Subject: FW: PDP Sampling Meeting

FYI.

This will be held here in this building if you want to attend. The meeting should be open to HED'ers, but it might be good to let David H. know if you want to attend so we can get an idea of how many
~~~

will be coming.

I am not sure I see an agenda as an attachment, but I presume that this will be coming.

For folks that want to get a bet idea of PDP sample collection procedures and sampling design, this will be an interesting meeting to attend. As stated below, it stems at least partially from a GAO Food Safety audit of USDA/FSIS, USDA/PDP, FDA, and EPA/OPP completed last year.

David.

Subject: PDP Sampling Meeting

Greetings,

USDA's Monitoring Programs Division (MPD) and EPA's Health Effects Division (HED) will be hosting a meeting November 17-18 at EPA HED in Crystal City, VA. The objective of the meeting will be to discuss the Pesticide Data Program (PDP) sampling frame in light of Government Accountability Office (GAO) audit comments/recommendations and to seek potential improvements to the sampling system. The meeting will begin at 8:00 both days and we expect to conclude no later than 2:00 on the 18th. ***Please forward this information to any members of your organization that will be attending.***

Topics to be covered include: sampling theory, current and future PDP sampling, PDP site selection as performed by USDA's National Agricultural Statistical Service (NASS), and the GAO audit comments/recommendations. We are in the process of finalizing the agenda and presentation materials. If you have anything to be added, please let me know. I have included some background material on the EPA building in Crystal City for visitors along with some links to recent sampling theory documents. Also 4 articles are attached as well.

1. 2002/63/EC, which is actually based on the Codex CAC/GL 33-1999, Sampling for Official Control of Pesticide Residues
2. CAC/GL 50-2004, General Guidelines on Sampling
3. Eurachem/Citac Guide to Measurement Uncertainty (MU) arising from Sampling
4. Call for TOS and Measurement Uncertainty Integration

We look forward to the upcoming discussion.
