I024154-024

County:	Yolo	**Incident Date:**	**through**	**Year:**	2011
State:	CA	**Total Number:**	1	**Case #:**	S08-255
Country:	USA	**Total Magnitude:**		**Weather:**	

Incident Type

- ☐ Aqua. Animal
- ☑ Terr. Animal
- ☐ Field Study
- ☐ Aqua. Plant
- ☐ Terr. Plant

Created: ########

Updated: ########

Abstract:

Brodifacoum (0.030 ppm) was detected in the liver of a red fox from Yolo, CA during 2011. The liver sample was collected from the red fox as part of a long term genetics and population study. The cause of death for the red fox was not reported (D1104583-01 S08-225).

With the present submission it would be important to have postmortem evidence of a coagulopathy for a diagnosis of anticoagulant rodenticide intoxication. In the absence of a coagulopathy, the detected concentration is consistent with exposure (not intoxication).
