Message: Subject: Credit for Boat Removal On The Beach @ Pennsylvania Ave

Janet,

In regards to our telephone conversation on Thursday, the following is the cost breakout that you requested for the work to take the boats off the shore at Pennsylvania. I have figured that it would take an operator, an excavator, and a laborer for a full day to drag the boats up to the top of the hill and crush them and load them out. Also I had figured that we should be able to get all the boats in one load of garbage to go to the land fill. The total cost for loading and disposing of these items would be $2,425.00. This amount, of $2,425.00, would be the amount that BRC Inc would credit to the contract if we did not have to perform the above mentioned work.

If you have any questions please give me a call at my office or on my cell @ (206) 396-0553.

Thank You

Paul Roning
Project Estimator/Manager
