to wear respirators during his autopsy.

There is no reason to shelf the NMP rule and there is no need for "long term action". The chemical kills, there are alternatives available. Have a soul and prevent this from happening again. If you care, read the details below.

V/R,

Brian Wynne

Subject: RE: "Alleged Death from Goof Off Product
To: Parsons.Douglas@epa.gov

Hello Douglas,

My name is Brian Wynne, I am writing to follow up on a message sent to you by a family friend of ours Ex. 6 t was my brother Ex. 6 Personal Privacy (PP) who died from Methylene Chloride toxic fumes. To help clarity and remove the "alleged" from the subject "Death from Goof Off Product", I thought I would go ahead and share the cause of death as determined by the Charleston Co. Coroner (autopsy conducted on 10/16/17 at 12:45pm). Sidebar the autopsy was delayed to to a need to decontaminate my brothers body. Below is a link to his obituary and after that is the COD from the coroner.

Ex. 6 Personal Privacy (PP) was a 31 yr old small business owner that died working hour number 59 of his regular 60 hour week. He was found a day after he died and it took the Hazmat team 2 hrs to recover his body from the building. The fumes were so strong that chemical detectors were having positive hits outside of the facility. I can go on into specific details (blood, smell, cleanup) but it wouldn't be worth it.

He bought poorly labeled poison and was sold an inadequate breathing apparatus at Lowes. He was blissfully unaware of the danger he faced when he walked out of that store and started working at his coffee plant.

http://www.mcalister-smith.com/obituaries/ Ex. 6

"In light of historical information and the toxicological, gross and microscopic autopsy findings, it is in the opinion of the pathologist that the decedent died as the result of acute dichloromethane and methanol toxicity. Furthermore, the manner of death is best deemed accident. "

Toxic Fumes (paint thinner/methylene chloride/methanol exposure).

Acute dichloromethane and methanol toxicity

- Peripheral blood toxicology: dichloromethane = 77 mcg/ml, methanol = 25 mg/dl
- History of exposure to paint thinner fumes in a poorly ventilated enclosed space

Attached is a picture of the paint thinner aisle at Lowe's. Can you find the product that kills more effectively than the department of corrections?

Everything on the left side of the shelf will kill you, nothing on the right will save you. I'm not interested in debating EPA positions, I'm following up to provide the additional details that were requested.

V/R,

Brian Wynne

Subject: Ex. 6 Personal Privacy (PP) Death by Methylene Chloride

Hi Nancy,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Can I count on you and the EPA to ban methylene chloride? I look forward to hearing from you.

Steve

Subject: Methylene Chloride

Dear Mr. Pruitt, Dr. Beck, Ms. Corado, Mr. Parsons and Mr. Morris,

Our dear friend's son, Ex. 6 Personal Privacy (PP) (age 31), recently passed away while using a Methylene Chloride based paint stripper. Despite wearing a respirator and protective gloves in a ventilated area, Drew died of toxic inhalation of this chemical, according to the autopsy report.

We are deeply troubled by reports that the EPA has indefinitely postponed its ban on Methylene Chloride. (EPA-HQ-OPPT-2016-0231-0001). The United States military has banned its use since 2013.

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to toxic chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. We urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on Methylene Chloride.

Thank you for your consideration.

Sincerely,
Ann and Chris McMurray
Ex. 6

Subject: Methylene Chloride Ban

Mr. Pruitt, Dr. Beck, Ms. Corado, Mr. Parsons, Mr. Morris,

Our friend's son, Ex. 6 Personal Privacy (PP) (age31), recently passed away while using a Methylene Chloride based paint stripper. Drew was wearing a respirator and protective gloves. The area was well ventilated. The autopsy report listed the cause of death as toxic inhalation of Methylene Chloride. Drew was a wonderful person with a full life ahead of him. His tragic loss is deeply felt by his family, friends and acquaintances.

I am troubled by reports that the EPA has indefinitely postponed its ban on Methylene Chloride. (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to toxic chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on Methylene Chloride.

Your resume came to me through two different channels and although neither mentioned an interest in pesticides, I figured I would reach out.

In OCSPP we oversee the EPAs chemicals program (under TSCA) and also the Pesticides Program (under FIFRA/FFDCA/ESA).

Might you be interested in something pesticides related? I may have the ability to fill a few political spots, depending on expertise and fit.

Regards,

Nancy

Subject: Ban methylene chloride!!

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Subject: ACS Chief Technology Officer Summit - September 12 & 13

Nancy:

I hope this note finds you well.

Tom Connelly and I may have mentioned to you when we visited earlier this year that ACS has been convening industry chemistry sector Chief Technology Officers for a day and a half meeting here in Washington, DC for the past three years. This year the CTO Summit will be September 12 & 13 at The Capital Hilton, 1001 16th St NW.

We start the first day with one-on-one meetings between the CTOs, have an evening reception and then the following day a program of speakers, etc. We usually involve Members of Congress, federal agency representatives, as well as leaders from other science organizations, embassies, trade associations etc. So far the following companies have confirmed their attendance – Air Liquide, Ascend, BASF, Dow, Dupont, Evonic, FMC, FXI, GE Global Research, GCP Technologies, Grasim Industries, Honeywell, PPG, Procter & Gamble, Royal DSM, Solvay, W.L. Gore. We are still awaiting answers from over a dozen other companies. Attached is the CTO Summit program agenda book from last year to give you a better sense of participants, program, etc.

I am reaching out to you to see if you would agree to be the lunch speaker on Wednesday, September 13. The time slot for lunch is 12:00 – 1:30 PM, and our format is typically 30 minutes of presentation followed by 15 minutes of Q&A. I know the CTOs would value learning more about EPA's new approaches to regulation of importance to the chemistry sector, such as TSCA implementation, risk management plans, transparency in regulation, etc.

I am hoping your schedule will allow you to join us on September 13 and speak with, and meet, the assembled CTOs. Many thanks in advance for your consideration.

Subject: Ex. 6 Personal Privacy (PP), our son

Dr. Beck,

This is the face of our son, Ex. 6 Personal Privacy (PP) who died using the very chemical you protect, Methylene Chloride, for the financial benefit of Barr Chemicals.

It was Oct.15,2017 that my husband and I faced a police officer and the coroner at our door and heard the words that shattered our lives, "your son has died". This has been an unimaginable journey however, it's one that has led us to believe it is our duty to tell Ex. 6 Personal Privacy (PP)'s story.

His story for us began Oct 22,2017 (2 days after Drew's memorial service) when we saw the story on the front page of the NYT. It was the day we learned the name Dr Nancy Beck and the affiliation with the American Chemical Lobbyists. It has continued thru our grief, by learning all we can about Methylene Chloride and the EPA 's delay in regulating toxic chemicals.

Drew's story is just beginning and will not end until this dangerous chemical does not take another life.

We look forward to opening a dialogue with you and anyone interested in completing this story.

Sincerely,
Cindy and Hal Wynne

Subject: RE: BNA

Lynn,

Our office of public affairs has some questions:

-Is this a B&C webinar or a BNA webinar? What's the relationship? *BNA is hosting the webinar—its handles all the logistics, marketing, promotion, micro-site, registration etc. B&C is the sponsor. We manage all content, speakers, moderator, topic selection, etc. Jeff Morris participated in one late last tear.*

- is there going to be any balance or will it be EPA and industry? *Our thought was to basically have you on, and Charlie and maybe me or Jim Aidala to discuss OCSPP's priorities and plans. If you prefer an NGO, I am sure I can find one, I just do not want it unpleasant or hostile.*

- will there be Q&A? how will they be handled? *Questions are managed by a Go-To-Webinar portal so we select which ones we can accommodate in the brief time available.*

Thanks,
Nancy

Hi Nancy,

Happy New Year. I hope your holidays were enjoyable.

We (B&C) have scheduled a BNA webinar for **FEBRUARY 6, 2018, at 1:00-2:00PM EST.** The topic is chemical regulation in 2018: a sneak preview. Jim Aidala and Charlie Auer are going to speak, and we can think of no better venue than this to offer to you to identify your priorities, plans, and policies for the New Year.

I know you are out until the 11th but if you could give this some thought and let me know, we could begin marketing it immediately. BNA handles everything and because it is FREE to the public, we would expect 500-600 attendees.

Thanks

Subject: RE: ACS Chief Technology Officer Summit - September 12 & 13

Glenn-

I hope all is well. Unfortunately due to an international trip, Nancy will not be able to attend. She highly recommends Erik Baptist to fill in for her. I have attached a quick bio and headshot for Erik. Please let me know if you have any questions or concerns.

Thank you,
Derrick Bolen

Glenn,
Thank you for the invitation. This seems like a great group to meet with and I'd like to make this work if its in the realm of possible. We are in the midst of figuring out schedules for early September and hope to be able to get back to you shortly with a solid answer.

Regards,
Nancy

Subject: ACS Chief Technology Officer Summit - September 12 & 13

Nancy:

I hope this note finds you well.

Tom Connelly and I may have mentioned to you when we visited earlier this year that ACS has been convening industry chemistry sector Chief Technology Officers for a day and a half meeting here in Washington, DC for the past three years. This year the CTO Summit will be September 12 & 13 at The Capital Hilton, 1001 16th St NW.

We start the first day with one-on-one meetings between the CTOs, have an evening reception and then the following day a program of speakers, etc. We usually involve Members of Congress, federal agency representatives, as well as leaders from other science organizations, embassies, trade associations etc. So far the following companies have confirmed their attendance – Air Liquide, Ascend, BASF, Dow, Dupont, Evonic, FMC, FXI, GE Global Research, GCP Technologies, Grasim Industries, Honeywell, PPG, Procter & Gamble, Royal DSM, Solvay, W.L. Gore. We are still awaiting answers from over a dozen other companies. Attached is the CTO Summit program agenda book from last year to give you a better sense of participants, program, etc.

I am reaching out to you to see if you would agree to be the lunch speaker on Wednesday, September 13. The time slot for lunch is 12:00 – 1:30 PM, and our format is typically 30 minutes of presentation followed by 15 minutes of Q&A. I know the CTOs would value learning more about EPA's new approaches to regulation of importance to the chemistry sector, such as TSCA implementation, risk management plans, transparency in regulation, etc.

I am hoping your schedule will allow you to join us on September 13 and speak with, and meet, the assembled CTOs. Many thanks in advance for your consideration.

Subject: Please Ban Methylene Chloride Immediately!

Ms. Beck, Mr.Morris, Ms.Corado and Mr. Parsons,
We received this tragic e-mail from a friend of ours and hope that you will ban Methylene Chloride immediately to prevent any further needless deaths:
"My friend's son, Ex. 6 Personal Privacy (PP) (age 31), a healthy young man, recently died while using a Methylene Chloride-based paint stripper. He carefully followed the manufacturer's directions, using all the protective respirator equipment and skin protections recommended on the label. He bought the Methylene Chloride off of the shelf at his local Lowes store. "I'm very troubled by reports that the EPA has indefinitely postponed its ban on Methylene Chloride. (EPA-HQ-OPPT-2016-0231-0001). It is banned for use by the US Military and the European Union since 2013. "Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed, the more workers and consumers will be needlessly exposed to toxic chemicals with serious, well-documented health risks and numerous deaths resulting from your delay. "Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on Methylene Chloride immediately." Thank you,LaVon and Richard McNaughton

Subject: Methylene Chloride review, action

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

The dangers of the product are well known. There is a causal link to fatalities from using the product. There is no need to tolerate even one more.

Peter Brodhead,

concerned citizen

Douglas Parsons
Communications Director, EPA

Ana Corado
EPA Contact for Methylene Chloride, EPA

All,

A young friend of mine, Drew Wynne, of Charleston, S.C., was killed October 14, 2017, by exposure to a methylene chloride paint stripper.

The lethal risk of methylene chloride is well understood and has been the object of regulatory attention for years. EPA is considering action but five other federal agencies have issued regulations: the Consumer Product Safety Commission, the Food and Drug Administration, the Occupational Safety and Health Administration, the Department of Housing and Urban Development and the National Institute for Occupational Safety and Health.

Drew had taken the precautions listed on the label. He was wearing a respirator and gloves, and had ventilated the area. These measures were insufficient. His autopsy report said the cause of his death was toxic inhalation of methylene chloride.

In January 2017, EPA proposed a rule (EPA-HQ-OPPT-2016-0231-0001) to ban the substance as a way to protect the public, but in April the agency extended the comment period. It has yet to make a decision.

Further delay of this rule increases the risk that people will be seriously harmed or killed. Had the agency acted sooner, perhaps Drew would still be alive.

Please hasten your work on this rulemaking and implement the proposed regulation.

Sincerely,

Oliver B. Patton

Subject: RE: Draft Charge Questions - Antimicrobial Copper Clinical Trial Expert Panel Review
Attachments: EPA_Draft_Charge_Questions_for_Copper_Clinical_Study_CDA_edits_04Jan2018 v1.docx; Antimicrobial Copper Alloys - Clinical Trial Claim Expert Review Panel Charge Questions and Schedule v1.docx; Antimicrobial Copper Alloys Group 1 - Registered Label (2014).pdf

Hi John –

Thanks again for sending the draft charge questions. In the attached letter and red-line document, CDA has a few suggestions on the questions and some recommendations for moving forward, including a suggested timeline to help maintain progress in getting the review of the copper clinical trial underway and completed. We do hope that the process can get started in the next week or so (by January 15) with sending out the initial communication from EPA to prospective panel members, as noted in our letter. To that end, I will be forwarding a suggested cover letter in the next day or so.

Please let us know if you have any questions or need any additional information, and keep us posted on how things proceed.

Also, best wishes with the new posting. We have appreciated working with you and look forward to continuing to do so.

Regards,
Joe

Subject: Draft Charge Questions

Hello Joe – Please see the attached draft charge questions. Along with charge questions, we intend to provide our federal partners with a white paper that describes the general registration process including efficacy data requirements for products making public health claims. Please let me know if you have any questions.

Regards,
John

Subject: RE: Tuesday Plenary / Re: updates slides from Terje Panel SRA 2017 Tuesday

Thanks Sally et al.! I also feel like I am not the right person to talk about society-wide trends. On Joe's second point -- in my experience, which is primarily in US regulatory policy and analysis, "facts"/analysis/science have always played somewhat of a subsidiary role to other concerns, and their importance has waxed and waned – varying by policy issue as well as over time. I agree with a point Terje makes in his slides: this is not necessary a problem, it often reflects (legitimate) disagreements about how to deal with uncertainty as well as value judgments.

I've been working on some slides which I will send later, and plan to discuss (1) the role of economic analysis in the (U.S.) regulatory decisionmaking process; (2) how judgment permeates the conduct of regulatory analysis and benefit-cost analysis more generally; and (3) some recommendations for what we (SRA and risk analysts more generally) can do to improve the use and usefulness of analysis. I also expect to talk for about 10 minutes, if that is OK with you.

Subject: Re: Tuesday Plenary / Re: updates slides from Terje Panel SRA 2017 Tuesday

Thanks, Sally.

My talk, which should be about 10 minutes long, will address all but one of the questions that Terje originally sent in the plenary abstract:

1. How has the post-truth society (in which objective facts are become less influential in shaping public opinion) been able to develop?
   - *I won't be able to answer this one; it's too far outside my expertise.*
2. Why are "alternative facts" and "fake news" becoming household names?
   - *They've always been there, they simply get updated tables from time-to-time.*
3. Has science sought to stretch its domain too widely and denied uncertainties?
   - *No. And yes.*
4. Or, is the truth not comfortable enough for those in power or seeking power?
   - *It has more to do with efficacy and less to do with comfort.*

Best, Joe

> Hi Everyone.

I have read all of the correspondence. You can expect another note from me about your introductions. Please send around reactions to this note and make any suggestions that you have. I'm always open to new ideas.

Background

This is a challenging and interesting Plenary topic. I am very happy to be working with each of you on this endeavor. It seems to me that Terje is being visionary and experimental with this Plenary. I think our job is to continue to ask questions to get to the heart of the matter and see what thoughts and expertise we can offer. The Plenary is the first stage in the discussion. My hope is that we can: illuminate some areas of the broad question; identify and explain challenges; and articulate additional questions that could be the starting point for a second phase of discussion.

My input

I will be adding another dimension — asking Terje's question but in the context of a well functioning, transparent decision-making environment. In my experience in the White House and Senate, rules are circumvented, access to principal decision makers is key, and effective communication is critical. Decision-making is an inherently human endeavor. So, given that good, knowledge-based decision -making is needed, how best can we proceed?

The line-up is as follows:

Frederic- takes a broad international view, Europe mostly

Nancy - reminding us about current requirements under EPA using the example of TSCA

Linda - adding economics into the regulatory decision-making process and highlighting the phenomenon of 'judgement' in the conduct of reg analysis and benefit-cost analysis

Joe - returning to Terje's questions adding specific insight from RA profession and to look at the actual deviance in today's governance 'systems' compared to the past 20 years.

Talk lengths

Everyone (Nancy see below) has 7-10 minutes, with a sharp cut-off at 10.

Nancy, I'm asking 5-7 minutes, because she has less latitude as a current EPA employee.

Plenary Schedule

Terje - 10 minutes

Sally - 10 minutes including introductions and Plenary format

Individual Panelists — 40 minutes in total

Discussion among Panelists (facilitated by Sally — 10-15 minutes

Questions from the Audience -
15 minutes (facilitated by Sally)

Few Reactions from Terje - 3 minutes

Closing from Sally— 30 seconds

Many thanks!
Sally

Subject: Methylene chloride

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Thank you for your time,

Jimmy Batka

Subject: Draft Charge Questions

Hello Joe – Please see the attached draft charge questions. Along with charge questions, we intend to provide our federal partners with a white paper that describes the general registration process including efficacy data requirements for products making public health claims. Please let me know if you have any questions.

Regards,
John

No - I haven't succeeded yet in finding that kindly midwestern United agent who will change my flight despite no waiver in place.

But don't worry. If you want to book something without me feel free. At least I've had my Singapore sling at Raffles.

Hi Linda. I really like your approach and the slides. Your emphasis on 'judgement' is terrific for this Plenary. Thanks for all of your efforts.

Hi Everyone.

I have read all of the correspondence. You can expect another note from me about your introductions. Please send around reactions to this note and make any suggestions that you have. I'm always open to new ideas.

Background
This is a challenging and interesting Plenary topic. I am very happy to be working with each of you on this endeavor. It seems to me that Terje is being visionary and experimental with this Plenary. I think our job is to continue to ask questions to get to the heart of the matter and see what thoughts and expertise we can offer. The Plenary is the first stage in the discussion. My hope is that we can: illuminate some areas of the broad question; identify and explain challenges; and articulate additional questions that could be the starting point for a second phase of discussion.

My input
I will be adding another dimension — asking Terje's question but in the context of a well functioning, transparent decision-making environment. In my experience in the White House and Senate, rules are circumvented, access to principal decision makers is key, and effective communication is critical. Decision-making is an inherently human endeavor. So, given that good, knowledge-based decision -making is needed, how best can we proceed?

The line-up is as follows:

Frederic- takes a broad international view, Europe mostly

Nancy - reminding us about current requirements under EPA using the example of TSCA

Linda - adding economics into the regulatory decision-making process and highlighting the phenomenon of 'judgement' in the conduct of reg analysis and benefit-cost analysis

Joe - returning to Terje's questions adding specific insight from RA profession and to look at the actual deviance in today's governance 'systems' compared to the past 20 years.

Talk lengths

Everyone (Nancy see below) has 7-10 minutes, with a sharp cut-off at 10.

Nancy, I'm asking 5-7 minutes, because she has less latitude as a current EPA employee.

Plenary Schedule

Terje - 10 minutes

Sally - 10 minutes including introductions and Plenary format

Individual Panelists — 40 minutes in total

Discussion among Panelists (facilitated by Sally — 10-15 minutes

Questions from the Audience -
15 minutes (facilitated by Sally)

Few Reactions from Terje - 3 minutes

Closing from Sally— 30 seconds

Many thanks!
Sally

Subject: Methylene chloride

Ms. Beck, Mr. Morris, Ms. Corado, and Mr. Parsons,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Sincerely,

Kirk Adkins

Subject: RE: My Brother's recent death from Methylene Chloride
Attachments: Paint thinner and PPE.jpg; IMG_0198.jpg

Hello Nancy,

Ana and Doug are tracking this, I thought you should as well. My brother died do to exposure from a chemical that you protect "Methylene Chloride". They say that Methylene chloride is a one-two punch when fumes accumulate, well that is 100% correct. My brother slumped over, no longer breathing, because the respiratory centers of his brain switched off and the chemical turned into Carbon Monoxide in his body which also starved his heart of oxygen. He was found dead on a cold floor surrounded by a puddle of blood (from falling over). You should know that his level of exposure was so high that we couldn't donate his organs and that they had to wear respirators during his autopsy.

There is no reason to shelf the NMP rule and there is no need for "long term action". The chemical kills, there are alternatives available. Have a soul and prevent this from happening again. If you care, read the details below.

V/R,

Brian Wynne

Subject: RE: "Alleged Death from Goof Off Product
To: Parsons.Douglas@epa.gov

Hello Douglas,

My name is Brian Wynne, I am writing to follow up on a message sent to you by a family friend of ours Ex. 6 from Methylene Chloride toxic fumes. To help clarify and remove the "alleged" from the subject "Death from Goof Off Product", I thought I would go ahead and share the cause of death as determined by the Charleston Co. Coroner (autopsy conducted on 10/16/17 at 12:45pm). Sidebar the autopsy was delayed to to a need to decontaminate my brothers body. Below is a link to his obituary and after that is the COD from the coroner.

Drew was a 31 yr old small business owner that died working hour number 59 of his regular 60 hour week. He was found a day after he died and it took the Hazmat team 2 hrs to recover his body from the building. The fumes were so strong that chemical detectors were having positive hits outside of the facility. I can go on into specific details (blood, smell, cleanup) but it wouldn't be worth it.

He bought poorly labeled poison and was sold an inadequate breathing apparatus at Lowes. He was blissfully unaware of the danger he faced when he walked out of that store and started working at his coffee plant.

http://www.mcalister-smith.com/obituaries/ Ex. 6

"In light of historical information and the toxicological, gross and microscopic autopsy findings, it is in the opinion of the pathologist that the decedent died as the result of acute dichloromethane and methanol toxicity. Furthermore, the manner of death is best deemed accident. "

Toxic Fumes (paint thinner/methylene chloride/methanol exposure).

Acute dichloromethane and methanol toxicity

- Peripheral blood toxicology: dichloromethane = 77 mcg/ml, methanol = 25 mg/dl
- History of exposure to paint thinner fumes in a poorly ventilated enclosed space

Attached is a picture of the paint thinner aisle at Lowe's. Can you find the product that kills more effectively than the department of corrections?

Everything on the left side of the shelf will kill you, nothing on the right will save you. I'm not interested in debating EPA positions, I'm following up to provide the additional details that were requested.

V/R,

Brian Wynne

Hi Lisa,
In the message below, I mistyped your name as Linda.
Safe travels.
Sally

Hi Everyone.

I have read all of the correspondence. You can expect another note from me about your introductions. Please send around reactions to this note and make any suggestions that you have. I'm always open to new ideas.

Background
This is a challenging and interesting Plenary topic. I am very happy to be working with each of you on this endeavor. It seems to me that Terje is being visionary and experimental with this Plenary. I think our job is to continue to ask questions to get to the heart of the matter and see what thoughts and expertise we can offer. The Plenary is the first stage in the discussion. My hope is that we can: illuminate some areas of the broad question; identify and explain challenges; and articulate additional questions that could be the starting point for a second phase of discussion.

My input
I will be adding another dimension — asking Terje's question but in the context of a well functioning, transparent decision-making environment. In my experience in the White House and Senate, rules are circumvented, access to principal decision makers is key, and effective communication is critical. Decision-making is an inherently human endeavor. So, given that good, knowledge-based decision -making is needed, how best can we proceed?

The line-up is as follows:

Frederic- takes a broad international view, Europe mostly

Nancy - reminding us about current requirements under EPA using the example of TSCA

Linda - adding economics into the regulatory decision-making process and highlighting the phenomenon of 'judgement' in the conduct of reg analysis and benefit-cost analysis

Joe - returning to Terje's questions adding specific insight from RA profession and to look at the actual deviance in today's governance 'systems' compared to the past 20 years.

Talk lengths

Everyone (Nancy see below) has 7-10 minutes, with a sharp cut-off at 10.

Nancy, I'm asking 5-7 minutes, because she has less latitude as a current EPA employee.

Plenary Schedule

Terje - 10 minutes

Sally - 10 minutes including introductions and Plenary format

Individual Panelists — 40 minutes in total

Discussion among Panelists (facilitated by Sally — 10-15 minutes

Questions from the Audience -
15 minutes (facilitated by Sally)

Few Reactions from Terje - 3 minutes

Closing from Sally— 30 seconds

Many thanks!
Sally
————————————
Hi. I am delighted to be working with Terje on the Tuesday AM Plenary. The topic is timely and broad. Later today I will be sending out the order of speakers are
off ofer some comments. Thank you

Sally

Subject: methylene chloride ban status

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Nancy,

We understand from Jeff Sands that you might now be available to participate in the BPIA 2018 Spring Meeting and International Symposium in San Diego in March. We would love to have you speak at our Regulatory Committee Meeting on Tuesday, March 6th and/or give a presentation at our International Symposium on Wednesday, March 7th. Please find a detailed invitation attached. Please let us know if and how you would like to participate or if you need any additional information. Thanks.

Happy New Year,
Keith

Subject: RE: Draft Charge Questions - Antimicrobial Copper Clinical Trial Expert Panel Review

Hi John –

Thanks again for sending the draft charge questions. In the attached letter and red-line document, CDA has a few suggestions on the questions and some recommendations for moving forward, including a suggested timeline to help maintain progress in getting the review of the copper clinical trial underway and completed. We do hope that the process can get started in the next week or so (by January 15) with sending out the initial communication from EPA to prospective panel members, as noted in our letter. To that end, I will be forwarding a suggested cover letter in the next day or so.

Please let us know if you have any questions or need any additional information, and keep us posted on how things proceed.

Also, best wishes with the new posting. We have appreciated working with you and look forward to continuing to do so.

Regards,
Joe

Hi. I think a window over the weekend works better.

Depending on weather early afternoon tomorrow could work.

Thanks.

Subject: BEES-C expansion

Hi Nancy,
Happy new year! I hope things are settling down for you.
I wanted to let you know that we have taken the BEES-C and expanded it (this was the outcome of the project started by Mike Z all that time ago). We just submitted the paper to JESEE. I was reading the July 20 Fed Reg notice on TSCA this weekend (I know how to have fun) and it occurred to me that the instrument (which we are now calling ExpoQual) might be useful for EPA in terms of assessing exposure data quality. If you like, I'd be happy to chat with you about this sometime.
Cheers,
Judy

Subject: Ban of Methylene Chloride

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Best,
Ryan Smith

>>
>> Lisa - can you please bring in any examples you have about the regulatory analysis process in other countries?

Nancy— can you please put the TSCA process in a broader historical context: where is this statue? Passed recently? Processes you talk about: how different are they from 5 (my arbitrary number) years ago, how different are their interpretation, and how different are their execution?

My comments: I have modified them. I will talk through Terje's questions using my words. I will reiterate the inherent messiness of the processes because decision making is messy and a **human enterprise**.

INTROS: Terje has asked for introductions to be as brief as possible. I will provide name and affiliation. If you have one more factoid that you would like me to include, please send it.

QUESTIONS: We will be experimenting with the new meeting app. Attendees will be encouraged to send short, focused questions forward and the Secretariat (Lori Strong) will help to clump them together. We also will entertain questions from the mikes in the room.

*** Thank you very much for participating in this Plenary. It is topically a little outside of our comfort zone, but is a discussion worth starting.

Warmly,
Sally

Hi all,
Is it Okay that we upload your slides on the SRA website? It would be nice to be able to refer to them – this has been done for other plenary panels before.
If it is okay, please send me the version that we should use.
Thanks again for participating in this panel. It was great – interesting and informative – that is the message I have received from people. And that I also think.

Subject: Methylene chloride

Dear Ms. Beck, Mr. Morris and Ms. Corado,

As you may be aware from recent messages from Ex. 6 Personal Privacy (PP)'s friends and family, my friend Drew Wynne recently passed away after using a methylene chloride-based paint stripper. I went to high school with Drew and swam with him on the swim team. He was far too young and full of life to have passed away so suddenly and so needlessly.

Since learning about methylene choloride and it's harmful and potentially (and in this case actually) fatal side-effects, I am concerned by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Thank you for your time and consideration.

Kristina Castille

Hi, here's the latest from EDF Health:

EDF files extensive comments challenging EPA's changes to new chemical reviews under TSCA

By Richard Denison

Richard Denison, Ph.D., is a Lead Senior Scientist. This weekend EDF submitted detailed comments to the Environmental Protection Agency (EPA) on its implementation of changes to the New Chemicals Review Program, as well as comments responding to the agency's draft New Chemicals Decision-Making Framework. After the passage of the Lautenberg Act in June 2016, EPA started [...]

Subject: ACS Chief Technology Officer Summit - September 12 & 13

Nancy:

I hope this note finds you well.

Tom Connelly and I may have mentioned to you when we visited earlier this year that ACS has been convening industry chemistry sector Chief Technology Officers for a day and a half meeting here in Washington, DC for the past three years. This year the CTO Summit will be September 12 & 13 at The Capital Hilton, 1001 16th St NW.

We start the first day with one-on-one meetings between the CTOs, have an evening reception and then the following day a program of speakers, etc. We usually involve Members of Congress, federal agency representatives, as well as leaders from other science organizations, embassies, trade associations etc. So far the following companies have confirmed their attendance – Air Liquide, Ascend, BASF, Dow, Dupont, Evonic, FMC, FXI, GE Global Research, GCP Technologies, Grasim Industries, Honeywell, PPG, Procter & Gamble, Royal DSM, Solvay, W.L. Gore. We are still awaiting answers from over a dozen other companies. Attached is the CTO Summit program agenda book from last year to give you a better sense of participants, program, etc.

I am reaching out to you to see if you would agree to be the lunch speaker on Wednesday, September 13. The time slot for lunch is 12:00 – 1:30 PM, and our format is typically 30 minutes of presentation followed by 15 minutes of Q&A. I know the CTOs would value learning more about EPA's new approaches to regulation of importance to the chemistry sector, such as TSCA implementation, risk management plans, transparency in regulation, etc.

I am hoping your schedule will allow you to join us on September 13 and speak with, and meet, the assembled CTOs. Many thanks in advance for your consideration.

Subject: RE: Good afternoon

Flag: Flag for follow up

Good afternoon and may I say Happy New Year to you and your staff at EPA. I would like to know if there will ever be any openings for the positions of Environmental Protection Specialist in OPPTS or in OPP. If so I would love to work for the EPA as I have a vast background in Pesticides and Toxic Substances as well as CWA, CAA, NEPA, SDWA, RCRA, and I have a very knowledgeable background of the models (Pesticides Models) that EPA uses in their Environmental Risk Assessments.

Please send me an email reply to this message as I would enjoy hearing from you.

Sincerely,

Ex. 6

Subject: Methylene Chloride

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Subject: Re: My Brother's recent death from Methylene Chloride

Just a reminder. My brother died from the fumes of the product you protect.

V/R,

Brian Wynne

On Wed, Jan 17, 2018 at 1:29 PM, Brian Wynne Ex. 6 Personal Privacy (PP) wrote:

Hello Nancy,

Ana and Doug are tracking this, I thought you should as well. My brother died do to exposure from a chemical that you protect "Methylene Chloride". They say that Methylene chloride is a one-two punch when fumes accumulate, well that is 100% correct. My brother slumped over, no longer breathing, because the respiratory centers of his brain switched off and the chemical turned into Carbon Monoxide in his body which also starved his heart of oxygen. He was found dead on a cold floor surrounded by a puddle of blood (from falling over). You should know that his level of exposure was so high that we couldn't donate his organs and that they had to wear respirators during his autopsy.

There is no reason to shelf the NMP rule and there is no need for "long term action". The chemical kills, there are alternatives available. Have a soul and prevent this from happening again. If you care, read the details below.

V/R,

Brian Wynne

Subject: RE: "Alleged Death from Goof Off Product
To: Parsons.Douglas@epa.gov

Hello Douglas,

My name is Brian Wynne, I am writing to follow up on a message sent to you by a family friend of ours Ex. 6 It was my brother (Ex. 6 Personal Privacy (PP) who died from Methylene Chloride toxic fumes. To help clarify and remove the "alleged" from the subject "Death from Goof Off Product", I thought I would go ahead and share the cause of death as determined by the Charleston Co. Coroner (autopsy conducted on

10/16/17 at 12:45pm). Sidebar the autopsy was delayed to to a need to decontaminate my brothers body. Below is a link to his obituary and after that is the COD from the coroner.

Ex. 6 Personal Privacy (PP) was a 31 yr old small business owner that died working hour number 59 of his regular 60 hour week. He was found a day after he died and it took the Hazmat team 2 hrs to recover his body from the building. The fumes were so strong that chemical detectors were having positive hits outside of the facility. I can go on into specific details (blood, smell, cleanup) but it wouldn't be worth it.

He bought poorly labeled poison and was sold an inadequate breathing apparatus at Lowes. He was blissfully unaware of the danger he faced when he walked out of that store and started working at his coffee plant.

http://www.mcalister-smith.com/obituaries/ Ex. 6

"In light of historical information and the toxicological, gross and microscopic autopsy findings, it is in the opinion of the pathologist that the decedent died as the result of acute dichloromethane and methanol toxicity. Furthermore, the manner of death is best deemed accident. "

Toxic Fumes (paint thinner/methylene chloride/methanol exposure).

Acute dichloromethane and methanol toxicity

- Peripheral blood toxicology: dichloromethane = 77 mcg/ml, methanol = 25 mg/dl
- History of exposure to paint thinner fumes in a poorly ventilated enclosed space

Attached is a picture of the paint thinner aisle at Lowe's. Can you find the product that kills more effectively than the department of corrections?

Everything on the left side of the shelf will kill you, nothing on the right will save you. I'm not interested in debating EPA positions, I'm following up to provide the additional details that were requested.

V/R,

Brian Wynne

Ms. Beck, Mr. Morris and Ms. Corado,

My frien[Ex. 6 Personal Privacy (PP)]recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Megan Stokes

Subject: Re: Sewer & Water repair and replacement work

Dear Director Mike Stuhr,

Water Commissioner Nick Fish's office responded to me on your behalf,below.

Todd omitted lead pigtails from his response. Lead pigtails are one major reason for potential lead spikes in customer drinking water. Also, Todd said no PWB studies had been conducted on potential health risk from physical/hydraulic line disturbances, but offers assurances of safe drinking water. How can he provide assurances when no studies have been conducted?

Finally, why does Todd assume complimentary water filters for expectant mothers would be *paid by ratepayers,* in light of the fact that corrosion control has not been adequate at *minimizing* lead for 20+ years? Your WQ engineers call this "partial" CCT , a deliberate choice in Portland's alternative "compliance approach" to the federal LCR.
In fact, why wouldn't *the Water Bureau* reallocate* funds to pay for water filters since high water lead concentrations are still being delivered to thousands of unwitting water customer taps?

Pittsburgh - to name one city - has provided filters/bottled water for their most vulnerable. The Rand Corp. reports Pittsburgh is second to Portland for ELL's.

Sincerely,
Lorie McFarlane
*Reallocated from the Water Bureau's ample lead paint mitigation partnership funding, for instance.

On Wed, Jul 11, 2018 at 12:10 PM Lofgren, Todd <Todd.Lofgren@portlandoregon.gov> wrote:

> Lorie, Thank you for your email regarding your questions about lead in water in Portland.
>
> On behalf of Commissioner Fish and the Portland Water Bureau, I want to assure you that as a public health agency, the Portland Water Bureau takes its responsibility to reduce exposure to lead for its customers seriously. We also want to make sure your questions are answered.

In your email you express a concern regarding street construction and its potential impact on drinking water. The Water Bureau does not have any studies demonstrating an increased health risk for lead exposure due to street excavation work. In your e-mail, you referenced a study on lead released from galvanized service lines as your basis for concern. According to our staff at the Portland Water Bureau, lead from lead service lines can accumulate in the scale in galvanized plumbing. Fortunately, Portland has never used lead service lines and the main source of lead in home plumbing is from lead solder and home plumbing fixtures.

Therefore, the concern of lead release from galvanized plumbing due to construction disturbance is not likely to be an issue in Portland. While providing filters as a public health precaution during construction in cities with lead service lines may provide a benefit, the lack of lead service lines in Portland would make a similar effort an unnecessary use of ratepayer funds.

As for your other question, City Council authorized the Water Bureau to construct improved corrosion control treatment in August 2016. It's planned to be in place by April 2022, more than five years before filtration to remove *Cryptosporidium* is in place.

Until the improved corrosion control treatment is in place, the Water Bureau will continue to implement an Oregon Health Authority approved compliance plan to reduce and prevent lead exposure in Portland that began in the 1990s. The Bureau's plan takes a holistic approach to reducing lead exposure, including providing free lead-in-water testing and education to customers to help them understand their household plumbing, as well as active water age management and targeted flushing of the city's water system. The City of Portland has been and remains in continuous compliance with the Lead and Copper Rule.

Thank you again for your email. You can find more information at:
https://www.portlandoregon.gov/water/lead.

Regards, Todd

Subject: "Defined Formats" Proposal
Attachments: Defined Formats Proposal_WIrwin Comments Accepted.pdf

Flag: Flag for follow up

Hi Nancy,

I am attaching a money-saving proposal for OPP for your consideration, which was written by Dr. John Doherty, DABT and myself. I have supported Dr. Doherty on this proposal since 2011. John was furious at all the hysteria mentioned in the NYT article and in the newspapers on chlorpyrifos, his project for years. John is an excellent toxicologist with 40 years of experience, one of the very best from OPP. Our honest intent for the proposal was based on that it was the duty of all federal employees to increase efficiencies and to save the taxpayers money. John was shocked that he was faced with intimidation in HED on this idea, even though it would save OPP $ millions. He has recently become convinced that there is a conflict of interest by those whom originated from CROs to support the idea.

John recently made a comment that he was considering sending the proposal to the IG for consideration. I don't know whether he was joking or not. I can't control John's actions. But to be fair to you, I thought that you should be sent our proposal in case he does. All that I can say is that the pharma industry from where I originated is far more efficient than the pesticides office and our ideas would have increased productivity in OPP.

I hope that all is well there. Thank you for your time and consideration.

Cheers,

Dr. William Irwin, DABT, ERT
Toxicologist

Executive Summary
This proposal defines a system to improve efficiency and to reduce taxpayer costs in the review of the toxicity, chemistry, fate and exposure studies submitted in support of the registration of pesticides to the Office of Pesticide Programs of the Environmental Protection Agency. This Defined Formats approach can save OPP $ millions/year in staff and contract work expenses derived from the taxpayers. Since the format was first proposed in the mid 1990's, OPP could have saved over $50 million in contract and staff expenses across all the disciplines. The Defined Formats system simply allows the pesticide companies to write the pesticide draft study analysis from the full study reports which are then reviewed by the EPA, saving taxpayer money and greatly speeding up the registration process. The pesticide companies are the experts on the study results and it would be much more efficient if they wrote the evaluation analysis and the EPA simply reviewed the evaluations for accuracy. The Defined Formats would better allow the EPA to meet the deadlines and obligations of FIFRA, FQPA and PRIA, for increased protection of children at decreased cost to the taxpayers. The Defined Formats approach to company data evaluation has applications in other offices across the Agency for further savings to the taxpayers. The computer technology to support this proposal has been available for decades.

Dear Nancy,

Thank you for taking the time to meet with me Friday.

After some reflection, I would be further interested in exploring the possibility of a political position at EPA. Working on TSCA implementation would be very appealing given the number of years I spent lobbying for the reform. I would also be interested in exploring positions where I would have the opportunity to work with industry: DFE, the new smart sector program, and compliance assistance come to mind, but I am sure there might be other possibilities as well.

I have enclosed my CV and would welcome any feedback you have.

On Wed, Jan 17, 2018 at 1:29 PM, Brian Wynne Ex. 6 Personal Privacy (PP) > wrote:
Hello Nancy,

Ana and Doug are tracking this, I thought you should as well. My brother died do to exposure from a chemical that you protect "Methylene Chloride". They say that Methylene chloride is a one-two punch when fumes accumulate, well that is 100% correct. My brother slumped over, no longer breathing, because the respiratory centers of his brain switched off and the chemical turned into Carbon Monoxide in his body which also starved his heart of oxygen. He was found dead on a cold floor surrounded by a puddle of blood (from falling over). You should know that his level of exposure was so high that we couldn't donate his organs and that they had to wear respirators during his autopsy.

There is no reason to shelf the NMP rule and there is no need for "long term action". The chemical kills, there are alternatives available. Have a soul and prevent this from happening again. If you care, read the details below.

V/R,

Brian Wynne

Subject: RE: "Alleged Death from Goof Off Product
To: Parsons.Douglas@epa.gov

Hello Douglas,

My name is Brian Wynne, I am writing to follow up on a message sent to you by a family friend of ours [redacted] Ex. 6 It was my brother (Drew Wynne) who died from Methylene Chloride toxic fumes. To help clarify and remove the "alleged" from the subject "Death from Goof Off Product", I thought I would go ahead and share the cause of death as determined by the Charleston Co. Coroner (autopsy conducted on 10/16/17 at 12:45pm). Sidebar the autopsy was delayed to to a need to decontaminate my brothers body. Below is a link to his obituary and after that is the COD from the coroner.

Ex. 6 Personal Privacy (PP) was a 31 yr old small business owner that died working hour number 59 of his regular 60 hour week. He was found a day after he died and it took the Hazmat team 2 hrs to recover his body from the building. The fumes were so strong that chemical detectors were having positive hits outside of the facility. I can go on into specific details (blood, smell, cleanup) but it wouldn't be worth it.

He bought poorly labeled poison and was sold an inadequate breathing apparatus at Lowes. He was blissfully unaware of the danger he faced when he walked out of that store and started working at his coffee plant.

http://www.mcalister-smith.com/obituaries/ Ex. 6

"In light of historical information and the toxicological, gross and microscopic autopsy findings, it is in the opinion of the pathologist that the decedent died as the result of acute dichloromethane and methanol toxicity. Furthermore, the manner of death is best deemed accident. "

Toxic Fumes (paint thinner/methylene chloride/methanol exposure).

Acute dichloromethane and methanol toxicity

- Peripheral blood toxicology: dichloromethane = 77 mcg/ml, methanol = 25 mg/dl
- History of exposure to paint thinner fumes in a poorly ventilated enclosed space

Attached is a picture of the paint thinner aisle at Lowe's. Can you find the product that kills more effectively than the department of corrections?

Everything on the left side of the shelf will kill you, nothing on the right will save you. I'm not interested in debating EPA positions, I'm following up to provide the additional details that were requested.

V/R,

Brian Wynne

Subject: RE: BPIA Speaking Invitation

Keith,
Thank you for the invitation. I would indeed be interested in participating if we can make it work with my schedule. I will need to be in San Diego on March 11th (Society of Toxicology Meeting) so if there was a way to efficiently combine the two meetings, without having me out of the office for too long that would be ideal. Can you please work with Kaitlin Keller on our team to help sort out what participation and topics may be best and then perhaps we can see where that leaves us date wise.

Many thanks,

Nancy

Nancy,

We understand from Jeff Sands that you might now be available to participate in the BPIA 2018 Spring Meeting and International Symposium in San Diego in March. We would love to have you speak at our Regulatory Committee Meeting on Tuesday, March 6th and/or give a presentation at our International Symposium on Wednesday, March 7th. Please find a detailed invitation attached. Please let us know if and how you would like to participate or if you need any additional information. Thanks.

Happy New Year,
Keith

Keith,
Thanks for the offer. By March we will hopefully have a senate confirmed Assistant Administrator in place and thus there will be more time for travel.
I will likely be in San Antonio on March 11th, but perhaps if your meeting runs through the end of the week of the 7th, I could do both.

Subject: Methylene Chloride Ban

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

-Margaux Lynam

Attachments: SRA-AM 2017 plenary panel Tuesday Intro Terje Aven1.ppt

Hi Nancy,
How are things going concerning the preparation for the Panel ?
I know we are a little early, but we very much would appreciate some feedback before the end of the month to be able to plan the discussion in a good way.

What we ask from you now is an indication of what type of message – themes- that you would like to highlight - in text or using slides.

Thanks a lot

Best
Terje

Kopi: Kane, Sally <[Ex. 6 Personal Privacy (PP)]
Emne: plenary panel session SRA Tuesday

Hi all,
Thanks for participating in the panel, it will be great :-)
I will have an introduction to the panel discussion, see enclosed preliminary slides with associated text.
A key point made is the important role risk analysis has and should have in understanding and characterizing the 'humbleness' part of science and clarifying the limits of the 'confidence' part.

After the Introduction Sally will take over, she is the Moderator. She will introduce you.
The idea is that each of you has a prepared introduction of some 5-7 minutes, prepared with slides if you like, with clear statements –linked to the challenges made in the abstract and hopefully inspired by my Intro and comments made by Sally:

«Has RA's role changed over time? How? What are current challenges? What seems easier or more well regarded currently? Can RA help rebuild trust in governance and public decision-making? How? «

We would not like to restrict creativity and what you find most important on this matter, so feel free to angle things as you like. Focusing on some few – one or two – themes is however recommended. To be able to lead the panel discussion in a good way, we think it is wise to have a process in advance – starting now – where we share some of the ideas we have. The aim of this dialogue is to make the panel as interesting as possible by being informed what is coming, so that one can get ideas for comments and questions. We would like to have a lively discussion so the point is not to use this dialogue to obtain some unity or consensus at this stage (rather the opposite ☺)

Looking forward to hearing from you. What we ask from you now is an indication of what type of message – themes- that you would like to highlight - in text or using slides.
We would very much appreciate if we could get some input before 15 November.
Thanks a lot.
Enjoy the weekend.

Best
Terje

Tuesday morning

Evidence and knowledge-based decision-making in a risk analysis setting: Desired reality or Misconception?

How has the post-truth society (in which objective facts are become less influential in shaping public opinion) been able to develop? Has science sought to stretch its domain too widely and denied uncertainties? Or was the truth not comfortable enough for those in power or seeking power? Why are "alternative facts" and "fake news" becoming household names?

As risk analysts we are aware that evidence is not only related to facts but also to beliefs and concerns that need to be taken into account in risk management and regulation. We are also aware that value judgments are equally important as a basis for decision-making as is evidence in the form of data, information and justified beliefs. However, there are clear data-driven insights that one cannot ignore. Climate change is real. And so is the risk of particulate matter for our health.

The panel will discuss the role of science and in particular risk science in keeping the delicate balance between factual statements and acknowledgement of uncertainty and ambiguity.

Introduction Terje Aven

Moderator: Sally M. Kane

Panelists: Joe Árvai, Nancy Beck, Frederic Bouder, Lisa A. Robinson

Terje Aven, University of Stavanger, Norway

Sally M. Kane, Independent Consultant

Joe Árvai, University of Michigan

Nancy Beck, US Environmental Protection Agency (EPA)

Frederic Bouder, Maastricht University, The Netherlands

Nancy,

I hope all is well with you and you are loving your new position. now that you've been at EPA a little while, I wanted to reach out to see if it made sense to arrange a meeting to show you our progress on SciPinion. We've developed some great findings, including investigating the issue of reproducibility of findings from peer review panels. If it makes sense, I'd be happy to make a trip to DC to have a meeting. I'm actually here this week, but would be happy to come back any other time.

Best regards and happy holidays.

Hi Sarah,

Week off was great but I started a new job at EPA on May 1 as the Deputy Assistant Administrator of the Office of Chemical Safety and Pollution Prevention (chemicals and pesticides). We have some crazy deadlines so my life wont be back to normal until after June 22nd.

Perhaps we can catch up this summer.

Regards,

Nancy

Subject: RE: Accelerating the Pace of Chemical Risk Assessment teleconference

Attachments: TKPlate.docx

Dear All,

A new case study we would like to launch under ACPRA: TKplate as an open source TK modelling platform.
The project was briefly presented at the Helsinki meeting. We are now making the big jump inviting you to join and seeking your support.

Best Regards

JL

Subject: Accelerating the Pace of Chemical Risk Assessment teleconference

Dear all,

Thank you again for the productive meeting in Helsinki. As you recall, we asked for updated abstracts on the case studies by December 8, 2017. If you have not already, please send us your update as soon as possible and I will share with all prior to our teleconference. Please note the new call-in information listed on the agenda. As a reminder, materials from the October workshop can be found at

Ex. 6

January 18, 2018 APCRA Teleconference Agenda
Conference call numbe **Ex. 6**

1. **Follow-up from October 2017 workshop**
   a. **General Feedback**
      i. Specific feedback on workshop
   b. **Action items from the workshop**
      i. Update on case studies (case study leads)
         1. Activity since the workshop

2. Current status
3. Timeline to completion

ii. Update on communication on use of NAMs

1. Scope of activity

iii. Outreach about APCRA activities (*Please share any outreach activities with Maureen Gwinn at* gwinn.maureen@epa.gov)

1. Overview presentation at OECD IATA Case study meeting (November 2017; slides in share drive)
2. Draft commentary submitted to journal (ECHA, EPA, HC)
3. Society of Toxicology (March 2018)

a. Poster presentation on workshop overview (ECHA, EPA, HC)
b. Platform presentation on case study #3 (EPA)
c. Others attending/presenting at Society of Toxicology meeting in March?

2. Other topics?

For the topic on outreach on the agenda, please share any outreach activities with Maureen Gwinn at gwinn.maureen@epa.gov if you'd like them included in the notes.

Also, for your information, I am sharing a link to a recently released ECHA report that might be of interest to you. The report is on the regulatory applicability of non-animal approaches under the three EU chemicals regulations coordinated by ECHA (REACH, CLP and BPR).

https://www.echa.europa.eu/-/more-progress-needed-to-replace-animal-tests-under-eu-chemicals-laws

Thank you,

Maureen

Subject: Please act on banning Methylene Chloride as soon as possible

Ms. Beck, Mr. Morris and Ms. Corado,

My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Thank you for your consideration,

Michael Wade

Subject: Accelerating the Pace of Chemical Risk Assessment teleconference

Dear all,

Thank you again for the productive meeting in Helsinki. As you recall, we asked for updated abstracts on the case studies by December 8, 2017. If you have not already, please send us your update as soon as possible and I will share with all prior to our teleconference. Please note the new call-in information listed on the agenda. As a reminder, materials from the October workshop can be found at

Ex. 6

January 18, 2018 APCRA Teleconference Agenda
Conference call number Ex. 6 Personal Privacy (PP) **code** Ex. 6 Personal Privacy (PP)

1. **Follow-up from October 2017 workshop**
    a. **General Feedback**
        i. Specific feedback on workshop
    b. **Action items from the workshop**
        i. Update on case studies (case study leads)
            1. Activity since the workshop
            2. Current status
            3. Timeline to completion
        ii. Update on communication on use of NAMs
            1. Scope of activity

iii. Outreach about APCRA activities (*Please share any outreach activities with Maureen Gwinn at* gwinn.maureen@epa.gov)
    1. Overview presentation at OECD IATA Case study meeting (November 2017; slides in share drive)
    2. Draft commentary submitted to journal (ECHA, EPA, HC)
    3. Society of Toxicology (March 2018)
    a. Poster presentation on workshop overview (ECHA, EPA, HC)
    b. Platform presentation on case study #3 (EPA)
    c. Others attending/presenting at Society of Toxicology meeting in March?

2. Other topics?

For the topic on outreach on the agenda, please share any outreach activities with Maureen Gwinn at gwinn.maureen@epa.gov if you'd like them included in the notes.

Also, for your information, I am sharing a link to a recently released ECHA report that might be of interest to you. The report is on the regulatory applicability of non-animal approaches under the three EU chemicals regulations coordinated by ECHA (REACH, CLP and BPR).

https://www.echa.europa.eu/-/more-progress-needed-to-replace-animal-tests-under-eu-chemicals-laws

Thank you,

Maureen

Subject: Re: My Brother's recent death from Methylene Chloride
Attachments: drew.jpg

Good morning Nancy!

Not only can Methylene Chloride kill you instantly, long-term exposure can cause cancer. Lung cancer, liver cancer, breast cancer. Even concentrations below applicable occupational exposure limits, may increase the risk of cancer.

This is so bad that the DOD won't even use it (and they invented it).

Do the right thing.

Below is a picture of my brother with my son. Have you ever had to explain heaven to a 3 year old? I hope you never have to experience that.

Have a nice day.

Brian Wynne

On Wed, Jan 17, 2018 at 1:29 PM, Brian Wynne <Ex. 6 Personal Privacy (PP)> wrote:
Hello Nancy,

Ana and Doug are tracking this, I thought you should as well. My brother died do to exposure from a chemical that you protect "Methylene Chloride". They say that Methylene chloride is a one-two punch when fumes accumulate, well that is 100% correct. My brother slumped over, no longer breathing, because the respiratory centers of his brain switched off and the chemical turned into Carbon Monoxide in his body which also starved his heart of oxygen. He was found dead on a cold floor surrounded by a puddle of blood (from falling over). You should know that his level of exposure was so high that we couldn't donate his organs and that they had to wear respirators during his autopsy.

There is no reason to shelf the NMP rule and there is no need for "long term action". The chemical kills, there are alternatives available. Have a soul and prevent this from happening again. If you care, read the details below.

V/R,

Brian Wynne

Subject: RE: "Alleged Death from Goof Off Product
To: Parsons.Douglas@epa.gov

Hello Douglas,

My name is Brian Wynne, I am writing to follow up on a message sent to you by a family friend of ours Ex. 6 was my brother Ex. 6 Personal Privacy (PP)) who died from Methylene Chloride toxic fumes. To help clarify and remove the "alleged" from the subject "Death from Goof Off Product", I thought I would go ahead and share the cause of death as determined by the Charleston Co. Coroner (autopsy conducted on 10/16/17 at 12:45pm). Sidebar the autopsy was delayed to to a need to decontaminate my brothers body. Below is a link to his obituary and after that is the COD from the coroner.

Ex. 6 Personal Privacy (PP) was a 31 yr old small business owner that died working hour number 59 of his regular 60 hour week. He was found a day after he died and it took the Hazmat team 2 hrs to recover his body from the building. The fumes were so strong that chemical detectors were having positive hits outside of the facility. I can go on into specific details (blood, smell, cleanup) but it wouldn't be worth it.

He bought poorly labeled poison and was sold an inadequate breathing apparatus at Lowes. He was blissfully unaware of the danger he faced when he walked out of that store and started working at his coffee plant.

http://www.mcalister-smith.com/obituaries Ex. 6

"In light of historical information and the toxicological, gross and microscopic autopsy findings, it is in the opinion of the pathologist that the decedent died as the result of acute dichloromethane and methanol toxicity. Furthermore, the manner of death is best deemed accident. "

Toxic Fumes (paint thinner/methylene chloride/methanol exposure).

Acute dichloromethane and methanol toxicity

- Peripheral blood toxicology: dichloromethane = 77 mcg/ml, methanol = 25 mg/dl
- History of exposure to paint thinner fumes in a poorly ventilated enclosed space

Attached is a picture of the paint thinner aisle at Lowe's. Can you find the product that kills more effectively than the department of corrections?

Everything on the left side of the shelf will kill you, nothing on the right will save you. I'm not interested in debating EPA positions, I'm following up to provide the additional details that were requested.

V/R,

Brian Wynne

Upcoming National Academies Workshop: "Review of Advances Made to the IRIS Process"

The National Academy of Sciences (NAS) will be holding a public workshop to review advances made to the IRIS process on February 1st and 2nd at The National Academies of Sciences, Engineering, and Medicine in Washington D.C. During the workshop, EPA will present on implemented and ongoing changes in the IRIS Program. The NAS committee will evaluate the changes that have been made in response to previous NAS reports. Stakeholder input is welcome -- public comment slots are available at the workshop; availability is based on a first come, first served basis. Registration, the workshop agenda, and more general information can be found at https://www.eventbrite.com/e/review-of-advances-made-to-the-iris-process-a-workshop-tickets-40108723271. Questions or comments should be directed to the NAS at best@nas.edu.

Nancy,

I sent Dr. Doherty an email informing him that you would like to meet with him. Unless he is on a vacation, I expect an answer in a couple of days.

I am attaching my CV to support my scientific credentials. You can forward the files to Charlotte if you like.
Mike was in RAD today, he may be the only toxicologist currently at the Agency with more toxicology board certifications than myself. Todd Stedeford and I were excellent colleagues, as you know. I am attaching a reference letter from Ray Kent, he is the best scientist in OPP without question and he is an excellent resource for unbiased science. I have degrees in Chemistry, Physics and Mathematics, with a PhD in Biochemistry/Molecular Biology, so the multi-disciplinary education is a powerful combination to solve problems.

Cheers,

Dr. William Irwin, DABT, ERT
Toxicologist

Subject: For your thoughtful consideration

Ms. Beck, Mr. Morris and Ms. Corado,

Good afternoon. My friend Ex. 6 Personal Privacy (PP) recently passed away after using a methylene chloride-based paint stripper. I'm very troubled by reports that the EPA has indefinitely postponed its ban on methylene chloride (EPA-HQ-OPPT-2016-0231-0001).

Protecting American consumers and workers from dangerous chemicals is at the core of your agency's mission. The longer these rules are delayed the more workers and consumers will be needlessly exposed to chemicals with serious, well-documented health risks.

Action on this toxic chemical is long overdue. I urge the EPA to reconsider its decision to delay the rule making process. You should finalize the proposed ban on methylene chloride as soon as possible.

Warm regards,

Chris Dial

Pat,
I'm looping in our special assistants Derrick and Kaitlyn to see if they can find a 30 minute window for us.
I know Dec 11 will not work (all day TSCA meeting) but we can see if the other windows are options.

Regards,
Nancy

Subject: RERESPONSE REQUESTED-- Briefing on Proposal to Exempt from Tolerance FDA Approved Food Additives (Flavorings) for Use as Fragrance Ingredients in Food Contact Antimicrobials
Importance: High

Nancy/ Rick, I hope you are both well and preparing for Turkey Day !...and a well -deserved break....

My Innovation Reform Group (Clorox, P&G, Reckitt Benckiser) has worked collaboratively with OPP for the last 18 years on policy and process reforms that have yielded benefits to EPA and the regulated community. One area of concentration has been fragrances and how best to provide EPA with data on fragrance ingredient safety in order that registrants making sanitizers and disinfectants might make changes efficiently and quickly without any compromise to public health protection. The work of the IRG companies along with the fragrance industry resulted in the EPA Fragrance Ingredient List (FIL) containing about 1500 approved fragrance ingredients and maintained by IIAB in RD and the EPA Fragrance Notification Program , which has worked flawlessly for nearly a decade saving registrants and OPP precious resources.

The IRG submitted a proposal (attached) under E.O. 13777 suggesting that EPA use existing authority to exempt from tolerance requirements about 1100 FDA approved direct and indirect food additives. These are naturally derived flavoring ingredients reviewed and approved by independent expert panels (JECFA, FEMA); these are commonly consumed by all of us in our daily diet. The 1100 represent a substantial portion of the EPA FIL and would allow registrants making food contact sanitizers/disinfectants to continue to sell fragranced products demanded by their customers for use in the kitchen.

Why is this necessary ? Simply put, OPP's view of residues left from food contact disinfectants has changed. Previously, it was assumed that –if a potable water rinse was required—no residues of concern would remain. That is no longer the case; the effect of a water rinse has been diminished and worst case residues are assumed. In addition , OPP's definition of a " food contact surface" has been substantially expanded. Virtually no fragrance ingredients currently have EPA tolerances or tolerance exemptions. The process of obtaining them for 1500 ingredients is daunting, lengthy, expensive and would result in no risk reduction or public health benefit. If IIAB completed one tolerance review/ week, the process could take 22 years and cost tens of millions of dollars. FDA has reviewed the safety of these food additives; they are commonly consumed; accepting FDA's science instead of conducting a duplicative review just makes good sense.

The IRG briefed RD (Mike) and AD (Steve) on 11/2 on the proposal (see attached PP slides). We would now propose to brief the two of you with RD, AD and perhaps OGC present. The following dates are suggested :

Monday 12/11

Tuesday 12/12

Wednesday 12/13

This is a science based initiative that will reduce burdens on EPA and the private sector; avoid duplicative reviews by sister Agencies; allow limited OPP resources to be more effectively directed while protecting public health. We won't waste your time !

Happy Thanksgiving and I look forward to hearing what might work for you on those dates.

Pat

Hi Nancy,

Our 4th (of 5) webinar is on chemical identity and CBI and we would LOVE to get Tracy and Scott on a one hour program with Rich (see draft micro-site doc). Tracy and Scott need EPA signoffs, which have been slow in coming. Anything you can do?

Subject: Re: BEES-C expansion

I'd be happy to come down and talk with you and your staff about our work and what you are doing to assess data quality.
Mary, would you like to suggest some days/times that are convenient for EPA folks? I would be taking the train down so mid-day would probably be best for me. If you let me know what month/weeks you are considering, I can tell you what my travel schedule is around that time.
Best,
Judy

> I wanted to let you know that we have taken the BEES-C and expanded it (this was the outcome of the project started by Mike Z all that time ago). We just submitted the paper to JESEE. I was reading the July 20 Fed Reg notice on TSCA this weekend (I know how to have fun) and it occurred to me that the instrument (which we are now calling ExpoQual) might be useful for EPA in terms of assessing exposure data quality. If you like, I'd be happy to chat with you about this sometime.

Subject: Meeting Request--Efficacy Working Group on OECD Method Implementation Issues

Importance: High

Nancy/ Rick, the companies comprising the Efficacy Working Group (..the other "EWG" (;) have asked me to request a meeting with both of you to discuss concerns they have regarding OPP's plans to implement the OECD Quantitative Efficacy Method for Bacteria and TB during the first few months of 2018. Those companies are :

1) Ecolab
2) Reckitt Benckiser
3) Procter & Gamble
4) Lonza
5) Stepan
6) Mason

These companies and others have expressed longstanding concerns about the readiness of the OECD Method for implementation; its reproducibility, and how the new method will co-exist with well-established efficacy methods (AOAC Use Dilution Method, EN-13697) currently in place to test the efficacy of antimicrobial products.

The potential market impact of the OECD Method is enormous since certain chemistries (Quaternary Compounds, Phenols) which consistently pass the UDM test for hospital disinfectants regularly fail the OECD Method; these compounds comprise the majority of hospital disinfectants used in the U.S today. An estimated 75% of all concentrate disinfectants currently marketed will fail the OECD Method and as many as 1500 EPA registered disinfectant products will be jeopardized, requiring reformulation with Active Ingredient levels at much higher concentrations.

The EWG companies have a long historical involvement with the OECD Method , participating is test collaboratives and testifying in Paris in 2011 at the OECD when concerns expressed by the German and French delegations delayed the method's full approval. We have worked closely with BEAD and AD on these matters and continue that collaboration.

With a Guidance Document implementing the OECD Method for use in the U.S. now imminent, we want to ensure that broad industry concerns are expressed clearly and in a timely fashion. To that end, the EWG companies are requesting a one hour meeting with you for either January 9th or January 11th . We could meet anytime between 9am -5pm on 1/9 and anytime between 1-5 pm on January 11th.

Thanks in advance for your consideration of this request and we look forward to the discussion.

Pat

Subject: Additional Info: Comment Period ends Dec 11, 2017 for Chemical Data Reporting (CDR) Requirements for Inorganic Byproducts

We apologize for the additional e-mail, but thought it may be helpful to provide more detailed directions (available at: https://www.regulations.gov/document?D=EPA-HQ-OPPT-2016-0597-0072). There is more information provided on the website than pasted below so we encourage you to visit the site.

Summary

EPA published a document in the Federal Register of August 18, 2017 (82 FR 39402) concerning meetings of the Negotiated Rulemaking Committee (Committee). This document cancels the meeting scheduled for October 25-26, 2017. The Committee decided at the September 13-14, 2017, meeting that it could not reach consensus, has concluded its discussions, and that the fourth meeting, scheduled for October 25-26, 2017, is not needed. Though the Committee has concluded its discussions, EPA is providing an opportunity for the public to offer input about approaches that would reduce burden associated with the reporting of inorganic byproducts while maintaining the Agency's ability to receive the information it needs to understand exposure. The docket established for the negotiated rulemaking public meetings will be open to receive public input for 60 days following publication of this document.

Dates

Comments must be received on or before December 11, 2017.

Addresses

Submit your comments, identified by docket identification (ID) number EPA-HQ-OPPT-2016-0597, by one of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Mail: Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

Hand Delivery: To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

For Further Information Contact

Any member of the public wishing to obtain information concerning the cancellation of this meeting may contact Jonah Richmond, Designated Federal Officer (DFO), Conflict Prevention and Resolution Center, Office of General Counsel, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (202) 564-0210; email address: *Richmond.jonah@epa.gov.* General information about the Committee, as well as any updates concerning the information included in this document, may be found at *https://www.epa.gov/chemical-data-reporting/negotiated-rulemaking-committee-chemical-data-reporting-requirements.*

For technical information contact: Susan Sharkey, Chemical Control Division (7405M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (202) 564-8789; email address: *sharkey.susan@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554-1404; email address: *TSCA-Hotline@epa.gov.*

Subject: Reminder: Comment Period ends Dec 11, 2017 for Chemical Data Reporting (CDR) Requirements for Inorganic Byproducts

Hello,

This e-mail is being sent to prior Committee Members of the EPA Chemical Data Reporting (CDR) Inorganic Byproducts Negotiated Rulemaking and people who were interviewed early in the process, observed meetings or asked to be on the communication distribution list.

We are sending a reminder that the public comment period ends December 11, 2017. EPA requests input on approaches that would reduce reporting burden while maintaining the Agency's ability to receive the information it needs to understand exposure. You can attach comments directly to the docket at: https://www.regulations.gov/docket?D=EPA-HQ-OPPT-2016-0597.

If you have any questions, please contact Susan Sharkey, EPA (202-564-8789; sharkey.susan@epa.gov). More information about the Negotiated Rulemaking Committee and relevant resources is included in the below e-mail.

Thanks!

Laura and Chris

Facilitators
Laura Sneeringer, Senior Associate, Consensus Building Institute, 720-251-9842, lsneeringer@cbuilding.org
Christopher Moore, Ph.D., Partner, CDR Associates, 303-918-2677, cmoore@mediate.org

---

EPA is cancelling the remaining scheduled meeting of the Negotiated Rulemaking Committee to Negotiate a Proposed Rule to Limit Chemical Data Reporting (CDR) Requirements for Certain Inorganic Byproducts. The meeting was scheduled for October 25 to 26, 2017. EPA is cancelling this meeting because the Committee determined that it was not able to reach consensus on regulatory approaches and concluded its discussions, which were required by TSCA and which were conducted in good faith. While the negotiated rulemaking process is concluding and will not be reopened, EPA is providing additional opportunity for the public to offer input for 60 days about approaches that would reduce reporting burden while maintaining the Agency's ability to receive the information it needs to understand exposure.

The objective of the Committee was to negotiate a proposed rule that would limit chemical data reporting requirements, under subsection 8(a) of the Toxic Substances Control Act (TSCA), for manufacturers of any inorganic byproducts when such byproducts are subsequently recycled, reused, or reprocessed. This negotiation process was required by TSCA, as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act.

The Committee was formally convened as a Federal Advisory Committee in June 2017, following a six-month process of public notification, identification and engagement with potential Committee members, and development of a balanced membership. It met three times from June through September 2017. Information about the Committee, including past meeting agendas and presentations have been posted to the Committee webpage: https://www.epa.gov/chemical-data-reporting/negotiated-rulemaking-committee-chemical-data-reporting-requirements. These materials, as well as additional materials such as the Committee's charter and meeting summaries, are available in docket EPA-HQ-OPPT-2016-0597 in regulations.gov. The docket established for the negotiated rulemaking public meetings will be open for any additional public input for 60 days following the publication of the Federal Register Notice.

You can unsubscribe or update your subscriptions or e-mail address at any time on yourSubscriber Preferences Page. All you will need is your e-mail address. If you have any questions or problems, please e-mail subscriberhelp.govdelivery.com for assistance.

Subject: Re: Biostimulant Question

Thanks Bob, we'll loop back in the next few days via Dave and Keith. I think we want to identify the right person to help pull together data to support a robust case. Having a better idea of what is needed to support an OIRA review will help us decide who that person or entity might be. As you know, the situation is a bit dispersed and ambiguous right now for this sector and the products seeking market entry. So, clarity is a goal here. Thanks, K

> Nancy, thank you. If the document is still with EPA, both BPIA and BSC would be interested in seeing what we can do to assist in pulling together data to support advancing the guidance.
>
> Both BPIA and BSC have been working with Lynn B. on the EPA guidance and with Stan Abramson on Farm Bill language on legal aspects of the biostimulant policy, and both

organizations are willing to chip in to pull together data needed to support the economic and cost-benefit analysis aspects that also need to be covered.

In order to make sure our data gathering hits the necessary mark, we will reach out to Bob and request a meeting. We will also review the OMB Circular A-4 and see if it provides any insights about what would be useful and applicable to our particularly conundrum. Keith and David, I think the ball is in our court to follow up with Bob. Thanks, with best wishes, Keith

Subject: RE: Biostimulant Question

Keith,

We appreciate your interest in this guidance. The guidance is not yet with OMB. EPA staff are still working on the analyses and documentation. Bob McNally (cc'd above) is the best point of contact at EPA if you would like to engage with EPA on this topic. I'm sure the division would welcome any information, data, or analyses you may have available to inform their work. Also, there is an industry-based biostimulants working group that is coordinated by Lynn Bergeson if you would like to reach out to her as well.

Regarding OMB, I think it may be difficult to get traction with them on a document OMB does not have under review. While OMB reviews regulations and guidance documents, they typically do not engage with the Agencies in the development of the documents/analyses themselves, although they do provide overarching guidance (see for example OMB Circular A-4). If you were interested in speaking with OMB, I would suggest you reach out to OIRA within OMB.

Please let me know if you have additional questions.

Best,

Nancy

Subject: Biostimulant Question

Nancy, I hope you are well. As you may know, the industry has been working with EPA-BPPD to complete a guidance document that provides clarity about what types of biostimulants fall within the plant growth regulator definition used under FIFRA.

We understand that the guidance document is now with OMB and have been told that OMB may be looking for an economic analysis to support why this guidance document has value to the industry and to the US economy.

If this is the case, the industry is willing to work with EPA and OMB to pull together data to support this review. In order to support this effort, if needed, the industry would appreciate an opportunity to discuss, with EPA and OMB, what information would be needed to support moving this guidance forward. The BPPD staff apparently have not had direct contact with OMB, so we do not know who the industry should be reaching out to at OMB to start a discussion about what information would be useful to support the decision-making process.

Could you possibly help us identify the appropriate contact(s) at EPA and OMB to help move this guidance forward?

As always, thank you for your help with this effort. With best wishes, Keith

I had a call with staff on the size standard earlier this week. (Danielle's deadline for interagency comments was last week.) None of what I said should be a surprise, given the 8(a) size standard letter we wrote earlier last year. The recommendations in that letter hold for this rule too. The size standard office hadn't yet been looped in either. (There was an assumption that vague discussions about the 8(a) rule were sufficient to give notice that this proposed rule was coming.) I sent more detailed comments to Danielle.

We'd also like to engage on Lead, with the newly imposed deadline and the ongoing 610 review.

I'm out until Wednesday. Let's talk next steps when I'm back.

Subject: TSCA NCC - Letters to EPA on New Chemical Issues
Attachments: 00229053.pdf; 00230086.pdf; 00225160.pdf

Jeff:

Appended are the following communications from the Toxic Substances Control Act (TSCA) New Chemicals Coalition (NCC) for your consideration:

- January 19, 2018, comments from the TSCA NCC in response to the U.S. Environmental Protection Agency's (EPA) request for comment on its process for reviewing new chemical substances under TSCA, as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act (document number 229053). These comments have been submitted to the EPA Docket (EPA-HQ-OPPT-2017-0585).

- January 23, 2018, letter to you to follow up on the TSCA NCC December 1, 2017, letter related to the mandated consultation process with the U.S. Occupational Safety and Health Administration (OSHA) at TSCA Section 5(f)(5) (document number 230086). Assuming your staff is agreeable, we could further discuss the ideas presented in this letter as part of our meeting to discuss the polymer flag approach.

- January 23, 2018, letter to you outlining further the TSCA NCC belief that EPA's current practice of imposing restrictions may be inappropriate and, in many cases, is based on a review process that lacks transparency and on legal and/or scientific principles that are, for the most part, entirely unspecified (document number 225160). The letter identifies areas in which we believe improved consistency is needed to ensure a robust and transparent review process.

The TSCA NCC appreciates your willingness to continue dialogue on this important subject. We look forward to discussing these issues further with your staff.

Howdy Nancy – how are you? I recently landed back at Steptoe, where I am yet again working with the antimicrobial registrant community (among other things).
I would welcome the opportunity to catch up with you, if your (presumably very demanding) schedule & interest allows for it.
Might you be willing to grab coffee, lunch beer or quick phone call sometime in the future?

All the best to you, I hope you find the pesticide world still fascinating (as opposed to you losing sleep and hair over it … hah hah)

- Erik

P.S. You also might be interested to hear that I am the technical anchor behind Steptoe's new Cannabis Emerging Issues practice group. We're trying to focus on FDA and EPA issues related to pesticide use and packaging.

Subject: RERESPONSE REQUESTED-- Briefing on Proposal to Exempt from Tolerance FDA Approved Food Additives (Flavorings) for Use as Fragrance Ingredients in Food Contact Antimicrobials
Importance: High

Nancy/ Rick, I hope you are both well and preparing for Turkey Day !...and a well -deserved break....

My Innovation Reform Group (Clorox, P&G, Reckitt Benckiser) has worked collaboratively with OPP for the last 18 years on policy and process reforms that have yielded benefits to EPA and the regulated community. One area of concentration has been fragrances and how best to provide EPA with data on fragrance ingredient safety in order that registrants making sanitizers and disinfectants might make changes efficiently and quickly without any compromise to public health protection. The work of the IRG companies along with the fragrance industry resulted in the EPA Fragrance Ingredient List (FIL) containing about 1500 approved fragrance ingredients and maintained by IIAB in RD and the EPA Fragrance Notification Program , which has worked flawlessly for nearly a decade saving registrants and OPP precious resources.

The IRG submitted a proposal (attached) under E.O. 13777 suggesting that EPA use existing authority to exempt from tolerance requirements about 1100 FDA approved direct and indirect food additives. These are naturally derived flavoring ingredients reviewed and approved by independent expert panels (JECFA, FEMA); these are commonly consumed by all of us in our daily diet. The 1100 represent a substantial portion of the EPA FIL and would allow registrants making food contact sanitizers/disinfectants to continue to sell fragranced products demanded by their customers for use in the kitchen.

Why is this necessary ? Simply put, OPP's view of residues left from food contact disinfectants has changed. Previously, it was assumed that –if a potable water rinse was required—no residues of concern would remain. That is no longer the case; the effect of a water rinse has been diminished and worst case residues are assumed. In addition , OPP's definition of a " food contact surface" has been substantially expanded. Virtually no fragrance ingredients currently have EPA tolerances or

tolerance exemptions. The process of obtaining them for 1500 ingredients is daunting, lengthy, expensive and would result in no risk reduction or public health benefit. If IIAB completed one tolerance review/ week, the process could take 22 years and cost tens of millions of dollars. FDA has reviewed the safety of these food additives; they are commonly consumed; accepting FDA's science instead of conducting a duplicative review just makes good sense.

The IRG briefed RD (Mike) and AD (Steve) on 11/2 on the proposal (see attached PP slides). We would now propose to brief the two of you with RD, AD and perhaps OGC present. The following dates are suggested :

Monday 12/11

Tuesday 12/12

Wednesday 12/13

This is a science based initiative that will reduce burdens on EPA and the private sector; avoid duplicative reviews by sister Agencies; allow limited OPP resources to be more effectively directed while protecting public health. We won't waste your time !

Happy Thanksgiving and I look forward to hearing what might work for you on those dates.

Pat

Subject: Dr. Doherty's Email: Ex. 6 Personal Privacy (PP)

Hi Nancy,

I am listing Dr. Doherty's email address above for you. He is very pleased that you are interested in the Defined Formats proposal to save the Agency money and he would be happy to meet with you. He is writing an updated version for you and it should be emphasized that it has applications to various Agency offices, not just OPP. Defined data fields in the final summary reports would additionally allow the ability of computer macros to extract information and transfer it into the Agency databases.

Cheers,

Dr. William Irwin, DABT, ERT
Toxicologist

Subject: RE: BNA

Lynn,

Our office of public affairs has some questions:

-Is this a B&C webinar or a BNA webinar? What's the relationship? *BNA is hosting the webinar—its handles all the logistics, marketing, promotion, micro-site, registration etc. B&C is the sponsor. We manage all content, speakers, moderator, topic selection, etc. Jeff Morris participated in one late last tear.*

- is there going to be any balance or will it be EPA and industry? *Our thought was to basically have you on, and Charlie and maybe me or Jim Aidala to discuss OCSPP's priorities and plans. If you prefer an NGO, I am sure I can find one, I just do not want it unpleasant or hostile.*

- will there be Q&A? how will they be handled? *Questions are managed by a Go-To-Webinar portal so we select which ones we can accommodate in the brief time available.*

Thanks,
Nancy

Hi Nancy,

Happy New Year. I hope your holidays were enjoyable.

We (B&C) have scheduled a BNA webinar for **FEBRUARY 6, 2018, at 1:00-2:00PM EST.** The topic is chemical regulation in 2018: a sneak preview. Jim Aidala and Charlie Auer are going to speak, and we can think of no better venue than this to offer to you to identify your priorities, plans, and policies for the New Year.

I know you are out until the 11th but if you could give this some thought and let me know, we could begin marketing it immediately. BNA handles everything and because it is FREE to the public, we would expect 500-600 attendees.

Thanks

Hey Erik,
Congrats on the new gig!
EPA is crazy busy—19 days to the holidays and much to get done so I'm a bit stressed about leaving the building.
Shall we try for 2018?

Howdy Nancy – how are you? I recently landed back at Steptoe, where I am yet again working with the antimicrobial registrant community (among other things).
I would welcome the opportunity to catch up with you, if your (presumably very demanding) schedule & interest allows for it.
Might you be willing to grab coffee, lunch beer or quick phone call sometime in the future?

All the best to you, I hope you find the pesticide world still fascinating (as opposed to you losing sleep and hair over it … hah hah)

- Erik

P.S. You also might be interested to hear that I am the technical anchor behind Steptoe's new Cannabis Emerging Issues practice group. We're trying to focus on FDA and EPA issues related to pesticide use and packaging.

Subject: RE: Copper Development Association: Review and Approval of Claims for Antimicrobial Copper Products Based on Clinical Trial Results (Confidential Business Information)

John – Thanks for the response. We appreciate the agency's efforts to keep this moving. As discussed during our call in June, CDA would like to review the charge questions to ensure that they properly frame the issues that we think will be paramount as we look towards future registration of claims. Let me know when we might be able to see a draft.

Thanks again and have a great weekend.
Joe

Subject: RE: Copper Development Association: Review and Approval of Claims for Antimicrobial Copper Products Based on Clinical Trial Results (Confidential Business Information)

Hi John and all –

From our discussions in June, CDA was encouraged that a panel to review the clinical trial studies would be formed promptly and in an open and cooperative manner. CDA provided the data to EPA on August 8, and recommendations on potential panel members for consideration on September 12. We understand that the agency is seeking appropriate reviewers, but it is unclear what kind of progress has been made in terms of panel formation or other aspects of the review process, such as developing draft panel questions. It is vital that we maintain momentum and focus on the issue.

Please let us know where things stand and the schedule for moving forward. CDA also is happy to initiate drafting of questions for the panel, or to discuss development of the questions with EPA.

Thanks and best regards,
Joe

Hi John –

Following up on my message last week, attached please find a list of potential candidates for potential inclusion on the review panel. CDA attempted to identify candidates with relevant expertise in the field that have not previously been involved or associated with the clinical trials.

We look forward to working with EPA on the panel selection process and in developing the charge questions. Thanks again for your continued attention to this matter.

Subject: RE: Copper Development Association: Review and Approval of Claims for Antimicrobial Copper Products Based on Clinical Trial Results (Confidential Business Information)

Hi John –

Thanks for the response and the information on the status of the panel selection process. During our June call, EPA offered to consult with CDA regarding selection of the panel members and we would like to do so. In particular, given CDA's detailed knowledge of the clinical trials, we think it would be helpful to review and provide feedback on the draft panel questions, as well as in identifying potential panel members. CDA is developing a list of potential reviewers who have not previously been involved or otherwise associated with the trials but have expertise and standing that would be relevant to potential participation in the panel. We will send that list to you in short order for consideration.

After we have a chance to consider the panel review questions, perhaps a follow up conference call with EPA would make sense at that point.

Thanks again for your continued attention to this matter.

Regards,
Joe

Subject: RE: Copper Development Association: Review and Approval of Claims for Antimicrobial Copper Products Based on Clinical Trial Results (Confidential Business Information)

Hello Joe – The update on where we are since our last meeting is that the Antimicrobials Division has assembled a task group that meets weekly to work on the review process for the clinical study. This group is in the process of drafting questions and criteria for review of the clinical study. The group is also working to identify appropriate

agencies/institutions to review the study, and specific qualifications needed for reviewers. We have engaged with the EPA Office of the Science Advisor to facilitate outreach to reviewers and are coordinating with the Human Research Ethics and Oversight staff.

This is where we currently are so if we have a call, I don't think we'll have anything more substantive to add. But let me know if you would still like a call or if you have any questions.

Regards,
John

Hi John –

I believe you are out of the office for the remainder of the week, but wanted to touch base to set up a call with CDA/EPA regarding the panel selection process. (per our letter with the data submission, excerpted below) Let me know what you think on possible dates for such a call.

Thanks
Joe

JOSEPH J. GREEN
Special Counsel
Kelley Drye & Warren LLP

> Finally, as discussed on our call, CDA looks forward to assisting EPA in the review panel selection process. Currently, we are working on identifying experts for EPA's consideration. To ensure continued progress, we believe it would be helpful to have a call to discuss the panel selection process and schedule, including, as noted on our call and follow-up letter of June 26th, areas of expertise and other criteria to ensure that a conflict of interest does not exist for any of the reviewers. **Please let us know your availability for such a call.**

Thanks John. We are good with the approach to the data submission as you described below - you have our OK to proceed.

One note: the spreadsheets are rather large and it may be tricky to get it all on a normal size PDF. Just want to make sure the data doesn't get truncated when put in that format.

Thanks again - and hope you are heading off on a good vacation!

Joe

> Hi Joe – I talked to the front end about this. We can take the electronic files you submitted and turn them into PDFs and assign that an MRID. We cannot assign MRIDs to electronic files and the data cannot be appended the clinical study (that's why it needs a new MRID). The supporting documents that were in your email will also be included. The data will be linked to the clinical study in our system and by name. For example, something like, "Data for the Clinical Trial of the .....(MRID 49108501). " The entire new MRID will be considered confidential. It's my impression that you don't have to do anything. The front end can work with the documents in the email. Since nothing is formatted per PRN 2011-3, the submission will technically get a failure for compliance to that. But we will just ignore that. There is really nothing for you to do other than give me your "ok" to go ahead. Sorry, if this seems complicated but I do think it's important for the data to be part of the official record and to link it with the clinical study.

Subject: RE: APCRA Follow-up and Action Items: Extended due date for Case Study Updates: December 8

Dear all,

Our first follow-up teleconference will be held on January 18, 2018 at 8am ET. Invitation to follow.

Please review the items below for details on follow-up actions. We are extending the due date for updates on case studies to **December 8th**, which will still allow time to compile all updates and share with the group for review prior to our next teleconference.

Please contact me with any questions or updates (gwinn.maureen@epa.gov).

Maureen

From: Gwinn, Maureen
Sent: Tuesday, October 24, 2017 2:48 PM

Subject: APCRA Follow-up and Action Items

Dear all,

Thank you all for a very productive meeting in Helsinki. Our discussions ranged from building bridges between case studies, increasing acceptance of the use of NAMs by risk assessors and managers, and use of NAMs for exposure analysis. Presentations included updates on specific case studies, with discussion of how these will move forward. We are working to compile and share notes from the workshop, but in the meantime we wanted to send out some follow-up action items that came out of our discussions.

1. Teleconferences: We will continue to hold teleconferences every 6-8 weeks to discuss progress on case studies and other action items, and build toward strengthening collaborations on current and future case studies. Please confirm that we have the correct members from your organization on our email contact list.
2. Case study leads: Please share updates for your case study by **November 27th.** Send updates to Maureen Gwinn (gwinn.maureen@epa.gov) for compilation.
3. Need for Communication strategy: Tina Bahadori will lead a workgroup on discussions of what is needed for a communication strategy to increase acceptance for the use of NAMs in risk assessment and regulation. Workgroup members currently include Tina, Mike Rasenberg, Rusty Thomas and Maureen Gwinn. Update to be given at next teleconference, likely sometime in January. Separate invitation will follow within the next week or so.

Slides and other workshop materials are being updated and maintained at https://drive.google.com/drive/ **Ex. 6** Please do not share materials outside of your organization without permission. We will share notes on key points from the workshop in the near future.

Thank you everyone for your continued activities in support of this work, and one last thank you to Bob Kavlock for bringing this group together.

Maureen

Subject: plenary panel session SRA Tuesday
Attachments: SRA-AM 2017 plenary panel Tuesday Intro Terje Aven1.ppt

Hi all,
Thanks for participating in the panel, it will be great :-)
I will have an introduction to the panel discussion, see enclosed preliminary slides with associated text.
A key point made is the important role risk analysis has and should have in understanding and characterizing the 'humbleness' part of science and clarifying the limits of the 'confidence' part.

After the Introduction Sally will take over, she is the Moderator. She will introduce you.
The idea is that each of you has a prepared introduction of some 5-7 minutes, prepared with slides if you like, with clear statements –linked to the challenges made in the abstract and hopefully inspired by my Intro and comments made by Sally:

«Has RA's role changed over time? How? What are current challenges? What seems easier or more well regarded currently? Can RA help rebuild trust in governance and public decision-making? How? «

We would not like to restrict creativity and what you find most important on this matter, so feel free to angle things as you like. Focusing on some few – one or two – themes is however recommended. To be able to lead the panel discussion in a good way, we think it is wise to have a process in advance – starting now – where we share some of the ideas we have. The aim of this dialogue is to make the panel as interesting as possible by being informed what is coming, so that one can get ideas for comments and questions. We would like to have a lively discussion so the point is not to use this dialogue to obtain some unity or consensus at this stage (rather the opposite ☺)

Looking forward to hearing from you. What we ask from you now is an indication of what type of message – themes- that you would like to highlight - in text or using slides.
We would very much appreciate if we could get some input before 15 November.
Thanks a lot.
Enjoy the weekend.

Best
Terje

Tuesday morning

Evidence and knowledge-based decision-making in a risk analysis setting: Desired reality or Misconception?

How has the post-truth society (in which objective facts are become less influential in shaping public opinion) been able to develop? Has science sought to stretch its domain too widely and denied uncertainties? Or was the truth not

comfortable enough for those in power or seeking power? Why are "alternative facts" and "fake news" becoming household names?

As risk analysts we are aware that evidence is not only related to facts but also to beliefs and concerns that need to be taken into account in risk management and regulation. We are also aware that value judgments are equally important as a basis for decision-making as is evidence in the form of data, information and justified beliefs. However, there are clear data-driven insights that one cannot ignore. Climate change is real. And so is the risk of particulate matter for our health.

The panel will discuss the role of science and in particular risk science in keeping the delicate balance between factual statements and acknowledgement of uncertainty and ambiguity.

Introduction Terje Aven

Moderator: Sally M. Kane

Panelists: Joe Árvai, Nancy Beck, Frederic Bouder, Lisa A. Robinson

Terje Aven, University of Stavanger, Norway

Sally M. Kane, Independent Consultant

Joe Árvai, University of Michigan

Nancy Beck, US Environmental Protection Agency (EPA)

Frederic Bouder, Maastricht University, The Netherlands

Amy,

I also want to extend my thanks to you and the CMC Committee Leaders. It was a great lunch and opportunity to meet with you; I also understand that the conference went well.

We look forward to continuing our work with you and Taiwan EPA.

Best regards,

Jane

Amy,

Thanks for sending the photos and of course huge thanks for hosting the wonderful lunch to provide me with an opportunity to meet with and learn from your group and members.

I was pleased I made the trip and look forward to future opportunities for collaboration. Clearly many opportunities exist.

Regards,
Nancy

Subject: Interesting article in NYT -- congratulations

I was enthused by the articles discussion of your approach to chemical regulation and disappointed by the laudatory comments for Wendy who in my opinion did little or nothing in her career. Mr. Auer was deemed a success by me and I was most pleased by his national and international efforts with High Production Volume Chemicals. I was always intrigued that the program was never completed with a report regarding the INDUSTRY voluntary participation and our ability to collect missing information. In fact, a program that makes much more sense than reviewing and reviewing the same chemicals. Though I continue to be disappointed that Chem View treats all studies as meaningful and does not flag the chaff from the useful or meaningful data. NYT and others do not seem to realize that despite the expense of testing, repeats do little but change a few significant digits at best and provide little information on real impacts. The expense of this charade of more testing and further risk assessment serves little or no purpose. It brings to mind the concept of beating a dead horse!

a chemical that is known to be toxic needs to be LABELED as such. TSCA should mirror FIFRA in labeling chemicals and let users know of known risks and are offered guidance on how to limit exposures. For example, taking effective chemicals from paint strippers means that one must use MORE of the ineffective and/or the risk of heat and possibility of fumes and fires. One truly can't find a riskless world -- to borrow a phrase, " life itself is impossible without chemicals!"

I congratulate you on your approach. Flame retardants do save lives. Dioxane is toxic. Carbon tetrachloride and asbestos are known international problems. We need to deal with the problems of use and exposure by foolish people. Education and outreach -- not animal testing should be the focus. I have tested tens of thousands of animals from mice and rats to horses and see value in testing, but not testing to mollify the uninformed public.

Keep up the good work. There are people that appreciate your efforts.

PS. Dr. Stedeford is having a great time and has realized that working in TSCA land was an easy job. He is no longer coasting but being challenged. a very good man!

Dear Dr. Nancy Beck,

Greetings.

As advised by family friend, Ex. 6 I would like to bring to your kind attention that I have applied for the following positions (Biologist/Toxicologist).

1. Location: Washington DC, District of Columbia
Job announcement number
R-OCSPP-DE-2018-0050
Series & Grade
GS-0401-12/13|GS-0415-12/13

2. Location: Washington DC, District of Columbia
Job announcement number
R-OCSPP-DE-2018-0046
Series & Grade
GS-0401-12/13|GS-0415-12/13

3. Location: Washington DC, District of Columbia
Job announcement number
R-OCSPP-DE-2018-0051
Series & Grade
GS-0401-12/13|GS-0403-12/13|GS-1301-12/13|GS-1320-12/13

4. Locations: Washington DC, District of Columbia and Arlington, Virginia
Job announcement number
R-OCSPP-DE-2018-0040
Series & Grade
GS-0401-12/13|GS-0819-12/13|GS-1301-12/13

5. Location: Arlington, Virginia
Job announcement Number: **R-OCSPP-DE-2018-0059**
Series & Grade
GS-0401-12/13|GS-0415-12/13

For your kind perusal, I have attached my updated resume (with one more publication that just got accepted) that highlights my versatile experience and quality accomplishments relevant to the duties of the above positions.

I would like to share with you a small set back that I have not been referred for the position- R-OCSPP-DE-2018-0040 (Biologist 0401). Below is the correspondence that I have had with the HR Staffing Specialist Ms. Amanda Jackson in this regard.

From: Ex. 6
Date: July 10, 2018 at 2:27:26 PM EDT
To: "Jackson, Amanda" <jackson.amanda@epa.gov>
Subject: Re: Request from Dr. Selvan

Thank you, Ms. Amanda for your very prompt response. I appreciate it.

I did not realize the categories when I inquired about it. I just mentioned.

In fact, I feel that I am best qualified considering my relevant experience and quality accomplishments.

I am grateful if you could refer my credentials to the HM. I profusely thank you in advance for your time and considerations.

Best,

Ex. 6

On Jul 10, 2018, at 2:19 PM, Jackson, Amanda <jackson.amanda@epa.gov> wrote:

Good afternoon Ex. 6

You are correct that you were deemed "Well Qualified" for this position. As described in the body of the announcement, applicants are placed in to three categories based on the score from their assessment questionnaire: Best Qualified, Well Qualified, and Qualified. You were not in the top category of applicants and therefore have not been referred to the hiring manager for further consideration.

Thank you for your interest in a position with the Environmental Protection Agency!

Amanda Jackson

HR Staffing Specialist

EPA/OARM-RTP/HRMD

Research Triangle Park, NC 27711

Subject: Request from Dr. Selvan

Dear Ms. Amanda,

Greetings.

I received an email notification that I am eligible for the following position but not referred to the hiring manager. I thought that I am well qualified considering my quality experience relevant to the position and would appreciate if you could please refer my credentials to the hiring manager. I thank you in advance for reevaluation and considerations in this regard.

R-OCSPP-DE-2018-0040 (Biologist 0401)

I very much look forward to hearing from you. Thanking you.
--
Best,
Ex. 6

I hope that I will be referred for other positions. I very much look forward to your kind advise in this regard. If you require any additional information about me and my interest in working for EPA, I am only happy to provide you with. I thank you in advance for your time and considerations.

--
Best,

Thanks, Sally.

My talk, which should be about 10 minutes long, will address all but one of the questions that Terje originally sent in the plenary abstract:

1. How has the post-truth society (in which objective facts are become less influential in shaping public opinion) been able to develop?
   - *I won't be able to answer this one; it's too far outside my expertise.*
2. Why are "alternative facts" and "fake news" becoming household names?
   - *They've always been there, they simply get updated tables from time-to-time.*
3. Has science sought to stretch its domain too widely and denied uncertainties?
   - *No. And yes.*
4. Or, is the truth not comfortable enough for those in power or seeking power?
   - *It has more to do with efficacy and less to do with comfort.*

Best, Joe

Subject: FW: Update and Pre-Registration for Information Exchange Seminar for IATA Related Projects (WebEx): November 14th 2017

Dear Maureen,

As you may have received the below email, we will have the Information Exchange Seminar for IATA Related Projects (WebEx) on November 14th 2017 (13:00-18:00 Paris time).
I would appreciate if you forward this email to the members of APCRA.

Thank you in advance.

Kind regards,
Masashi

Subject: Update and Pre-Registration for Information Exchange Seminar for IATA Related Projects (WebEx): November 14th 2017

To:
WPHA, QSAR TB MG, WNT, EAGMST, EG Skin Sensitisation, EG on Non-genotoxic carcinogenicity, EDTA Advisory Group, EG Skin Irritation/Corrosion, EG Ocular Corrosives and Severe Irritants, EG Reproductive and Developmental toxicity, NANO: WP Hods + EC, NANO:WP observers/ general contact

As we have already informed all of you before, we will hold the Information Exchange Seminar for IATA Related Projects (WebEx) on **November 14th 2017 (13:00-18:00 Paris time).**
Please find enclosed the draft agenda of the seminar as it has been updated.

Also, we would like to request the participants to make a pre-registration on the following link:

Ex. 6

For your pre-registration, please see the below "To register for the online event" and find the attached document "Event Attendee and registration 2016".
We would appreciate if you forward this email to your colleagues who are interested in this seminar.

To register for the online event

---

1. Go to

Ex. 6

2. Click "Register".
3. On the registration form, enter your information and then click "Submit".

Once the host approves your registration, you will receive a confirmation email message with instructions on how to join the event.

IMPORTANT NOTICE:
This WebEx service includes a feature that allows audio and any documents and other materials exchanged or viewed during the session to be recorded. By joining this session, you automatically consent to such recordings. If you do not consent to the recording, discuss your concerns with the meeting host prior to the start of the recording or do not join the session. Please note that any such recordings may be subject to discovery in the event of litigation.

Please let me know if you have any questions.

Best regards,
Masashi

We would like to inform you that an Information Exchange Seminar for OECD IATA Related Projects (WebEx) will be held on **November 14th 13:00-18:00 Paris time**.

The objective of the seminar is to exchange information on experiences from IATA related activities and identify future activities at OECD to advance the area and harmonise approaches and to identify overlapping activities and opportunities of collaboration between OECD IATA working groups (See the attached draft agenda for details).

This seminar was proposed by the IATA Case Studies Project team and endorsed at the 1st meeting of WPHA [ENV/JM/HA(2017)7]

Detailed information on the seminar will be sent out later.

Best regards,

Yuki

Subject: Emerging Technologies

Nancy,

As you may know, I have worked for years with David Rejeski, now with ELI, on emerging technologies including nano, bio, and synbio, and governance systems. ELI was recently awarded seed money by USDA on developing a workplan for ELI's horizon scanning project. Attached is a one-pager on horizon scanning at ELI (which mentions both the USDA funded project and the other one for the Global Environment Facility).

My question to you is how can we get funding from EPA to match the $150,000 from USDA? I will do whatever I can to assist.

Thanks

Subject: Meeting Request - AHFA
Attachments: AHFA Laminated Products Letter October 2017.pdf

Nancy,

I hope all is well.

First of all, thank you for your efforts in recent months to clear up the remaining early implementation issues with the Formaldehyde Emissions for Composite Wood Products Rulemaking. Those final rules have been helpful in educating the industry.

Bill Perdue, VP for Regulatory Affairs with the AHFA, and Brian Adams, Director of Regulatory Affairs at Ashley Furniture, will be in Washington, DC on Wednesday November 15th. Do you have time in the late morning or early afternoon to further discuss the laminated product definition in the formaldehyde emissions from composite wood product rulemaking?

Thank you very much,

Chris

Workshop Title: Understanding Pathways to a Paradigm Shift in Toxicity Testing and Decision Making

Date: November 20-21, 2017

Location: (in person or webcast)
Keck Center of the National Academies of Sciences, Engineering, and Medicine
Room 100
500 Fifth Street NW
Washington, DC

Workshop URL: http://nas-sites.org/emergingscience/meetings/paradigm-shift-in-decisions/

Registration: click here

Workshop Description:

Advances in the environmental health sciences – from high-throughput cell-based *in vitro* studies to tissue chips to environment-wide association studies – have led to new approaches for understanding the toxicity of chemicals in humans. These new approaches are faster, less expensive, and potentially more comparable to real-life human exposures than legacy animal toxicity testing approaches. However, many questions remain about whether—and how—to make the paradigm shift to using these new data streams as the basis for research, policy, and regulatory decisions.

Join a workshop on November 20-21, hosted by the Standing Committee on Emerging Science for Environmental Health Decisions, that will bring together scientists, policymakers, risk assessors, and regulators to explore key factors that influence how new science is incorporated into the decision making process.

Held in Washington DC and webcast, this free, 2-day workshop will draw on expertise from the social sciences on issues such as the type and quantity of data that is "sufficient" for decision making, and trust in decisions influenced by new data streams. Participants will investigate case studies that illustrate examples of how the environmental health community has used these new approaches for decision making.

Please visit the workshop website to register to attend, and for more information: http://nas-sites.org/emergingscience/meetings/paradigm-shift-in-decisions/

Dear Nancy

It is with regret that I realise my failure as chair of the scientific committee to set a deadline for the feedback.

On the other hand I fully understand that your schedule is busy and complex and that a fast response is difficult to
achieve. I appreciate very much your supportive reaction. However, we had to move on with the invitation process and we
have received confirmation from another speaker on the topic.

What I hope now is that you may consider participating the conference without the formal process of a guest speaker
invitation. Using the regular abstract submission process would perhaps give you and/or colleagues of your group some
additional time for planning.

Again, I apologise for the inconvenience but I do hope that we shall find an opportunity to exchange some thoughts about
uncertainty analysis.

Kind regards, Matthias

Would help if I attached agenda ☺

Hi Mary,

I'm following up on Nancy's email to Bill Hubbard regarding out Thompson Hine event in DC on October 26 & 27. I have attached the agenda for your review. Her presentation would only be about 20 minutes in length and is the last segment of the "Hot Topics" agenda item which runs from 8:30 – 9:30 am on Friday, October 27. There are three short presentations planned; Government Contracts, Immigration and an EPA update. We were hoping that Nancy could speak to what's going on currently with TSCA and given the new administration, any initiatives or general policy changes that may impact the chemical industry. A brief update would be perfect.

Look forward to hearing from you.

Best regards,

Alice

Nancy,

While you are unable to join us at the DRI conference, I was wondering if you might be interested and available to speak at an event my Firm is hosting on our DC office. On October 26th and 27th, our firm is hosting a symposium in our Washington DC office for the general counsel of our chemical industry clients – a group of about 10-20. We invite presenters on various topics of concern that general counsel are facing in the industry. One topic of particular interest is happenings at the EPA. I was wondering if you might be interested in speaking for about 20 minutes to us the morning of October 27th. Please let me know if you are interested and we can further discuss details.

Subject: DRI: TTEL Seminar Speaker Confirmation

Nancy,

I am happy to report that DRI has accepted our seminar program and you as a speaker at the Toxic Tort and Environmental Law seminar in Nashville March 1 and 2, 2018. You will be speaking from 3:50 to 4:40 on the 1st and will be joined by Lynn Bergeson.

The title and description (we are limited to 35 words) of your talk is:

New TSCA: Repercussions on commercial transactions, supply chain relationships, and toxic tort and product liability law

Learn how New TSCA is redefining supply chain relationships; rewriting due diligence rules of engagement; reopening debate on new avenues in product liability, insurance, and tort law; and raising important questions regarding right-to-know vs. confidentiality.

You will be fully comped, which includes registration, 2 nights at hotel, up to $500 for flight, up to $125 for meals, and up to $200 for ground transportation.

As soon as possible could you please confirm your availability to speak.

By July 21st I need from you please:

1) Any revision to the session title and description (we are limited to 35-40 words).

2) Contact information: organization, mailing address, phone, and email

3) Bio: 80 word limit.

4) Photo: Head shot.

Thank you so much.

Subject: Next Steps re OX513A

Nancy,

Good evening. I hope that you are doing well. I realize that you are on travel, but am leaving this message in the hope that Tom, Jack, and I might be able to get on your calendar for a call to discuss next steps re OX513A, and share ideas on moving forward.

Intrexon is, of course, very pleased that jurisdiction has finally passed over to EPA. Regulating insects that are being released to cause significant population suppression of pest insects clearly is a function that should be handled by EPA.

Tom is in London this week, but can make any time that is convenient for you work, as can I. If it would be better for me to work with Venus to find an opening on your calendar, I'd be pleased to do so. Just let me know what you'd prefer.

Look forward to speaking with you.

Best,

Keith

Subject: RE: 2018 Water Quality Report - another ALE in Portland, Oregon
Attachments: PWB Interim measures Response to OHA_ 12.2.16.pdf

Hello Ms McFarlane

Sorry for delay in getting back to you. Please find attached PBW's interim plan to OHA that I hope addresses your questions. You may have already seen this document. EPA worked with OHA and PWB on the interim measures. Also, since last year, OHA has worked closely with EPA to review PWB's water quality data. Our efforts agreed that PWB's water quality parameters (WQP) ranges could be improved to more effectively control lead corrosion since the system continues to exceed the lead action level. On April 20, 2017, OHA established interim WQPs based on feasible levels given their interim measure of raising pH to 8.2 at the entry point. The entry point was reset from a pH of 7.2 to 8.0 and the distribution system from a pH of 7.0 to 7.6. We are continuing to review their data quarterly.

1. What **corrective actions** is OHA making, after the State approved an "alternative", less-stringent LCR in 1997, that is still not minimizing lead? See Attached Document

2. Is the Water Bureau required to do something in the interim to protect all citizens to the extent feasible ... **right now**? See Attached Document

3. PWB will *not be optimizing* corrosion control treatment until many years from now (by 2027). Yet the 2018 WQ Report asserts, "Water quality is a shared responsibility between the Portland Water Bureau and its customers". Where systems like Portland are *not yet optimized*, why is PWB and the Commissioner-in-charge stepping up their messaging to customers to replace their "bad" plumbing, while failing to mention that sub-optimally treated water has made - and will continue to make - lead corrosion problems worse? We are in discussions with OHA re: the CCR.

Subject: 2018 Water Quality Report - another ALE in Portland, Oregon

Marie Jennings,
Drinking Water Manager
EPA region 10

Dear Ms Jennings,

I am writing on behalf of public drinking water health protection during the next decade - especially for pregnant women, infants and young children, and immuno-compromised.

Portland Water Bureau Director Mike Stuhr and Water Commissioner Nick Fish have just approved their *Annual 2018 Drinking Water Quality Report*. I have looked at some other cities' WQR/CCR's who have made efforts to fully inform and educate the public on lead, and the intention of the Lead and Copper Rule. Portland has not, in spite of our Utility's chronic high lead levels and most 2 back-to-back exceedances.
Here is one excerpt:

"*The Portland Water Bureau has been reducing lead in water by treating Bull Run water with sodium hydroxide for corrosion control since 1997. However, new evidence shows that there is no safe level of lead exposure. This led the Portland Water Bureau to install enhanced corrosion control by 2022. This will increase the alkalinity and pH of the drinking water to further reduce the amount of lead at customer taps.* "

After historic and the 2 recent lead exceedances, it is disingenuous to perpetuate this false assurance (1st sentence), misinform the public on what is a long-held understanding of lead's health impact (2nd sentence). It is particularly egregious to suggest that this "new" knowledge was what drove PWB's decision to "enhance" CCT, as a courtesy to the public (3rd sentence).Finally, there is no explanation on whether or when corrosion control will be *optimized* , per the precise intent of the LCR(4th sentence).

Here is another excerpt:
"***Arsenic, Barium, Copper, Fluoride and Lead:***
These metals are elements found in the earth's crust. They can dissolve into water that is in contact with natural deposits. At the levels found in Portland's drinking water, they are unlikely to contribute to adverse health effects. "
"Lead is regulated at customer taps" has been completely deleted from the 2018 Report (previously in this section of earlier WQR's).

Other messaging has simply changed; "Improved CCT" is now characterized as "enhanced CCT", likely because "improved CCT" in Mar/Jn 2017 did not improve lead levels for the Oct 2017 sampling (in fact caused another ALE).

Portland's website byline claims, "From forest to faucet, we deliver the best drinking water in the world". But Numbers don't lie.
The 90th%ile in the Report shows PWB still struggling with minimizing lead due to inadequate corrosion control. The City of Tualatin, a PWB wholesale customer, reported a lead ALE last week, the City of Gresham - in Jan 2018. Moreover, PWB's public education has been poor and ineffective, except to fault customer plumbing: "Does your plumbing contribute lead to your drinking water?" [in water bill inserts].

These are only a few things to note from the Report.

Ms Jennings, I am requesting you address these 3 questions specifically:
1. What **corrective actions** is OHA making, after the State approved an "alternative", less-stringent LCR in 1997, that is still not minimizing lead?
2. Is the Water Bureau required to do something in the interim to protect all citizens to the extent feasible ... **right now**?
3. PWB will *not be optimizing* corrosion control treatment until many years from now (by 2027). Yet the 2018 WQ Report asserts, "Water quality is a shared responsibility between the Portland Water Bureau and its

customers". Where systems like Portland are *not yet optimized*, why is PWB and the Commissioner-in-charge stepping up their messaging to customers to replace their "bad" plumbing, while failing to mention that sub-optimally treated water has made - and will continue to make - lead corrosion problems worse?

Thank you for your thoughts, attention, and time.
Sincerely,
Lorie McFarlane, Ex. 6

Nancy,

I hope all is well.

First of all, thank you for your efforts in recent months to clear up the remaining early implementation issues with the Formaldehyde Emissions for Composite Wood Products Rulemaking. Those final rules have been helpful in educating the industry.

Bill Perdue, VP for Regulatory Affairs with the AHFA, and Brian Adams, Director of Regulatory Affairs at Ashley Furniture, will be in Washington, DC on Wednesday November 15th. Do you have time in the late morning or early afternoon to further discuss the laminated product definition in the formaldehyde emissions from composite wood product rulemaking?

Thank you very much,

Chris

Nancy & Jeff –

I have provided Derrick (via a separate email) a copy of the attached agenda for our meeting at 12th pm Friday.

We will have a small group (myself, Steve Harper from INTEL, and David Isaacs from the Semiconductor Industry Association).

Thank you for agreeing to meet with us. I look forward to seeing you again. Feel free to call if you have any questions or concern in the meantime.

Subject: possible informal meeting during July

Nancy and Jeff –

I am interested in scheduling a meeting with the two of you soon, so we can confer and bring you up to date on the considerable progress that is being made on certain new chemicals issues.

Among the clients I represent, I am fortunate to work with the Semiconductor Industry Association. SIA includes the major US manufacturers of semiconductors ("microchips") that are components of numerous electronic devices. That industry works closely with its suppliers, who are manufacturers and processors of various sophisticated chemical substances and mixtures that are critical to "chip" making. Such substances are unique and highly specific in their composition and properties; consequently, new chemicals often are being developed to suit specific technologies.

Among the substances used in these processes are Photo-acid Generators (PAGs) which are used in photolithographic processes to layer various surfaces on microchips. Last year, SIA and its suppliers voluntarily formed a Consortium to address certain issues that had been arising in the context of the Agency's review of PAG substances that are submitted as new chemicals (in LVEs and PMNs).

Approximately one year ago, the two of you met with a delegation from SIA and its core group of suppliers to discuss the New Chemicals Program's approach to new chemical PAGs. (The meeting occurred in May 2017, just as Mark Greenwood was retiring from his practice – while he was transitioning this client to me.) In the intervening period, we have made great strides as the PAG Consortium has worked collaboratively with New Chemicals Program personnel on a structured agreement by which our members are supplying certain information to EPA reviewers and will be generating new data on representative PAG substances to submit to EPA.

We think this would be a good time for you to become more acquainted with SIA's role, how its industry depends on the availability of innovative new chemistries, and report on how the PAG Consortium is continuing to work with EPA personnel to further the Agency's objectives to obtain a more robust data profile on this category of substances.

If we could find mutually convenient dates during the middle two weeks in July (the weeks of July 9th and 16th) that would be ideal. I realize your schedules are jammed packed; thus, an informal meeting is being sought. We would bring with us only a handful of SIA personnel, one or two representative members, and a "supplier" representative.

I would be pleased to contact your respective schedulers to seek an appropriate date.

Larry

Nancy,

While you are unable to join us at the DRI conference, I was wondering if you might be interested and available to speak at an event my Firm is hosting on our DC office. On October 26th and 27th, our firm is hosting a symposium in our Washington DC office for the general counsel of our chemical industry clients – a group of about 10-20. We invite presenters on various topics of concern that general counsel are facing in the industry. One topic of particular interest is happenings at the EPA. I was wondering if you might be interested in speaking for about 20 minutes to us the morning of October 27th. Please let me know if you are interested and we can further discuss details.

Nancy,

I am happy to report that DRI has accepted our seminar program and you as a speaker at the Toxic Tort and Environmental Law seminar in Nashville March 1 and 2, 2018. You will be speaking from 3:50 to 4:40 on the 1st and will be joined by Lynn Bergeson.

The title and description (we are limited to 35 words) of your talk is:

New TSCA: Repercussions on commercial transactions, supply chain relationships, and toxic tort and product liability law

Learn how New TSCA is redefining supply chain relationships; rewriting due diligence rules of engagement; reopening debate on new avenues in product liability, insurance, and tort law; and raising important questions regarding right-to-know vs. confidentiality.

You will be fully comped, which includes registration, 2 nights at hotel, up to $500 for flight, up to $125 for meals, and up to $200 for ground transportation.

As soon as possible could you please confirm your availability to speak.

By July 21st I need from you please:

1) Any revision to the session title and description (we are limited to 35-40 words).

2) Contact information: organization, mailing address, phone, and email

3) Bio: 80 word limit.

4) Photo: Head shot.

Thank you so much.

Subject: Next Steps re OX513A

Nancy,

Good evening. I hope that you are doing well. I realize that you are on travel, but am leaving this message in the hope that Tom, Jack, and I might be able to get on your calendar for a call to discuss next steps re OX513A, and share ideas on moving forward.

Intrexon is, of course, very pleased that jurisdiction has finally passed over to EPA. Regulating insects that are being released to cause significant population suppression of pest insects clearly is a function that should be handled by EPA.

Tom is in London this week, but can make any time that is convenient for you work, as can I. If it would be better for me to work with Venus to find an opening on your calendar, I'd be pleased to do so. Just let me know what you'd prefer.

Look forward to speaking with you.

Best,

Keith

Subject: ACS Chief Technology Officer Summit - September 12 & 13

Nancy:

I hope this note finds you well.

Tom Connelly and I may have mentioned to you when we visited earlier this year that ACS has been convening industry chemistry sector Chief Technology Officers for a day and a half meeting here in Washington, DC for the past three years. This year the CTO Summit will be September 12 & 13 at The Capital Hilton, 1001 16th St NW.

We start the first day with one-on-one meetings between the CTOs, have an evening reception and then the following day a program of speakers, etc. We usually involve Members of Congress, federal agency representatives, as well as leaders from other science organizations, embassies, trade associations etc. So far the following companies have confirmed their attendance – Air Liquide, Ascend, BASF, Dow, Dupont, Evonic, FMC, FXI, GE Global Research, GCP Technologies, Grasim Industries, Honeywell, PPG, Procter & Gamble, Royal DSM, Solvay, W.L. Gore. We are still awaiting answers from over a dozen other companies. Attached is the CTO Summit program agenda book from last year to give you a better sense of participants, program, etc.

I am reaching out to you to see if you would agree to be the lunch speaker on Wednesday, September 13. The time slot for lunch is 12:00 – 1:30 PM, and our format is typically 30 minutes of presentation followed by 15 minutes of Q&A. I know the CTOs would value learning more about EPA's new approaches to regulation of importance to the chemistry sector, such as TSCA implementation, risk management plans, transparency in regulation, etc.

I am hoping your schedule will allow you to join us on September 13 and speak with, and meet, the assembled CTOs. Many thanks in advance for your consideration.

Subject: New Chemicals Coalition - Letter to EPA on Section 5 Points to Consider Document

Jeff:

Appended is a letter from the New Chemicals Coalition (NCC), a group of over 20 company representatives that have come together to identify new chemical notification issues under the amended Toxic Substances Control Act (TSCA) and to work collaboratively with you and your team to address them.

Our letter focuses on the anticipated U.S. Environmental Protection Agency (EPA) updated guidance material to assist stakeholders in developing Section 5 submissions and provides specific issues that must be included in that guidance so it is truly helpful to the regulated community. As noted in our letter, beyond knowing *what* to report in a submission, stakeholders need to understand *why* the information is needed by EPA assessors and *how* that information will be used

by EPA and incorporated into a new chemical risk evaluation. Without this information, the lack of certainty regarding the EPA process will adversely impact investment, stifle innovation, and deny the regulated community with a clearer understanding of how EPA is actually implementing the new law as it relates to new chemical review.

We will be in touch with you later this week to discuss the letter and potentially arrange for a meeting with you and other EPA staff.

Subject: Meeting with EPA

Hello Venus and Mary:

We are confirmed for a meeting on November 6th. In a perfect world, the meeting would be around 10A. As our clients are flying in on Sunday, in a perfect world they would be headed back to the airport by 2:00P so later than 10 would also work.

Please advise. Thanks

Hello Nancy,

In your absence last week, I called Venus (after recalling you were in Finland) about scheduling a meeting on behalf of our client, Occidental. It wishes to visit with you, Jeff, Gino, and Gino's RAD counterpart for carbon tet (whoever that is), and others as you deem appropriate, to address issues pertinent to the forthcoming problem formulation documents on asbestos and carbon tet. We think an hour would be sufficient. We are seeking a meeting on **November 7 or 8.**

Please let me know of EPA's availability for such a meeting. Thanks.

Lynn

Subject: Summary for Sept 13-14, 2017 CDR Inorganic Byproducts Negotiated Rulemaking Committee
Attachments: 09.13-14.17_Byproducts Reg-Neg Mtg Summary_101017_approved.pdf

Flag: Flag for follow up

Hello,

This e-mail is being sent to Committee Members of the EPA Chemical Data Reporting (CDR) Inorganic Byproducts Negotiated Rulemaking and people who were interviewed early in the process, observed meetings or asked to be on the communication distribution list.

At the end of our last CDR Inorganic Byproducts Negotiated Rulemaking meeting on September 14, 2017, the Committee made the decision to end negotiations because members recognized that they would not be able to reach consensus on any of the options discussed. EPA thanked everyone for their participation and expressed their view that, even without reaching consensus, the exchange of information was extremely valuable and will be used to inform future actions.

Attached Is the final summary from the September 13-14, 2017 meeting, which incorporates feedback from Committee Members.

Committee Members - if you'd like to provide a Stakeholder Report or comments to be added to the public docket, submit it to EPA by October 31, 2017. If you have related questions, please contact Susan Sharkey (202-564-8789; sharkey.susan@epa.gov) or Jonah Richmond (202-564-0210; richmond.jonah@epa.gov).

All information is saved on the Byproducts Committee website and in the docket (EPA-HQ-OPPT-2016-0597).

Do not hesitate to contact us with any questions. We are also very interested in any feedback you have on the overall process. Thanks!

Laura and Chris

Subject: Chemical Safety and Pollution Prevention

Hello, Dr Beck--

First, congratulations on joining the EPA! This branch of the government has many important duties, one of which you are now an integral part.

I implore you, as a citizen of this great country, to consider closely the names of your Office (Chemical Safety and Pollution Prevention) and the EPA (Environmental Protection Agency) as you proceed in your work. Your job is now to protect the environment and, more specifically, ensure chemical safety and prevent pollution on behalf of me and everyone in this country. Anything that fights against or obstructs these goals is counter to your Office's specific, clear mission.

If you cannot or will not do this, as some of your recent actions seem to indicate (Did you indeed contribute to "...the rewriting of a rule to make it harder to track the health consequences of the chemical, and therefore regulate it"? See the NY Times article from yesterday, 10/21/2017), then you have no business working at the EPA.

Your duty is to the mission of the EPA and your specific Office now. Here is the mission, from EPA.gov's About the Office of Chemical Safety and Pollution Prevention page:

"Using sound science as a compass, OCSPP's mission is to protect you, your family, and the environment from potential risks from pesticides and toxic chemicals. Through innovative partnerships and collaboration, we also work to prevent pollution before it begins. This reduces waste, saves energy and natural resources, and leaves our homes, schools and workplaces cleaner and safer."

All I ask, as a citizen and taxpayer, is that you do your job as indicated here. Your former work must not affect your current mission. Your job is protect all of us from potentially unsafe chemicals, which means you should be making the testing and tracking of the effects of chemicals an easier thing to do -- not harder.

I'm trying very hard to conclude that you are following your own moral compass, and not chasing money or prestige of some kind; but actions like those reported on by the NY Times yesterday, that go against the interest of the U.S.'s citizenry and our right to know what's in our water and air, are making it very difficult to do so.

Please do the right thing for all of us. Please help to keep us safe from harm.

--Ginger

Subject: AGA and NGVA Regulatory Reform Discussion Focusing on the Subpart W Reporting Rule and the PCB Rules
When: Friday, November 03, 2017 3:00 PM-3:30 PM (UTC-05:00) Eastern Time (US & Canada).
Where: DCRoomARN3500/OPEI

Directions: Please use the **William Jefferson Clinton North Entrance located on your right as you exit the Federal Triangle Metro Station**. Please arrive 10 minutes prior to the meeting with photo IDs to clear Security.

EPA Contact: For an escort from Security to the meeting call (202) 564-4332; for all other matters call Robin Kime (202)564-6587.

Attendees:
Kathryn Clay, Allison Cunningham and Pamela Lacey

Request: The American Gas Association (AGA) and Natural Gas Vehicles of America (NGVA) would like to arrange a follow-up meeting with you to discuss our ideas for regulatory reform, as described in our attached comments, filed May 15, 2017 in Docket EPA-HQ-OA-2017. AGA's comments address several programs, but at this meeting, we will want to focus on revisions we have suggested to improve: (1) the Subpart W reporting rule and (2) the PCB rules.

Subject: Re: Invitation to Speak at NCAC / American Chemical Society Chemical Society of Washington October 13th Symposium

Dr. Beck:

Thank you so much for agreeing to take time from your schedule to speak at this symposium. The subject matter is of immediate relevance to many fields and sub-fields in chemistry and the allied sciences, and I am certain that the audience will greatly appreciate your insights.

Sincerely,

Jason E. Schaff, Ph.D.
CSW President

Subject: Invitation to Speak at NCAC / American Chemical Society Chemical Society of Washington October 13th Symposium

Dear Nancy,
Hello to you, and I hope you've been well. The SOT National Capital Area Chapter (NCAC) and the American Chemical Society's Chemical Society of Washington Chapter are jointly hosting a symposium on October 13th at ACS Headquarters. The topic will be TSCA, and we would be grateful if you would speak at the symposium. We have attached a draft symposium agenda with proposed topics for invited speakers. Would you please inform us as to your availability to participate? Thank you very much for your time and consideration!
Sincerely,
Meg Whittaker (NCAC Vice-President)
Jen Tanir (CSW Secretary)

Subject: New Chemicals Decision Making

Flag: Flag for follow up

Colleagues,

Thank you for participating in this morning's meeting on the new chemicals framework. I found your questions and comments very insightful and helpful to advancing our use, and further development of, the decision framework for new chemicals. I hope that you also found the discussion useful.

Implementing a new decision framework requires support throughout the office. That includes full understanding by the office's senior management team on how our decisions are adhering to the framework. To that end, for the time being Tanya Mottley and I will be the deciding officials for new chemicals cases. I expect this to be a temporary situation while we all become familiar with applying the framework to the hundreds of new chemicals decisions OPPT makes every year. This type of temporary front office hands-on involvement in decision making is not uncommon when organizations begin implementing new approaches to, or frameworks for, decision making.

To operationalize my and Tanya's ability to make new chemicals decisions without slowing down the process, we will establish an ad-hoc cross-division team that will review new chemicals cases in view of the decision framework, and make recommendations directly to Tanya and me on the determinations for each case. CCD, CESSD, and RAD will each provide a team member, and the team will be chaired by Andrea Cherepy in the Immediate Office. The team will review cases post FOCUS or standard review, consult with staff as necessary, and write up a recommendation to Tanya and me for each case. Once a determination has been made, the write-up will be posted to the CBI LAN in order to build a knowledge base for informing future evaluations and determinations.

As I said in this morning's meeting, those of you involved in the new chemicals program are doing work that is of high value in protecting human health and the environment while supporting chemical innovation. Thank you very much for your hard work and dedication to EPA's mission.

All the best,

Jeff

Subject: New Chemicals Coalition - Letter to EPA on Section 5 Points to Consider Document
Attachments: 00223603.pdf

Flag: Flag for follow up

Jeff:

Appended is a letter from the New Chemicals Coalition (NCC), a group of over 20 company representatives that have come together to identify new chemical notification issues under the amended Toxic Substances Control Act (TSCA) and to work collaboratively with you and your team to address them.

Our letter focuses on the anticipated U.S. Environmental Protection Agency (EPA) updated guidance material to assist stakeholders in developing Section 5 submissions and provides specific issues that must be included in that guidance so it is truly helpful to the regulated community. As noted in our letter, beyond knowing *what* to report in a submission, stakeholders need to understand *why* the information is needed by EPA assessors and *how* that information will be used by EPA and incorporated into a new chemical risk evaluation. Without this information, the lack of certainty regarding the EPA process will adversely impact investment, stifle innovation, and deny the regulated community with a clearer understanding of how EPA is actually implementing the new law as it relates to new chemical review.

We will be in touch with you later this week to discuss the letter and potentially arrange for a meeting with you and other EPA staff.

Call in number: Ex. 6 Personal Privacy (PP)
Access Code: Ex. 6 Personal Privacy (PP)

Hurricane Harvey/Irma Policy Coordinating Committee
Agenda
September 14, 2017

Opening Remarks **Ryan Jackson**
Barry Breen

Situational Updates

For each situational update would you please address the following topic areas in addition to Regional/Program specific highlights:

What are you being asked to do/support from our Federal, State and Local partners?

- **Are there actions you are considering leaning forward on to address a need or expedite our response activities?**
- **Are there program policy, legal, or resource issues impacting your operations?**
- **Discussion of recovery efforts**

Flag: Follow up

Nancy,

Sorry for the delay on my end.

We completely understand. Is there a time on your schedule in December/January that looks good? We can plan our next visit around it to avoid any conflicts.

Thank you again,

Chris

Bill Perdue, VP for Regulatory Affairs with the AHFA, and Brian Adams, Director of Regulatory Affairs at Ashley Furniture, will be in Washington, DC on Wednesday November 15th. Do you have time in the late morning or early afternoon to further discuss the laminated product definition in the formaldehyde emissions from composite wood product rulemaking?

Thank you very much,

Chris

Subject: Meeting with EPA

Hello Nancy,

In your absence last week, I called Venus (after recalling you were in Finland) about scheduling a meeting on behalf of our client, Occidental. It wishes to visit with you, Jeff, Gino, and Gino's RAD counterpart for carbon tet (whoever that is), and others as you deem appropriate, to address issues pertinent to the forthcoming problem formulation documents on asbestos and carbon tet. We think an hour would be sufficient. We are seeking a meeting on **November 7 or 8.**

Please let me know of EPA's availability for such a meeting. Thanks.

Lynn

Nancy,

Welcome back from Finland.

We (Occidental) seek a meeting with you, Jeff, Gino, and his RAD counterpart on carbon tet on Nov 7 or 8th. An hour is sufficient. I left a v-message with Venus.

Thanks

Subject: Meeting with EPA

Hello Nancy,

In your absence last week, I called Venus (after recalling you were in Finland) about scheduling a meeting on behalf of our client, Occidental. It wishes to visit with you, Jeff, Gino, and Gino's RAD counterpart for carbon tet (whoever that is), and others as you deem appropriate, to address issues pertinent to the forthcoming problem formulation documents on asbestos and carbon tet. We think an hour would be sufficient. We are seeking a meeting on **November 7 or 8.**

Please let me know of EPA's availability for such a meeting. Thanks.

Lynn

Subject: RE: Invitation to Speak at NCAC / American Chemical Society Chemical Society of Washington October 13th Symposium

Dear Nancy,
Hello to you, and I sincerely appreciate you making the time from your busy schedule to participate.
Jen Tanir and I will contact you closer to the symposium to discuss the details of the symposium and registrants. Thank you again!
Sincerely,
Meg

Subject: RE: Invitation to Speak at NCAC / American Chemical Society Chemical Society of Washington October 13th Symposium

Meg,
I should be back from Helsinki on the 12th so I should be able to make this work.
As we get closer it would be useful for me to talk about what type of talk would be most useful for this audience.

Regards,
Nancy

Subject: Invitation to Speak at NCAC / American Chemical Society Chemical Society of Washington October 13th Symposium

Dear Nancy,
Hello to you, and I hope you've been well. The SOT National Capital Area Chapter (NCAC) and the American Chemical Society's Chemical Society of Washington Chapter are jointly hosting a symposium on October 13th at ACS Headquarters. The topic will be TSCA, and we would be grateful if you would speak at the symposium. We have attached a draft symposium agenda with proposed topics for invited speakers. Would you please inform us as to your availability to participate? Thank you very much for your time and consideration!
Sincerely,
Meg Whittaker (NCAC Vice-President)
Jen Tanir (CSW Secretary)

Subject: Slightly Updated Materials for Byproducts Committee Meeting - Sept 13-14, 2017
Attachments: 09.13-1417_Byproducts Reg-Neg Mtg Agenda_09.11.17.docx; Draft Categories Discussion Starter 11Sept2017-final.pdf; Part III Thought starter_8Sept2017.pdf; August 16th -17th_CDR Byproducts Committee Summary_090617.docx; Exemption Proposal - Subgroup Presentation and Responses_090617.pdf; Modernize Data approach_082917.pdf; Byproducts Committee Directory_090717.docx; Directions to RRB Oceanic Suites.pdf

Hello Everyone,

We are resending materials for the Byproducts Committee Meeting on Sept. 13-14. The only documents that have changed are the following (see below e-mail for the full list of materials). All materials will be provided as handouts as well.

- Agenda: Note – we received a request from the Director of EPA's Chemical Control Division to present results of recent data analyses and from the Small Business Administration Office of Advocacy to say a few words. We're hoping that you will be willing to stay until at least 5:30p in order to have ample time in your caucus discussions.
- Option of Reporting via Categories Proposal – incorporated some additional feedback.
- Form U Part III Data Proposal – minor changes in Appendix D.

We expect to send updates for the following late afternoon/evening tomorrow.

- Approach E- Limit Reporting for Site-Specific Catalyst Recycling
- Approach F – Limit Reporting for Reuse of Inorganic Byproducts

Just a reminder that we are in a different location – the Ronald Reagan Building Oceanic Room, 1300 Pennsylvania Avenue NW, Washington, DC 20004. You will be required to go through security, but we do not need to provide names in advance and you do not need an escort. Directions to the meeting room are attached. We will not be providing coffee or snacks, but there are many options nearby.

Thanks!

Laura and Chris

Hello,

This e-mail is being sent to Committee Members of the EPA Chemical Data Reporting (CDR) Inorganic Byproducts Negotiated Rulemaking and people who were interviewed early in the process, observed previous meetings or asked to be on the communication distribution list.

Our next meeting is scheduled on Wednesday, September 13 from 9:00 AM- 5 PM and Thursday, September 14 from 9:00 AM - 3 PM. (We anticipate not having the full Committee meet on the 14th until 11:30 AM due to some proposed small group meetings scheduled for the first part of the morning. See the attached agenda for details.) The meeting will

be held at the Ronald Reagan Building Oceanic Room. Additional caucus time may be needed in the evening, early morning and over lunch. **Committee Members please let us know if you are unable to attend.**

Several Workgroups, established at the August 16-17 Committee meeting, used Committee input from the August meeting to refine proposals. The goals of this meeting are to present and discuss updated proposals, develop a package of recommendations that Committee Members can tentatively agree to, and outline next steps to refine them and obtain constituent input before the October 25-26 meeting. **Committee Members are expected to review the updated proposals closely before the meeting and be prepared to share clarification questions, strengths, concerns/ considerations, and additional ideas on how to improve them.**

The Workgroups did not strive for consensus on the updated proposals. Instead, they discussed questions and concerns so that the leads could address and refine them. The Workgroup members are listed at the end of the August 16-17 meeting summary in case you'd like to reach out to them with any initial questions.

Meeting Location

We have a new location at the Ronald Reagan Building Oceanic Room, 1300 Pennsylvania Avenue NW, Washington, DC 20004. You will be required to go through security, but we do not need to provide names in advance and you do not need an escort. Directions to the meeting room are attached. We will not be providing coffee or snacks, but there are many options nearby.

Please let us know if you do not want to be included on future e-mails. Information will also be saved on the Byproducts Committee website and on the docket (EPA-HQ-OPPT-2016-0597).

Do not hesitate contacting us with any questions.

Subject: Cancellation of October 25-26, 2017 Public Meeting for Negotiated Rulemaking Committee: Chemical Data Reporting Requirements for Inorganic Byproducts
Attachments: 09.13-14.17_Byproducts Reg-Neg Mtg Summary_101217_approved.pdf

Hello,

This e-mail is being sent to Committee Members of the EPA Chemical Data Reporting (CDR) Inorganic Byproducts Negotiated Rulemaking and people who were interviewed early in the process, observed meetings or asked to be on the communication distribution list.

We are forwarding information below from EPA on the official cancellation of the October meeting and opening of the docket for public input. EPA welcomes input from Committee Members as well as members of the public. While EPA would appreciate input before the end of the month, the docket will be open until December 11. Note that there was a question about our framing of "Stakeholder Reports" in our previous e-mail. This was just meant to refer to comments from individual Committee Members or groups of Committee Members that will be added to the public docket. Attached is a slightly updated meeting summary, in which we clarified this and added Committee Members who were unable to attend the final meeting, as requested. This summary should be added to the docket early next week.

Thanks!

Laura and Chris

---

EPA is cancelling the remaining scheduled meeting of the Negotiated Rulemaking Committee to Negotiate a Proposed Rule to Limit Chemical Data Reporting (CDR) Requirements for Certain Inorganic Byproducts. The meeting was scheduled for October 25 to 26, 2017. EPA is cancelling this meeting because the Committee determined that it was not able to reach consensus on regulatory approaches and concluded its discussions, which were required by TSCA and which were conducted in good faith. While the negotiated rulemaking process is concluding and will not be reopened, EPA is providing additional opportunity for the public to offer input for 60 days about approaches that would reduce reporting burden while maintaining the Agency's ability to receive the information it needs to understand exposure.

The objective of the Committee was to negotiate a proposed rule that would limit chemical data reporting requirements, under subsection 8(a) of the Toxic Substances Control Act (TSCA), for manufacturers of any inorganic byproducts when such byproducts are subsequently recycled, reused, or reprocessed. This negotiation process was required by TSCA, as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act.

The Committee was formally convened as a Federal Advisory Committee in June 2017, following a six-month process of public notification, identification and engagement with potential Committee members, and

development of a balanced membership. It met three times from June through September 2017. Information about the Committee, including past meeting agendas and presentations have been posted to the Committee webpage: https://www.epa.gov/chemical-data-reporting/negotiated-rulemaking-committee-chemical-data-reporting-requirements. These materials, as well as additional materials such as the Committee's charter and meeting summaries, are available in docket EPA-HQ-OPPT-2016-0597 in regulations.gov. The docket established for the negotiated rulemaking public meetings will be open for any additional public input for 60 days following the publication of the Federal Register Notice.

Situational Updates

For each situational update would you please address the following topic areas in addition to Regional/Program specific highlights:

What are you being asked to do/support from our Federal, State and Local partners?

- **Are there actions you are considering leaning forward on to address a need or expedite our response activities?**
- **Are there program policy, legal, or resource issues impacting your operations?**

Aquatic environmental exposure assessment for formulated consumer products using iSTREEM®

Join us for a webinar on Oct 12, 2017 at 2:00 PM EDT.

Register now!

https://attendee.gotowebinar.com/register/3766439038919403267

Every day people use products on their bodies or in their home that may make their way down the drain and eventually into the environment. Widespread and constant use of these products potentially exposes the aquatic environment to trace concentrations of ingredients from these products. How do we determine whether there are risks to the environment associated with chemicals used in formulated consumer products? Join us to learn about a free online tool, iSTREEM®, that predicts the concentrations of "down-the-drain" chemicals in the conterminous U.S. and southern Ontario surface waters and how this model may help you better understand possible environmental risk associated with use of these products.

After registering, you will receive a confirmation email containing information about joining the webinar.

Nancy,

Sorry for the delay on my end.

We completely understand. Is there a time on your schedule in December/January that looks good? We can plan our next visit around it to avoid any conflicts.

Thank you again,

Chris

Dear Terje ,
Many thanks ! I am looking forward to the plenary panel . I will send my slides early November ,
Kind regards
Frederic

On Fri, 20 Oct 2017 at 12:08, Terje Aven <terje.aven@uis.no> wrote:

Hi all,

Thanks for participating in the panel, it will be great :-)

I will have an introduction to the panel discussion, see enclosed preliminary slides with associated text.

A key point made is the important role risk analysis has and should have in understanding and characterizing the 'humbleness' part of science and clarifying the limits of the 'confidence' part.

After the Introduction Sally will take over, she is the Moderator. She will introduce you.

The idea is that each of you has a prepared introduction of some 5-7 minutes, prepared with slides if you like, with clear statements –linked to the challenges made in the abstract and hopefully inspired by my Intro and comments made by Sally:

«Has RA's role changed over time? How? What are current challenges? What seems easier or more well regarded currently? Can RA help rebuild trust in governance and public decision-making? How? «

We would not like to restrict creativity and what you find most important on this matter, so feel free to angle things as you like. Focusing on some few – one or two – themes is however recommended. To be able to lead the panel discussion in a good way, we think it is wise to have a process in advance – starting now – where we share some of the ideas we have. The aim of this dialogue is to make the panel as interesting as possible by being informed what is coming, so that one can get ideas for comments and questions. We would like to have a lively discussion so the point is not to use this dialogue to obtain some unity or consensus at this stage (rather the opposite ☺)

Looking forward to hearing from you. What we ask from you now is an indication of what type of message – themes- that you would like to highlight - in text or using slides.

We would very much appreciate if we could get some input before 15 November.

Thanks a lot.

Enjoy the weekend.

Best

Terje

Tuesday morning

Evidence and knowledge-based decision-making in a risk analysis setting: Desired reality or Misconception?

How has the post-truth society (in which objective facts are become less influential in shaping public opinion) been able to develop? Has science sought to stretch its domain too widely and denied uncertainties? Or was the truth not comfortable enough for those in power or seeking power? Why are "alternative facts" and "fake news" becoming household names?

As risk analysts we are aware that evidence is not only related to facts but also to beliefs and concerns that need to be taken into account in risk management and regulation. We are also aware that value judgments are equally important as a basis for decision-making as is evidence in the form of data, information and justified beliefs. However, there are clear data-driven insights that one cannot ignore. Climate change is real. And so is the risk of particulate matter for our health.

The panel will discuss the role of science and in particular risk science in keeping the delicate balance between factual statements and acknowledgement of uncertainty and ambiguity.

Introduction Terje Aven

Moderator: Sally M. Kane

Panelists: Joe Árvai, Nancy Beck, Frederic Bouder, Lisa A. Robinson

Terje Aven, University of Stavanger, Norway

Sally M. Kane, Independent Consultant

Joe Árvai, University of Michigan

Nancy Beck, US Environmental Protection Agency (EPA)

Frederic Bouder, Maastricht University, The Netherlands

Lisa A. Robinson, Harvard T.H. Chan School of Public Health

John – Thanks for the response. We appreciate the agency's efforts to keep this moving. As discussed during our call in June, CDA would like to review the charge questions to ensure that they properly frame the issues that we think will be paramount as we look towards future registration of claims. Let me know when we might be able to see a draft.

Thanks again and have a great weekend.

Hello Joe – I apologize for not getting back to you earlier. The current status is that we are close to finalizing the letter that we will share with our federal partners that will include a request for a reviewer, the charge questions and the criteria for the review. I ensure you that we are still focused on this issue and I will let you know as soon as I have any updates on our progress.

Thanks,
John

Subject: RE: Copper Development Association: Review and Approval of Claims for Antimicrobial Copper Products Based on Clinical Trial Results (Confidential Business Information)

Hi John and all –

From our discussions in June, CDA was encouraged that a panel to review the clinical trial studies would be formed promptly and in an open and cooperative manner. CDA provided the data to EPA on August 8, and recommendations on potential panel members for consideration on September 12. We understand that the agency is seeking appropriate reviewers, but it is unclear what kind of progress has been made in terms of panel formation or other aspects of the review process, such as developing draft panel questions. It is vital that we maintain momentum and focus on the issue.

Please let us know where things stand and the schedule for moving forward. CDA also is happy to initiate drafting of questions for the panel, or to discuss development of the questions with EPA.

Thanks and best regards,
Joe

Hello Joe – Thank you for CDA's list of potential candidates. We will take your recommendations in consideration as we continue to work on finding appropriate agencies and institutions to review the clinical study. We'll be in touch when we have more information to share with you on this.

Thanks,
John

Hi John –

Following up on my message last week, attached please find a list of potential candidates for potential inclusion on the review panel. CDA attempted to identify candidates with relevant expertise in the field that have not previously been involved or associated with the clinical trials.

We look forward to working with EPA on the panel selection process and in developing the charge questions. Thanks again for your continued attention to this matter.

Regards,
Joe

Subject: RE: Copper Development Association: Review and Approval of Claims for Antimicrobial Copper Products Based on Clinical Trial Results (Confidential Business Information)

Hi John –

Thanks for the response and the information on the status of the panel selection process. During our June call, EPA offered to consult with CDA regarding selection of the panel members and we would like to do so. In particular, given CDA's detailed knowledge of the clinical trials, we think it would be helpful to review and provide feedback on the draft panel questions, as well as in identifying potential panel members. CDA is developing a list of potential reviewers who have not previously been involved or otherwise associated with the

trials but have expertise and standing that would be relevant to potential participation in the panel. We will send that list to you in short order for consideration.

After we have a chance to consider the panel review questions, perhaps a follow up conference call with EPA would make sense at that point.

Thanks again for your continued attention to this matter.

Regards,
Joe

Hello Joe – The update on where we are since our last meeting is that the Antimicrobials Division has assembled a task group that meets weekly to work on the review process for the clinical study. This group is in the process of drafting questions and criteria for review of the clinical study. The group is also working to identify appropriate agencies/institutions to review the study, and specific qualifications needed for reviewers. We have engaged with the EPA Office of the Science Advisor to facilitate outreach to reviewers and are coordinating with the Human Research Ethics and Oversight staff.

This is where we currently are so if we have a call, I don't think we'll have anything more substantive to add. But let me know if you would still like a call or if you have any questions.

Regards,
John

Hi John –

I believe you are out of the office for the remainder of the week, but wanted to touch base to set up a call with CDA/EPA regarding the panel selection process. (per our letter with the data submission, excerpted below) Let me know what you think on possible dates for such a call.

Thanks
Joe

JOSEPH J. GREEN

> Finally, as discussed on our call, CDA looks forward to assisting EPA in the review panel selection process. Currently, we are working on identifying experts for EPA's consideration. To ensure continued progress, we believe it would be helpful to have a call to discuss the panel selection process and schedule, including, as noted on our call and follow-up letter of June 26th, areas of expertise and other criteria to ensure that a conflict of interest does not exist for any of the reviewers. **Please let us know your availability for such a call.**

Thanks John. We are good with the approach to the data submission as you described below - you have our OK to proceed.

One note: the spreadsheets are rather large and it may be tricky to get it all on a normal size PDF. Just want to make sure the data doesn't get truncated when put in that format.

Thanks again - and hope you are heading off on a good vacation!

Joe

Hi Joe – I talked to the front end about this. We can take the electronic files you submitted and turn them into PDFs and assign that an MRID. We cannot assign MRIDs to electronic files and the data cannot be appended the clinical study (that's why it needs a new MRID). The supporting documents

CBI / Ex. 4

that. There is really nothing for you to do other than give me your "ok" to go ahead. Sorry, if this seems complicated but I do think it's important for the data to be part of the official record and to link it with the clinical study.

Please let me know if you have any questions.

Thanks,
John

Attachments: CII GC Symposium Agenda 2017, v.9.docx

Good morning Mary,

Would you have any idea yet if Nancy will be available to present at our offices on October 27. Certainly understand if she is too busy. A brief update on any of the following topics would be of great interest to the group; legislative agenda; TSCA reform implementation; research reform; and regulatory reform.

Best regards,

Alice

Subject: RE: Thompson Hine Speaker Request

Hi Mary,

I'm following up on Nancy's email to Bill Hubbard regarding out Thompson Hine event in DC on October 26 & 27. I have attached the agenda for your review. Her presentation would only be about 20 minutes in length and is the last

segment of the "Hot Topics" agenda item which runs from 8:30 – 9:30 am on Friday, October 27. There are three short presentations planned; Government Contracts, Immigration and an EPA update. We were hoping that Nancy could speak to what's going on currently with TSCA and given the new administration, any initiatives or general policy changes that may impact the chemical industry. A brief update would be perfect.

Look forward to hearing from you.

Best regards,

Alice

Nancy,

While you are unable to join us at the DRI conference, I was wondering if you might be interested and available to speak at an event my Firm is hosting on our DC office. On October 26th and 27th, our firm is hosting a symposium in our Washington DC office for the general counsel of our chemical industry clients – a group of about 10-20. We invite presenters on various topics of concern that general counsel are facing in the industry. One topic of particular interest is happenings at the EPA. I was wondering if you might be interested in speaking for about 20 minutes to us the morning of October 27th. Please let me know if you are interested and we can further discuss details.

Subject: DRI: TTEL Seminar Speaker Confirmation

Nancy,

I am happy to report that DRI has accepted our seminar program and you as a speaker at the Toxic Tort and Environmental Law seminar in Nashville March 1 and 2, 2018. You will be speaking from 3:50 to 4:40 on the 1st and will be joined by Lynn Bergeson.

The title and description (we are limited to 35 words) of your talk is:

New TSCA: Repercussions on commercial transactions, supply chain relationships, and toxic tort and product liability law

Learn how New TSCA is redefining supply chain relationships; rewriting due diligence rules of engagement; reopening debate on new avenues in product liability, insurance, and tort law; and raising important questions regarding right-to-know vs. confidentiality.

You will be fully comped, which includes registration, 2 nights at hotel, up to $500 for flight, up to $125 for meals, and up to $200 for ground transportation.

As soon as possible could you please confirm your availability to speak.

By July 21st I need from you please:

1) Any revision to the session title and description (we are limited to 35-40 words).

2) Contact information: organization, mailing address, phone, and email

3) Bio: 80 word limit.

4) Photo: Head shot.

Thank you so much.

Subject: RE: Meeting with EPA

Lynn,
My understanding is that Jeff Morris's staff are working on setting this up for the 6th.
Mary should be able to confirm when she is back in the office on Monday.

Have a great weekend!
Nancy

Lynn,
I may be on international travel, definitely on the 8th, maybe on the 7th, but Mary and Venus should be able to help you set up a meeting with OPPT staff to discuss asbestos and carbon tetrachloride.

Regards,
Nancy

Subject: Meeting with EPA

Hello Nancy,

In your absence last week, I called Venus (after recalling you were in Finland) about scheduling a meeting on behalf of our client, Occidental. It wishes to visit with you, Jeff, Gino, and Gino's RAD counterpart for carbon tet (whoever that is), and others as you deem appropriate, to address issues pertinent to the forthcoming problem formulation documents on asbestos and carbon tet. We think an hour would be sufficient. We are seeking a meeting on **November 7 or 8.**

Please let me know of EPA's availability for such a meeting. Thanks.

Lynn

Subject: APCRA-3 Face-to-Face meeting registration and logistics - updated

Attachments: Welcome package v2.docx

Dear all,

We wanted to send you the logistics and registration information for the APCRA-3 Face-to-Face meeting in Ottawa on October 10-11, 2018. Further follow-up from our teleconference early this week (e.g., updated draft agenda, open session invitation) will be sent out separately in the next week.

Please find attached a welcome package with information on meeting location and nearby hotels. As noted in this document, there is a discount block of rooms at the Lord Elgin which closes on September 8th so please make your

reservations prior to this date if you'd like to take advantage of this discount. You should be able to reserve rooms through the link in the attached document, or via phone if the link does not work.

For **APCRA participants planning to attend in person, please register** by email to gwinn.maureen@epa.gov with the following information by September 20th:

1. Name
2. Affiliation
3. Email
4. Hotel (optional)
5. Dates of stay (optional)

As a reminder, the meeting will be held on October 10 -11, 2018 from 8:30am to 5 or 6pm each day. As in the past, we may try to organize an optional group dinner on the first night of the meeting. Details to follow.

For non-US travelers: I have included a link below for the electronic travel authorization (eTA) process which is recommended to be completed prior to booking your flight to Canada. This is true even for most travelers from visa exempt countries. This is a fairly new requirement. For information on the eTA visit:
https://www.canada.ca/en/immigration-refugees-citizenship/services/visit-canada/eta/facts.html

Thank you, and please let me know if you have any questions.

Maureen

Subject: APCRA-3 Face-to-Face meeting registration and logistics

Attachments: Welcome package v2.docx

Dear all,

We wanted to send you the logistics and registration information for the APCRA-3 Face-to-Face meeting in Ottawa on October 10-11, 2018. Further follow-up from our teleconference early this week (e.g., updated draft agenda, open session invitation) will be sent out separately in the next week.

Please find attached a welcome package with information on meeting location and nearby hotels. As noted in this document, there is a discount block of rooms at the Lord Elgin which closes on September 8th so please make your

reservations prior to this date if you'd like to take advantage of this discount. You should be able to reserve rooms through the link in the attached document, or via phone if the link does not work.

For **APCRA participants planning to attend in person, please register** by email to gwinn.maureen@epa.gov with the following information by September :

1. Name
2. Affiliation
3. Email
4. Hotel (optional)
5. Dates of stay (optional)

As a reminder, the meeting will be held on October 10 -11, 2018 from 8:30am to 5 or 6pm each day. As in the past, we may try to organize an optional group dinner on the first night of the meeting. Details to follow.

For non-US travelers: I have included a link below for the electronic travel authorization (eTA) process which is recommended to be completed prior to booking your flight to Canada. This is true even for most travelers from visa exempt countries. This is a fairly new requirement. For information on the eTA visit:
https://www.canada.ca/en/immigration-refugees-citizenship/services/visit-canada/eta/facts.html

Thank you, and please let me know if you have any questions.

Maureen

Attachments: Permissions Release for SOT Use of Materials.pdf

Hi Mary,
I noticed Dr. Beck's slides were sent by you. Are you able to take care of the SOT permission form (attached) and send a short bio? I was trying to collect them from all of the speakers by today, but I see Nancy is out of the office and may not be able to respond.

Best,
Jen

Attachments: APCRA2 Agenda and groups assigment_220917.docx; APCRA Workshop_Biosketches_220917.docx

Flag: Flag for follow up

Dear APCRA participants,

We hope this note finds you well, with travel plans in place and discussion points at the ready! We are looking forward to furthering the dialogue we began last year in Washington, DC and have continued throughout our regular conference calls this past year. We continue to fine-tune the agenda, and will send a final agenda to you all prior to the meeting. However, we have a few logistical details that we'd like to address in advance, which are described below.

Thanks again for your continued interest and energy in this topic, and we look forward to seeing you in Helsinki!

To all attendees:

Biosketches: As with last year, we would like to include biosketches for all participants. This should include your current job, past professional activities, your potential role in advancing the use of NAMs for chemical risk assessment, and which, if any, case studies or APCRA-related projects you are currently working on. If you attended last year, please feel free to update your biosketch (please checked attached document). If you are new participant, please provide your biosketch. In both cases please send an e-mail to anita.rynkanen@echa.europa.eu (preferably by **OCTOBER 2**).

Contact information: We would also like to share contact information for all attendees. Please send your name, title, organization, mailing address, contact numbers and preferred email address to anita.rynkanen@echa.europa.eu (preferably by **OCTOBER 2**)

Presenters: For all presenters, if you plan to use slides, please send them to Maureen Gwinn and Tatiana Netzeva by **OCTOBER 5.**

For the case study presentations at this year's workshop, each case study presenter has 30 min including time for questions and discussion unless a different amount of time was previously discussed.

Each project is invited to address the following questions:

- How does the project contribute to the objectives of APCRA?
    a. Prioritisation
    b. First tier assessment
    c. Full assessment in a weight of evidence approach
    d. Replacement (of animal study) for full assessment
    e. Classification and labelling
- What has been done and what was achieved?
- What entities have been involved?
- Next steps and timelines
-

For Day Two presentations, each presenter has 15 min including time for questions to discuss on how regulatory Agencies intend to implement NAMs in their processes, both mid- to long-term vision. Slides are optional for these presentations.

Breakout groups: Based on feedback received, we are currently planning to have three breakout groups on the following topics:

- Strategic discussion of data gaps and research needs,
- Establishing competence in NAMs application and standardizing approaches,
- Future needs and development for exposure analysis.

To streamline the organization, we made the preliminary proposal for breakout groups composition, please let us know (Maureen Gwinn and Tatiana Netzeva, preferably by **OCTOBER 2**) in case you would prefer to join different group.

On day 2 we have also included a possibility of working lunch for case study leads to get together with interested participants to discuss next steps for their case studies. Case study leads – please contact Tatiana Netzeva if you would like to have it (latest **OCTOBER 5,** so we can prepare logistics).

Hello Everyone,

We're forwarding documents from Jim Cooper on Byproducts Approach E - Limit Reporting for Site-Specific Catalyst Recycling. We should have printed versions tomorrow. Note that the flowchart is currently set to print on legal sized paper.

We look forward to seeing you tomorrow.

Laura and Chris

Subject: Slightly Updated Materials for Byproducts Committee Meeting - Sept 13-14, 2017

Hello Everyone,

We are resending materials for the Byproducts Committee Meeting on Sept. 13-14. The only documents that have changed are the following (see below e-mail for the full list of materials). All materials will be provided as handouts as well.

- Agenda: Note – we received a request from the Director of EPA's Chemical Control Division to present results of recent data analyses and from the Small Business Administration Office of Advocacy to say a few words. We're hoping that you will be willing to stay until at least 5:30p in order to have ample time in your caucus discussions.
- Option of Reporting via Categories Proposal – incorporated some additional feedback.
- Form U Part III Data Proposal – minor changes in Appendix D.

We expect to send updates for the following late afternoon/evening tomorrow.

- Approach E- Limit Reporting for Site-Specific Catalyst Recycling
- Approach F – Limit Reporting for Reuse of Inorganic Byproducts

Just a reminder that we are in a different location – the Ronald Reagan Building Oceanic Room, 1300 Pennsylvania Avenue NW, Washington, DC 20004. You will be required to go through security, but we do not need to provide names in advance and you do not need an escort. Directions to the meeting room are attached. We will not be providing coffee or snacks, but there are many options nearby.

Thanks!

Laura and Chris

Hello,

This e-mail is being sent to Committee Members of the EPA Chemical Data Reporting (CDR) Inorganic Byproducts Negotiated Rulemaking and people who were interviewed early in the process, observed previous meetings or asked to be on the communication distribution list.

Our next meeting is scheduled on Wednesday, September 13 from 9:00 AM- 5 PM and Thursday, September 14 from 9:00 AM - 3 PM. (We anticipate not having the full Committee meet on the 14th until 11:30 AM due to some proposed small group meetings scheduled for the first part of the morning. See the attached agenda for details.) The meeting will be held at the Ronald Reagan Building Oceanic Room. Additional caucus time may be needed in the evening, early morning and over lunch. **Committee Members please let us know if you are unable to attend.**

Several Workgroups, established at the August 16-17 Committee meeting, used Committee input from the August meeting to refine proposals. The goals of this meeting are to present and discuss updated proposals, develop a package of recommendations that Committee Members can tentatively agree to, and outline next steps to refine them and obtain constituent input before the October 25-26 meeting. **Committee Members are expected to review the updated proposals closely before the meeting and be prepared to share clarification questions, strengths, concerns/ considerations, and additional ideas on how to improve them.**

The Workgroups did not strive for consensus on the updated proposals. Instead, they discussed questions and concerns so that the leads could address and refine them. The Workgroup members are listed at the end of the August 16-17 meeting summary in case you'd like to reach out to them with any initial questions.

Join the conversation online with #SacklerSciComm.

Climate intervention…fracking… vaccines…human genome editing…artificial intelligence… with so many complex, important, and sometimes uncertain scientific issues facing our society, there has never been a more critical time to communicate effectively. The challenges facing scientists, professional communicators, and the interested public have resulted in a growing area of research—the science of science communication. The **National Academy of Sciences** is hosting its third Arthur M. Sackler Colloquium on this topic to advance a national dialogue.

Evolving from past colloquia, this Colloquium will focus on the consensus study report, Communicating Science Effectively: A Research Agenda, as a framework for advancing both research and practice in science communication. The Colloquium will explore ways to build capacity for and foster the use of evidence-based strategies for engaging the public with science and ensuring its appropriate use. Additionally, this third Colloquium will tackle the tough and often overlooked organizational and infrastructure changes needed to make research-based communication the norm.

Sessions include:

- The Mistrust of Science - Keynote by Atul Gawande
- Future Directions in the Sciences of Science Communication
- A View from Philanthropy on the Future of Science Communication
- Incentives for Scientists and Engineers to Communicate About Their Research
- Focus on a Communication Challenge: Threats to Science's Reputation
- The Role of Scientists and the Media in Communicating Uncertainty
- Creating a Collaborative Community for the Sciences of Science Communication
- Marshalling the Troops: How Can Traditional Disciplines Help Build the Scale of Research in Science Communication?

- Rethinking Evaluation: Using Networks, Big Data, and Social Media to Measure Dissemination and Impact
- Science in the News: Human Genome Editing, AI and Driverless Cars, and Gene Drive

The National Academy of Sciences' Sackler Colloquium on the Science of Science Communication III is the premier gathering for researchers, practitioners, content experts, and philanthropists to come together to ensure that evidence-based science communication thrives.

Support for the Colloquium is provided by The Annenberg Public Policy Center of the University of Pennsylvania, Rita Allen Foundation, Science Sandbox – a Simons Foundation initiative, William and Flora Hewlett Foundation, Gordon and Betty Moore Foundation, The Kavli Foundation, Alfred P. Sloan Foundation, Burroughs Wellcome Fund and Penn State Science Communication Program.

Lois,
Hello! Rick Keigwin suggested I reach out to you. On the recent CA specialty crop tour, there were multiple referrals to how the MRLs from Taiwan appear to be driving pesticide use in California. In trying to understand why this is happening, Rick suggested I reach out to you. Nothing is urgent but if you have some time, I would appreciate hearing about how we've ended up in this position. Additionally, I will likely be going to Taiwan in November to talk about TSCA/chemical regulation and I'm wondering if it would be worthwhile to add on some pesticide meetings.

Many thanks,
Nancy

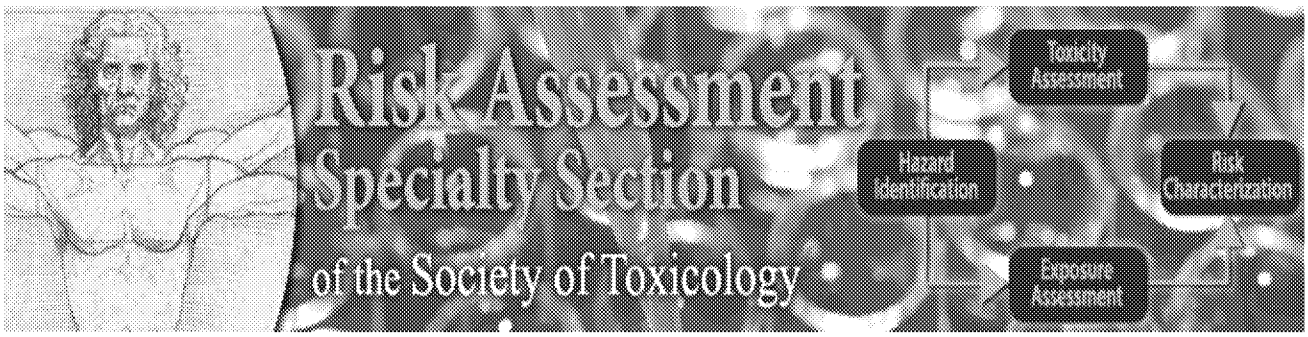
Subject: Risk Assessment Specialty Section (RASS) Monthly Webinar on November 8, 2017
Reply-To: "SOT Headquarters" <SOTHQ@toxicology.org>



Dear RASS members:

Our November webinar will familiarize us with the latest on systematic review – how and why it was developed as well as how it is being implemented in assessment applications. Vickie Walker of the National Toxicology Program in the NIEHS and Michele Taylor of the IRIS program at the US EPA will present perspectives and applications from their respective agencies on the practice and promise of systematic review in their two-part presentation entitled: "*Systematic Review: Concept and Tool Development with Application to Assessment Processes of the National Toxicology Program (NTP) and the Integrated Risk Information System (IRIS).*"

The abstract for the presentation is provided below with the instructions for webinar access.

The file for the presentation will be available for download on Monday, November 6th, by COB in the "Webinars and Downloads" section of the RASS homepage. The URL is as follows: http://www.toxicology.org/groups/ss/RASS/downloads.asp.

I hope you will be able to join us to learn about the state-of-the-science for application of systematic review in risk assessment. Your participation in the webinars and especially the discussion at the end makes the time taken by our presenters to contribute to our webinars worthwhile. Please show your appreciation of their contribution by your continued attendance and active engagement.

Cheers,
Annie

Systematic Review: Concept and Tool Development with Application in the IRIS Assessment Process

Abstract

There is growing interest within the environmental health community to incorporate systematic review methodology to increase transparency and objectivity of literature

reviews of complex environmental questions. Systematic review uses a pre-established scientific framework to identify, select, assess, and summarize data from available studies to address specific scientific questions. The goal is to ensure the review is complete, unbiased, reproducible and transparent. The results of a systematic review can be used to inform decisions, reach conclusions, or identify research needs. Environmental health questions require the evaluation of a broad range of relevant data (e.g., human, animal, and "other relevant data" including mechanistic or *in vitro* studies), therefore systematic review methods must consider the diversity of data types and include procedures to integrate data across these evidence streams to reach conclusions regarding potential health effects from environmental exposures.

This webinar will provide a general overview of systematic review methods for addressing environmental questions and several software tools that facilitate the application of the workflow. Examples will be presented from both the National Toxicology Program's Office of Health Assessment and Translation (OHAT) and the Integrated Risk Information System (IRIS) at EPA.

Hi, here's the latest from EDF Health:

How Pruitt's EPA finds a dangerous chemical is safe: Ignore most exposures to it

By Richard Denison

Richard Denison, Ph.D., is a Lead Senior Scientist. The 2016 Lautenberg Act amendments to the Toxic Substances Control Act (TSCA) expanded and enhanced Congress' vision for how the Environmental Protection Agency (EPA) should evaluate and mitigate the potential risks of chemicals. The original TSCA was intended to encompass the full lifecycles of chemicals, from manufacturing to [...]

Hello Nancy,

In your absence last week, I called Venus (after recalling you were in Finland) about scheduling a meeting on behalf of our client, Occidental. It wishes to visit with you, Jeff, Gino, and Gino's RAD counterpart for carbon tet (whoever that is), and others as you deem appropriate, to address issues pertinent to the forthcoming problem formulation documents on asbestos and carbon tet. We think an hour would be sufficient. We are seeking a meeting on **November 7 or 8.**

Please let me know of EPA's availability for such a meeting. Thanks.

Subject: SOT-ACS Colloquium

Dear Dr. Back (Nancy) ----

Good morning. It was very good meeting you last week at ACS HQ for the joint ACS-SOT meeting. Thanks very much for your outstanding presentation on the new TSCA updates mandated by the Frnak Lautenberg Chemical Safety Act (LCSA).

The question that I had spoken of in our post-talk "sidebar" was whether under "Scope" or "Definitions", "cosmetic ingredients", "cosmetics", or other ingredients and finished products in the range regulated by FDA under the federal FD&C Act are covered by EPA as "chemical substances"; I believe that they weren't previously covered under TSCA (1976) and that in the new LCSA, this hasn't changed. I just wanted to confirm this with you, if you know.

Many thanks for your courtesy in taking the time to answer this question. 'Much appreciated.

Tim,
Ryan forwarded your message to me and asked me to respond.

The guidance is currently still at OMB undergoing their typical interagency review process. As you likely know, this involves multiple back and forths among the agencies with OMB to work towards resolving all concerns. Once the deliberative dialogue is concluded, FDA will finalize the guidance and then EPA will assume authority. Unfortunately, I can't predict exactly when this will happen, but I do know the agencies are all working together to get to resolution.

As Tom Bostick checks in regularly, once we have some news, I will surely pass it along to him as well as other working with Intrexon. I would be happy to keep you updated as well.
Please let me know if you have any other questions.

Ryan, I may have missed your response to my inquiry (I have been in and out of the office on vacation). Thanks for any status report you can provide.-- Tim

Ryan—

I hope you are well and have a little time to catch up this month. I know it has been a hectic few months.

I was hoping that you could provide a little information about a jurisdictional issue involving EPA and FDA. I represent Intrexon, which has a subsidiary (Oxitec) that produces a genetically modified mosquito that may become a valuable resource for preventing the spread of the Zika virus and other diseases transmitted by the same type of mosquito (aedes aegypti). Back in January, EPA and FDA issued draft guidance for industry on the regulation of mosquito-related products and took public comments. It is my understanding that this guidance is very close to being finalized, and may have already cleared OMB review. I was wondering if you could share any information about when this guidance is expected to be finalized and take effect.

As always, thanks for your assistance.

Tim

Good to hear from you.

January 23rd works on our end. We will plan on it. I know it is far off for now but any specific time?

Thank you very much,

Chris

Subject: Thank you

Nancy,

Thank you for meeting with the representatives of TX Citrus Mutual, FL Fruit & Veg, National Sorghum Producers, National Cotton Council, American Soybean Association and me to discuss the pending Section 3 for Sulfoxaflor. We are hopeful that Rick's team will be able to review the status of new use requests and be able to move forward with at least a couple of them before too long. Please do not hesitate to let me know if you have any questions or concerns about this issue or some of the broader pollinator policy impacts on agriculture.

Thanks again and enjoy the weekend.

Subject: RE: Copper Development Association: Review and Approval of Claims for Antimicrobial Copper Products Based on Clinical Trial Results (Confidential Business Information)
Attachments: Scientific_Panel_Recommendations_EPA_Copper_Clinical_Trial_Review.docx

Hi John –

Following up on my message last week, attached please find a list of potential candidates for potential inclusion on the review panel. CDA attempted to identify candidates with relevant expertise in the field that have not previously been involved or associated with the clinical trials.

We look forward to working with EPA on the panel selection process and in developing the charge questions. Thanks again for your continued attention to this matter.

Regards,
Joe

Hi John –

Thanks for the response and the information on the status of the panel selection process. During our June call, EPA offered to consult with CDA regarding selection of the panel members and we would like to do so. In particular, given CDA's detailed knowledge of the clinical trials, we think it would be helpful to review and provide feedback on the draft panel questions, as well as in identifying potential panel members. CDA is developing a list of potential reviewers who have not previously been involved or otherwise associated with the trials but have expertise and standing that would be relevant to potential participation in the panel. We will send that list to you in short order for consideration.

After we have a chance to consider the panel review questions, perhaps a follow up conference call with EPA would make sense at that point.

Thanks again for your continued attention to this matter.

Regards,
Joe

Subject: RE: Copper Development Association: Review and Approval of Claims for Antimicrobial Copper Products Based on Clinical Trial Results (Confidential Business Information)

Hello Joe – The update on where we are since our last meeting is that the Antimicrobials Division has assembled a task group that meets weekly to work on the review process for the clinical study. This group is in the process of drafting questions and criteria for review of the clinical study. The group is also working to identify appropriate agencies/institutions to review the study, and specific qualifications needed for reviewers. We have engaged with the EPA Office of the Science Advisor to facilitate outreach to reviewers and are coordinating with the Human Research Ethics and Oversight staff.

This is where we currently are so if we have a call, I don't think we'll have anything more substantive to add. But let me know if you would still like a call or if you have any questions.

Regards,
John

Hi John –

I believe you are out of the office for the remainder of the week, but wanted to touch base to set up a call with CDA/EPA regarding the panel selection process. (per our letter with the data submission, excerpted below) Let me know what you think on possible dates for such a call.

Thanks
Joe

JOSEPH J. GREEN
Special Counsel
Kelley Drye & Warren LLP

JGreen@KelleyDrye.com

Finally, as discussed on our call, CDA looks forward to assisting EPA in the review panel selection process. Currently, we are working on identifying experts for EPA's consideration. To ensure continued progress, we believe it would be helpful to have a call to discuss the panel selection process and schedule, including, as noted on our call and follow-up letter of June 26th, areas of expertise and other criteria to ensure that a conflict of interest does not exist for any of the reviewers. **Please let us know your availability for such a call.**

Thanks John. We are good with the approach to the data submission as you described below - you have our OK to proceed.

One note: the spreadsheets are rather large and it may be tricky to get it all on a normal size PDF. Just want to make sure the data doesn't get truncated when put in that format.

Thanks again - and hope you are heading off on a good vacation!

Joe

Lynn,
Thanks for the note. This is on the radar and I should be getting briefed on the topic shortly. If you have sent comments to an OPP docket, I should be able to access them.

Regards,
Nancy

Subject: EPA Guidance on Biostimulants

Hello Nancy,

The attached letter is submitted on behalf of the U.S. Biostimulant Coalition (USBC), the Biological Products Industry Alliance (BPIA), and the American Seed Trade Association (ASTA). In it, these groups express strong support for prompt issuance of the guidance document on which the Office of Pesticide Programs (OPP) has been working for a year or so relating to biostimulants. We are appreciative of OPP's efforts in this regard, commend Rick Keigwin, Mark Harman, and others for their hard work, and are eager to see the fruits of their significant labor shared with stakeholders.

As always, please let me know if you would like additional information on this important issue.

Best regards for a great Labor Day weekend.

Lynn

Nancy,
We look forward to the meeting in the morning at 10:15 am. Attending with me from Covestro will be Bob Skoglund and Christine Bryant. Also attending will be my colleague, Rob Mangas.
Can you tell me which EPA Associates will be attending?

Thanks-
Tim

To: cmoore@mediate.org
Subject: Timing for Byproducts Committee Meeting - Thurs, Aug 14 (Industry at 9a and everyone else at 10a)

Hello Everyone,

After discussions with each caucus, we've developed the following schedule.

Industry caucus - 9–10a
Full Committee arrive at 10a

Industry needs more time to discuss a potential package and determine whether they are ready to proceed with a Cross-Caucus Package Workgroup, full Committee discussion or some other recommended approach. Therefore, we are requesting all Committee Members arrive at 10a. We'll share a more refined schedule then.

Thanks and we look forward to tomorrow's discussions.

Laura and Chris

Thanks, Silvia. The cost to maintain the site is pretty minimal (~$150/year). We would of course have to add content and update it to keep it current. Cost in time; not necessarily dollars.

Bill

Sorry for the delay. I was out of the circuit for the last two months.

My first look at the site and reading the content of some articles indicates the site is scientifically based and goes in the direction of TEF ideas.
Not clear how much could be the costs and if we are keeping both sites or will include a section at TEF website.

Best

Silvia

All-

As discussed at the Annual Meeting, we are considering taking over the website "Kids+Chemical Safety" as a part of TEFs efforts to educate the public. TERA and the University of Cincinnati are willing to turn it over to us if we assume responsibility for the costs of managing the site. The first order of business is to decide if we think the current content would be appropriate for our site and a useful addition to our web presence. An archived version of the site can be found at:

https://web.archive.org/web/20161007143018/http://kidschemicalsafety.org/

Executive Committee and Web Committee members, please review the site and let me know whether you think TEF should pursue this addition to our site. In the meantime, I will work with Susie and Laurie to determine costs for hosting and maintaining the site. If we decide to take this on, we will talk further about adding content and cross-referencing between our current TEF materials and the added website.

Thanks in advance for a prompt response,

Bill

Dear Colleagues

I would be happy to answer questions about either how this website was funded, who the partners are, or who wrote the various articles.
The overall intent was to give parents a place to go for balanced information; and the stories strived to include links to other websites that were scientifically credible.

Cheers!

Michael

Subject: Settled In

I presume you are settled in nicely at EPA and have identified the turkeys and losers --- at least i hope so.

Keep fighting the good fight. I always loved "without chemicals life itself is impossible!"

Loved todays news regarding chemical in sun screen tied to death of corals. Certainly not an end point to pick up in PMN review program. Sadly, most real chemical regulation is in response to active real world information provide bad news not animal testing or the new BS of alternative testing. Fix what the press and the world trips over and you are a winner.

kick butt. nuke the turkeys. PhD does not mean smart. nope.

Hello Gloria,

We are counsel to Duracell, the battery company. It wishes to meet with Wendy, Nancy, Jeff, and David Widawsky later this month to introduce a new battery technology and explain its benefits, and how it will be regulated under TSCA.

Could you please find an hour where the people above will be available? We thought perhaps Administrator Pruitt would welcome an opportunity to visit as well, so it would be fantastic if Mr. Pruitt's calendar were also considered.

Thanks much.

Hello,

This e-mail is being sent to Committee Members of the EPA Chemical Data Reporting (CDR) Inorganic Byproducts Negotiated Rulemaking and people who were interviewed early in the process, observed previous meetings or asked to be on the communication distribution list.

Our next meeting is scheduled on Wednesday, September 13 from 9:00 AM- 5 PM and Thursday, September 14 from 9:00 AM - 3 PM. (We anticipate not having the full Committee meet on the 14th until 11:30 AM due to some proposed small group meetings scheduled for the first part of the morning. See the attached agenda for details.) The meeting will be held at the Ronald Reagan Building Oceanic Room. Additional caucus time may be needed in the evening, early morning and over lunch. **Committee Members please let us know if you are unable to attend.**

Several Workgroups, established at the August 16-17 Committee meeting, used Committee input from the August meeting to refine proposals. The goals of this meeting are to present and discuss updated proposals, develop a package of recommendations that Committee Members can tentatively agree to, and outline next steps to refine them and obtain constituent input before the October 25-26 meeting. **Committee Members are expected to review the updated proposals closely before the meeting and be prepared to share clarification questions, strengths, concerns/ considerations, and additional ideas on how to improve them.**

The Workgroups did not strive for consensus on the updated proposals. Instead, they discussed questions and concerns so that the leads could address and refine them. The Workgroup members are listed at the end of the August 16-17 meeting summary in case you'd like to reach out to them with any initial questions.

Subject: Request for Continued Stay of Effective Date for Nano Reporting Rule
Attachments: 00216691.pdf

Flag: Flag for follow up

Hello Jeff:

The groups noted in the attached letter respectfully request that EPA continue to stay the effective date of the January 12, 2017, final rule, *Chemical Substances When Manufactured or Processed as Nanoscale Materials; TSCA Reporting and Recordkeeping Requirements*, which is now scheduled to expire on August 14, 2017, until six months from issuance of the promised guidance. We would be pleased to discuss this request with you if you would find that helpful.

Thank you for your consideration.

Lynn,
Thanks for thinking of me. I can check the calendar to see if it will work, but more details about who attends and what the agenda looks like for the meeting may be helpful. In addition, can you share the PDFs of the previous publications you cite? They don't appear to be open-access. This may help me understand previous workshops and thus the planned workshop better.

Thanks!
Nancy

Subject: UCLA CEIN Workshop in February 2018

Hi Nancy,

I am on an organizing committee for a program being planned by the UCLA Center for Environmental Implications of Nanotechnology (CEIN). We are working on a February 20-21, 2018, Workshop titled **Where do we Stand on Nano-Governance? Looking Back and Forward.** The hosts are Tim Malloy, Andre Nel, and Hilary Godwin, UC CEIN.

The goal is to convene opinion leaders, academia, industry, government, and NGOs to engage in a discussion on how voluntary and regulatory development of data for product stewardship and regulatory purposes and decision-making can be met by integrated approaches to testing and assessment (IATA) that leverages alternative testing strategies (ATS) and adverse outcome pathways (AOPs) for nanomaterials. Additionally, the meeting will cover nano-governance over the past decade with a view of shaping the future of how the field may (or should) move forward, including consideration of risk assessment, risk prevention and management (*i.e.*, mitigation, safety by design.)

To address these topics, opinion leaders will make short statements and pose questions, which will be followed by roundtable discussion. An overarching objective of this workshop is to produce and disseminate a report addressing steps needed to drive broader implementation of integrated testing approaches, decision making approaches, and effective nano-governance. This workshop follows successful multi-stakeholder workshops on Alternative Testing Strategies (*ACS Nano*, **2013**, *7*, 6422-6433) and Categorization Strategies for Engineered Nanomaterials (*ACS Nano*, **2015**, *9*, 3409-3417).

Given your critically important role in policy, governance, and risk assessment, I join my colleagues in hoping you will consider participating in this workshop, if only for a day, given your jam-packed schedule. LA is a great place to visit in February, and we sure could use your wisdom.

How about it??

Subject: Re: ACTION REQUIRED: EBTC Fall Board meeting - logistics survey

Hi Nancy,

It is really disappointing, but I understand and appreciate your sincere efforts to run this through. I'm certainly hoping that we will stay in touch and continue the collaboration we started, not to mention our personal friendship and FitBit competition! :)

I'm on vacation next week but I'd appreciate if you could give some thought to who the replacements from EPA would be and we can perhaps speak week of August 14 or 21? Are you going to be at NIEHS SR workshop August 24-25? I will be.

Have a good weekend and again, thank you for your service and I'm not saying goodbye! :)

Katya

> Katya,
> I've run all the traps and I think the easiest and best path forward is for me to step down from the board. In reality, even if it was workable ethically, I would not be able to devote to it the time that you all deserve. As you know, since I started here at EPA I have had no time to contribute to the dialogue. However, I hope I can continue to participate in EBTC activities and collaborate as a government stakeholder.

Subject: ACTION REQUIRED: EBTC Fall Board meeting - logistics survey

Dear EBTC Board Trustees,

I would like to ask you to let us know whether you would be able to come to the next Board meeting. I'd like to strongly encourage you to attend the meeting, of course, because your advice and guidance are extremely valuable for the EBTC, as we grow and evolve as an organization. This time the meeting is going to be held a day before the EBTC/EFSA Colloquium in Lisbon, Portugal. The venue is already available and will be used for both events, but we will send more info on group rates, registration etc., in the coming weeks. This presents a great opportunity to see the first product of one of the EBTC Workgroup: Education WG headed up by myself and Daniele Wikoff from Tox Strategies and Paul Whaley of University of Lancaster. The group worked hard together with EFSA staff over the last 9 months on putting together the Colloquium and will be guiding the discussions and facilitating the follow-ups from the meeting in the following months.

So if you could please respond to the following short questionnaire on your planned attendance for both events, I'd appreciate it:

https://g Ex. 6

More info will follow in the coming month. Enjoy your Summer!

Subject: EPA Guidance on Biostimulants
Attachments: Joint letter to EPA 9.1.17.pdf

Hello Nancy,

The attached letter is submitted on behalf of the U.S. Biostimulant Coalition (USBC), the Biological Products Industry Alliance (BPIA), and the American Seed Trade Association (ASTA). In it, these groups express strong support for prompt issuance of the guidance document on which the Office of Pesticide Programs (OPP) has been working for a year or so relating to biostimulants. We are appreciative of OPP's efforts in this regard, commend Rick Keigwin, Mark Harman, and others for their hard work, and are eager to see the fruits of their significant labor shared with stakeholders.

As always, please let me know if you would like additional information on this important issue.

Best regards for a great Labor Day weekend.

Subject: Thompson Hine Speaker Request - October 27 in Washington, DC

Mary,

I'm sorry for the short notice, and I'm not even sure if Nancy was able to participate or not, but I just learned the firm elected to cancel and reschedule this event due to cancellations by a couple of other speakers.

Please extend my apologies to Nancy and that we really appreciate her consideration to participate as a speaker. I hope we have an opportunity to work together on this event in the future.

Thanks again.

Best regards,

Alice

Subject: Thompson Hine Speaker Request - October 27 in Washington, DC

Good morning Mary,

Would you have any idea yet if Nancy will be available to present at our offices on October 27. Certainly understand if she is too busy. A brief update on any of the following topics would be of great interest to the group; legislative agenda; TSCA reform implementation; research reform; and regulatory reform.

Best regards,

Alice

THOMPSON HINE

From: Armstrong, Alice
Sent: Wednesday, October 04, 2017 10:42 AM
To: Hanley, Mary
Cc: Coughlin, Timothy; 'Beck, Nancy'; Hubbard, William
Subject: RE: Thompson Hine Speaker Request

Hi Mary,

I'm following up on Nancy's email to Bill Hubbard regarding out Thompson Hine event in DC on October 26 & 27. I have attached the agenda for your review. Her presentation would only be about 20 minutes in length and is the last segment of the "Hot Topics" agenda item which runs from 8:30 – 9:30 am on Friday, October 27. There are three short presentations planned; Government Contracts, Immigration and an EPA update. We were hoping that Nancy could speak to what's going on currently with TSCA and given the new administration, any initiatives or general policy changes that may impact the chemical industry. A brief update would be perfect.

Look forward to hearing from you.

Best regards,

Alice

Nancy,

While you are unable to join us at the DRI conference, I was wondering if you might be interested and available to speak at an event my Firm is hosting on our DC office. On October 26th and 27th, our firm is hosting a symposium in our Washington DC office for the general counsel of our chemical industry clients – a

group of about 10-20. We invite presenters on various topics of concern that general counsel are facing in the industry. One topic of particular interest is happenings at the EPA. I was wondering if you might be interested in speaking for about 20 minutes to us the morning of October 27th. Please let me know if you are interested and we can further discuss details.

Bill,
I think I'm going to pass on this opportunity. I am not the right person to give a talk on toxic tort and product liability law. I'm sure Lynn Bergeson can find someone better suited to this audience and the sessions. In addition my GC would likely have concerns with my preparing a manuscript.

Subject: DRI: TTEL Seminar Speaker Confirmation

Nancy,

I am happy to report that DRI has accepted our seminar program and you as a speaker at the Toxic Tort and Environmental Law seminar in Nashville March 1 and 2, 2018. You will be speaking from 3:50 to 4:40 on the 1st and will be joined by Lynn Bergeson.

The title and description (we are limited to 35 words) of your talk is:

New TSCA: Repercussions on commercial transactions, supply chain relationships, and toxic tort and product liability law

Learn how New TSCA is redefining supply chain relationships; rewriting due diligence rules of engagement; reopening debate on new avenues in product liability, insurance, and tort law; and raising important questions regarding right-to-know vs. confidentiality.

You will be fully comped, which includes registration, 2 nights at hotel, up to $500 for flight, up to $125 for meals, and up to $200 for ground transportation.

As soon as possible could you please confirm your availability to speak.

By July 21st I need from you please:

1) Any revision to the session title and description (we are limited to 35-40 words).

2) Contact information: organization, mailing address, phone, and email

3) Bio: 80 word limit.

4) Photo: Head shot.

Thank you so much.

Subject: **Uncertainty Conference speaker invitation - please RSVP
Importance: High

Dear Nancy,

On behalf of the scientific committee of the *International Conference on Uncertainty in Risk Analysis* (co-organized by the European Food Safety Authority and the German Federal Institute For Risk Assessment on February 20-22, 2019 in Berlin; see https://www.bfr-akademie.de/media/wysiwyg/SavetheDate_Conference-on-Uncertainty.pdf), we invite you as a key speaker on one of your areas of expertise. Specifically, your presentation would set the stage for the session entitled "Communication of Uncertainties". With this session we want to address aspects such as "documentation and visualization of uncertainties; perception of risk and uncertainty; target-oriented communication; education; lessons-learned; dealing with fear and mistrust; communication strategies".

We are confident that your presentation would provide an overview of the topic, key areas of agreement and disagreement, and cutting edge aspects of this topic. We further hope that your presentation will stimulate discussion during your session. As we are asking you to provide one of the opening presentation with these specific goals, we are offering support for your travel and accommodation.

For further information on the conference, please feel free to contact me. In the event that you accept our invitation, please send us a tentative title of your presentation at your earliest convenience, a short (140 words) biosketch and a portrait photo along with your consent to use it for the announcement of the conference on the websites of EFSA and BfR.

I look forward to your response.
Best,
Judy

Hi Nancy,

I expect to bring the following individuals to our meeting next week.
Renee Manusifi, American Soybean Association
Mike Aerts, Florida Fruit and Vegetable Association
Don Parker, National Cotton Council
Steve Hensley, National Cotton Council
Tim Lust, National Sorghum Producers
Dale Murden, Texas Citrus Mutual

Nick Hill a citrus grower from CA was planning to attend and represent CA Citrus Mutual but USDA cancelled a DC-based citrus meeting so he will not be making the trip east.

Looking forward to seeing you on Monday.

Thank you,
Joe

Hi Nancy,

Would it be possible to meet with you and/or someone from your team on September 18th to discuss the delay in the Section 3 approval for Sulfoxaflor on citrus, sorghum and soybean uses? My apologies for offering only the one day as an option but it was the only day I could get people from National Sorghum Producers (TX), American Soybean Association (DC), California Citrus Mutual, Florida Fruit & Vegetable Association, and Texas Citrus Mutual all in DC on the same day.

The Sulfoxaflor registration was vacated by the 9th circuit in Sept. 2015. EPA finalized a new registration in Oct. 2016 but removed citrus and soybean from the Section 3 citing concerns about pollinators.

Sorghum was not on the original Section 3 but was it in the works when the original registration was vacated. Last winter we (sorghum) were assured by folks at EPA that the new uses for sulfoxaflor would be completed by August (this month) and they had everything they needed to get it done. But now we are hearing that the new uses (citrus, sorghum and soybean) aren't getting done anytime soon.

This is a big problem for a number of crops. I'm not as familiar wth the soybean situation but I know for sorghum, sufloxaflor is one of only two tools they have to fight the sugarcane aphid, a new and invasive pest that is hammering the crop throughout its range. For citrus, I'm told it is the only product they can use to combat Asian Citrus Psylid, the vector of citrus greening, during the weeks just before harvest.

I'm hopeful that hearing the grower perspective might help provide context beyond what the registrants can share and effectively communicate the urgency for the products approval.

Thank you,
Joe

Dear Nancy,
Good morning to you, and thank you for checking for us. Have a nice Labor Day holiday, and we look forward to hearing back from you.
Sincerely,
Meg

Meg,
Thank you for the invitation. There is a chance I will be on international travel that week, but the schedule is still fluid. I expect things will be locked down by mid September and can let you know.

Regards,
Nancy

Subject: Invitation to Speak at NCAC / American Chemical Society Chemical Society of Washington October 13th Symposium

Dear Nancy,
Hello to you, and I hope you've been well. The SOT National Capital Area Chapter (NCAC) and the American Chemical Society's Chemical Society of Washington Chapter are jointly hosting a symposium on October 13th at ACS Headquarters. The topic will be TSCA, and we would be grateful if you would speak at the symposium. We have attached a draft symposium agenda with proposed topics for invited speakers. Would you please inform us as to your availability to participate? Thank you very much for your time and consideration!
Sincerely,
Meg Whittaker (NCAC Vice-President)
Jen Tanir (CSW Secretary)

Lynn,
Jeff and I chatted about this. I think that based on where we are with our nano program and our development of alternative methods, Gino Scarino is likely the best person to represent us at this meeting. The meeting falls at a good time for us to talk about our nano strategy development.

Regards,
Nancy

Lynn,
Thanks for thinking of me. I can check the calendar to see if it will work, but more details about who attends and what the agenda looks like for the meeting may be helpful. In addition, can you share the PDFs of the previous publications you cite? They don't appear to be open-access. This may help me understand previous workshops and thus the planned workshop better.

Thanks!
Nancy

Subject: UCLA CEIN Workshop in February 2018

Hi Nancy,

I am on an organizing committee for a program being planned by the UCLA Center for Environmental Implications of Nanotechnology (CEIN). We are working on a February 20-21, 2018, Workshop titled **Where do we Stand on Nano-Governance? Looking Back and Forward.** The hosts are Tim Malloy, Andre Nel, and Hilary Godwin, UC CEIN.

The goal is to convene opinion leaders, academia, industry, government, and NGOs to engage in a discussion on how voluntary and regulatory development of data for product stewardship and regulatory purposes and decision-making can be met by integrated approaches to testing and assessment (IATA) that leverages alternative testing strategies (ATS) and adverse outcome pathways (AOPs) for nanomaterials. Additionally, the meeting will cover nano-governance over the past decade with a view of shaping the future of how the field may (or should) move forward, including consideration of risk assessment, risk prevention and management (*i.e.*, mitigation, safety by design.)

To address these topics, opinion leaders will make short statements and pose questions, which will be followed by roundtable discussion. An overarching objective of this workshop is to produce and disseminate a report addressing steps needed to drive broader implementation of integrated testing approaches, decision making approaches, and effective nano-governance. This workshop follows successful multi-stakeholder workshops on Alternative Testing Strategies (*ACS Nano*, **2013**, *7*, 6422-6433) and Categorization Strategies for Engineered Nanomaterials (*ACS Nano*, **2015**, *9*, 3409-3417).

Given your critically important role in policy, governance, and risk assessment, I join my colleagues in hoping you will consider participating in this workshop, if only for a day, given your jam-packed schedule. LA is a great place to visit in February, and we sure could use your wisdom.

How about it??

Dear Nancy

It is with regret that I realise my failure as chair of the scientific committee to set a deadline for the feedback.

On the other hand I fully understand that your schedule is busy and complex and that a fast response is difficult to
achieve. I appreciate very much your supportive reaction. However, we had to move on with the invitation process and we
have received confirmation from another speaker on the topic.

What I hope now is that you may consider participating the conference without the formal process of a guest speaker
invitation. Using the regular abstract submission process would perhaps give you and/or colleagues of your group some
additional time for planning.

Again, I apologise for the inconvenience but I do hope that we shall find an opportunity to exchange some thoughts about
uncertainty analysis.

Kind regards, Matthias

Nancy,
I am happy to chat with you about this but I think it might be better for you to speak with either Dr. Greiner or Dr. Merten because all next week I am on work travel Denver (all day meetings). I don't want to hold things up. Matthias/Caroline, would you please reach out to Nancy and see if you can find a time to talk next week?
Best,
Judy

Importance: High

Dear Nancy,

On behalf of the scientific committee of the *International Conference on Uncertainty in Risk Analysis* (co-organized by
the European Food Safety Authority and the German Federal Institute For Risk Assessment on February 20-22, 2019 in
Berlin; see https://www.bfr-akademie.de/media/wysiwyg/SavetheDate_Conference-on-Uncertainty.pdf), we invite you as a key speaker on one of your areas of expertise. Specifically, your presentation would set the stage for the session entitled "Communication of Uncertainties". With this session we want to address aspects such as "documentation and visualization of uncertainties; perception of risk and uncertainty; target-oriented communication; education; lessons-learned; dealing with fear and mistrust; communication strategies".

We are confident that your presentation would provide an overview of the topic, key areas of agreement and disagreement, and cutting edge aspects of this topic. We further hope that your presentation will stimulate discussion during your session. As we are asking you to provide one of the opening presentation with these specific goals, we are offering support for your travel and accommodation.

For further information on the conference, please feel free to contact me. In the event that you accept our invitation, please send us a tentative title of your presentation at your earliest convenience, a short (140 words) biosketch and a portrait photo along with your consent to use it for the announcement of the conference on the websites of EFSA and BfR.

I look forward to your response.
Best,
Judy

Subject: an update

todd stedeford is a terrific loss and it is not a great time to have him wander off for a higher grade or a grand international opportunity.

I really enjoyed my time in OPPT/OPPTS and many different divisions and branches. It felt like home and I never felt very rewarded for my attempts to get interesting staff to work. 8 different Grievances -- all futile and unsupported by senior staff when final decisions had to be made. I was in HERD which became RAD and i had 35 staff and HERD was over 120 people. Hernandez was highly skilled and well spoken.

I think RAD became a target when Jeff Morris arrived and made a spot for Stan Barone. Also, when Charlie Auer did not TRAIN Wendy but used her to do odd jobs.

Please do not promote Morris or Barone to get rid of them. I have night mares about the two of them.

Hope Todd gets the chance to tell you i am a good guy and not the evil IG poster child the agency will be dealing with for ages to come. I have never failed on a project (in spite of unskilled non productive staff) and EPA is my current project.

again so sorry about the loss of Todd.

Subject: Re: Invitation to Speak at NCAC / American Chemical Society Chemical Society of Washington October 13th Symposium

Meg

As listed on your program, I have been nominated by President Trump as the assistant administrator of EPA's Office of Chemical Safety and Pollution Prevention. As you know, this is the same office that manages the new TSCA legislation. It is an exciting and humbling opportunity, but one that requires senate confirmation. My committee hearing is slated for some time in late September, with a full senate vote sometime later (presuming that I get voted out of the EPW committee).

So... while I would like to speak at your event, the timing is somewhat problematic. If Nancy Beck agrees to speak, then she can more easily cover any aspect of this new legislation as the principal deputy assistant administrator in this office. Or if you are looking for a university voice, then perhaps ask Jacqueline Patterson of our Risk Science Center. Jacqueline is quite adept at managing independent peer reviews, and has suggested such reviews as one approach to fulfilling this new legislation.

Cheers!

Michael...

Subject: Invitation to Speak at NCAC / American Chemical Society Chemical Society of Washington October 13th Symposium

Dear Mike,
Hello to you, and I hope you've been well, and I look forward to seeing you at the autumn NSF HAB meeting. The SOT National Capital Area Chapter (NCAC) and the American Chemical Society's Chemical Society of Washington Chapter are jointly hosting a symposium on October 13th at ACS Headquarters in Washington, D.C. The topic will be TSCA, and we would be grateful if you would speak at the symposium. I would very much like to balance out the points of view at the symposium, and I have always valued your insight.

We have attached a draft symposium agenda with proposed topics for invited speakers. Would you please inform us as to your availability to participate, and I'll coordinate the logistics. Thank you very much for your time and consideration.
Sincerely,
Meg Whittaker (NCAC Vice-President)
Jen Tanir (CSW Secretary)

Subject: RE: Request Suspend P-18-0101 for further review

Thanks Nancy for your call today and following up next week when we are back in the office. I do think it will be good to get all of us together to discuss. All we are asking is that the weight of evidence of the analog data available on 2-ethylhexanoates (esters) take precedence in risk calculations over the use of data on the acid.

It is only due to using the POD of the acid as LOEL of 100 mg/kg with a safety factor of 1000x that dermal risk was originally indicated. For the intended use industrial applications, this is driving an extreme worst case/safe harbor.

We believe that we have provided sufficient weight of evidence that the NOAEL would be expected to be >1000 mg/kg bw day for reproductive and developmental tox for the ester based on the following analogues which are all esters that best fit the same/similar structures, MW ranges, solubility, and partition coefficient which are expected to have the same metabolic pathways to our substance:

Analog Data provided includes:
7299-99-2: OECD 422 oral, 2005. NOAEL > 1000 mg/kg bw day (PO/F1)
7299-99-2: OECD 414 oral, 2015. NOEL >1000 mg/kg bw day (maternal, developmental)
90411-68-0: OECD 414 oral, 1997. NOAEL >1500 mg/kg bw day (maternal, developmental)
(Newest) 68130-25-6: OECD 422 oral, 2017. NOAEL >1000 mg/kg bw day (systematic and repro/developmental)

And 2 Cosmetic Ingredient Reviews by expert panels that concluded the same based on the following:
2-ethylhexanoic acid, a possible metabolite, was shown to be a liver and developmental toxicant in animal studies at high dose levels, and it was postulated that the maternal liver toxicity began a cascade of effects that included MT induction, zinc accumulation in the liver due to MT binding, and a resulting zinc deficiency in the developing embryo; the Panel found that results of testing with DEHT and the fact that akyl ethylhexanoates and tetraesters of ethylhexanoate would have to pass through the stratum corneum before entering the blood stream precluded the risk of developmental toxicity from dermal absorption

Hello Nancy,

I spoke with Jeff Bauer last week and he provided me a quick update. He let me know you met with the risk assessment team last Friday and needed to review for yourself further. With the holiday next week, I was just checking to see if we should even expect any update in the next week or if there is any timing I might be able to provide my commercial/R&D teams to keep them from asking daily?

Best regards,

Thanks Nancy,

My apology for my delay on our response. We have had a few phone calls where we are getting closer to an understanding but we still have concerns. Our understanding is that we should be able to eliminate the risk assessors concerns with new OECD 422 testing of the PMN substance. There are definitely still some questions around the testing that are not clear but these details were passed through the risk assessor to the PM and we haven't seen them in writing so it might just be my misunderstanding.

Cargill would like EPA management to provide sign-off on the agreement that we have exhausted all existing data available from surrogates and other referenced data provided (see below) with the explanation to why this data is insufficient to support the weight of evidence approach for determination of hazard of the PMN substance and that new animal testing is the <u>only</u> option available to eliminate the risk concerns by the agency. We request a response to address each of the aspects of the references listed and we would find it helpful to have a follow-up call with you or Jeff Morris in attendance.

1. Analog 1 (provided in P2 Assessment) OECD 422/414 and 90 Day Repeat Dose; and additional Analog (provided in 03.24 email) OECD 414 Study (oral) C16-C18 Alkyl esters of the fatty acid of concern
    a) Page 6 of updated Risk Assessment Summary received by fax 5/8/2018. Based on data provided on the average molecular weight fraction of the fatty acids, the risk assessor made new implied references determining that the analog would not be "closest fatty ester analog". However, analytical characterization data provided in the PMN clearly shows the % weight fraction of each of the prominent tetraesters present as constituents of the PMN substance which actually includes the analog.
        - It is our position that Analog (1) is not only a constituent, it carries the highest concentration of the fatty acid of concern potentially available giving best worst case concentration and provided additional references in my 03/24/2018 email that were not addressed by the risk assessors. Based on the additional references we provided, there is not expected to be a difference in the rate of enzymatic hydrolysis of the branched tetraesters and the combination linear and branched tetraesters. The rate of

hydrolysis is more dependent on the esterification and all species substituted with greater than 3 ester groups were found to be 2000 times slower (Mattson and Volpenhein, 1972a, b).

b) The risk assessor makes an important statement regarding the metabolism of the tetraester by dermal absorption versus gastrointestinal: "Furthermore, dermal exposure would bypass the liver and gastrointestinal metabolism of the fatty acid esters increasing the uncertainty of oral studies based on the intact ("Analog 1") molecule. Thus, the oral developmental study in rats for ("Analog 1") was not utilized for regulatory decisions."
   - There still seems to be a contradiction on what testing we would do on the PMN substance based on the above. During our last conversations this week, we discussed an additional oral 422 on the PMN substance in order to extrapolate to inhalation and dermal. If the risk assessor has excluded analog data based on on oral ingestion, it is unclear why additional testing on PMN substance would be acceptable. See additional number 5) below regarding inhalation.
   - Alternatively, it is not clear why the tetraester data by oral ingestion is not sufficient to support a finding of "no concern", but developmental toxicity data from oral ingestion of the fatty acid is acceptable to use in calculations to determine there is a concern.
   - If the risk assessor does believe that the dermal exposure would bypass the liver and gastrointenstinal metabolism of the fatty acid esters, it is not clear why there is still concern for developmental toxicity. See number 2) below for additional reference material provided regarding the importance of the concentration of the fatty acid reaching the liver.
   - After exhausting all public searches, every study found that was conducted on a polyol or alkyl esters in connection with the developmental toxicity of the fatty acid of concern was based on oral ingestion. No new dermal exposure studies could be found, even when chemicals were specifically tested recently due to use in cosmetics for dermal leave-on applications. Reasoning provided for the oral route chosen by the study directors for those studies was due to expected higher risk of concentration of the fatty acid metabolites from esterase in the gastrointestinal tract over any other routes. Oral ingestion would give the best representation of the worst case potential for systematic and developmental toxicity concerns subsequently ruling out the need for additional dermal or inhalation studies. It is our position that the 422 and 414 data provided representing both a tetraester and an alkyl ethylhexanoate provide best weight of evidence that the PMN substance is not expected to have systematic or developmental toxicity concerns.

2. Additional supporting references: CIR Safety Assessment of Alkyl Ethylhexanoates, 2012: http://www.cir-safety.org/sites/default/files/ethylh122012tent_faa_final%20for%20posting.pdf ; CIR Safety Assessment Pentaerythritol Tetraesters, 2012: https://www.cir-safety.org/sites/default/files/Pentae122011FINAL%20for%20posting.pdf

a) ..*"2-Ethylhexanoic acid has been shown to be a liver and developmental toxicant at high dose levels. In developmental studies, it has been postulated that 2-ethylhexanoic acid maternal liver toxicity begins a cascade of effects that includes metallothionein (MT) induction, zinc accumulation in the liver due to MT binding, and a resulting zinc deficiency in the developing embryo. In this model, it is the zinc deficiency in the developing embryo that causes developmental toxicity. Support for this mechanism of action comes from several sources. Animal studies have demonstrated that dietary zinc supplementation reduces the toxic effect and that further zinc deficiency makes 2-ethylhexanoic acid more toxic. In vitro studies using embryo cultures have demonstrated that either zinc deficiency or 2-ethylhexanoic acid treated sera produced developmental toxicity. Zinc supplementation of either/both sera eliminated the effect."*

b) Additional studies have been conducted to prove the hypothesis that the pathway to 2-ethylhexanoic acid production from a precursor would not give rise to acute liver toxicity, MT induction, zinc sequestration, and developmental toxicity. CIR safety panel concluded that the category of PE tetraesters were not likely to pass through the dermal layer as these ingredients have very poor solubility in water and have large molecular weights and additionally ethylhexanoates were precluded from risk of developmental toxicity from dermal exposure due to metabolic conversion that results in a time course of 2-ethylhexanoic acid appearance that allows clearance before sufficient levels can arise to produce acute liver toxicity.

c) Risk assessor does make reference to the Canadian Draft Screening Assessment of Ethylhexyl Ethylhexanoate from 2017 which also relied on risk calculations using the same oral developmental toxicity data available for the fatty acid as EPA, but also summarize that their calculations are assuming .."to the extent hydrolysis is unknown, it is conservatively assumed that all of 2ethylhexyl 2-ethylhexanoate is hydrolyzed to 2-EHA, followed by complete absorption through the skin (i.e., assuming that absorption through the dermal route is equivalent to absorption through the oral route)".. The Canadian reference did not consider available data from additional alkyl ethylhexanoates such as what was provided to EPA and did not include the comments or new data received after the draft was published in 2017. The Final Assessment from Canada was expected to be published after March 2018 but could not be found as of yet.
   - The OECD 414 study referenced for the additional Analog listed in number 1) above supports the hypothesis and conclusions made by the CIR Safety Assessment.

- If the risk assessor agrees the dermal exposure would bypass the liver and gastrointenstinal metabolism of the fatty acid esters, it is not clear why there is still concern for developmental toxicity.

3. Analog 2 (provided in P2 Assessment) and the EPA High Production Volume Assessment of Polyol Esters Category, 2010 (see attached)
   - Page 8 of updated Risk Assessment Summary received by fax 5/8/2018. We have provided our concerns about the study referenced has a LOEL of 2000 mg/kg/day (NOAEL of 800 mg/kg/day) and is included in the 2010 HPV Screening Assessment for Polyol Esters Category of chemicals. This study has been used by EPA as a basis of risk determination for the Polyol Esters Category in the past "as not likely" for human health concerns. Based on that study, EPA made the determination in 2010 that no further testing was necessary for the category, however, the use in the risk calculation would seem to be a reversal of EPA's earlier findings for HPV chemical category, is this the case? Since 2010, there have been multiple subsequent 90-day repeat tox and OECD 421/422/414 oral reference data generated for the Polyol Esters Category that has contributed to the weight of evidence for the category that these chemicals are of low concern.
     - Specifically, are you in an agreement that based on data provided in the 2010 HPV Assessment, the chemical category is lacking data for dermal exposure to address concerns summarized by the risk assessor? Has this been applied consistently previously and will apply similar to future submissions under the polyol ester category?

Additional Notes:

4. Page 1 of the updated risk assessment summary provided to us in fax 05/8/2018 indicated that risk were not identified for worker for inhalation because exposure is negligible, however, the PM continues to insist there will be a proposed SNUR to address risk from inhalation due to spray applications. To our knowledge, beyond our applications, the only potential industrial uses (not including FDA regulated uses) identified of polyol tetraesters from public resources have been for lubricating oils of jet engines, low-temperature use grease, heat-resistant engine oil, and refrigerator oil which have not indicated any foreseeable use including spray applications. From discussions regarding testing, we do have a concern that there will be adjustments in the recommended testing to eliminate the proposed SNURs that would also address inhalation even though no concerns were indicated by the risk assessor or before any additional modeling/calculations indicated concern.

5. Page 8 of the updated risk assessment summary provided to us in fax 05/8/2018, there is still an error in the risk calculations after amendment by the risk assessor based on data cited from our PMN or P2 assessment. It does not greatly affect the outcome, but should still be noted for accuracy or if the results are further used in additional determinations. The "worst case" exposure from the handling of filter media from the manufacturing process should still have a concentration adjustment of 50% wt/wt of the PMN chemical in the solid and when combined with the adjustment for the % fatty acid would result in a 14.3% Structural Alert/Component as % PMN Substance.

6. Page 9 of the updated risk assessment summary provided to us in fax 05/8/2018, the risk assessor has made reference to Cargill Technical documents and a study found online which apply to Cargill's Natural Esters used in the same use applications. The Natural Esters referenced in this application are primarily vegetable oils with additives which are a different category of chemicals. Synthetic Esters are designed to have better stability to extreme temperature variations when compared to our Natural Esters and do not use the same Technical Guidance for handling and storage. The following was provided by my technical team for additional information for consideration:
   - It is not anticipated that transformers are opened, even for maintenance, for the life of the transformer (20-60 years)
   - For some transformers (such as switch gears), any sampling or contact with the fluid is uncommon; there would be 40-60 years without exposure to oil
   - Where there are routine assessments in place, the sampling of the oil is done in a very controlled manner ranging from a 6 month to bi-annual basis. Amounts ranging from 50 ml to 1 L samples are taken with a syringe, taking great care to keep the transformer oil sealed from air or exposure – often through some type lock and bleed valve
   - One of the standards tested from this analysis is Acid Value, which dictates an upper acidity limit of the oil to be below 0.3 mg/g KOH – the fluid is expected to remain well below this level for the life of the transformer (40-60 years).
   - Other maintenance or contact with the fluid is not expected for the life of the transformer
   - Additionally, per the IEEE standard C57.154 (we can provide) – the max allowable temperature of operation for a transformer (and only for a short time in emergency conditions) is 140 C. This is recognized by UL, a well-known industry standard, which the industry adheres to.

Thanks again for your diligence with your teams and support to get to a good resolution. As I provided previously, we may want an additional call or meeting which would include either yourself or Jeff so that we can expedite the next steps forward and if that will include additional 422 testing on our part.

Best regards,

Anastasia

Hi Anastasia,
I've heard you've now had a few calls with the program and hopefully we are moving towards a common understanding and good resolution.
Please let me know if you have further concerns.

Regards,
Nancy

Subject: Request Suspend P-18-0101 for further review

Hello Jeff,

We will need to suspend the PMN for at least 15 days as we discussed in order to give us time to respond to the most recent information received from the risk assessment team. I will be out of office until May 7th but can still be reached by cell phone.

I received the fax of the risk assessors summary based on the changes to calculations and the addition of other data or endpoints since reviewing with Nancy more than three weeks ago. I did actually expect the reports or summary presented to Nancy to be included and the explanation to the changes. I had also expected some summary or additional

detail on their determinations to why the assessors chose not to use the additional OECD 421/422, repeat tox data, and referenced material that we have provided for analogs of the ester. Will it be possible to get the additional determinations in writing for the reference data provided and why they are still choosing the LOEL for the fatty acid and not any of the toxicity data provided on the substantially similar esters?

For us, this is not about not wanting to require gloves through a SNUR. This is about the potential commercial impact of the additional regulatory burdens of a SNUR and the perceived health risk implied to this chemical versus others used in industry.

We need better guidance on what data and scientific evidence or references that can be provided that will elevate the concerns raised by the risk assessors. From our conversation, the indication that even if we did complete new OECD 421/422 with a positive outcome of a NOAEL of 1000 mg/kg/day or greater using our manufactured chemical would not change the risk assessors concerns that are driving the recommendation for a SNUR is insufficient for us to be able to address how to move forward.

We will make a full response or would like to provide additional information if possible for review but also need better understanding of the additional references newly added by the risk assessor to support their concerns.

The second point of the summary, references a repeat tox dermal absorption study that was used as a secondary NOAEL for risk calculations by the assessors to support concerns. The study referenced has a LOEL of 2000 mg/kg/day (NOAEL of 800 mg/kg/day) and is included in the 2010 HPV Screening Assessment for the category of chemicals. This study has been used by EPA as a basis of risk determination for the chemical Category in the past "as not likely" for human health concerns. Based on that study, EPA made determination in 2010 that no further testing was necessary, however, the use in the risk calculation would seem to be a reversal of EPA's earlier findings for HPV chemical category. Is EPA reversing their previous determinations for the whole category under the HPV Assessment? There has been multiple subsequent 90-day repeat tox and OECD 421/422/414 oral reference data submitted that has been used as a weight of evidence for the category. It is unclear why it would now be used in risk calculations to support concerns?

We would like to also provide additional supporting information or data in regards to the third and last claims of the potential thermal degradation of the chemical made by the risk assessor in their summary, however, they did not provide any references to what they are basing their assumptions. Our knowledge and the additional industry standards which require testing under ISO, IEEE, UL certifications do not support the statements made by the risk assessors. We would like guidance on what information they are using as reference or data that we can provide that would be helpful to review to elevate this concern.

Thanks,

Anastasia Coots

Subject: RE: mosquitos

Good morning Nancy,

Thanks for getting back to me. I hope that you've had a good trip to California for the crop tours.

First, I'd like to emphasize that we really do appreciate the time that OPP has put into to reviewing our draft application package. We know that they have plenty of PRIA work keeping them busy, so for staff to take time to look at our package is greatly appreciated.

Just to clarify, the package that we submitted presents currently available data and evidence that demonstrate that release of OX513A will not have adverse effects to humans or the environment, including any endangered species. In that sense, it is a complete package because all endpoints and exposure scenarios required for a Section 3 registration are addressed.

BPPD has indicated previously that confirmatory data on proteodynamics of the active ingredient (tTAV) and inert (DsRed2) would be helpful to conclude conclusively that no adverse effects will occur. Those data are being generated and should be available this Fall. Therefore, our package, and the subsequent formal application, will meet the requirements for a Section 3(c)(7)(C) conditional registration, which would be conditioned on submission of the confirmatory protein data.

If you'd like to discuss further, I'm available at any time at the number below.

Best,

Keith

Subject: mosquitos

Keith,
I've been in California all week doing crop tours and finally had a moment to check voice messages today.
I know OPP has been thoroughly reviewing the package and does have some thoughts/suggestions. I will get an update when I'm back in the office on Monday and perhaps we can chat after that. Also, can you clarify for me if the package is a complete section 3 or if you are looking for a conditional section 3 approval because there is still some data that are in the works? Perhaps this is semantics and I'm not understanding the terminologies completely yet, but I thought that

there was some further data that would be coming later, thus when you say complete section 3, do you mean a conditional section 3 (pending development of data that is forthcoming)?

Thanks,
Nancy

Dear Nancy,
Hello to you, and I hope you've been well. The SOT National Capital Area Chapter (NCAC) and the American Chemical Society's Chemical Society of Washington Chapter are jointly hosting a symposium on October 13th at ACS Headquarters. The topic will be TSCA, and we would be grateful if you would speak at the symposium. We have attached a draft symposium agenda with proposed topics for invited speakers. Would you please inform us as to your availability to participate? Thank you very much for your time and consideration!
Sincerely,
Meg Whittaker (NCAC Vice-President)

Subject: meeting July 12 @ 11 am

Ms. Marshall –

We are looking forward to meeting with Dr. Beck this Wednesday (July 12) at 11 am as confirmed. So that you can communicate this information to the building security personnel if required, I am providing this list of names of the individuals who will be attending for W M Barr:

- Scott Beal, president
- Dennis Shireman, VP R&D
- T.J. Vestal, Director of Regulatory Compliance
- Ed Roberson, member of the Board of Directors
- Larry Culleen, Arnold & Porter Kaye Scholer
- Greg Louer, A&PKS

Thank you for your continuing assistance in making this meeting possible. We would appreciate it very much if you could let us know if there will be anyone else from the Agency who will be joining Dr. Beck for the meeting.

Larry

Subject: meeting request

Ms. Marshall –

I am writing to follow-up on my telephone call from earlier today. I am requesting your assistance in setting up a meeting with Dr. Beck and representatives of my client, W. M Barr & Company. We are interested in conferring with Dr. Beck about the proposed TSCA Section 6(a) paint strippers regulation. The President of the Company and one or more members of its Board are interested in scheduling such a meeting during the weeks of July 10 or 17th if Dr. Beck's calendar permits. In particular, July 11 and 12th would work well for our group. In addition, the 19th, 20th and 21st of July would work.

Please feel free to contact me directly to identify potential date and time combinations that are convenient for Dr. Beck as well. I can be reached at 202-942-5477.

I appreciate hearing from you at your first opportunity. I have attached below an email I recently sent to Dr. Beck to provide her with additional background on the purpose of the requested meeting.

Subject: meeting request

Nancy –

I am interested in setting up a meeting with you concerning the proposed TSCA paint stripper rule. We represent W.M. Barr & Company, an employee-owned small business that is the country's largest producer of consumer-use paint strippers that contain methylene chloride and which are sold in retail centers and home & hardware stores nation-wide. We have submitted detailed comments on the proposed Section 6(a) paint strippers regulation which, as you may know, will effectively ban Barr's retail-size paint strippers on the basis of certain assumptions and conclusions that we do not believe are scientifically supported by the record.

Barr's President has asked me to approach you directly because the CEO and one or more members of the company's Board of Directors intend to travel to Washington so they can make you personally aware of the jeopardy their enterprise faces if the rule if finalized as proposed. The Agency's economic assessment greatly underestimates the impacts the rule will have on Barr and other small businesses that formulate paint strippers and the many thousands of small business residential remodeler/contractors that rely on retail-size paint strippers containing methylene chloride. Unfortunately, Agency staff have erroneously concluded that there are technically and economically feasible alternatives to methylene chloride paint stripers which information in the public literature (and data Barr has provided to EPA staff) contradict.

I intend to reach out today to your scheduler to try to arrange such a meeting the week of July 10 or 17th. However, I want you to feel free to contact me directly to confer further about the purpose of our meeting and the substantive aspects of the comments Barr timely submitted during the public comment period.

Thank you in advance for your consideration and any assistance you can provide in setting up such a meeting.

Subject: RE: Trail of 15 Year "Goal" for Registration Review

When briefed, ask about "the living RED" – it was what RED's were called in earlier times since the assessment is always on-going, subject to change from more and new data, or discoveries of new issues or other things.

That is partly why a RED, or now "registration review," was not a final agency action – it did not "do" anything until applied to what the agency said should be on an end-use product label which can capture the formulation specific characteristics as applied to the use situation allowed on the label. Hence, literally counting the end uses which were approved in concert to what the RED/registration review said (ok for granular uses, not for liquid formulations, ok if used only twice a year at or less than 5. Pounds/acre and with a ten-foot buffer and so on).

Sorry to be so nerdy but the distinctions have been how the program has responded to the question of progress, and how to measure it, over the years.

Subject: RE: Trail of 15 Year "Goal" for Registration Review

Goat may be a better term than goal, but yes.

At the same time, since exactly what "registration review" means (not trying to do the "….definition of is, is"), it is not clear how one might define completing the review or "missing the deadline."

In years past the when the progress of the program has been criticized about x of 600 active ingredient cases have been reviewed, the agency has been able to say it has prioritized the top uses that represent the bulk of the usage by acreage (e.g. the top 25 pesticides alone probably represent a sizable fraction of all acre-treatments).

Subject: RE: Trail of 15 Year "Goal" for Registration Review

So basically it was originally intended to be a goat in the FQPA in 1996, but in 2007 it was amended as part of PRIA 2 reauthorization.

Thank you for clarifying,
Nancy

Jeff:

We have a common interest in the development and refinement of the new chemicals category documents to ensure their continued successful role under new TSCA. Based on this interest, we would like to share with you our comments and perspective on a set of draft new chemicals category documents kindly provided by the New Chemicals Program staff.

If there is sufficient interest, we would be happy to meet with you and the technical staff to discuss this topic.

Subject: Sulfoxaflor - sorghum, citrus, soybean

Hi Nancy,

Would it be possible to meet with you and/or someone from your team on September 18th to discuss the delay in the Section 3 approval for Sulfoxaflor on citrus, sorghum and soybean uses? My apologies for offering only the one day as an option but it was the only day I could get people from National Sorghum Producers (TX), American Soybean Association (DC), California Citrus Mutual, Florida Fruit & Vegetable Association, and Texas Citrus Mutual all in DC on the same day.

The Sulfoxaflor registration was vacated by the 9th circuit in Sept. 2015. EPA finalized a new registration in Oct. 2016 but removed citrus and soybean from the Section 3 citing concerns about pollinators.

Sorghum was not on the original Section 3 but was it in the works when the original registration was vacated. Last winter we (sorghum) were assured by folks at EPA that the new uses for sulfoxaflor would be completed by August (this month) and they had everything they needed to get it done. But now we are hearing that the new uses (citrus, sorghum and soybean) aren't getting done anytime soon.

This is a big problem for a number of crops. I'm not as familiar wth the soybean situation but I know for sorghum, sufloxaflor is one of only two tools they have to fight the sugarcane aphid, a new and invasive pest that is hammering the crop throughout its range. For citrus, I'm told it is the only product they can use to combat Asian Citrus Psylid, the vector of citrus greening, during the weeks just before harvest.

I'm hopeful that hearing the grower perspective might help provide context beyond what the registrants can share and effectively communicate the urgency for the products approval.

Thank you,
Joe

Flag: Flag for follow up

Nancy and Aaron –

Thank you again for meeting with us today. We found the session to be extremely helpful. We will be following up in August with Joel for a more "in depth" session with CCD and the pertinent technical staff with whom we will focus more specifically on some of the "science aspects" of the comments, EPA's risk and economic assessments, and the data WM Barr provided to the Agency with its comments.

In the meantime, because a great deal of the discussion today focused on the lack of technically and economically feasible alternatives to MeCl2 paint strippers, we are sharing with you the attached copy of the Report prepared by Barr Brands personnel in 2017. The Report compares the performance of consumer-use paint stripper products available on the retail market today. The efficacy tests were performed in a manner consistent with the industry standard published by ASTM. Barr's Report also includes an evaluation of alternative formulations that are likely to emerge in the retail (consumer and small business contractor) market if MeCl2 strippers are no longer available at retail. Some information on the prices of retail-sale paint strippers is reflected in the Report, as is very basic information on the flammability of the various products noted in the Report. Of course, Barr's public comments and the technical reports we submitted during the comment period explore these and other facets of the rule in greater depth.

Again, thank you for meeting with the delegation from Barr Brands; we appreciate your time and attention to this important matter.

Larry

EPA Marks Chemical Safety Milestone on 1st Anniversary of Lautenberg Chemical Safety Act

Agency Meeting Statutory Responsibilities and Deadlines

WASHINGTON - (June 22, 2017) Today, on the one-year anniversary of the *Frank R. Lautenberg Chemical Safety for the 21st Century Act*, Administrator Scott Pruitt announced that EPA has met its first-year statutory responsibilities under the law. This includes issuing three new rules, providing a guidance document for external parties, and releasing the scoping documents for the first 10 risk evaluations that will be conducted.

"The activities we are announcing today demonstrate this Administration's commitment to providing regulatory certainty to American businesses, while protecting human health and the environment," said Administrator Pruitt. **"The new process for evaluating existing chemicals outlined in these rules will increase public confidence in chemical safety without stifling innovation."**

EPA Administrator Scott Pruitt signs new TSCA rules surrounded by staff from EPA's Office of Chemical Safety and Pollution Prevention.

The *Act* amends the nation's primary chemicals management law known as the *Toxic Substances Control Act (TSCA)*. The legislation received bipartisan support in the U.S. House of Representatives and the Senate, and provides significant new responsibilities and authorities to EPA to advance chemical safety.

EPA has completed the following implementation activities at this one-year anniversary:

- <!--[if !supportLists]--><!--[endif]-->Finalized a rule to establish EPA's process and criteria for identifying high priority chemicals for risk evaluation and low priority chemicals for which risk evaluation is not needed. In response to public comments, this final rule affirms EPA's commitment to following the best available science, engaging stakeholders in the prioritization process, and recognizing the value of designating chemicals as low priority when appropriate. Read more: http://www.epa.gov/assessing-and-managing-chemicals-under-tsca/prioritizing-existing-chemicals-risk-evaluation

- <!--[if !supportLists]--><!--[endif]-->Finalized a rule to establish EPA's process for evaluating high priority chemicals to determine whether or not they present an unreasonable risk to health or the environment. In response to public comments, this final rule clearly defines important scientific terms to ensure transparency and confidence in the risk evaluation process while retaining flexibility to allow for new scientific approaches to be incorporated as they are developed. Additionally, the final rule clarifies EPA's authority to determine what uses of a chemical are appropriate for risk evaluation, ensuring that the Agency's resources are focused on those uses that may pose the greatest risk. Read more: https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/risk-evaluations-chemicals-under-tsca

- <!--[if !supportLists]--><!--[endif]-->Finalized a rule to require industry reporting of chemicals manufactured or processed in the U.S. over the past 10 years. This reporting will be used to identify which chemical substances on the TSCA Inventory are active in U.S. commerce and will help inform the chemicals EPA prioritizes for risk evaluation. In response to public comments, EPA streamlined the reporting requirements for manufacturers and processors in the final rule to help reduce regulatory burden. Read more: https://www.epa.gov/tsca-inventory/tsca-inventory-notification-active-inactive-rule

- <!--[if !supportLists]--><!--[endif]-->Released scope documents for the initial ten chemicals for risk evaluation under the amended law. These documents identify what uses of the chemicals will be evaluated and how the evaluation will be conducted. Read more: https://www.epa.gov/assessing-and-managing-chemicals-

CC: James V. Aidala [jaidala@lawbc.com]
Subject: It's good to have goals: FQPA text
Attachments: PLAW-104publ170.pdf

Nancy

About your question about the 15 year registration review goals – I was referring to the 1996 text of FQPA (attached) – see pages 3-4. That was FQPA, and FR notices about reregistration through 2008 has language such as this from a July 9, 2008 FR notice:

EPA is initiating its reviews of the pesticides identified in this document pursuant to section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. Section 3(g) of FIFRA provides, among other things, that the registrations of pesticides are to be periodically reviewed. The goal is a review of a pesticide's registration every 15 years.

However, the law, as it turns out, was changed.

It was amended by PRIA 2 in 2007 (so the 2008 FR notice was incorrect) – and simply put, the word "goal" was taken out. So I was mistaken insofar as the language has changed. I am told it was changed as part of what the NGO folks wanted as part of supporting PRIA. [I will also send you a brief memo outlining what and when the text changed from a colleague (Susan Kirsch – she was also at the PPC meeting).]

Separate from my own opinion (I would not have recommended taking the deal), I suspect that the idea of what "meeting the registration review deadline" meant in 2007 is possibly different from 2017. Also, some ironic benefit might derive from missing deadlines. In my time, and I suspect currently, a court order to make decisions on a dictated schedule from a court will help the AA-ship compete for resources in the internal budget discussions.

In my earlier response I gave a general description of the what the RED or registration review document is versus a final product reregistration action - the bottom line is that in 2007 (before the ESA "mega-suit" outcome) the RED has/had a different meaning. Your lawyers can opine and parse it all better than I can, but given where things are now (with the 15 year "deadline" having more bite) - what it really means to be "re-registered" or having "completed registration review" may become important distinctions.

For purposes of "meeting the 2022" deadline, the Agency at that time will likely have to consider whether something might meet the 15 year deadline under FIFRA (meeting the requirements for re-

registration under FIFRA) while not yet completing all of its ESA review(s). This remark is entirely my own and mostly driven by my thinking about how what the program could say given the almost impossible tasks that lie ahead.

So sorry for this complicated answer to a rather directly simple question, but the nooks and crannies of FIFRA are often challenging.

I am happy to discuss in more detail anytime, and I will try to set up some time to meet over the next few weeks.

Thanks again for the time last week.

Regards,

Jim

Bill,
I think I'm going to pass on this opportunity. I am not the right person to give a talk on toxic tort and product liability law. I'm sure Lynn Bergeson can find someone better suited to this audience and the sessions. In addition my GC would likely have concerns with my preparing a manuscript.

Regards,
Nancy

Subject: DRI: TTEL Seminar Speaker Confirmation

Nancy,

I am happy to report that DRI has accepted our seminar program and you as a speaker at the Toxic Tort and Environmental Law seminar in Nashville March 1 and 2, 2018. You will be speaking from 3:50 to 4:40 on the 1st and will be joined by Lynn Bergeson.

The title and description (we are limited to 35 words) of your talk is:

New TSCA: Repercussions on commercial transactions, supply chain relationships, and toxic tort and product liability law

Learn how New TSCA is redefining supply chain relationships; rewriting due diligence rules of engagement; reopening debate on new avenues in product liability, insurance, and tort law; and raising important questions regarding right-to-know vs. confidentiality.

You will be fully comped, which includes registration, 2 nights at hotel, up to $500 for flight, up to $125 for meals, and up to $200 for ground transportation.

As soon as possible could you please confirm your availability to speak.

By July 21st I need from you please:

1) Any revision to the session title and description (we are limited to 35-40 words).

2) Contact information: organization, mailing address, phone, and email

3) Bio: 80 word limit.

4) Photo: Head shot.

Thank you so much.

-Bill

Subject: RE: FIFRA

Great to have a least a short time to get together; I will set up some time in August.

Re: reregistration, I will dig deeper, but one element of what you have below is the notion of when a registration review is "complete" [that is not what I was referring to, I will dig around] --- but as registration review should mean the final product reregistration of all the products formulated from the active (the active ingredient case) -- the numbers are very different.

EPA likes to say registration review is completed when the RED or registration review document is issued. There has been tortuous debate about whether that is a final agency action (it was not considered so until to get out of the ESA "Mega" case saying it is a final agency action prevented more ESA mess). In reality, however, the reg. review document says what should happen to the end use products (restrictions, use rate changes, etc.) -- and the time all the products from that active may take years before all the labels are changed.

When I was on the Hill we regularly complained about the distinction.

This is confusing for a number of reasons, but you can ask counsel and of course feel free to call (I would not be surprised if they disagree).

Regards,

Jim

Subject: FIFRA

Hi Jim,
It was good to chat with you briefly yesterday. Sorry the time was so crunched. Perhaps we can try again in August, when hopefully things will be calmer.
In the morning you mentioned that the 15 yr review period is a goal. Below is the language staff provided from FIFRA 3(g).
It seems pretty firm. Were you referring to something else?

REGISTRATION REVIEW.— (1)(A) GENERAL RULE.— (i) IN GENERAL.—The registrations of pesticides are to be periodically reviewed. (ii) REGULATIONS.—In accordance with this subparagraph, the Administrator shall by regulation establish a procedure for accomplishing the periodic review of registrations. (iii) INITIAL REGISTRATION REVIEW.—The Administrator shall complete the registration review of each pesticide or pesticide case, which may be composed of 1 or more active ingredients and the products associated with the active ingredients, not later than the later of— (I) October 1, 2022; or (II) the date that is 15 years after the date on which the first pesticide containing a new active ingredient is registered. (iv) SUBSEQUENT REGISTRATION REVIEW.—Not later than 15 years after the date on which the initial registration review is completed under clause (iii) and each 15 years thereafter, the Administrator shall complete a subsequent registration review for each pesticide or pesticide case.

Thanks,
Nancy

Subject: RE: UCLA CEIN Workshop in February 2018

Nancy,

The pdfs are attached. The draft agenda is very much a work in progress and the "speakers" are entirely aspirational as no one has been approached except for emails like this

Subject: RE: UCLA CEIN Workshop in February 2018

Lynn,

Thanks for thinking of me. I can check the calendar to see if it will work, but more details about who attends and what the agenda looks like for the meeting may be helpful. In addition, can you share the PDFs of the previous publications you cite? They don't appear to be open-access. This may help me understand previous workshops and thus the planned workshop better.

Thanks!
Nancy

Subject: UCLA CEIN Workshop in February 2018

Hi Nancy,

I am on an organizing committee for a program being planned by the UCLA Center for Environmental Implications of Nanotechnology (CEIN). We are working on a February 20-21, 2018, Workshop titled **Where do we Stand on Nano-Governance? Looking Back and Forward.** The hosts are Tim Malloy, Andre Nel, and Hilary Godwin, UC CEIN.

The goal is to convene opinion leaders, academia, industry, government, and NGOs to engage in a discussion on how voluntary and regulatory development of data for product stewardship and regulatory purposes and decision-making can be met by integrated approaches to testing and assessment (IATA) that leverages alternative testing strategies (ATS) and adverse outcome pathways (AOPs) for nanomaterials. Additionally, the meeting will cover nano-governance over the past decade with a view of shaping the future of how the field may (or should) move forward, including consideration of risk assessment, risk prevention and management (*i.e.*, mitigation, safety by design.)

To address these topics, opinion leaders will make short statements and pose questions, which will be followed by roundtable discussion. An overarching objective of this workshop is to produce and disseminate a report addressing steps needed to drive broader implementation of integrated testing approaches, decision making approaches, and effective nano-governance. This workshop follows successful multi-stakeholder workshops on Alternative Testing Strategies (*ACS Nano*, **2013**, *7*, 6422-6433) and Categorization Strategies for Engineered Nanomaterials (*ACS Nano*, **2015**, *9*, 3409-3417).

Given your critically important role in policy, governance, and risk assessment, I join my colleagues in hoping you will consider participating in this workshop, if only for a day, given your jam-packed schedule. LA is a great place to visit in February, and we sure could use your wisdom.

How about it??

Jeff:

We have a common interest in the development and refinement of the new chemicals category documents to ensure their continued successful role under new TSCA. Based on this interest, we would like to share with you our comments and perspective on a set of draft new chemicals category documents kindly provided by the New Chemicals Program staff.

If there is sufficient interest, we would be happy to meet with you and the technical staff to discuss this topic.

Subject: Section 3

Hi Nancy, we appreciate all that you are doing to support our efforts to gain approval of a Section 3 as Administrator Pruitt and our CEO, RJ Kirk discussed. Keith gave us an update on your meeting yesterday. The Section 3 remains the number one priority for our company, and we're doing all that we can to provide the EPA with the necessary information requirements.

Just wanted to make one point clear regarding the EUP. This is not something we wish to pursue. It really makes no sense to us at this point. The FDA decision on a trial would have allowed us to proceed with work in Florida, but we made the decision not to go down that path, so that we could fully commit to the EPA and Section 3 approval. As we have discussed, we are confident that the existing data support a Section 3 registration. Moreover, we are generating the additional confirmatory data requested by BPPD.

So, we are 100% committed to submission of a Section 3 registration application as soon as reasonably possible after the transfer of jurisdiction. I just did not want to leave any room for doubt on our position regarding our sole focus on the Section 3.

Thank you and the EPA team for all that you are doing to assist us.

Best,
Tom

Subject: Product Stewardship Society
Attachments: Revised Closing Plenary Session-Suggested Abstract

Derrick,

The closing program will consist of Nancy, offering some remarks, Christopher Cassell, Director of Corporate Sustainability, Lowe's Company Inc., offering some remarks, and I will moderate a conversation between Nancy and Chris on topics like those noted in the attached. Nancy will have the questions well in advance of the event.

Thanks!

Derrick,

The session is on **Saturday, September 29 from 10:45 to noon.**

The agenda from website is below.

Education

Conference at a Glance

Thursday, September 27

[ ]

[ ]	Time	Session Title
[ ]		
[ ]	8:00 AM - 9:30 AM	Opening Session
[ ]	10:30 AM - 12:00 PM	Living with Inconsistencies in Classification of Chemical Hazards

[ ]	10:30 AM - 12:00 PM	Transparency, Innovation, Optimization: The Building Blocks of Sustainable Product Stewardship
[ ]	10:30 AM - 12:00 PM	Product Exposure Modeling Workshop: What's in the ToolBox?
[ ]	1:30 PM - 2:30 PM	Addressing Chemical Exposure from Your Compliant Consumer Products - Lessons Learned
[ ]	1:30 PM - 2:30 PM	California's Proposition 65: The Wide-Ranging Applications of Chemical Analysis
[ ]	1:30 PM - 2:30 PM	The Impact of the European Poison Centers on Global Organizations
[ ]	3:00 PM - 4:00 PM	The Business Case for Product Stewardship: Case Studies from Industry
[ ]	3:00 PM - 4:00 PM	Dealing with Data Gaps: Emerging Tools in Predictive Toxicology
[ ]	3:00 PM - 4:00 PM	Food Contact Requirements in Asia and Latin America
[ ]	4:30 PM - 5:30 PM	The Big Reveal: Preparing for Increased Ingredient Transparency
[ ]	4:30 PM - 5:30 PM	REACH 2018 and Beyond: What You Need to Know
[ ]	4:30 PM - 5:30 PM	Product Stewardship: A Partnership in Safety and Business Development

Friday, September 28 [ ]

[ ]	Time	Session Title
[ ]	8:00 AM - 9:00 AM	Complex Risk and Customer Demand Management in Complex Supply Chains
[ ]	8:00 AM - 9:00 AM	Characterizing UVCB Substances: Unique Challenges for Product Stewardship and Compliance
[ ]	8:00 AM - 9:00 AM	So, Your Product is in Asia? Challenges & Opportunities in Accessing and Working in the Region
[ ]	9:30 AM - 10:30 AM	Global Best Practices to Ensure Compliance for Business Continuity
[ ]	9:30 AM - 10:30 AM	Endocrine Disruptor Testing Upgrades from EU: Stewardship and Substitution Implications
[ ]	9:30 AM - 10:30 AM	Attracting Developing and Retaining a New Generation of Product Stewards
[ ]	11:00 AM - 12:00 PM	Greener Products: The Making and Marketing of Sustainable Brands
[ ]	11:00 AM - 12:00 PM	Integrating Regulatory Compliance with Tort Law in Authoring & Managing Labeling & SDS
[ ]	11:00 AM - 12:00 PM	How Can LCA and HPD Tools be Utilized as a Roadmap for Product and Process Improvements
[ ]	1:30 PM - 3:00 PM	The GHS-SDS Lifecycle for Authoring Professionals: Where Hazard Classification Begins
[ ]	1:30 PM - 3:00 PM	Product Stewardship Program Continuous Improvement: Application of Lean Principles
[ ]	3:30 PM - 4:30 PM	From Hazard Assessment Through Product Stewardship to Sustainability
[ ]	3:30 PM - 4:30 PM	Building an Anticipatory and Emerging Issues Management for Product Stewards Around the Globe
[ ]	3:30 PM - 4:30 PM	Roles of Exposure Assessments and Limits in Risk Analysis

Saturday, September 29 [ ]

[ ]	Time	Session Title
[ ]	8:30 AM - 9:00 AM	Practical Chemical Alternatives Assessment: A Decision Science Approach
[ ]	8:30 AM - 9:00 AM	Approaching REACH SVHC Authorization: a Johnson & Johnson Perspective
[ ]	8:30 AM - 9:00 AM	Feedback is the Breakfast of Champions
[ ]	9:15 AM - 9:45 AM	The Long Arm of Liability Risk in Product Stewardship
[ ]	9:15 AM - 9:45 AM	Assessing Environmental Hazards: Tips, Tools, and Guidance for Product Stewards
[ ]	9:15 AM - 9:45 AM	Guiding Principles of Chemical Stewardship for Oilfield Services Companies
[ ]	10:00 AM - 10:30 AM	Amended TSCA Impacts on OSHA: Product Stewardship Implications
[ ]	10:00 AM - 10:30 AM	Oh, the Places We Have Been!

[ ] 10:45 AM - 12:00 PM

Subject: Product Stewardship Society- Invitation to Speak

Nancy,

As President-Elect of the Product Stewardship Society https://www.productstewards.org/Pages/default.aspx, an affiliate of the American Industrial Hygiene Association (AIHA) (www.aiha.org), I write to invite you to speak at our 2018 Conference https://www.productstewards.org/ProductStewardship2018/Pages/default.aspx. The conference is conveniently located in Washington, D.C. on **September 27-29, 2018,** at the Marriott Marquis. We seek your participation on Saturday, September 29, at 10:00 a.m. to keynote the closing plenary session.

Reasons to Accept this Invitation

1. EPA OCSPP has not historically participated in AIHA PSS events. We believe this is an excellent venue to address this gap.
2. Given amendments to TSCA, there is a much greater need for the industrial hygiene and product stewardship community to know and understand TSCA and your participation in the Conference will help draw attention to this need (Section 5 SNURs and workplace issues come to mind).
3. Product stewardship is a growing area of substantive interest and our members and participants need to hear from you as this Administration's top TSCA leader.

4. While this presentation falls on a Saturday, which is not great news, because it falls on a Saturday, you may be more available and willing to spend an hour with several hundred people extremely interested in what you have to say.

Please let me know as we are anxious to promote your participation if we are lucky enough to secure your acceptance.

Thanks

Subject: possible informal meeting during July

Nancy and Jeff –

I am interested in scheduling a meeting with the two of you soon, so we can confer and bring you up to date on the considerable progress that is being made on certain new chemicals issues.

Among the clients I represent, I am fortunate to work with the Semiconductor Industry Association. SIA includes the major US manufacturers of semiconductors ("microchips") that are components of numerous electronic devices. That industry works closely with its suppliers, who are manufacturers and processors of various sophisticated chemical substances and mixtures that are critical to "chip" making. Such substances are unique and highly specific in their composition and properties; consequently, new chemicals often are being developed to suit specific technologies.

Among the substances used in these processes are Photo-acid Generators (PAGs) which are used in photolithographic processes to layer various surfaces on microchips. Last year, SIA and its suppliers voluntarily formed a Consortium to address certain issues that had been arising in the context of the Agency's review of PAG substances that are submitted as new chemicals (in LVEs and PMNs).

Approximately one year ago, the two of you met with a delegation from SIA and its core group of suppliers to discuss the New Chemicals Program's approach to new chemical PAGs. (The meeting occurred in May 2017, just as Mark Greenwood was retiring from his practice – while he was transitioning this client to me.) In the intervening period, we have made great strides as the PAG Consortium has worked collaboratively with New Chemicals Program personnel on a structured agreement by which our members are supplying certain information to EPA reviewers and will be generating new data on representative PAG substances to submit to EPA.

We think this would be a good time for you to become more acquainted with SIA's role, how its industry depends on the availability of innovative new chemistries, and report on how the PAG Consortium is continuing to work with EPA personnel to further the Agency's objectives to obtain a more robust data profile on this category of substances.

If we could find mutually convenient dates during the middle two weeks in July (the weeks of July 9th and 16th) that would be ideal. I realize your schedules are jammed packed; thus, an informal meeting is being sought. We would bring with us only a handful of SIA personnel, one or two representative members, and a "supplier" representative.

I would be pleased to contact your respective schedulers to seek an appropriate date.

Thanks for volunteering to do this. I agree that you would be a good lead and have also asked other members of the executive committee. and they were also in agreement. Therefore, I appoint you as the chair (so formal!). I have asked committee chairs to also be members of the executive committee, and we meet periodically to go over business items and committee status. Please also feel free to suggest agenda topics.

Thanks again for your efforts.

Subject: meeting request

Nancy –

I am interested in setting up a meeting with you concerning the proposed TSCA paint stripper rule. We represent W.M. Barr & Company, an employee-owned small business that is the country's largest producer of consumer-use paint strippers that contain methylene chloride and which are sold in retail centers and home & hardware stores nation-wide. We have submitted detailed comments on the proposed Section 6(a) paint strippers regulation which, as you may know, will effectively ban Barr's retail-size paint strippers on the basis of certain assumptions and conclusions that we do not believe are scientifically supported by the record.

Barr's President has asked me to approach you directly because the CEO and one or more members of the company's Board of Directors intend to travel to Washington so they can make you personally aware of the jeopardy their enterprise faces if the rule if finalized as proposed. The Agency's economic assessment greatly underestimates the impacts the rule will have on Barr and other small businesses that formulate paint strippers and the many thousands of small business residential remodeler/contractors that rely on retail-size paint strippers containing methylene chloride. Unfortunately, Agency staff have erroneously concluded that there

are technically and economically feasible alternatives to methylene chloride paint stripers which information in the public literature (and data Barr has provided to EPA staff) contradict.

I intend to reach out today to your scheduler to try to arrange such a meeting the week of July 10 or 17th. However, I want you to feel free to contact me directly to confer further about the purpose of our meeting and the substantive aspects of the comments Barr timely submitted during the public comment period.

Thank you in advance for your consideration and any assistance you can provide in setting up such a meeting.

Larry

Subject: Fun at EPA

after you r first few weeks at EPA I would imagine you are putting in some massive hours reading, meeting and listening to excuses and blue sky plans. Justifications for why programs do not move forward. Bu no one has offered that certain projects are complete and finished and based on current science a valid LONG-term solution is available and practical. NO SENIOR staff think that way.

you must have a tera byte of excuses and justifications.

As a manager who used to ask foolish questions regarding, "when is enough enough?" and 'what is the ROI for this effort." and "how will we know that we are done -- failure or success!"

I was consistently annoyed and sometimes shifted to other tasks when there questions obviously had merit. Yes, these questions made me an aggravation person trying to influence programs such as TRI and Challenge and flawed web sites such as chem view.

being on the outside i have been finding alternative methods to seek good government. but surprise surprise, OSC, MSPB, and EEOC are overwhelmed and understaffed. Poor or intentional planning. not you problem.

Hope you are doing well. determining who is lying to you or who is lying the most. Keep charging ahead. Make the work meaningful and not farcical.

Subject: RE: Speaking Invitation: TSCA Reform - One Year Later (June 27)

Hi Jeff,

Thanks so much! We are very pleased to have you. We will be in touch soon for a brief conversation among the panel in preparation, and I will have all the details for the 27th to you by the end of the week.

Best,

Brett

Brett,

If there's still room on the agenda, I would be happy to attend the 3:00-4:00 session.

Jeff

Dear Dr. Morris,

My name is Brett Korte and I am the Director of Professional Education at the Environmental Law Institute. I would like to invite you to participate as an expert panelist at an upcoming forum.

The ELI and George Washington University Milken Institute School of Public Health program, **"TSCA Reform - One Year Later,"** will take place on **Tuesday, June 27 from 9:00 am – 4:45 pm EDT** at George Washington University in Washington, DC. It will include both an in-person meeting and a nationally-webcast video stream. The program is a day-long conference that will explore current issues surrounding the implementation of the Frank R. Lautenberg Chemical Safety for the 21st Century Act. We hope to convene thought leaders of the legal and environmental communities, including elected officials, experienced practitioners, government officials, and NGO leaders. We anticipate the ensuing dialogue will be most valuable to participants and speakers alike.

We would be delighted if you would lend your expertise to the session below. A conference agenda with a list of invited panelists is attached.

Session Title:	Guided Discussion: "Legal & Regulatory Issues"
Time:	3:00 pm – 4:30 pm EDT

I would like to note that video from this event will be recorded and uploaded to ELI's website. There is also a possibility that we will transcribe portions of the event for publication in one of our journals. I would be seeking your permission for any of these uses.

Please let me know if you are interested in participating. If you have any questions as you decide, please don't hesitate to contact me. Thank you for your time and I hope to hear from you soon.

Sincerely,

Brett Korte

Subject: 2018 DRI Toxic Tort and Environmental Law Seminar

Tim,

The seminar is March 1-2 at the Nashville Grand Sheraton Downtown. We could be flexible with Nancy's schedule as to the date and time of her presentation, but it is tentatively scheduled for the morning of Friday March 2nd. We are also flexible with the topic, but the general idea would be a panel discussion about the potential impacts of TSCA re-evaluation of chemicals in toxic tort cases. She would also be asked to submit some sort of written manuscript.

DRI would cover registration, two nights at the hotel, up to $500 in airfare.

Attached is a brochure from last year's conference so she sees the typical topics.

Subject: Urgent Commercial Need

Good Morning Nancy,

One of the two companies that met with you on July 5 has an urgent commercial need for the product at issue. I know OPPT is working hard on the questions presented, but we all thought the resolution would be before now, July 24. Is there anything you or others can share that would inform our judgment regarding how best to proceed? Thanks.

Thank you for checking.

Yes, we included the 2017 Report among the half-dozen expert reports attached to our written comments. Both electronic and hard copies were timely submitted.

Of course, we would be happy to email or messenger over copies of the set of comments and reports if it would help enable access and future discussions.

We appreciate your interest.

Larry

Thank you Larry.
Is this 2017 report in the docket or is it something we should make sure we add?

Regards,
Nancy

Nancy and Aaron –

Thank you again for meeting with us today. We found the session to be extremely helpful. We will be following up in August with Joel for a more "in depth" session with CCD and the pertinent technical staff with whom we will focus more specifically on some of the "science aspects" of the comments, EPA's risk and economic assessments, and the data WM Barr provided to the Agency with its comments.

In the meantime, because a great deal of the discussion today focused on the lack of technically and economically feasible alternatives to MeCl2 paint strippers, we are sharing with you the attached copy of the Report prepared by Barr Brands personnel in 2017. The Report compares the performance of consumer-use paint stripper products available on the retail market today. The efficacy tests were performed in a manner consistent with the industry standard published by ASTM. Barr's Report also includes an evaluation of alternative formulations that are likely to emerge in the retail (consumer and small business contractor) market if MeCl2 strippers are no longer available at retail. Some information on the prices of retail-sale paint strippers is reflected in the Report, as is very basic information on the flammability of the various products noted in the Report. Of course, Barr's public comments and the technical reports we submitted during the comment period explore these and other facets of the rule in greater depth.

Again, thank you for meeting with the delegation from Barr Brands; we appreciate your time and attention to this important matter.

Larry

Flag: Flag for follow up

i was really hoping that you would get the job and that tsca and FIFRA could drift back to being regulatory. These were not to be research organizations but intended to fill critical gaps to allow appropriate regulation.

I could see the program slipping down the path as more and more ORD 'managers' found homes in OCSPPE.

May you have a good three to four years

i will cease nagging you though i will be reading and watching. I view this as ACC vs ORD. sorry to cry or lol that is the question.

Subject: RE: Advice solicited on Section 5(e) review process

Nancy;

Sorry for the delay in responding. I have checked with Christine Bryant (Senior Vice President for Coatings, Adhesives & Specialties) and Bob Skogland (Director of Product Safety & Regulatory Affairs) at Covestro and it now looks like their visit to DC will not be until September 25 and 26. Would a meeting on either of those dates work on your schedule?

I very much appreciate your follow-up and your willingness to meet with us.

Best-

Tim

Subject: FW: Advice solicited on Section 5(e) review process

Tim,
Ryan asked me to follow up with you. I would be happy to meet with Tim and Bob. I've cc'd Gloria Milhouse who can assist in finding a 30 minute window on my calendar.
I will also try to ensure that our TSCA Office Director can join the meeting. If you have a concern about specific PMNs if you let me know the numbers, we can also engage the case manager. Just let me know.

Regards,
Nancy

Subject: Advice solicited on Section 5(e) review process

Ryan, we need to look at new dates and will send possibilities asap. Any advice regarding with whom we need to meet?

Ryan—

Hope you are doing well.

I represent Covestro, which is a major manufacturer of adhesives, coatings and other unique chemicals with U.S. headquarters in Pittsburgh and major operations in Texas, Ohio, and West Virginia. Covestro's products are used in many industries, including the automotive, electronics, and construction industries.

Covestro is appreciative of the steps being taken at EPA to reduce the backlog of applications in the New Chemicals Review Program under TSCA. Two prominent Covestro officials -- Christine Bryant (Senior Vice President for Coatings, Adhesives & Specialties) and Bob Skogland (Director of Product Safety & Regulatory Affairs) – will be in Washington on August 1st and 2nd. I was hoping to get your advice and assistance on setting up a meeting at EPA with appropriate officials involved in the "section 5(e)" review process. Covestro would like to discuss how the implementation of TSCA by the previous Administration has adversely affected them, and serve as a resource for EPA on any information they can provide moving forward. (As an aside, you may be interested to know that Covestro's President, Jerry MacCleary, currently serves as Vice Chairman of the Board at the American Chemistry Council, where the 5(e) process reforms are receiving considerable attention.)

Your thoughts on setting up a meeting with the right folks would be most appreciated. Thanks.

Tim

Thanks Nancy,

I can be available anytime today or tomorrow, and after 5 is fine with me. I work remotely full time so I can always be reached by my mobile below. If we schedule a call, I will need to include the R&D Director and Commercial Manager on this project. I would suggest that maybe you and I have a quick chat if possible today or tomorrow and if we need to schedule a call then we are open for the week of the July 11th.

Best regards,

Anastasia,
It would be good for us to find a window to chat. I'm looping in Derrick and Mary who can assist with my schedule.
I will be in the office Monday and Tuesday and then back in the office on July 11th. I think my days are already pretty packed but perhaps we can chat after 5pm one day.

Nancy

Hello Nancy,

I spoke with Jeff Bauer last week and he provided me a quick update. He let me know you met with the risk assessment team last Friday and needed to review for yourself further. With the holiday next week, I was just checking to see if we should even expect any update in the next week or if there is any timing I might be able to provide my commercial/R&D teams to keep them from asking daily?

Best regards,

Hi Anastasia,
Let me circle back with the team on this. I know they were working hard to respond to concerns.
I appreciate your patience—it's a crazy busy time, but that is no excuse.

Nancy

Thanks Nancy,

My apology for my delay on our response. We have had a few phone calls where we are getting closer to an understanding but we still have concerns. Our understanding is that we should be able to eliminate the risk assessors concerns with new OECD 422 testing of the PMN substance. There are definitely still some questions around the testing that are not clear but these details were passed through the risk assessor to the PM and we haven't seen them in writing so it might just be my misunderstanding.

Cargill would like EPA management to provide sign-off on the agreement that we have exhausted all existing data available from surrogates and other referenced data provided (see below) with the explanation to why this data is insufficient to support the weight of evidence approach for determination of hazard of the PMN substance and that new animal testing is the only option available to eliminate the risk concerns by the agency. We request a response to address each of the aspects of the references listed and we would find it helpful to have a follow-up call with you or Jeff Morris in attendance.

1. Analog 1 (provided in P2 Assessment) OECD 422/414 and 90 Day Repeat Dose; and additional Analog (provided in 03.24 email) OECD 414 Study (oral) C16-C18 Alkyl esters of the fatty acid of concern
    a) Page 6 of updated Risk Assessment Summary received by fax 5/8/2018. Based on data provided on the average molecular weight fraction of the fatty acids, the risk assessor made new implied references determining that the analog would not be "closest fatty ester analog". However, analytical characterization data provided in the PMN clearly shows the % weight fraction of each of the prominent tetraesters present as constituents of the PMN substance which actually includes the analog.
        - It is our position that Analog (1) is not only a constituent, it carries the highest concentration of the fatty acid of concern potentially available giving best worst case concentration and provided additional references in my 03/24/2018 email that were not addressed by the risk assessors. Based on the additional references we provided, there is not expected to be a difference in the rate of enzymatic hydrolysis of the branched tetraesters and the combination linear and branched tetraesters. The rate of hydrolysis is more dependent on the esterification and all species substituted with greater than 3 ester groups were found to be 2000 times slower (Mattson and Volpenhein, 1972a, b).
    b) The risk assessor makes an important statement regarding the metabolism of the tetraester by dermal absorption versus gastrointestinal: "Furthermore, dermal exposure would bypass the liver and gastrointestinal metabolism of the fatty acid esters increasing the uncertainty of oral studies based on the intact ("Analog 1") molecule. Thus, the oral developmental study in rats for ("Analog 1") was not utilized for regulatory decisions."
        - There still seems to be a contradiction on what testing we would do on the PMN substance based on the above. During our last conversations this week, we discussed an additional oral 422 on the PMN substance in order to extrapolate to inhalation and dermal. If the risk assessor has excluded analog data based on on oral ingestion, it is unclear why additional testing on PMN substance would be acceptable. See additional number 5) below regarding inhalation.
        - Alternatively, it is not clear why the tetraester data by oral ingestion is not sufficient to support a finding of "no concern", but developmental toxicity data from oral ingestion of the fatty acid is acceptable to use in calculations to determine there is a concern.
        - If the risk assessor does believe that the dermal exposure would bypass the liver and gastrointenstinal metabolism of the fatty acid esters, it is not clear why there is still concern for developmental toxicity. See number 2) below for additional reference material provided regarding the importance of the concentration of the fatty acid reaching the liver.
        - After exhausting all public searches, every study found that was conducted on a polyol or alkyl esters in connection with the developmental toxicity of the fatty acid of concern was based on oral ingestion. No new dermal exposure studies could be found, even when chemicals were specifically tested recently due

to use in cosmetics for dermal leave-on applications. Reasoning provided for the oral route chosen by the study directors for those studies was due to expected higher risk of concentration of the fatty acid metabolites from esterase in the gastrointestinal tract over any other routes. Oral ingestion would give the best representation of the worst case potential for systematic and developmental toxicity concerns subsequently ruling out the need for additional dermal or inhalation studies. It is our position that the 422 and 414 data provided representing both a tetraester and an alkyl ethylhexanoate provide best weight of evidence that the PMN substance is not expected to have systematic or developmental toxicity concerns.

2. Additional supporting references: CIR Safety Assessment of Alkyl Ethylhexanoates, 2012: http://www.cir-safety.org/sites/default/files/ethylh122012tent_faa_final%20for%20posting.pdf ; CIR Safety Assessment Pentaerythritol Tetraesters, 2012: https://www.cir-safety.org/sites/default/files/Pentae122011FINAL%20for%20posting.pdf

a) ..*"2-Ethylhexanoic acid has been shown to be a liver and developmental toxicant at high dose levels. In developmental studies, it has been postulated that 2-ethylhexanoic acid maternal liver toxicity begins a cascade of effects that includes metallothionein (MT) induction, zinc accumulation in the liver due to MT binding, and a resulting zinc deficiency in the developing embryo. In this model, it is the zinc deficiency in the developing embryo that causes developmental toxicity. Support for this mechanism of action comes from several sources. Animal studies have demonstrated that dietary zinc supplementation reduces the toxic effect and that further zinc deficiency makes 2-ethylhexanoic acid more toxic. In vitro studies using embryo cultures have demonstrated that either zinc deficiency or 2-ethylhexanoic acid treated sera produced developmental toxicity. Zinc supplementation of either/both sera eliminated the effect."*

b) Additional studies have been conducted to prove the hypothesis that the pathway to 2-ethylhexanoic acid production from a precursor would not give rise to acute liver toxicity, MT induction, zinc sequestration, and developmental toxicity. CIR safety panel concluded that the category of PE tetraesters were not likely to pass through the dermal layer as these ingredients have very poor solubility in water and have large molecular weights and additionally ethylhexanoates were precluded from risk of developmental toxicity from dermal exposure due to metabolic conversion that results in a time course of 2-ethylhexanoic acid appearance that allows clearance before sufficient levels can arise to produce acute liver toxicity.

c) Risk assessor does make reference to the Canadian Draft Screening Assessment of Ethylhexyl Ethylhexanoate from 2017 which also relied on risk calculations using the same oral developmental toxicity data available for the fatty acid as EPA, but also summarize that their calculations are assuming .."to the extent hydrolysis is unknown, it is conservatively assumed that all of 2ethylhexyl 2-ethylhexanoate is hydrolyzed to 2-EHA, followed by complete absorption through the skin (i.e., assuming that absorption through the dermal route is equivalent to absorption through the oral route)".. The Canadian reference did not consider available data from additional alkyl ethylhexanoates such as what was provided to EPA and did not include the comments or new data received after the draft was published in 2017. The Final Assessment from Canada was expected to be published after March 2018 but could not be found as of yet.
    - The OECD 414 study referenced for the additional Analog listed in number 1) above supports the hypothesis and conclusions made by the CIR Safety Assessment.
  - If the risk assessor agrees the dermal exposure would bypass the liver and gastrointenstinal metabolism of the fatty acid esters, it is not clear why there is still concern for developmental toxicity.

3. Analog 2 (provided in P2 Assessment) and the EPA High Production Volume Assessment of Polyol Esters Category, 2010 (see attached)
   - Page 8 of updated Risk Assessment Summary received by fax 5/8/2018. We have provided our concerns about the study referenced has a LOEL of 2000 mg/kg/day (NOAEL of 800 mg/kg/day) and is included in the 2010 HPV Screening Assessment for Polyol Esters Category of chemicals. This study has been used by EPA as a basis of risk determination for the Polyol Esters Category in the past "as not likely" for human health concerns. Based on that study, EPA made the determination in 2010 that no further testing was necessary for the category, however, the use in the risk calculation would seem to be a reversal of EPA's earlier findings for HPV chemical category, is this the case? Since 2010, there have been multiple subsequent 90-day repeat tox and OECD 421/422/414 oral reference data generated for the Polyol Esters Category that has contributed to the weight of evidence for the category that these chemicals are of low concern.
     - Specifically, are you in an agreement that based on data provided in the 2010 HPV Assessment, the chemical category is lacking data for dermal exposure to address concerns summarized by the risk assessor? Has this been applied consistently previously and will apply similar to future submissions under the polyol ester category?

Additional Notes:

4. Page 1 of the updated risk assessment summary provided to us in fax 05/8/2018 indicated that risk were not identified for worker for inhalation because exposure is negligible, however, the PM continues to insist there will be a proposed SNUR to address risk from inhalation due to spray applications. To our knowledge, beyond our applications, the only potential industrial uses (not including FDA regulated uses) identified of polyol tetraesters from public resources have been for lubricating oils of jet engines, low-temperature use grease, heat-resistant engine oil, and refrigerator oil which have not indicated any foreseeable use including spray applications. From discussions regarding testing, we do have a concern that there will be adjustments in the recommended testing to eliminate the proposed SNURs that would also address inhalation even though no concerns were indicated by the risk assessor or before any additional modeling/calculations indicated concern.

5. Page 8 of the updated risk assessment summary provided to us in fax 05/8/2018, there is still an error in the risk calculations after amendment by the risk assessor based on data cited from our PMN or P2 assessment. It does not greatly affect the outcome, but should still be noted for accuracy or if the results are further used in additional determinations. The "worst case" exposure from the handling of filter media from the manufacturing process should still have a concentration adjustment of 50% wt/wt of the PMN chemical in the solid and when combined with the adjustment for the % fatty acid would result in a 14.3% Structural Alert/Component as % PMN Substance.

6. Page 9 of the updated risk assessment summary provided to us in fax 05/8/2018, the risk assessor has made reference to Cargill Technical documents and a study found online which apply to Cargill's Natural Esters used in the same use applications. The Natural Esters referenced in this application are primarily vegetable oils with additives which are a different category of chemicals. Synthetic Esters are designed to have better stability to extreme temperature variations when compared to our Natural Esters and do not use the same Technical Guidance for handling and storage. The following was provided by my technical team for additional information for consideration:
    - It is not anticipated that transformers are opened, even for maintenance, for the life of the transformer (20-60 years)
    - For some transformers (such as switch gears), any sampling or contact with the fluid is uncommon; there would be 40-60 years without exposure to oil
    - Where there are routine assessments in place, the sampling of the oil is done in a very controlled manner ranging from a 6 month to bi-annual basis. Amounts ranging from 50 ml to 1 L samples are taken with a syringe, taking great care to keep the transformer oil sealed from air or exposure – often through some type lock and bleed valve
    - One of the standards tested from this analysis is Acid Value, which dictates an upper acidity limit of the oil to be below 0.3 mg/g KOH – the fluid is expected to remain well below this level for the life of the transformer (40-60 years).
    - Other maintenance or contact with the fluid is not expected for the life of the transformer
    - Additionally, per the IEEE standard C57.154 (we can provide) – the max allowable temperature of operation for a transformer (and only for a short time in emergency conditions) is 140 C. This is recognized by UL, a well-known industry standard, which the industry adheres to.

Thanks again for your diligence with your teams and support to get to a good resolution. As I provided previously, we may want an additional call or meeting which would include either yourself or Jeff so that we can expedite the next steps forward and if that will include additional 422 testing on our part.

Best regards,

Anastasia

Hi Anastasia,
I've heard you've now had a few calls with the program and hopefully we are moving towards a common understanding and good resolution.
Please let me know if you have further concerns.

Regards,
Nancy

Subject: Request Suspend P-18-0101 for further review

Hello Jeff,

We will need to suspend the PMN for at least 15 days as we discussed in order to give us time to respond to the most recent information received from the risk assessment team. I will be out of office until May 7th but can still be reached by cell phone.

I received the fax of the risk assessors summary based on the changes to calculations and the addition of other data or endpoints since reviewing with Nancy more than three weeks ago. I did actually expect the reports or summary presented to Nancy to be included and the explanation to the changes. I had also expected some summary or additional detail on their determinations to why the assessors chose not to use the additional OECD 421/422, repeat tox data, and referenced material that we have provided for analogs of the ester. Will it be possible to get the additional determinations in writing for the reference data provided and why they are still choosing the LOEL for the fatty acid and not any of the toxicity data provided on the substantially similar esters?

For us, this is not about not wanting to require gloves through a SNUR. This is about the potential commercial impact of the additional regulatory burdens of a SNUR and the perceived health risk implied to this chemical versus others used in industry.

We need better guidance on what data and scientific evidence or references that can be provided that will elevate the concerns raised by the risk assessors. From our conversation, the indication that even if we did complete new OECD 421/422 with a positive outcome of a NOAEL of 1000 mg/kg/day or greater using our manufactured chemical would not change the risk assessors concerns that are driving the recommendation for a SNUR is insufficient for us to be able to address how to move forward.

We will make a full response or would like to provide additional information if possible for review but also need better understanding of the additional references newly added by the risk assessor to support their concerns.

The second point of the summary, references a repeat tox dermal absorption study that was used as a secondary NOAEL for risk calculations by the assessors to support concerns. The study referenced has a LOEL of 2000 mg/kg/day (NOAEL of 800 mg/kg/day) and is included in the 2010 HPV Screening Assessment for the category of chemicals. This study has been used by EPA as a basis of risk determination for the chemical Category in the past "as not likely" for human health concerns. Based on that study, EPA made determination in 2010 that no further testing was necessary, however, the use in the risk calculation would seem to be a reversal of EPA's earlier findings for HPV chemical category. Is EPA reversing their previous determinations for the whole category under the HPV Assessment? There has been multiple subsequent 90-day repeat tox and OECD 421/422/414 oral reference data submitted that has been used as a weight of evidence for the category. It is unclear why it would now be used in risk calculations to support concerns?

We would like to also provide additional supporting information or data in regards to the third and last claims of the potential thermal degradation of the chemical made by the risk assessor in their summary, however, they did not provide any references to what they are basing their assumptions. Our knowledge and the additional industry standards which require testing under ISO, IEEE, UL certifications do not support the statements made by the risk assessors. We would like guidance on what information they are using as reference or data that we can provide that would be helpful to review to elevate this concern.

Thanks,

Anastasia Coots

Nancy,

Thanks again for your time, and for all you are doing to implement TSCA. We wanted to summarize a few of our discussion topics, and did so in the attached letter.

Best regards,

Lynn

Subject: Meeting Follow-up: EPA Regions- example of overreach
Attachments: epas_partial_approvalpartial_disapproval_wa_hh_wqc_impl_tools_bellon_ltr_enclosures_508c.pdf

Dear Brittany & Nancy,

First of all, congratulations on assuming key policy leadership roles at USEPA under Administrator Scott Pruitt. The color pigments industry greatly appreciates the opportunity to serve as a strategic partner with the Agency to protect human health & the environment, and concurrently, preserve and expand manufacturing jobs in the color pigments industry and in the downstream industries it serves.

We offered to follow-up with specific examples of continuing regulatory challenges and Agency impediments to US economic growth and job creation. Let me offer one example of how an EPA Regional Office, in the waning days of the previous Administration, imposed unattainable and unmeasurable water quality regulatory requirements on the good citizens and manufacturing companies in Washington State, rather than agree with common-sense regulatory recommendations proposed by very knowledgeable environmental professionals at the Washington State Department of Ecology.

Historical background:

- Washington State Department of Ecology (ECY) tasked with reviewing and updating Federal water quality regulations that it is delegated to manage
- ECY professional technical staff conducted thorough review of existing regulations
- ECY conducted stakeholder outreach meetings and webinars to seek public comments
- Indian tribes in Washington State (funded by Region 10 grants) lobbied Region 10 for higher level of water quality standards, exceeding existing state-federal standards
  ECY presents water quality proposal to Region 10 that maintains WQ standard of 7 micrograms per liter for contaminants (existing federal level); the current TMDL is based upon 22g/day of fish per day, while Region 10 used 175kg/day fish.
- Region 10 communicates its decision to override ECY recommendations and impose water quality standards at 170 micrograms per liter (unmeasurable, unattainable, no technology exists) (see attached document signed by Region 10 Director of Water Quality Daniel Opalski); Washington State ECY given five years to implement.
- Immediate Economic Impact- over 1000 manufacturing jobs in Washington State located on Spokane River at risk of being eliminated; economic impact on Boeing and other national defense industries currently located in Washington State still to be determined

This example questions Region 10 staff motivations and regulatory decision-making practices. How balanced are regulatory outcomes within regions? Which groups may exert more influence over regulatory decisions? Why is state government regulators' expertise questioned or overruled? This example also raises other questions:

Why do Regional Offices exist? What are roles of Regional Offices? Does it make sense for different Regions to develop different regulatory conclusions while operating under the same basic assumptions?
http://www.spokesman.com/stories/2016/jan/20/fish-hatchery-suspected-as-a-source-of-pcbs-in-the/

http://www.scdhec.gov/HomeAndEnvironment/Docs/WQS/South%20Carolina%20Pulp%20and%20Paper%20Association%20Comments.pdf

We encourage EPA to review the Region 10 regulatory decision imposed on Washington State in November 2016, and work with stakeholders to develop solutions that seek to maintain and expand manufacturing jobs in Washington State.

We would be glad to assist EPA in developing common-sense strategies to ensure a balanced regulatory approach across the country.

Nancy,

I hope all is well.

Do you have time for a call this Thursday or Friday with Andy Counts and Bill Perdue from the American Home Furnishings Alliance? We wanted to check in on the formaldehyde emissions rule and discuss next steps. We saw the DFR withdrawal notice in the Federal Register so wanted to touch on that, the early labeling issue, and laminated products.

We can be flexible to your schedule later this week if there is a good time.

Thank you very much,

Chris

Subject: My apology

I just realized that Wendy is still acting Jim Jones and you have not yet gotten the position I hope to someday see you filling.

It would be interesting to see if you evolve some of the same opinions of people and programs after the SES shake up is completed. It is my understanding that more excitement is to come in the relatively near future. Also, interested in the eventual budget as that proposed and sent forward by EPA is a tad entertaining. TSCA is so messed up.

and how many staff are left where 25k is likely to influence retirement dates by more than 6 months. That amount is strictly for public relations. the fun begins when people start thinking Federal RIF. That concept was such fun with anne gorsuch and friends. wish you well and hope we can actually talk some day.

Subject: Meeting Request - American Home Furnishings Alliance

Nancy,

I hope all is well.

Andy Counts, CEO of the American Home Furnishings Alliance, and Bill Perdue, VP for Regulatory Affairs, will be in Washington, DC on Thursday June 15, 2017. They were hoping to meet with you to discuss the 'Formaldehyde Emission Standards for Composite Wood Products' rulemaking. We worked with the agency over the last seven years through development and then recently with the delay in the effective date and the subsequent Direct Final Rule/Proposed Rule on the Compliance Date extension.

The AHFA represents furniture manufacturers and our main issue in the rulemaking has been the treatment of laminated products. We were hoping to go into more detail on the impact of the EPA rule and discuss next steps.

We can be flexible in the late morning or early afternoon but would 11am on June 15th work on your schedule?

Thank you very much,

Chris

Lynn,
Thanks for thinking of me. I can check the calendar to see if it will work, but more details about who attends and what the agenda looks like for the meeting may be helpful. In addition, can you share the PDFs of the previous publications you cite? They don't appear to be open-access. This may help me understand previous workshops and thus the planned workshop better.

Thanks!
Nancy

Subject: UCLA CEIN Workshop in February 2018

Hi Nancy,

I am on an organizing committee for a program being planned by the UCLA Center for Environmental Implications of Nanotechnology (CEIN). We are working on a February 20-21, 2018, Workshop titled **Where do we Stand on Nano-Governance? Looking Back and Forward.** The hosts are Tim Malloy, Andre Nel, and Hilary Godwin, UC CEIN.

The goal is to convene opinion leaders, academia, industry, government, and NGOs to engage in a discussion on how voluntary and regulatory development of data for product stewardship and regulatory purposes and decision-making can be met by integrated approaches to testing and assessment (IATA) that leverages alternative testing strategies (ATS) and adverse outcome pathways (AOPs) for nanomaterials. Additionally, the meeting will cover nano-governance over the past decade with a view of shaping the future of how the field may (or should) move forward, including consideration of risk assessment, risk prevention and management (*i.e.*, mitigation, safety by design.)

To address these topics, opinion leaders will make short statements and pose questions, which will be followed by roundtable discussion. An overarching objective of this workshop is to produce and disseminate a report addressing steps needed to drive broader implementation of integrated testing approaches, decision making approaches, and effective nano-governance. This workshop follows successful multi-stakeholder workshops on Alternative Testing Strategies (*ACS Nano*, **2013**, *7*, 6422-6433) and Categorization Strategies for Engineered Nanomaterials (*ACS Nano*, **2015**, *9*, 3409-3417).

Given your critically important role in policy, governance, and risk assessment, I join my colleagues in hoping you will consider participating in this workshop, if only for a day, given your jam-packed schedule. LA is a great place to visit in February, and we sure could use your wisdom.

How about it??

Bill

Sorry for the delay. I was out of the circuit for the last two months.

My first look at the site and reading the content of some articles indicates the site is scientifically based and goes in the direction of TEF ideas.

Not clear how much could be the costs and if we are keeping both sites or will include a section at TEF website.

Best

Silvia

All-

As discussed at the Annual Meeting, we are considering taking over the website "Kids+Chemical Safety" as a part of TEFs efforts to educate the public. TERA and the University of Cincinnati are willing to turn it over to us if we assume responsibility for the costs of managing the site. The first order of business is to decide if we think the current content would be appropriate for our site and a useful addition to our web presence. An archived version of the site can be found at:

https://web.archive.org/web/20161007143018/http://kidschemicalsafety.org/

Executive Committee and Web Committee members, please review the site and let me know whether you think TEF should pursue this addition to our site. In the meantime, I will work with Susie and Laurie to determine costs for hosting and maintaining the site. If we decide to take this on, we will talk further about adding content and cross-referencing between our current TEF materials and the added website.

Thanks in advance for a prompt response,

Bill

Dear Ms. Beck:

Thank you once again for agreeing to provide a presentation at The ISSA Forum on Sept. 11, 2018 from 9:30 a.m. - 10:15 a.m. on the topic of **"TSCA Reform and the Cleaning Industry."**

For your review and reference, kindly find attached an updated agenda for the two-day program, which includes a description of your session.

When convenient, could you please provide us with the following:

1. A current bio so we can prepare a proper introduction for you; and
2. If you plan on using ppt, please send us a copy of your presentation by Aug. 28

WHEN AND WHERE: The ISSA Forum will be conducted on Sept. 11-12, 2018, at the Hyatt Regency Crystal City, 2799 Jefferson Davis Highway, Arlington, VA.

Please feel free to contact me with any questions. In the meantime, I hope you and yours have a great Fourth of July Holiday!

Thank you!

Sincerely,

-Bill

Subject: possible informal meeting during July

Nancy and Jeff –

I am interested in scheduling a meeting with the two of you soon, so we can confer and bring you up to date on the considerable progress that is being made on certain new chemicals issues.

Among the clients I represent, I am fortunate to work with the Semiconductor Industry Association. SIA includes the major US manufacturers of semiconductors ("microchips") that are components of numerous electronic devices. That industry works closely with its suppliers, who are manufacturers and processors of various sophisticated chemical substances and mixtures that are critical to "chip" making. Such substances are unique and highly specific in their composition and properties; consequently, new chemicals often are being developed to suit specific technologies.

Among the substances used in these processes are Photo-acid Generators (PAGs) which are used in photolithographic processes to layer various surfaces on microchips. Last year, SIA and its suppliers voluntarily formed a Consortium to address certain issues that had been arising in the context of the Agency's review of PAG substances that are submitted as new chemicals (in LVEs and PMNs).

Approximately one year ago, the two of you met with a delegation from SIA and its core group of suppliers to discuss the New Chemicals Program's approach to new chemical PAGs. (The meeting occurred in May 2017, just as Mark Greenwood was retiring from his practice – while he was transitioning this client to me.) In the intervening period, we have made great strides as the PAG Consortium has worked collaboratively with New Chemicals Program personnel on a structured agreement by which our members are supplying certain information to EPA reviewers and will be generating new data on representative PAG substances to submit to EPA.

We think this would be a good time for you to become more acquainted with SIA's role, how its industry depends on the availability of innovative new chemistries, and report on how the PAG Consortium is continuing to work with EPA personnel to further the Agency's objectives to obtain a more robust data profile on this category of substances.

If we could find mutually convenient dates during the middle two weeks in July (the weeks of July 9th and 16th) that would be ideal. I realize your schedules are jammed packed; thus, an informal meeting is being sought. We would bring with us only a handful of SIA personnel, one or two representative members, and a "supplier" representative.

I would be pleased to contact your respective schedulers to seek an appropriate date.

Larry

Nancy and Aaron –

Thank you again for meeting with us today. We found the session to be extremely helpful. We will be following up in August with Joel for a more "in depth" session with CCD and the pertinent technical staff with whom we will focus more specifically on some of the "science aspects" of the comments, EPA's risk and economic assessments, and the data WM Barr provided to the Agency with its comments.

In the meantime, because a great deal of the discussion today focused on the lack of technically and economically feasible alternatives to MeCl2 paint strippers, we are sharing with you the attached copy of the Report prepared by Barr Brands personnel in 2017. The Report compares the performance of consumer-use paint stripper products available on the retail market today. The efficacy tests were performed in a manner consistent with the industry standard published by ASTM. Barr's Report also includes an evaluation of alternative formulations that are likely to emerge in the retail (consumer and small business contractor) market if MeCl2 strippers are no longer available at retail. Some information on the prices of retail-sale paint strippers is reflected in the Report, as is very basic information on the flammability of the various products noted in the Report. Of course, Barr's public comments and the technical reports we submitted during the comment period explore these and other facets of the rule in greater depth.

Again, thank you for meeting with the delegation from Barr Brands; we appreciate your time and attention to this important matter.

Larry

Subject: RE: Following Up

Chris,
Its been crazy busy and I have not yet had a briefing on the laminated products issue yet so I'm not sure another conversation makes sense right now.
If you would like, please check in again in 2 weeks and perhaps by then I can have a more informed conversation.

Regards,
Nancy

Subject: Following Up

Nancy,

I hope all is well.

Do you have time for a call this Thursday or Friday with Andy Counts and Bill Perdue from the American Home Furnishings Alliance? We wanted to check in on the formaldehyde emissions rule and discuss next steps. We saw the DFR withdrawal notice in the Federal Register so wanted to touch on that, the early labeling issue, and laminated products.

We can be flexible to your schedule later this week if there is a good time.

Thank you very much,

Chris

Dear Science Policy Issues Panel:

Thanks so much for your willingness to participate in our workshop today.

I am sorry that we didn't have a pre-meeting phone call at which we all could speak.

I am hoping that we can proceed in something like the following fashion. I would like you each to give 5-10 minutes in which to present the most salient issues that you think need to be addressed in terms of science policies for implementing the LCSA. I will then moderate the discussion. I think we can recognize that there are disagreements among us about the path forward and at the same time that there is a considerable amount of respect for each of our individual viewpoints. In other words, I think you should feel free to respectfully disagree amongst yourselves when we move into the discussion. It will be much more interesting for the audience and will (hopefully) help elevate the discussion so that those in the audience here at GW and online can more fully appreciate the relevance of the issues that you are raising. I do not plan to preprogram the panel with questions but instead will guide the discussion into points that each of you are making..

1. Goldman: Introduce the panel and the issues and moderate the discussion.

2. Beck: Trump administration viewpoint on the significant science policy issues, directions that are being taken and how the administration is obtaining science input to these decisions.

3. Patterson: Views from the standpoint of the risk analysis community.

4. Diderich: Views from the standpoint of the OECD and efforts to globally harmonize science evaluations of chemicals, share scientific data and resources and build capacity for science assessment globally.

5. Denison: Environmental NGO viewpoint on significant science policy issues and relevance to environmental and public health goals of LCSA.

6. Panel Discussion and (if relevant) responses to written questions from the audience.

Hi All,

Thank you very much for joining the Environmental Law Institute and George Washington University's Milken Institute School of Public Health, and our sponsors Bergeson & Campbell P.C and the Environmental Defense Fund, for tomorrow's conference **"TSCA Reform – One Year Later."** We appreciate all of the time you have put into preparing, and very much look forward to seeing you tomorrow!

Attached you will find a list of RSVPs as of midday today. We have about 100 in-person registrants and another 150 on the webinar. You will also find the final agenda attached. If you aren't joining us for the whole day, please arrive at least 15 minutes before your scheduled panel. Finally, I'm passing along bios of your fellow speakers. Hard copies of all of these will be available tomorrow.

The event is in the first floor auditorium of the public health school. The address is 950 New Hampshire Ave NW, Washington, DC. We will have a registration table with materials and name tags set up just inside the door. Please check in with the staff there when you arrive.

If you need to contact us tomorrow, please text or call either my cell Ex. 6 John Hare-Grogg's Ex. 6

Best Regards,

Brett

About Asbestos Disease Awareness Organization

Asbestos Disease Awareness Organization (ADAO) was founded by asbestos victims and their families in 2004. ADAO seeks to give asbestos victims and concerned citizens a united voice to raise public awareness about the dangers of asbestos exposure. ADAO is an independent global organization dedicated to preventing asbestos-related diseases through education, advocacy and community. ADAO's mission includes supporting global advocacy and advancing asbestos awareness, prevention, early detection, treatment, and resources for asbestos-related disease. ADAO Science Advisory Board is under the leadership of Dr. Arthur Frank and Dr. Richard Lemen.

Asbestos Disease Awareness Organization is a registered 501(c) (3) nonprofit organization

Subject: **Uncertainty Conference speaker invitation - please RSVP

Importance: High

Dear Nancy,

On behalf of the scientific committee of the *International Conference on Uncertainty in Risk Analysis* (co-organized by
the European Food Safety Authority and the German Federal Institute For Risk Assessment on February 20-22, 2019 in
Berlin; see https://www.bfr-akademie.de/media/wysiwyg/SavetheDate_Conference-on-Uncertainty.pdf), we invite you as a key speaker on one of your areas of expertise. Specifically, your presentation would set the stage for the session entitled "Communication of Uncertainties". With this session we want to address aspects such as "documentation and visualization of uncertainties; perception of risk and uncertainty; target-oriented communication; education; lessons-learned; dealing with fear and mistrust; communication strategies".

We are confident that your presentation would provide an overview of the topic, key areas of agreement and disagreement, and cutting edge aspects of this topic. We further hope that your presentation will stimulate discussion during your session. As we are asking you to provide one of the opening presentation with these specific goals, we are offering support for your travel and accommodation.

For further information on the conference, please feel free to contact me. In the event that you accept our invitation, please send us a tentative title of your presentation at your earliest convenience, a short (140 words) biosketch and a portrait photo along with your consent to use it for the announcement of the conference on the websites of EFSA and BfR.

I look forward to your response.
Best,
Judy

Subject: OPs and ESA

Dear Dr. Beck: I write at Justin Schwab's recommendation to follow-up on the letter I sent Administrator Pruitt in April about the OP Biological Evaluations and biop(s). Would it be possible for us to talk briefly this afternoon or later this week? Please let me know when would be convenient and I will call you at that time.

Thank you.

David Weinberg.

Good morning Nancy,

Thank you for your message. We are looking forward to coming in and speaking with you and your team today.

We would like to discuss the scope of the data and information to be submitted with our application; information that will be submitted post-approval; the timing of the application submission and EPA review; and the current status of the EPA and FDA processes, including the timing of the jurisdictional transfer.

We, of course, will be ready and willing to discuss any other aspects of the regulatory status of OX513A that you or staff may have.

Best,

Keith

Dr. Beck,

I just got off the phone with a bunch of folks from Syngenta. They want to be helpful on this issue and may have some data that you need. Would it be ok for me to link you and Tate, and everyone on this email, in a new introductory email? I wanted to get Syngenta's OK before doing so and they said that would be great.

I know you all are devoting a ton of resources to this and I want to make sure that the right folks are connected.

Thanks so much!

Scott

Subject: RE: Section 18

Scott,
Below is the latest. Long story short, we are currently working with state and Extension Service experts to explore and identify possible alternatives as we evaluate the request. We have had similar situations like this and have been able to work cooperatively to find alternative approaches in emergency situations. Our staff is meeting internally with extension experts and trying to schedule a meeting with the sugar beet states for next week.

Regarding the data needs, below is what I've learned. However, I would encourage you to keep in mind that the work noted above to identify possible alternative approaches with the states is what will likely be most helpful to your group because it does take time to run through the full risk evaluation process.

Summary:
North Dakota and Minnesota submitted to the agency emergency exemption requests for the subject uses in late March and early April, 2017, respectively, but chorothalonil has outstanding data requirements most of which concern the need for a subchronic inhalation study, which precludes the agency from being able to make the required aggregate risk safety finding.

More specifically, the Chlorothalonil Scoping Document of March, 2012, developed to support the opening of the docket for registration review, indicates that in our most recent risk assessment (2010),

- MOEs for short and intermediate-term occupational handler inhalation exposures exceed HED's LOC (MOE ≤1000). For mixing/loading liquids for aerial, chemigation, and groundboom applications, MOEs range from 42 to 180.

- MOEs for short-term residential handler exposure exceeded HED's LOC (MOE=1000). For mixing/loading/applying liquids with a brush or sprayer MOEs range from 52 to 220.

Because there is no inhalation study of appropriate length available to assess short- and intermediate-term exposures, HED relied upon an acute study (in which no NOAEL was achieved) to assess short- and intermediate-term exposure. Additional UFs were applied for both the lack of an NOAEL and the lack of a subchronic inhalation study.

In response to this risk assessment, the registrant withdrew the new use applications that triggered the need for this risk assessment.

In March 2013, after OMB review, we issued the Registration Review data call-in. Nearly 25 studies were identified is being needed to support the registration review. Most pertinent to this situation is the need for a 90-day subchronic inhalation study, but we identified a number of other missing studies across human exposure, animal tox, environmental fate, and ecological effects. Sipcam Agro, the registrant for the requested product under section 18, was a recipient of the DCI and a copy of the DCI has been posted in the registration review public docket since July 2013.

We have been working with the consortium of chlorothalonil registrants to build a record for an upcoming FIFRA SAP peer review meeting on the use of in vitro studies and CFD/MMAD models for deriving points of departure and uncertainty factors. This would be the first time that EPA derived a point of departure from an in vitro study. We are targeting late 2017 or early 2018 for that SAP meeting.

So as you can see this process takes time. Given all that and the need for the emergency use, as I noted above, we are reaching out to the states and to the land grant universities to explore other control options for this fungal pest that we might be able to make available under section 18. The point Rick was trying to make in his testimony is that the earlier engagement we have with the states on potential control tools, the less likely that we will find ourselves in a situation mere days before the use needs to occur of having to scramble to find an alternative. This is an approach that we use with IR-4 (Interregional Risk Project 4) ; they don't conduct research on chemicals where we don't think we'll be able to make the FFDCA safety finding. That way, their packages move rather quickly through the review process.

Please let me know if you have any questions.
Regards,
Nancy

Subject: RE: Section 18

Christian and Amy, it was nice meeting you!

I have listened to the hearing about 20 times now so that I could transcribe the Section 18 comments verbatim for our growers. I've pasted them below for you as well. When you are able, do you mind telling me what data is missing, if any? I've heard that it is the vapor data that is missing but have alternatively heard that it is the residue data that is missing. I want to make sure that our folks have or can provide all necessary data. I've also attached the relevant contacts for this issue.

Thanks so much again!

My transcript of Section 18 comments from today's hearing below:

Senator Stabenow:
"Thank you Mr. Chairman and thank you to both of our witnesses. Mr. Keigwin, I first want to thank you personally for your engagement with Michigan State University and our Michigan hop growers that created the gift that we just gave to the Chairman to facilitate Section 18 exemptions under FIFRA. Most recently I've heard from Michigan sugar beet growers about emergency use needs under Section 18 as well. What steps can be taken by growers, states, manufacturers and the EPA to make this Section 18 process more efficient so that growers facing unexpected risk can get needed crop insurance tools in a timely manner?"

Mr. Rick Keigwin, Acting Director, Office of Pesticide Programs, EPA
"Thank you, Senator, and I've had the great fortune of meeting with Michigan growers on a number of occasions. Your growers sponsor an annual tour to help educate EPA employees about Michigan agriculture and what farmers do to help grow our crops so thank you for that. In terms of Section 18s, we have a pretty solid record of completing our decision making for most Section 18 emergency exemptions in less than 50 days but there are times and I think this situation with the sugar beet ones, the growers, that came to your attention highlights the need for early engagement between EPA, the Michigan Department of Agriculture and the grower community and the land-grand universities. Knowing early on what tools a grower might need to address an emerging pest situation. It is hard when at the end of the process, or right when they need to apply the product, for EPA to say, 'wait, hold on, we might have a problem' so one process efficiency would probably be for us to have earlier engagement, maybe even before the state submits their Section 18 request to see if there might

be any issues with that particular chemical and to the extent to which there are we could work collaboratively with cooperative extension and with the state to maybe find some alternatives that we could move through the process more quickly to address the emerging pest management."

>> Tate,
>>
>> I wanted to give you a heads up that Senator Stabenow's Ag. Committee staff spoke with EPA career staff this afternoon. The EPA staff don't believe that they have any room on this issue and still believe there is a data gap. From what Stabenow's staff relayed to me, EPA staff characterized the Section 18 component as relatively straightforward under FIFRA but the Food Drug and Cosmetic Act (FDCA) requirements for residues and granting tolerances are very strict. Under Section 18, the cost benefit analysis can weigh the economic harm, etc. I asked them to triple check with EPA that they were looking at the data SipCam submitted on Friday and they said they would (attached).
>>
>> Also, they may bring this up at the Senate Agriculture hearing tomorrow with the Director of Pesticide Programs. We did not ask them to do this but I also don't think that I can ask them not to do it. I just wanted to give you a heads up so you all wouldn't be caught off guard. Tate,

I've looped Cassie back in and wanted to give you both an update. Dr. Mohamed Khan with NDSU had a conversation with Andrea Conrath at EPA (her contact information is below) this morning about the new data that was supplied by SipCam. Dr. Khan prepared the Section 18 applications that were requested by the ND and MN Departments of Agriculture. He also prepared the application that we expect the Michigan Department of Agriculture to file soon.

In his email to me he stated "I spoke to Andrea today at EPA. Unfortunately, she does not believe the new tolerance data submitted will help. Seems they are looking for some data for some other studies." I have been unable to determine what additional data they need and have asked Dr. Khan if that was relayed to him but have not yet heard back.

Dear Dr. Beck,

My name is Brett Korte and I am the Director of Professional Education at the Environmental Law Institute. I would like to invite you to participate as an expert panelist at an upcoming forum.

The ELI and George Washington University Milken Institute School of Public Health program, **"TSCA Reform - One Year Later,"** will take place on **Tuesday, June 27 from 9:00 am – 4:45 pm EDT** at George Washington University in Washington, DC. It will include both an in-person meeting and a nationally-webcast video stream. The program is a day-long conference that will explore current issues surrounding the implementation of the Frank R. Lautenberg Chemical Safety for the 21st Century Act. We hope to convene thought leaders of the legal and environmental communities, including elected officials, experienced practitioners, government officials, and NGO leaders. We anticipate the ensuing dialogue will be most valuable to participants and speakers alike.

We would be delighted if you would lend your expertise to session below. A conference agenda with a list of invited panelists is attached.

Session Title:	Guided Discussion: "Science Policy Issues"
Time:	1:30 pm – 3:00 pm

I would like to note that video from this event will be recorded and uploaded to ELI's website. There is also a possibility that we will transcribe portions of the event for publication in one of our journals. I would be seeking your permission for any of these uses.

Please let me know if you are interested in participating. If you have any questions as you decide, please don't hesitate to contact me. Thank you for your time and I hope to hear from you soon.

Sincerely,

Brett Korte

Hi Nancy,

We appreciate your efforts to re-open the comment period on the proposed EUP to release the OX513A in the FL Keys and in Harris County TX. We trust that many additional informative comment have been able to reach your team over this period and large disclosure was provide from the activities in the Cayman, that will have weight in your team's considerations.

As a follow up to prior emails, we would like to request a meeting with you and your science team to discuss this proposed EUP and our concerns and experience. Our team for this discussion is limited to Dr Jack Norris and I presently. For our schedules July 13 seem to fit best, but we have some flexibility, so please let us know if there are time that fit with your schedule in the mid July weeks. We hope that provides sufficient time for your team to investigate the responses received during the comment period and that our meeting will be more robust with that content.

We look forward to meeting with you and your team. Please let us know if the 13th is good for you and your tema and if not what other dates you could suggest.

Sincerely,

EPA Pesticide Program Updates

From EPA's Office of Pesticide Programs

www.epa.gov/pesticides

May 10, 2018

In This Update:

EPA Reopens Public Comment Period on Application for Experimental Use Permit to Combat Mosquitoes

In response to requests from stakeholders, EPA is reopening the public comment period regarding an application from Oxitec Ltd. for an experimental use permit (EUP) for genetically engineered OX513A*Aedes aegypti* mosquitoes.

EPA first announced the availability of Oxitec's application for an experimental use permit on March 9, 2018, in the Federal Register. Following review of the application, data and public comments, EPA will decide whether to issue or deny the EUP request and, if issued, the conditions under which the study is to be conducted.

Aedes aegypti mosquitoes can spread several diseases of significant human health concern, including the Zika virus. Oxitec's genetically engineered *Aedes aegypti* mosquitoes are designed to suppress wild *Aedes aegypti* populations. Genetically engineered male mosquitoes are released into the environment to mate with wild female mosquitoes, and the resulting offspring do not survive.

Oxitec's proposed experimental program is designed to take place over 24 months in Harris County, Texas, and Monroe County, Florida. For additional details view the entire proposal.

Public comments about this proposed EUP should be submitted to www.regulations.gov under docket # EPA-HQ-OPP-2017-0756 on or before June 7, 2018.

EPA distributes its Pesticide Program Updates to external stakeholders and citizens who have expressed an interest in the agency's pesticide program activities and decisions. This update service is part of EPA's continuing effort to improve public access to federal pesticide information.

For general questions about pesticides and pesticide poisoning prevention, contact the National Pesticide Information Center (NPIC), by email at npic@ace.orst.edu or, by visiting http://npic.orst.edu.

For information about ongoing activities in the Office of Pesticide Programs, visit our homepage at: https://www.epa.gov/pesticides.

Subject: Re: Oxitec

HI Nancy,

Thank you so much for reaching out to assure we were informed. We realize the standard notification process is via the the FR, but does the EPA ever reach out to local media with either a direct Press Release, or courtesy email of some sort direct communication to media in the community affected, to let them know that there is a subject of interest for their citizens. Both Monroe County, FL and Harris County, TX has citizens who need to be aware and the FR is not something that even the press follows well. We feel the EPA provides a larger and more readily published voice that would reach deeper into these communities with standing on this issue.

As the EPA science team begins the investigation. We would welcome a chance in the next 45 to 60 days to discuss the evaluation of the OX513A EUP application and the safety concerns we feel have not been address in prior reviews.

Our groups within the Coalition are very focused on the scientific evaluation of this technology and as you may be aware we have embraced other Sterile Insect Techniques, that provide a clearer understanding of risk and benefits than the historical Oxitec OX513A field trial applications have in the past. We have been working on this issue for over 7 years, so the knowledge within our work is deep

and some of the discoveries that our member have made, we believe will help the comprehensive outcome of the EPA's considerations surrounding the Oxitec EUP Application.

Given the new comment period will close in mid June, perhaps a 3rd week of June, or second week of July meeting (trying avoiding any holiday conflicts) will provide an opportunity for your team to meet a few of our key contributors and discuss our concerns. We are hopeful that this will include representatives from Harris County as well, but the awareness in that community is very low, hence our questions about the public relations/ Press Release outreach.

Thanks again for your direct outreach initiative to us and you and your team's commitment to service. We look forward to an opportunity to meet in person.

Sincerely,

Subject: Oxitec

Dear Nancy,

We realize you are the team lead on the OX513A Oxitec Genetically Modified Mosquito (GMM) evaluation. While there are many comments being worked on, there is also not an ample amount of time for people to respond with the quality of comments needed to support the investigative level we feel this technology and this particular company should be viewed with.

The most recent proposal expands venues and seems to have changes in both claims and process for testing these mosquitoes. While it is not appropriate to go into deep discussions here, we do feel it appropriate that the EPA should afford ample time for groups like ours to work with our members and assemble the scientific input that will help the EPA perform with the most current observations, data and concerns. We humbly ask that the comment period be expanded to a minimum of 60 days in total.

Oxitec has had years to perfect their story, ever evolving as it may be. We are the affected citizens and have witnessed the difficulty of combating the resources es of a $4B company with just your passions, communication network and intellect. We do however represent the best of what our nation is about, the people asking relevant and challenging questions, most of which Oxitec has not answered over the 6 plus years that we have been engaging them.

Please afford the public additional time to present a clearer picture of Oxitec, along with the concerns and questions we should all be asking.

My sincere thanks,

Barry Wray

I just determined that my previous message to you may have never been delivered as EPA may not yet have sent up your account and my message may have gone into limbo. Please allow me to introduce myself and if possible to meet with you to discuss my Federal observations of the failings of EPA management. Based i believe in part on non-trained policy staff (lawyers, economists, policy experts etc.) consistently ignoring or finessing science to meet their perceived goals and objectives. Often programs are actually successful in their early years but do not know how to take credit for success and move on to new higher return projects. They continue to seek resources to feed the search for one more significant digit. When it is found no one knew what to do with it --- bury it, and ask for more money was the theme song I often heard. The concept of ROI was ignored even by Jim Jones and economist and my mention of such put me in a bad position over time.

I would be honored to meet with you at anytime to discuss an ex-public servants views of what went wrong and remained wrong at EPA for far too long.

If you have received and reviewed the below (likely lost message) and deemed such a meeting unnecessary I honestly think you are missing out on a rare set of insights.

Sincerely
Mark W Townsend
MS MBA and Cancer Researcher

When Charlie Auer quickly departed OPPTS and Wendy Cleland Hamnett and Jim Jones moved up I realized Pesticides and Toxics were going to be poorly managed. As a rather outspoken manager scientist at decision meetings asking questions like "what is the return on the investment" or "why are we wasting money reviewing again the same chemicals" I knew my days were likely numbered and I was correct.

However, with my MBA in finance and public policy and years of industry experience testing carcinogens I was a highly effective mid-level manager in your TSCA program. And i have more than 40 years as a fed and am a tad bored being retired. And I am known by Steve Russel and others at ACC as i represented the Challenge Program and the OECD SIAM review process and often worked with ACC and API and chemical industry representatives. I always viewed myself as a practical decision maker with my decisions based on facts and not a fear of chemicals. I always loved the TV industry "PSA" --- "Without chemicals, life itself is impossible!"

Why am i writing to you? Oddly, enough i would like to return to EPA for several years to help you and others clean house within OCSPP.

A. Why does EPA have some many programs reviewing the same chemicals?
B. Why does EPA insist on reviewing the same chemicals over and over again?
C. Why did Congress insist on using the 83 black listed already reviewed chemicals as a priority?
D. Asbestos and Carbon Tetrachloride do not need more review or testing --- Why did they get prioritized?
E. I know where the skeletons reside and would like to help YOU dig them up, defuse them, and prioritize REAL work.
F. Why does OPPT TSCA have a larger budget since the work products should be simplified not expanded. The program needs to be MANAGED not continue down established risk assessment process tracks.
G. Why would anything put SAFETY in an organizational title when there really are no "safe chemicals" only relatively safe use.
OCSPP name is so inappropriate. Green chemistry does in fact work for me --- relative risk also makes sense.

I could easily go on with this list, especially in reference to TRI, HAPPS, Chem View, PMNs, Existing chemicals, Test rules, OECD/ECHA REACH, and the consolidation or removal of redundant chemical review units at EPA.

I have attached a short and focused resume and would love to come to head quarters to discuss a role for me in helping you aggressively clean up redundant and wasteful EPA programs. My vision is to return for one to two years on your staff and to help you direct ongoing work to be targeted and more effective and to kill redundancies in work and web page spam (OH! Chem View is web page SPAM).

I retired as a GS 15/10 Biologist. I can help you resolve problems

Subject: Request to meet with members of the plastics industry on July 25
Attachments: EHS+ Cmte 2017 Speaker Invitation - Morris.pdf

Dear Mr. Morris:

The work of the EPA's Office of Pollution Prevention and Toxics – particularly with the amended Toxic Substances Control Act, pollution prevention initiatives, and the Toxics Release Inventory Program – is of great interest to members of the Plastics Industry Association (PLASTICS), formerly SPI.

Our EHS+ Committee would very much appreciate the opportunity to meet with you and members of your staff in conjunction with its next meeting on July 25. Please find attached a letter containing this request.

Thank you in advance for your consideration, and please do not hesitate to contact me with any questions.

Kind regards,
Marie

Attachments: TSCA Final Clarification on Activated Phosphors Fed Reg 2-24-2010.pdf; 00180384.pdf; 1367_001.pdf

Patrick,

Thank you for visiting with me this afternoon. I greatly appreciate your time and enjoyed seeing you again!

Nancy, thank you for planning to visit. I appreciate how busy you both are.

Patrick, I spoke with counsel for the Region 2 entity we discussed (Debra Rosen, Archer & Greiner, P.C.). Debra confirmed EPA Region 2 has verbally communicated its decision to waive penalties on multiple occasions, but has not rendered that decision in writing. Debra is forwarding to you directly (or perhaps to me) the contact information of the EPA Region 2 counsel with whom you may wish to confirm that decision. I shared your contact information with Debra this afternoon.

Without getting into the details, a quick summary for Nancy's benefit is as follows:

- The Statutory Mixture exemption from TSCA Section 5 notification has been the source of confusion for years.
- We have shared with EPA on several occasions (OGC and OPPT) a binder of illustrations of this lack of regulatory clarity.
- In the more recent past, EPA actually initiated a process (it was assigned a RIN and published in the *Federal Register*) to revise the 1995 EPA guidance on statutory mixtures, but the effort was abandoned about 5 years ago for no stated reason.
- EPA's interpretation of TSCA nomenclature has evolved over the years. The *Dover Chemical* and related cases illustrate the mischief that arises when EPA uses TSCA Section 5 to address TSCA Section 6 issues.
- EPA has used its enforcement authority in a case very similar to ours in EPA Region 2, the company there being a U.S. subsidiary of a UK entity.
- Before EPA filed a show cause and NOV against our client in Region 5, our client, the Region 2 entity, and three other companies joined forces to seek EPA's assistance in clarifying the application of the statutory mixture exemption to certain mixed metal oxides (MMO) like what our client ,the Region 2 entity, and the other members of the coalition produce and to work with EPA to update the guidance and ensure unsuspecting companies are not the subject of random enforcement actions based on new interpretations of old exemptions and EPA guidance.
- We met with OGC months before EPA Region 5 inspected our client's plant, and long before receiving the NOV.
- As noted, EPA Region 2 has waived all penalties and has expressed to the Region 2 entity its desire that it submit a PMN and get on with its life. The notification was made last year.
- We believe these mixtures fall squarely within the scope of the statutory mixture exemption and no notification is required. There are other entities, likely many, making and importing these MMOs. For this reason, we have urged OPPT to work with us to clarify the guidance and allow regulated entities an opportunity to come into compliance with any new interpretation that suggests notification is required, and to do so by a time certain (*i.e.*, submit an PMN within a defined period of time) to avoid the threat of enforcement consequence
- EPA has done exactly this on at least three occasions (activated phosphors, isotopes, and carbon nanotubes—attached are the notices/EPA statement for your easy reference).

- We are frustrated by Region 5's seeming disinterest in solving problems efficiently, in pursing an enforcement action despite the state of play on these complicated TSCA nomenclature issues, by burdening our client with requiring that it respond to extensive demands as a result of the show cause order and NOV when it was fully aware of our client's simultaneous preparation of a consolidated PMN which it initiated late last year due to commercial imperatives, and with its refusal to even discuss waiving penalties as EPA Region 2 has done despite the fact it has had numerous calls and meeting with EPA Region 2 and Headquarters. Our efforts to elicit a consistent approach to these issues from EPA have failed despite our vigorous attempts to harmonize these approaches.
- We appreciate your view that the local entity should first and foremost address these matters, while at the same time ensuring that Headquarters do what it can to avert inconsistent approaches when it has a clear line of site on such inconsistencies. We have redoubled our efforts to ensure Region 5 knows the notification was submitted (it was clearly copied on the letter I shared with you and Joel has called several times). If we obtain no response or an unfavorable one, we will circle back.

Thanks again. I hope you both enjoy the 4th of July holiday.

Lynn

Seth,
I have brought my lunch every day since May 1. However there was 1 day where I did make it to the plaza to go to a vendor at the farmers market. In total, excluding trips to OPP in crystal city, I have made it out of the building during the day exactly twice in six weeks. There are just too many meetings. Lunch is just not workable before June 22nd, but I'm hoping after that things will calm down and perhaps we can get something on the calendar. Happy to do a call tomorrow if that helps.

Hi, Nancy. Great to see that the TSCA Rulemaking package has gone to OMB. Thought I'd check in to see whether you might be able to squeeze in lunch tomorrow. Or Monday. If not, I fully understand. Lots going on.

I do hope all is well and look forward to catching up sometime soon.

Subject: FW: P&G/ Clorox/ RB Proposal To Exempt FDA Approved Flavoring Ingredients as approved Fragrance Ingredients for Antimicrobial Food Contact Pesticides---EO 13777
Attachments: EPA Docket EPA-HQ-OA-2017-0190.pdf; FSF Position Paper 5-15-2017 EO 13777.pdf

Flag: Follow up

Nancy, how is week 3 !!??

I'm not sure if we have spoken of my Innovation Reform Group , comprised of Clorox, P&G and Reckitt Benckiser ? I serve as the consultant/ executive director; we have worked together since 2001 on process and policy reform issues collaboratively with OPP that improve certainty, predictability and timeliness of OPP decisions. It has been one of my most satisfying professional experiences.

The attached proposal was submitted yesterday in response to EO 13777. We are putting forward the idea of a blanket exemption from tolerance requirements for about 1000 ingredients reviewed and approved by FDA. These are flavoring ingredients at FDA—approved as direct food additives. The same materials are utilized in the fragrance industry.

Typically, finished fragrances are about 0.25-0.5% of an antimicrobial product, and composed of 20-100 fragrance ingredients. Residential and commercial customers demand fragranced products for use in kitchen and other food use settings.

Recent changes in OPP policy will significantly impact the availability of fragrances for food surface contact use. Previously, OPP recognized that a Potable Water Rinse (PWR) when used following use of a sanitizer in the kitchen, removed all residue ---thereby negating the need for a tolerance under FIFRA or approval as a food use inert. That policy has changed –now worst case residues are assumed , meaning that thousands of inert ingredients (surfactants, chelators, fragrances) will now require costly tolerance petitions to be filed with OPP.

These would be reviewed by the already under resourced Inerts Branch. With about 1500 fragrance ingredients now used in FIFRA approved products , the PRIA tolerance fees ($27,000/ petition) and EPA resource demands will be overwhelming. More importantly, about 1000 of the 1500 ingredients have been thoroughly vetted by FDA's expert panels and are routinely and safely consumed as direct food additives now.

Further review by EPA of these same materials used at de minims concentrations would be duplicative and a waste of Federal Government resources –and the regulatory burden on industry would be enormous. Finally, the opportunity for risk reduction or public health protection simply isn't present –and the tolerance review process will take years.

OGC may argue that EPA's FQPA obligations are different than FDA's FFDCA obligations, but that is not at all clear –and should not be a determinative factor.

I would like your thoughts on how we might work with you and the OPP affected staff on this to move the idea forward. I realize that you must be drinking from a fire hose right now but wanted to plant this seed while it was fresh in my mind.

Hope you are enjoying the new challenge –and that we can see each other soon, Pat

Hello Wendy and Nancy,

We truly appreciate your meeting with us earlier today, especially on the heels of the July 4th holiday. There is much commercial pressure on both of our clients to achieve resolution here. Do you have a sense of when OPPT will be able to respond to our belief that a non-5(e) SNUR is the most appropriate Agency response here?

Thanks again.

Subject: End of second week

TSCA lists of 10 and 83 should be being recognized as problems by now and you are likely being snowed by blue sky responses. RAD like ORD does not seem to realize the difference between a research organization and a regulatory shop. That drift has grown over time and while I think highly of green chemistry I think the success of that logical approach has slanted other managers to attempt to compete in seeking chemical safety. a wonderful objective but not a mandate of TSCA and in reality a never ending task as NOTHING is safe.

Just guessing as i have been through political changes and many reorganizations. You are going to be fed so much blue sky pulled out of folders from the past. You need people with a jaundiced eye or two. sorry but lol

Subject: asbestos

My mother died from mesothelioma in 1973. Thanks to the EPA asbestos was recognized as a health hazard. I can only assume you have never had someone in your life die from chemical exposure.
My sister, brother and I have lived most of our lives without a mother, my brother was 12 when she died. Many young people have not had to endure this hardship thanks to the decision of the EPA many years ago. I need to hear back from you how your new standards will benefit young people who are at risk now of drinking water that they will have no idea it is contaminated. I cried this morning. I would have loved to have had a mother.
I teach Special Education at high school in Seattle. Today I will look at some of my students and know their future is at risk. My job is not easy, but I protect children, you have chosen to at best ignore their health.

Hi Derrick,

Thanks for the quick response. 2:00PM on July 13th is great for us. Dr. Jack Norris and I will be attending. Our discussion interests include the points that we both we have submitted during the comment periods and will likely include other comment submissions both from other response, such as Oxitec/Intrexon and other substantive comments that highlight concerns, risks, performance and standards applicable to the OX513A.

Our goals remain focused on assuring human and ecological health and safety, and the science of assessing this technology within the background of outstanding societal needs that have affect on risk, versus reward, decision making.

Please provide us specifics of where we will be meeting and any other information that may required for credentialing prior to our visit.

We are looking forward to meeting with the EPA evaluation team.

Sincerely,

Barry Wray

On May 11, 2018, at 8:43 AM, Keller, Kaitlin <keller.kaitlin@epa.gov> wrote:

Good Morning Barry,

We do conduct various levels of outreach beyond the Federal Register process depending on the issue, but the best way to ensure you receive updates on pesticide-related issues is to sign up for our email list, which is at the bottom of EPA's pesticides homepage. Below is the update that went out this week on this issue, also now available on our web here. Please share with your stakeholders as appropriate.

Nancy would be happy to meet with you and to hear your concerns. Derick Bolen (cc'ed) can work with you to find a date that works for you and our office. A quick note in advance of scheduling, the timeframe you suggested might present a bit of a challenge--our office has multiple key statutory deadlines the 3rd week of June, and Nancy will be on travel the last week of June—but Derrick always finds a way to make it work. Thank you in advance for your patience and flexibility. We also still encourage you to submit any substantive comments to the docket prior to comment period closing on June 7, 2018.

Best Regards,
Kaitlin

EPA Pesticide Program Updates

From EPA's Office of Pesticide Programs

www.epa.gov/pesticides

May 10, 2018

In This Update:

EPA Reopens Public Comment Period on Application for Experimental Use Permit to Combat Mosquitoes

In response to requests from stakeholders, EPA is reopening the public comment period regarding an application from Oxitec Ltd. for an experimental use permit (EUP) for genetically engineered OX513A*Aedes aegypti* mosquitoes.

EPA first announced the availability of Oxitec's application for an experimental use permit on March 9 2018, in the Federal Register. Following review of the application, data and public comments, EPA wil decide whether to issue or deny the EUP request and, if issued, the conditions under which the study to be conducted.

Aedes aegypti mosquitoes can spread several diseases of significant human health concern, includin the Zika virus. Oxitec's genetically engineered *Aedes aegypti* mosquitoes are designed to suppress wild *Aedes aegypti* populations. Genetically engineered male mosquitoes are released into the environment to mate with wild female mosquitoes, and the resulting offspring do not survive.

Oxitec's proposed experimental program is designed to take place over 24 months in Harris County, Texas, and Monroe County, Florida. For additional details view the entire proposal.

Public comments about this proposed EUP should be submitted to www.regulations.gov under docket # EPA-HQ-OPP-2017-0756 on or before June 7, 2018.

EPA distributes its Pesticide Program Updates to external stakeholders and citizens who have expressed an interest in the agency's pesticide program activities and decisions. This update service is part of EPA's continuing effort to improve public acce federal pesticide information.

For general questions about pesticides and pesticide poisoning prevention, contact the National Pesticide Information Center (NPIC), by email at npic@ace.orst.edu or, by visiting http://npic.orst.edu.

For information about ongoing activities in the Office of Pesticide Programs, visit our homepage at: https://www.epa.gov/pesticid

Subject: Re: Oxitec

HI Nancy,

Thank you so much for reaching out to assure we were informed. We realize the standard notification process is via the the FR, but does the

EPA ever reach out to local media with either a direct Press Release, or courtesy email of some sort direct communication to media in the community affected, to let them know that there is a subject of interest for their citizens. Both Monroe County, FL and Harris County, TX has citizens who need to be aware and the FR is not something that even the press follows well. We feel the EPA provides a larger and more readily published voice that would reach deeper into these communities with standing on this issue.

As the EPA science team begins the investigation. We would welcome a chance in the next 45 to 60 days to discuss the evaluation of the OX513A EUP application and the safety concerns we feel have not been address in prior reviews.

Our groups within the Coalition are very focused on the scientific evaluation of this technology and as you may be aware we have embraced other Sterile Insect Techniques, that provide a clearer understanding of risk and benefits than the historical Oxitec OX513A field trial applications have in the past. We have been working on this issue for over 7 years, so the knowledge within our work is deep and some of the discoveries that our member have made, we believe will help the comprehensive outcome of the EPA's considerations surrounding the Oxitec EUP Application.

Given the new comment period will close in mid June, perhaps a 3rd week of June, or second week of July meeting (trying avoiding any holiday conflicts) will provide an opportunity for your team to meet a few of our key contributors and discuss our concerns. We are hopeful that this will include representatives from Harris County as well, but the awareness in that community is very low, hence our questions about the public relations/ Press Release outreach.

Thanks again for your direct outreach initiative to us and you and your team's commitment to service. We look forward to an opportunity to meet in person.

Sincerely,

Barry Wray

Subject: Oxitec

Dear Nancy,

We realize you are the team lead on the OX513A Oxitec Genetically Modified Mosquito (GMM) evaluation. While there are many comments being worked on, there is also not an ample amount of time for people to respond with the quality of comments needed to support the investigative level we feel this technology and this particular company should be viewed with.

The most recent proposal expands venues and seems to have changes in both claims and process for testing these mosquitoes. While it is not appropriate to go into deep discussions here, we do feel it appropriate that the EPA should afford ample time for groups like ours to work with our members and assemble the scientific input that will help the EPA perform with the most current observations, data and concerns. We humbly ask that the comment period be expanded to a minimum of 60 days in total.

Oxitec has had years to perfect their story, ever evolving as it may be. We are the affected citizens and have witnessed the difficulty of combating the resources es of a $4B company with just your passions, communication network and intellect. We do however

represent the best of what our nation is about, the people asking relevant and challenging questions, most of which Oxitec has not answered over the 6 plus years that we have been engaging them.

Please afford the public additional time to present a clearer picture of Oxitec, along with the concerns and questions we should all be asking.

My sincere thanks,

Barry Wray

Dear Nancy,
I cannot express enough of my appreciation as I understand that you always make time out of your busy schedule to make these arrangements.

Justin told us how much you treat this invitation. We heard representatives from your office will be attending both the meetings held by the Toxic and Chemical Substances Bureau this year. He said that this is rare yet delightful news.

I have conveyed your enthusiasm to the Director General, Hsieh. We are both delighted and would just like to say thank you so much.
A few of my colleagues, myself included, will be having a conference call with U.S. EPA next Wednesday.
We're all very much looking forward to learning new things from you and your colleagues at this year's conference.

Best Regards,

Subject: Request for advice on a seminar

Hi Nancy:
After the previous email, we are planning to arrange the event about U.S.-Taiwan cooperation.
I am writing to request for advice on a seminar/conference that our company and the Taiwan EPA are thinking of hosting.

The conference title will be **U.S.-Taiwan Pesticides Seminar and Conference**, which will be held in **Taipei, Taiwan** during **mid-September, 2018** (date yet to be confirmed). I've also attached a draft document for your convenience to show you in detail the topic and discussion questions that we have in mind. The Council of Agriculture, Ministry of Health and Welfare, and other regional offices in Taiwan are also interested to come join the discussion and hearing.

My company is the consulting team to help gathering a planning information.
We are thinking to invite two representatives from the U.S. EPA to come and share experiences regarding the EPA's pesticides policies and management. Do you have any recommendations of whom we should contact and invite to come speak? Also, do you also have any other suggestions on what other topics is worth discussing for this conference?

After your recommendations, I will organize the ideas from both Taiwan side and your precious ones. And then, Taiwan EPA will send an offical invitation to **U.S. EPA.**

Thank you for taking the time to read this, we would appreciate your any feedback and recommendations

Best Regards,

Dear Nancy,
It is my great pleasure to receive your mail.
From your very warm and friendly words, I knew that you are such a nice person.
I was I assigned by the Director of TCSB, Director Hsieh, to join this meeting.
Another objective is to have more communication with US EPA.
We are very sorry that we just passed the Chinese New Year,
and we didn't reply your invitation promptly.
And, it is too short time to arrange another representative from TCSB.
We really appreciate your recommendation to join this training,
I got so much information these couple days.
Now, we are planning our visiting GlobalChem 2019.
During 2018, we are also thinking the other events we can have more cooperation.
Of course, we are keen to learn more from US EPA.
The person I add to c.c. this mail is my supervisor in TCSB, Chief Shu.
He is the Chief of Evaluation Management Division of TCSB.
We will have more talk and more learning in the future.
If you have any other recommendation that this event or meeting,
that will be welcomed and great appreciated.
Thank you very much for your kind help.
Please stay in touch.

Sincerely yours,

Cherish
