Thanks Stuart. I've actually heard some rumblings - second-hand - that Mayor Arakawa might be amenable to full uv disinfection at Lahaina. among other things. We'll see.

David

Aloha David,

In my conference call with Nancy last week, she implied that you were waiting for feedback on this e-mail. I have no objection, though I can imagine how excited the County of Maui will be☺. I hope that you do not mind, but I also spoke with Chauncey and he also had no objection.

Stuart

Subject: Confidential - Lahaina

Aloha Stuart,

I wanted to give you a heads-up about an action we are about to take regarding the Lahaina WWRF. Attached is a DRAFT Consent Agreement and Proposed Administrative Order to address violations of their permit and EPA's UIC regulations related to injection of effluent that is not fully disinfected. In brief, the Order requires several steps leading toward full, non-chlorine disinfection by June 2013.

I will be forwarding this draft to the County early next week for their review/consideration. While we prefer to move forward on this action with the cooperation/consent of the County, we are prepared to proceed relatively quickly with a unilateral order if needed. Since the County has not yet seen this proposed enforcement order, I ask that you keep it confidential to DOH at this time.

On other Lahaina matters, I want to thank you Stuart for your assistance in getting the 401 cert letter to Maui revised and sent off by Joanna, as well as for the continued cooperation from both SDWB and CWB on the tracer study and the proposed coastal seep sampling. We spoke at the December EOY of our two agencies working together to try to advance the resolution of issues at Lahaina, and I'm very appreciative that such cooperation is occurring.

Feel free to give me or Nancy a call if you have any questions about these matters.

Thanks,
David
