Radiological & Occupational Health
107 North Church Street
Mulberry, Florida 33860
April 29, 1977

[redacted] 33803

Dear [redacted]

The gamma survey of the above property shows that the radiation levels at this site average below the 10 uR/hr level designated by the U. S. EPA as the limiting factor for homes under construction on reclaimed phosphate land. As a means of comparison, the radiation readings at this homesite are slightly above and on some occasion equal to the average radiation readings of homes built on remined land.

Sincerely yours,

Keith B. Moore
Industrial Hygienist I

KBM/bb

Dear [redacted]

The gamma survey done inside and outside your home on 1/30/86 showed an average level of 4 uR/hr with the highest level found being 5uR/hr. The average background level of gamma radiation for Polk County is accepted as being 6 uR/hr.

If we can be of further assistance or if you have any questions concerning this information, please call.

Sincerely,

J. Wesley Nall

Dear Sir:

We would like to request a test for indoor radiation levels in our home.

We give permission for entrance on our land.

Thank you.

Sincerely,
