Subject: RE: Sesko/Tank Removal

No big hurry.
I spoke with the Sesko guardian and got the scoop. They are planning on bringing in a crane and barge and lifting the tanks off the beach and placing them on the barge. They will then be taken for disposal/recycling to Schnitzer Steel on Tacoma. Not sure if the tanks will be cut up on the barge or at Schnitzer. Also did not ascertain the timeline for this works.

I was mainly inquiring to see if you knew how they were going to do the work. As we discussed a while back when a different approach was being considered, I wanted to make sure that they were not going to complicate the Superfund investigation on the beach by doing something (like cutting up the tanks) that could contribute additional contamination to the beach. Looks like we won't have to worry about that if this all goes as planned.

I'm happy to relay anything else I learn about this work. Does this type of work require coordination with and/or a permit from DNR?

Ryan-Many folks here at DNR are either on fire or vacation so may be a bit before we can confirm if any activity on this. When do you need to know by?

Hi Shayne and Erika-
Was wondering if you had any info related to the removal of the ballast tanks from the beach at the Bremerton Gas Works Superfund site (see below). If so, is it anything you can share?
Let me know.
Thanks.

Bill Ryan

Mr. Ryan

In late July, PGS signed a contract for the removal of the tanks with Global Diving & Salvage.

Below is the recent update PGS received from Global.

Vicki Carrillo, Case Manager

> Jeanie,
> Appreciate your patience. Hopefully it is an expedited process with the Dept. of Fish and Wildlife regarding the permit (it can require up to 90 days). The permit application will also be reviewed by the USACE.
>
> Thanks and have a good weekend. I will keep you abreast of the schedule as it materializes into operations.
