Upper Columbia River Residential Soils Study: Soil Data, Lead and Arsenic Samples

(b) (6)

Incremental composite soil samples: Soil taken from 30 locations in each decision unit (DU) were mixed together to make a single sample.

(b) (6)

(b) (6)

(b) (6)

DU 87
100 ppm of lead
4 ppm of arsenic
No action required

(b) (6)

(b) (6)

(b) (6)

DU 94M
75 ppm of lead
5 ppm of arsenic
No action required

(b) (6)

(b) (6)

DU 86
115 ppm of lead
5 ppm of arsenic
No action required

Incremental Composite Sample Concentrations

Less than 250 ppm of lead and less than 20 ppm of arsenic. No action required.

Greater than 250 ppm of lead and/or greater than 20 ppm of arsenic. Recommend using the Soil Safety Guidelines described in the brochure included with this map.
