Legend

Monitoring well sample location

- Result above MCL of 5.0 pCi/L
- Result below MCL of 5.0 pCi/L
- Approximate site boundary
- Buffer zone
- Non-radiological cell
- Radiological area
- MCL Maximum contaminant level
- 7.7 Result in picoCuries per liter (pCi/L)
- D13 Well identification number

Note: Monitoring well results represent combined total Radium 226+228 concentrations. Only results for monitoring wells that exceed 5.0 pCi/L are shown.
