MEMORANDUM

RECEIVED
2003 DEC 17 AM 7:44
AR/OK/TX BRANCH

Date: December 12, 2003

Subject: Contract Laboratory Program Data Review

From: Marvelyn Humphrey, ESAT Regional PO, 6MD-HE

To: V. Malott, SF-AP

Site : JONES ROAD GROUND WATER PLUME

Case#: 32292

SDG# : F0Q07

The EPA Region 6 Houston Branch ESAT data review team has completed a review of the submitted Contract Laboratory Program (CLP) data package for the referenced site. The samples analyzed and reviewed are detailed in the attached Regional data review report.

Please note, the quantitation limit for vinyl chloride is qualified as unusable in sample F0QD3 because of a zero percent DMC recovery.

If you have any questions regarding the data review report, please call me at (281) 983-2140.

MEMORANDUM

DATE: December 10, 2003

TO: Marvelyn Humphrey, ESAT PO, Region 6

FROM: Tom C.H. Chiang, ESAT Program Manager, Region 6

SUBJECT: CLP Data Review

REF: TDF # 6-03-321A ESAT # O-0392
ESAT Contract No. 68-W-01-030

Attached is the data review summary for Case #32292
SDG #F0Q07
Site Jones Road Ground Water Plume

COMMENTS:

I. CONTRACTUAL ASSESSMENT OF THE DATA PACKAGE

CCS and hardcopy reviews found the data package contractually compliant.

II. TECHNICAL USABILITY ASSESSMENT OF THE DATA PACKAGE

The total number of sample results reviewed was 1,000 for this data package. Some results were qualified for technical problems, and the significant problem is addressed below.

DMC recoveries were below the QC limits for samples F0QD3, F0QE3, F0QE5, and F0Q07, including a 0% DMC recovery that caused the vinyl chloride QL to be unusable for sample F0QD3.

III. OTHER AREA OF CONCERN

The airbill numbers were not recorded on the OTR/COC Records.

O = Data had no problems.
M = Data qualified due to major or minor problems.
Z = Data unacceptable.
NA = Not applicable.

ACTION ITEMS:

AREA OF CONCERN: Some DMC recoveries were below the QC limits for samples F0QD3, F0QE3, F0QE5, and F0Q07, including a 0% DMC recovery that caused the vinyl chloride QL to be unusable for sample F0QD3. The results were inconsistent for methyl tert-butyl ether, cis-1,2-dichloroethene, trichloroethene, and tetrachloroethene for some field duplicate pairs.

NOTABLE PERFORMANCE:

COMMENTS/CLARIFICATIONS
REGION 6 CLP QA REVIEW

CASE 32292 **SDG** F0Q07 **SITE** Jones Road Ground Water Plume **LAB** A4

The following is a summary of sample qualifiers used by Region 6 in reporting this CLP data:

No.	Acceptable	Provisional	Unacceptable
VOA	14	6	

COMMENTS: This SDG, contracted under Low Concentration SOW OLC03.2, consisted of 20 water samples for VOA analysis. The sampler designated sample F0Q07 as the laboratory QC sample, samples F0QC7 and F0QE3 as trip blanks, and samples F0QD0 and F0QE0 as field blanks. Field blank samples F0QD9 and F0QE1 in SDG F0Q72 and trip blank sample F0QC8 and field blank samples F0QD1 and F0QD2 in SDG F0PY3 were also associated with the samples in this SDG. The RSCC verified that samples F0QD3, F0QD4, F0QD5, F0QD6, F0QD7, F0QE5, F0QE6, and F0QE7 were field duplicates of samples F0PZ9 (SDG F0PT9), F0Q78 (SDG F0PY3), F0PY3 (SDG F0PY3), F0Q25 (SDG F0PY3), F0Q09 (SDG F0PY3), F0Q65 (SDG F0PW3), F0PW4 (SDG F0PW3), and F0Q47 (SDG F0PW3), respectively. The data package arrived on time for the seven-day contractual turnaround requirement and was contractually acceptable.

The TDF requested that this package be reviewed at level 2 review with the exception of the data for the target compounds of concern which were reviewed using level 3 (full) review. The target compounds of concern were vinyl chloride, cis-1,2-dichloroethene, trichloroethene, and tetrachloroethene with desired detection limits at the SOW CRQL's. All samples met the desired detection limit criteria. Samples F0QD3, F0QD5, F0QD6, F0QE5, F0QE6, F0Q16, and F0Q17 contained cis-1,2-dichloroethene, trichloroethene, and/or tetrachloroethene at concentrations above the desired detection limits. The only target compound not designated as a compound of concern but detected at a concentration above the CRQL was methyl tert-butyl ether in sample F0QD6.

The vinyl chloride result was unusable for sample F0QD3 because of a 0% DMC recovery. Some other results were also provisional for six samples because of problems with DMC performance and/or field duplicate precision. The technical usability of all reported results is indicated by ESAT's final data qualifiers in the Data Summary Table (DST). An Evidence Audit was conducted for the Complete Sample Delivery Group File (CSF), and the audit results were reported on the Evidence Inventory Checklist.

NOTE: THE FOLLOWING REVIEW NARRATIVE ADDRESSES BOTH CONTRACTUAL ISSUES (BASED ON THE STATEMENT OF WORK) AND TECHNICAL ISSUES (BASED ON THE NATIONAL FUNCTIONAL GUIDELINES). THE ASSESSMENT MADE FOR EACH QC PARAMETER IS SOLELY BASED ON THE TECHNICAL DATA

USABILITY, WHICH MAY NOT NECESSARILY BE AFFECTED BY CONTRACTUAL PROBLEMS. THE ASSESSMENTS ARE DEFINED BELOW.

Acceptable = No results were qualified for any problem associated with this QC parameter.
Provisional = Some results were qualified because of problems associated with this QC parameter.
Unusable = All results are unusable because of major problems associated with this QC parameter.

1. Holding Times: Acceptable. The samples were analyzed within the contractual and technical holding time limits, and pH values indicated that the samples were preserved with acid.

NOTE: Polymerization of vinyl chloride and styrene is likely to occur in acid-preserved samples and could cause low biased results for these analytes.

2. Tuning/Performance: Acceptable. BFB analyses met GC/MS tuning criteria.

3. Calibrations: Acceptable. Target analytes met contractual calibration criteria. Several analytes failed the technical %RSD and/or %D calibration criteria but were not detected in the associated samples, so qualification of these analyte results was not required per Region 6 guidelines.

4. Blanks: Acceptable. The method and storage blanks met the contractual QC guidelines and were free from contamination.

Trip and Field Blanks: Field blank sample F0QD0 contained an acetone concentration below the CRQL. Because of this field contamination, the acetone results below the CRQL for samples F0QD3 and F0Q18 should be considered undetected and were flagged "U" at the CRQL on the DST. The other trip and field blanks associated with the samples in this SDG were free from contamination.

5. Deuterated Monitoring Compounds (DMC's)/Surrogates: Provisional. DMC performance met the contractual QC criteria for every analysis. Although contractually acceptable, up to three DMC's had recoveries outside of the QC limits for every analysis except the laboratory blanks and MSD sample. Because of a 0% recovery for VDMC1, the QL was unusable for vinyl chloride in sample F0QD3. Because DMC recoveries were below the QC limits,

the reviewer qualified results for the following analytes as estimated and biased low:

analytes associated with VDMC9 for samples F0QD3 and F0QE5;

analytes associated with VDMC10 for samples F0Q07, F0QD3, F0QE3, and F0QE5; and

analytes associated with VDMC13 for sample F0Q07.

The DMC recoveries below the QC limits for the MS sample were not associated with the spike analytes. The other outlying DMC recoveries were marginally outside the QC limits or were above the QC limits with undetected sample results for the associated analytes. Therefore, no other result qualification was necessary.

6. Matrix Spike/Matrix Spike Duplicate/Laboratory Control Sample (MS/MSD/LCS): Acceptable. The MS/MSD results met the QC criteria for precision and %recovery.

7. Other QC:

Field Duplicates: Provisional. The reviewer qualified as estimated the cis-1,2-dichloroethene and tetrachloroethene results for samples F0QD5 and F0QE5, the methyl tert-butyl ether result for sample F0QD6, and the trichloroethene result for sample F0QE5 because of inconsistent field duplicate results. Field duplicate results were consistent for all other analytes.

8. Internal Standards (IS): Acceptable. IS performance was acceptable for all analyses.

9. Compound Identity (ID)/Quantitation: Acceptable. Samples F0QD3, F0QD5, F0QD6, F0QE5, F0QE6, F0Q16, and F0Q17 contained methyl tert-butyl ether, cis-1,2-dichloroethene, trichloroethene, and/or tetrachloroethene at concentrations above the CRQL's. All reported sample results met compound identification criteria.

10. Performance/Completeness: Acceptable. The data package was complete. The laboratory was contacted concerning some reporting errors (see FAX Record Log). The laboratory response to the Regional request is not expected to affect the DST.

11. Overall Assessment: Fourteen samples were acceptable. Sample F0QD3 was provisional because the vinyl chloride QL was

unusable and some other results were qualified as estimated for poor to extremely poor (0% recovery) DMC performance. Samples F0QD5, F0QD6, F0QE3, F0QE5, and F0Q07 were provisional because some results were qualified for problems with DMC performance and/or field duplicate precision.

HEADER DEFINITIONS FOR ORGANIC EXCEL DST

CASE: Case Number

SDG: SDG Number

EPASAMP: EPA Sample Number

LABID: Laboratory File/Sample ID

MATRIX: Sample Matrix

ANDATE: Sample Analysis Date

ANTIME: Sample Analysis Time

CASNUM: Compound CAS Number

ANALYTE: Compound Name

CONC: Compound Concentration

LABQUAL: Laboratory Qualifier

UNITS: Concentration Units

ADJCRQL: Adjusted Contract Required Quantitation Limit Value

CRQLLBL: Contract Required Quantitation Limit Label

SMPDATE: Sampling Date

VALDQAL: Region 6 Organic Data Validation Qualifier (see Organic Data Qualifier Definitions on the next page)

STATLOC: Station Location

Disclaimer: **ESAT verified the accuracy of the information reported in the Excel DST only for the following data fields: CASE, SDG, EPASAMP, MATRIX, ANALYTE, CONC, UNITS, and VALDQAL. The data qualifiers in the VALDQAL column indicate the technical usability of the reported results.**

ORGANIC DATA QUALIFIER DEFINITIONS

The following definitions provide brief explanations of the ESAT-Region 6 qualifiers assigned to results in the Data Summary Table.

U Not detected at reported quantitation limit.

N Identification is tentative.

J Estimated value.

L Reported concentration is below the CRQL.

M Reported concentration should be used as a raised quantitation limit because of interferences and/or laboratory contamination.

R Unusable.

^ High biased. Actual concentration may be lower than the concentration reported.

v Low biased. Actual concentration may be higher than the concentration reported.

F+ A false positive exists.

F- A false negative exists.

B This result may be high biased because of laboratory/field contamination. The reported concentration is above 5X or 10X the concentration reported in the method/field blank.

UJ Estimated quantitation limit.

T Identification is questionable because of absence of other commonly coexisting pesticides.

***** Result not recommended for use because of associated QA/QC performance inferior to that from other analysis.

W The result should be used with caution. The result was reported on a dry weight basis although the sample did not conform to the EPA Office of Water definition of a soil sample because of its high water content (>70% moisture).

Summary of Questions/Issues:

1. 11/13/03 BFB injection at 0927 on instrument E-5973: The background scan responses (page 366) were not subtracted from the average responses for m/e 96 or m/e 177 (page 362). Raw abundances should be 340 and 287, respectively, not 390 and 349, respectively. Percent relative abundances for 96/95 and 177/176 should be 7.1 and 7.3, respectively, not 8.1 and 8.9, respectively (page 18). Please verify the raw and percent relative abundances in question and submit the necessary corrections.

2. Sample F0Q16: The spectra for the TIC's eluting at 1.62, 1.84, and 7.72 minutes (pages 53, 54, and 56) were crossed out and labeled as carbon dioxide and a DMC artifact. However, these compounds were also erroneously reported on Form 1LCF (page 46). Please correct and resubmit page 46.

NOTE: Any laboratory resubmission should be submitted either as an addendum to the original CSF with a revised Form DC-2 or submitted as a new CSF with a new Form DC-2 (OLC03.2, B-36, 2.6.3). Custody seals are required for all such shipments.

FAX COMMUNICATION LOG
