1																
2		**This data collection exercise is intended to capture comprehensive greenhouse gas emission data consistent with existing and evolving GHG protocols. Some of the emission factors are slightly different from previous years. The purchased electricity factor may be quite different. This data collection is separate and supplemental to the Energy and Greenhouse Gas Metrics effort, and is designed to estimate the company's greenhouse gas "footprint" and the results will be reported externally.**														
3																
4		**The data required is covered in three worksheets / tabs: Electricity and Natural Gas, Fuels, and Direct Emissions:**														
5		**Electricity and Natural Gas:**														
6		The Electricity and Natural Gas values are already included for sites tracked in Avista for 2007. Please review and confirm. If there are discrepancies, please call or email me. Other sites will need to enter this data directly from site billing records.														
7		Natural Gas values are to be reported in **MMBTU**. One MMBTU = 10 Therms, Therms x 0.1 = MMBTU. Electricity is reported in **kWHrs** only.														
8		**Fuels:**														
9		The fuel values need to be entered in gallons (except coal, which, as far as we know, no one still uses). On-road diesel is taxed. Off-road is not taxed. Residual oil includes #5 or #6 oil. If you use some other heavy distillate, (e.g. PS-300) please add a note telling me what it is, and how much was used. If you have biodiesel, please note how much and what the concentration is (B5, B20, B100, etc.)														
10		Jet fuel totals are for the quantity used by Boeing - not including the quantity supplied to customers. For Puget Sound and Long Beach, this would be the total used in pre-delivery flights. For our modification / repair sites, this would be the quantity used in testing by Boeing before returning the aircraft to the customer. If you have a flight test organization operating at your site, contact them for the data. Company aircraft need to be identified and their fuel reported separately from the product aircraft.														
11		Motor gasoline includes all gasoline, all grades dispensed at the site. If you have records for gasoline purchased off-site for company vehicles, please inlcude and let me know how these records are obtained.														
12		Aviation gasoline is not the same as Motor gasoline. If you use Av. Gas (primarily in helicopters) please keep the totals separated.														
13		Propane is entered in **gallons** - not cubic ft or lbs.														
14		Any other fuels (e.g. LPG, CNG) should be included separately in the yellow note box.														
15		**Direct Emissions:**														
16		Direct emissions are the losses from laboratory operations, refrigeration and air conditioning equipment, chemical recharge or other uses of greenhouse gas chemicals. The list of reportable chemicals is included. Please note that some compounds, particularly refrigerants and fire extinguishing chemicals are mixtures containing one or more of the HFC or PFC materials. Please report the fraction of the listed chemical in these mixtures in pounds.														
17		Dry ice use, if quantities are available, should be included with a note on how much CO2 is used in this form, in order to be able to separate fire extinguishing CO2 and lab uses from the dry ice used for chilling or paint removal.														

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P
18		Any other information you believe is important in compiling a comprehensive inventory should be noted in the yellow comment boxes.														
19		**Summary:**														
20		A fourth tab is included with a compilation of various totals that may be reportable in various venues. Absent a universally defined format for reporting greenhouse gas emissions, some of the more common summary forms are included here for your information.														
21		**Factors:**														
22		The Climate Registry draft Reporting Protocol due to be finalized this spring. If you have any questions about these, please feel free to contact me.
