---

Tony,

Please find attached EPA's letter highlighting our need to further protect drinking water source areas from regional groundwater contamination within the Puente Valley Operable Unit. EPA is requesting that based on these comments certain additional conditions be added to the Sect 28 San Gabriel B24C Permit (attached Staff Report) approved in November 2013.

We appreciate your efforts to work collaboratively to ensure protection of critical drinking water resources within the PVOU.

Please call me if you have any questions.

Sincerely,

Ray
