Dear STEPHEN B MIDDLETHON:

Thank you for submitting your paper Notice of Intent (NOI) form for coverage under EPA's 2008 Multi-Sector General Permit (MSGP). The 2008 MSGP expired at midnight on September 29, 2013, and a new permit to replace it has not yet been issued. Until the new MSGP is issued, any new facilities may not file an NOI for coverage under the MSGP. Therefore, the NOI Processing Center cannot process your NOI form.

EPA has issued a memorandum concerning new facilities that begin discharging stormwater associated with industrial activity after September 29, 2013. This memorandum provides a "no action assurance" for new facilities that comply with the requirements of the 2008 MSGP, subject to particular terms and conditions as set forth in a memorandum found at www.epa.gov/npdes/stormwater/msgp.

Once the MSGP has been reissued, all facilities desiring MSGP coverage will then need to file an NOI. Please visit the EPA MSGP website at www.epa.gov/npdes/stormwater/msgp for updated information about the reissuance of the MSGP.

Should you have any questions in regards to your compliance with the MSGP, please contact the EPA Regional Office that corresponds to the location of your site.
