---

Ron, as requested, AEP is providing the information specified in your letter of February 6, 2014. Attached, you will find a cover letter, the completed analytical data and data request spreadsheets, two MSDS forms, coal specifications, and FGD wastewater treatment flow diagrams. The associated lab reports are being sent to you by over-night delivery, along with copies of the above.

Please note that in accordance with the requirements of 40 CFR §2.203, AEP is asserting a claim of business confidentiality with respect to certain of the requested information. AEP has indicated on the face of individual documents, through the use of a legend or stamp including the word "Confidential" that the document contains confidential business information entitled to protection under 40 CFR Part 2. The information generally contains operational detail, vendor information or other information that, if disclosed publicly, would harm the competitive position of the AEP companies in the electricity markets. We ask that EPA treat the marked information in accordance with the requirements of 40 CFR Part 2. AEP considers the coal specification and sulfur data, all organosulfide and treatment chemical vendors, and the flow diagrams, with all chemical injection locations and treatment dosages, to be confidential business information (CBI) and has marked these documents accordingly.

If you have any questions regarding the data submittal, please contact me at 614-716-1255 or at twlohner@aep.com.

Subject: Follow up to comments on proposed Steam Electric effluent guidelines

This is an EXTERNAL email. STOP. THINK before you CLICK links or OPEN attachments.

Good morning Tim,

I hope all is well with you. It's been quite some time since we last spoke.

As you are aware, on June 7, 2013, EPA published proposed revisions to the effluent limitations guidelines and standards (ELGs) for the steam electric power generating point source category. The comment period for the proposed rule closed on September 20. Based on our review of comments submitted by your company and other comments relating to the proposed ELGs, we have concluded that additional information is either needed or would be useful in evaluating comments with respect to FGD wastewater characterization and treatment performance. Please see the attached letter for a description of the information that EPA is asking you to provide.

We appreciate the information you've provided to date, as well as the cooperation your company provided as EPA collected information for the proposed rule. Should you have any questions regarding this request for additional information related to the comments we received, please contact me at jordan.ronald@epa.gov or by phone at (202) 566-1003.

Regards,
Ron
