I believe you have the well index for the wells in this aquifer, so may see the few chloride readings that we have. The old Pioneer Mill wells do not have more information. I've enclosed an as-built drawing from 5741-01, showing initial chlorides, but hopefully more helpful some of the original salinity profiles from our deep monitor well 5739-03.

Charley,

Thank you for reviewing the information that you may have on this.

Hope to check in with you next week, Nancy
