Subject:	RE: EPA Comments on the SBT QAPP for Air Quality Monitoring
Date:	Wednesday, October 07, 2015 12:41:43 PM

Kelly:

Thanks for the telephone conversation yesterday regarding SBT air quality monitoring during grading phase remedial action construction at the FMC OU of the EMF site. Based upon our conversation, I understand that the Shoshone-Bannock Tribes elected to not finalize the QAPP in light of the short time frame available to conduct the field work. I spoke with EPA's Mike McGown about our conversation earlier today. Thanks.

Subject: EPA Comments on the SBT QAPP for Air Quality Monitoring

Kelly and Penny:

Attached are EPA comments on the Shoshone-Bannock Tribes' QAPP submitted August 26, 2015. As noted in the comments, EPA has provided the attached revised QAPP (both redline/strikeout and clean versions) in an effort to facilitate approval. Please note, however, that in addition to accepting these suggested edits, information to be included in the QAPP appendices must also be submitted.

The window of opportunity to acquire samples under the QAPP will be closing soon. Grading phase remedial action construction work is scheduled to be complete this month. Also, the cooperative agreement between EPA and the Shoshone-Bannock Tribes which would fund QAPP implementation has a period of performance which ends September 30, 2015.

Feel free to call me or EPA's Mike McGown with any questions you might have. Thanks.
